As for the financial aspect, I do not think that there is ground for fear. At the close of the Napoleonic wars Britain had a debt of eight hundred million. That is taking in the British Empire alone. Our present debt is estimated at somewhere about six thousand million, add in the debt of all other parts of the Empire and the total debt will yet be less than eight thousand million. Ten times as much as that of the Napoleonic wars, but is anyone foolish enough to believe that our resources are not ten times greater than then? Why, take Canada, her resources are a thousand times and more greater than they were in the Napoleonic era. Australia had only been discovered by Captain Cook a few years before. Africa had practically no resources, and the resources of India were a mere bagatelle. Why our resources were scarcely touched in those days. To-day they are certainly many times more than ten times as great, and if a time of undreamed of prosperity followed on those uncertain days, why should we fear any disastrous financial conditions now? As I said I am an optimist and I can see only good times ahead."

# The Prospective Iron and Steel Price Level

DISCUSSING the outlook in regard to steel and iron the American "Metal Market and Daily Stock Reporter" says:

"Odds are not likely to be offered yet as to which philosophy has won in the iron and steel market, the philosophy of holding to March 21st prices and hoping for a general deflation in commodity prices generally, or the philosophy of getting all that can be obtained.

"The first philosophy has been that of the United States Steel Corporation, several of the large independent steel interests, a very few of the merchant furnace interests, and the Lake Superior ore producers. The second philosophy has been that of most of the interests not mentioned. The philosophy has been held by more than have openly avowed it.

**Supply and Demand**

"Arguments based on regard for the best interests of the country and the stability of business have been on the side of the first named philosophy. The law of supply and demand has been on the side of the second, also the mental attitude of the great majority of the people, which is to pay whatever price is asked, look cheerful while paying it and then complain loudly about the high cost of living, and which involves also in most cases a notion that the more one pays for his raw materials the more he can charge somebody else for what he sells.

**No Good Basis**

"There is no good basis for offering odds in betting which philosophy will prevail, for the reason that actual market developments up to date have been of very mixed character. It is true on the one hand that pig iron has sold at rapidly advancing prices, but on the other hand it is clear from the testimony of furnacemen themselves that they have not sold far ahead. They explain that they refused to sell far ahead, but an analysis looking to the future depends not on what may have been in the minds of sellers, but on what is on their order books.

**Unfinished Steel**

"As to unfinished steel, there has been a large volume of business put on books at March 21st prices. The sales of billets and sheet bars at premiums, while widely heralded, have been of only very small lots, and for prompt deliveries, the tonnage being quite insignificant. In the case of finished steel products, such appearances of the market being above the March 21st prices have been chiefly by way of refusals of mills to sell at those prices rather than of buyers actually contracting at higher prices. It is true that premium prices have been paid, but if one wishes to argue that such transactions prove the market is advanced he should be willing to specify the level to which he holds it has advanced.

**Automobile Sheets**

"For instance, nearly a fortnight ago it was reported that $40 a ton over the March 21st price had been bid for automobile sheets. Precisely what level for the sheet market does that incident establish? Now when it comes to tonnages, the United States Steel Corporation and several of the independents have been selling, for 1920, such tonnages as they were justified in believing they could produce, at precisely the March 21st prices. If the general market is established by the bulk of the tonnage sold, the market is the March 21st schedule. The sellers at these prices, however, might conceivably become sold out for so long a time that the market would get entirely away from them. This may occur, but that is something for the future. It has not occurred yet.

**Pig Iron Situation**

"In connection with the question whether or not iron and steel prices should advance comment is fitting upon the influence likely to be exerted by the advances that have occurred in pig iron. Reference to the "endless chain" and the "vicious circle" have been very common, always in condemnatory spirit. The observation may be applied to pig iron. When furnacemen first began to advance their prices sharply they spoke of what they professed to see as a prospect, higher prices for coke, and they wanted to square themselves. The coke operators heard this and marked up their views."

**POSITION WANTED**

EXPERIENCED RETAIL HARDWARE AND paint man desires change for next year. Married. Box 615, Hardware and Metal.

# Second to None In Quality and Economy

# DOUGALL Blanchite

## Wall Coating

Increasing activity in the building and contracting field is creating a still better demand for this popular wall coating.

The beautiful effect that Blanchite produces and the fact that one coat is usually sufficient, makes it the first choice from the double point of view of good looks and good economy.

*Gloss White and Flat White*

Dealers stocking Blanchite will find it the connecting link between their business and the building and contracting trades who require large quantities of a real sanitary wall covering. And Blanchite profits are worth securing.

"Save the surface and you save all" *Paint & Varnish*

# The Dougall Varnish Co., Ltd.

**MONTREAL**

*Associated with the Murphy Varnish Co., U.S.A.*

# CURRENT MARKET QUOTATIONS

*These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.*

# THE WHY PHILOSOPHY OF

## W. G. HARRIS

**President The Canada Metal Company, Limited**

**Did you ever get up against the question WHY?**

**In building up a huge business like ours, time and time again WHY is the great question we get rubbed in.**

**For instance, for years we have been manufacturing BABBITT METALS—SHEET LEAD—LEAD PIPE and SOLDER and guarantee everything we manufacture to be of the highest quality and to give excellent service.**

**WHY can we give this guarantee?**

**The reply is, we have been manufacturing for over 30 years and our factory is the best equipped in the Dominion. We use nothing but the purest of raw materials.**

**The WHY is because of QUALITY and SERVICE.**

**Let us have your enquiries.**

# What is the Life of a Paint Brush?

Generally it depends on the usage it gets and the preparations in which it is used.

TRADE SIMMS SET IN RUBBER MARK

## Paint Brushes

can be used in any paint, oil or varnish preparation, kalsomine, glue, paint removers, etc., and yet live longer than the ordinary brush that is used in only one kind of paint.

The SIMMS brush lives until its bristles are worn down to the handle, and it gives excellent service all the time, under all conditions.

The painter's trade will come your way if you handle SIMMS Set-In-Rubber Paint Brushes.

Our other lines are also winners.

MONTREAL LONDON TORONTO

# Beatty Bros. Limited Bulletin

**One of our London Factories: It is the York Street plant where we do the iron work on BT Washers, Churns and Pumps.**

**MR. N. J. DICK**
He is one of our foremost washer salesmen. He has been with us over ten years.

## WOODEN TUBS ARE BEST FOR WASHERS

Why do we use wood instead of metal in our washers? We have three large iron working plants and it would be easy for us to make metal tubs. Why do we use wood?

BT TIME SAVER

## TIME SAVER ELECTRIC WASHERS HAVE WOODEN TUBS

We make our tubs of wood because wood will not conduct heat. It keeps the water hot. It keeps the water so hot that long after the washing is done the water is still too hot for the hand. Leave the Time Saver Washer full of hot water over night and the water will still be hot in the morning.

# One Fact Sells Silkstone—

# Economy!

## Tell Customers the Facts

Silkstone Flat Wall Colours are cheaper than wall paper, more sanitary and lasting; Silkstone can be washed often and never rubs off; it gives a beautiful, soft, silky finish that will outwear any other wall covering. The economy of this splendid finish, that costs so little to apply and serves so satisfactorily, is an appeal to every customer.

While economy is a forceful appeal to housewives and furnishes a motive for an enormous purchase of Silkstone, it is a profitable article for the dealer. We suggest that you write us and so give opportunity for us to prove two things—that Silkstone sells, and that it is profitable to you. Better yet—write us about the benefit to you in an agency.

*For years the perfect washer*

# The Eden ELECTRIC

THOUSANDS of women throughout the country have learned to appreciate the many advantages and economies of washing clothes the Eden way. The **Eden Electric Clothes Washer** is a time-proved success because it washes everything from the heaviest blanket to the most delicate bit of silk or lace by dipping them up or down through hot suds—without wear or tear or rubbing or scrubbing.

The **Eden** makes clothes last five or six times as long because it washes them without rubbing. It saves time, trouble, money and hard work, and has done so in many homes for many years.

Many dealers have taken advantage of the many superior points of the **Eden,** and are handling it to the exclusion of all other makes. They have found it the most profitable machine to handle because it is the one machine that, once sold, stays sold. The **Eden** has no comebacks.

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

*The Trade Mark Behind Canada's*
*Largest Wholesale Hardware House*

## Buckeye Incubator and Fittings

Proof that their success and great sales are founded on merit is shown by their continued use at Canadian institutions like MacDonald College, Ontario Agricultural College and by many Canadian poultry farms.

Like all the lines handled by Ashdown's, they're good sellers. For half a century Ashdown's has had the confidence of manufacturers of the best lines.

Let us put a Buckeye in your store to demonstrate and boost your trade.

On all incubators and brooders shipped this Fall we will give a dating of net 30 days, February 1st, 1920.

**Sold under a broad guarantee.**

# Quick Results

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word for first insertion, and one cent per word for subsequent insertions, with 5c additional for Box Number or Address.

## An Announcement

*By the*

## MAYTAG CO., LIMITED

*To the Retail Hardware and Implement Dealers of*

## ALBERTA AND BRITISH COLUMBIA

By the first of the New Year we will have in operation at Calgary, a Branch House, where we will carry a full line of The Maytag Washing Machines, and Repairs for them. Also a full and complete stock of Thresher Supplies, as well as the RUTH Self Feeder and Repairs and Extras.

Orders for anything in our line, after the first of January, 1920, should be sent direct to **THE MAYTAG COMPANY, LTD.**, 806 Ninth Ave. West, Calgary.

In this connection we wish to say that our business relations with the Merchants' Hardware Specialties, of Calgary, who have had the sale of our Washing Machines, and the W. S. Cooper Co., who have handled the Ruth Feeder and Extras, have always been more than satisfactory.

We feel that by putting a manager there who will be able to give his whole time and attention to the business, that the business will not only be increased, but that our old, as well as the new customers, will have better service on account of the manager who will be in charge, being more familiar with the line than anyone else could be who has not had the expert training and experience he has had.

Mr. C. W. Gilson will be the manager for Alberta and British Columbia and will be pleased to meet his old friends and customers whom he has done business with for years in the West, as well as many new ones.

# The Paint Man's Best Friends

## BOWSER Paint Oil Storage Outfits

They prevent evaporation and gumming; leakage and spillage. Keep the oils pure and clean; keep the oil room clean and free from fire hazard.

Measure oils accurately, quickly, without loss and in a clean satisfactory manner.

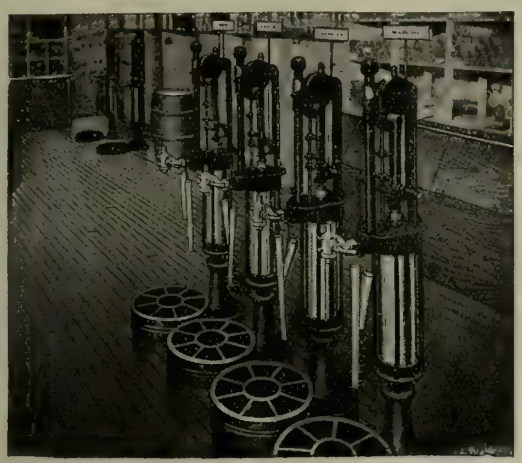

Fig. 115 Pumps on Sales Floor. Tanks anywhere in basement.

Fig. 109 First Floor Outfits.

May be installed where most convenient: require but little floor space.

**BOWSER Storage Is:** Systematic—Clean—Saving Sanitary—Practical—Safe

It makes the handling of paint oil a pleasure and profit instead of a burden and loss.

**S. F. BOWSER COMPANY, Limited**

66-68 Frazer Avenue,

---

# EUREKA
**Tough and strong as Gauge Glass can be made**

There is only one best and that is the "Eureka" manufactured by Joseph Tomey & Sons, Birmingham, used with utmost satisfaction by railways and larger plants throughout Canada and United States. We are Canadian representatives and carry a stock in Winnipeg for sorting orders and shorts. Let us quote you either F.O.B. Winnipeg or Liverpool.

The great shortage of Gauge Glasses makes it to your advantage to place import orders as early as possible.

Barrett Everlastic Roofings

*Everlastic "Rubber" Roofing on a group of modern farm buildings, including silo at right.*

# Everlastic
## "Rubber" Roofing

A good seller because it is so well and favorably known, and is so satisfactory to consumers.

The name "Everlastic" aims to suggest to the buyer in a word the wonderful flexibility, elasticity and the sturdy and stubborn wear that are the chief characteristics of this excellent product.

### Everlastic Roofing Cement

Vast quantities of Everlastic Roofing Cement are being used each year to re-surface old and worn out Prepared and "Rubber" Roofings. Its use gives renewed life to roofs of this type which have been in service for some years and are beginning to lose their water-proofing qualities.

# A Complete Line of Paints

## Backed By New Sales-Getting Plans

With the Canada Paint line on your shelves you are never at a loss to fill an order. Whatever your customer may require in the way of paint, varnish, stain, enamel, white lead, putty, etc., you can give him just the right product if you stock

# The Canada Paint Line

Canada Paint quality is made known to your customers through aggressive and resultful advertising. Let us outline the new forceful sales plans which have been arranged with a view to increasing the profits in your paint department.

If genuine results seem lacking in that department at present, write to-day for free copy of our booklet—"Paint and Varnish as a profitable investment for a merchant" which tells you all about the C.P. Agency Proposition.

# Reliability Is The True Test Of Linseed Oil

When a man grows up with a business he becomes an expert in his line. We have men in our employ who have grown up with the LIVINGSTON BUSINESS, men who have studied our interests for the past 50 years. They are part of the organization.

This is one of the secrets which is responsible for the high and uniform quality standard of

## Livingston Brand

The entire organization is at your service when you specify our brand.

Protect your 1920 business by using the oil which you know to be right.

**The outward marks of this "Quality" oil are the**

# CARTER'S

**The Best Of Its Kind—**
**Carter's Genuine Dry Red Lead**

has proven its superiority to the satisfaction of paint users everywhere. A "Made-in-Canada" product, manufactured from the highest grade Canadian pig lead, highly oxidized and ground very fine. Nothing better for safeguarding iron and metal work, steam pipes, etc. A Carter product that will secure for you the red lead business of your community.

**Ask for prices and particulars on this and our other perfect products—Carter's Genuine Dry White Lead, Carter's Genuine Orange Lead and Carter's Litharge.**

**The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal**

Did you ever stop to consider the cost of

**Wood Cold Air Faces**

in comparison with iron ones? Oak faces are stronger, neater, cheaper and make a better finish with any kind of floor and are also cleaner and more sanitary.

Made with oblong mesh. Legs of chairs or other small articles will not drop through. Write for price list and order some samples.

**A. H. Power Furnace Co., 1-3 Hayden St., Toronto**

# Salesmen Wanted

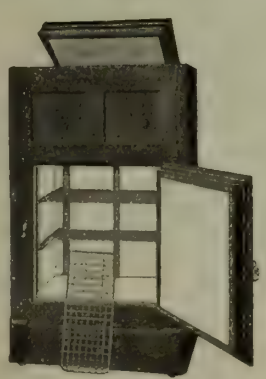
Men who have worked up a connection with the trade are far more valuable to you than inexperienced men. The way to locate them is through your trade paper, because wide-awake salesmen read it. When in need of salesmen use the Want Ad Page; the rates are 2 cents per word first insertion and one cent per word for each subsequent insertion, a charge of 5 cents extra is made for Box Number to cover cost of forwarding replies.

PLUMBS **SAND'S** LEVELS

Deserve your confidence because they are known and wanted throughout the building trades and represent the easiest selling level stock on the market.

**Your Jobber Carries Them**

*Canadian Branch:*



**CAMPBELL AGENCIES, McKinnon Building**
**TORONTO, ONT.**

# Works While You Are Busy

This "King Cutter" card display stand on your counter brings in the sales while you are busy with other customers. They come; they see; they buy—you have only to ring up the sales. You ring them up pretty often. "King Cutter" Razor Paste puts all the razors in town in tip-top shape. Ask your jobber.

**The Season's Rush Proves the Necessity of Gipe-Hazard Service in Your Store**

Time and labor saved is money earned.
Absence of salesmen from their posts when customers are waiting diverts many of the latter to other stores where service is better.
With Gipe-Hazard service you will have the satisfaction of knowing that you have the best, and it will enable your staff to remain at their posts instead of running for change. Watch your out-of-date system during the busy season, and you will be convinced.

GIPE-HAZARD STORE SERVICE CO., LTD.,
113 Sumach Street
**Toronto, Ontario, Canada**

## "Maple Leaf" Belting

IN THE MACHINE SHOP. "Maple Leaf" belting is invaluable in the machine shop where belting is put to severe tests. Its strong construction of stitched cotton duck makes it a superior belting.

There is a good margin of profit in handling it. "Maple Leaf" Brand Belt Dressing gives longer life and more satisfactory service to all makes of beltings. Write To-day.

HEAD OFFICE & WORKS
1280 ST PATRICK ST
MONTREAL

BRANCHES: Vancouver, Calgary, Winnipeg, Toronto.

# GASOLINE TANKS
WELDED, TESTED, HIGH-CLASS TANKS
For Underground Storage of Gasoline

A high quality tank, steel welded throughout, making it practically a one-piece tank. Painted on the outside with anti-rust, acid-proof black paint. They are practically rust and corrosion proof. They are made by expert workmen. Our tanks are built to conform to the requirements of the National Board of Fire Underwriters. They are all tested before leaving our works under air pressure by a competent superintendent and then crated and shipped so they will reach you in good condition. We believe our prices will appeal to you as being very reasonable. If not as represented when it reaches your station, fire it back at our expense. Can we do fairer? Any size made to your order.

# CANADA HAS MANY PROBLEMS TO FACE DURING COMING YEAR

## BANK OF MONTREAL ANNUAL MEETING

**Sir Vincent Meredith, the President, Favored System of Taxation That Would Affect All Classes of Community Who Have Ability to Pay—Sir Frederick Williams-Taylor, General Manager, Points Out That There Had Been No Profiteering by Banks During War Period, As Loanable Funds Had Remained Unchanged—Bank Had Never Been In a Healthier State.**

MONTREAL, Dec.—(Special)—At the annual meeting of the Bank of Montreal, at the head office of the Bank, Sir Vincent Meredith, the President, in his annual address, took occasion to refer particularly to the many problems with which Canada was at present confronted and to the best manner in which these could be solved. It is generally recognized that these problems at the moment are of almost an unprecedented character, and, therefore, they are of the greatest importance to the mercantile interests of the country.

Sir Vincent attributed the high cost of living very largely to the pressing demands of European countries for commodities of every nature. He considered that in Canada it might be possible to look forward confidently to a reduction in all commodities, both at home and abroad, after another harvest.

He dealt particularly with the change in opinion that had developed as regards the relation of gold reserve to note circulation. He expressed the view that it might be a part of wisdom to depart from the old notions of the rigidity of the gold reserve and recognize that we are justified in enlarging our note issuing powers to respond to all legitimate business demands in periods of great trade activity or emergency, provided such expansion is based on self-liquidating securities.

The President also pointed out that it was vitally important that the unoccupied areas of Canada should be settled and made productive with as much rapidity as possible, the future prosperity of the country and ability to meet our debts being largely dependent on increased production.

The question of taxation in Canada also received particular attention and Sir Vincent expressed the view that trade was being hampered by a somewhat penalizing excess business profit tax. Furthermore, enterprise and expansion are stifled and foreign establishments deterred from entering the Canadian industrial field. He expressed the view that Canada should do away with many exemptions and impose taxation on all classes of the community who have the ability to pay and at the same time place a higher tariff upon imported luxuries, which would cause little hardship and at the same time considerably ease a strained financial situation.

### Difficulties to be Overcome

Sir Frederick Williams-Taylor, the General Manager, dealt more particularly with the record of the Bank during the past year, but also touched on many of the developments outside of the country which had a bearing on the situation. Sir Frederick stated that it was no reassuring reflection that the United States has already reduced her war debt by some $800,000,000, while Canada was confronted with an increase of $600,000,000 for the current year.

Sir Frederick took occasion to point out that it was a matter of sufficient importance to bear repeating that there had been no profiteering whatever by the banks of Canada, for the price of money had not been raised. Alone of all commodities, the cost to the borrower of loanable funds of the banking institutions of the country had remained unchanged. Not only was this the case, but speaking for the Bank itself, it was only proper that the shareholders should know that in handling banking business entrusted by the several Governments during the war and since, the policy had been to charge only the narrowest of commissions and minimum interest rates. In many instances, where the services were of a war character, the Bank had acted free of charge.

A satisfactory sign of the times in Canada was the increase in buying power for first-class securities. This is a healthy and desirable condition, induced by Government war loans and war savings certificates. It is vital that Canadians should recognize the virtue of saving, as between production and thrift, though they go hand in hand, the latter is fundamental and leads naturally to the former.

### General Trade Activity

Sir Vincent Meredith, in his address to shareholders, said, in part:

"General trade in practically all branches had been active and profitable during the war and the Bank has participated in the general prosperity. The balance sheet shows profits in moderate proportion to the resources employed, and yet, I trust, not unsatisfactory to the shareholders. That reaction from the feverish activities and high prices produced by the vast conflict, which so many apprehended, has not occurred, nor can it be said to be impending. The feeling as to the future is less optimistic than it has been, but the great pressure on our agricultural and manufactured resources, caused by home and foreign demand, shows no signs of abatement.

### Three Indispensable Factors

"There are three indispensable factors to the upbuilding of Canada—immigration, production and exports. Immigration during the last five years has been negligible, owing to the war. In the first seven months of the current fiscal year, new arrivals numbered 82,893, of whom 42,377 came from Great Britain and 35,949 from the United States. While these figures do not represent a large movement as compared with several pre-war periods, they show a gain of 51,734 immigrants, or about 166 per cent., over the corresponding months last year. After-the-war emigration of foreign-born has taken place in fairly large volume, the exact figures of which are not obtainable

"With regard to the subject of foreign trade, it is only a matter of time before increased production will overtake domestic demands, and unless preparations are made in advance for finding markets overseas for our exportable surplus of raw materials and manufactured goods, our uninterrupted prosperity may be checked. The needs of foreign countries are great and pressing, and profitable business awaits the Canadian exporter, but it cannot be acquired unless long term credits are provided.

"Our Government has been far-seeing in giving assistance in this direction, and, no doubt, is prepared to extend further aid, provided exporters, who reap the benefit, will assume a proportion of the risk.

"Self-interest alone would seem to dictate that credit facilities be extended to those countries who can demonstrate their ability to pay if given reasonable time, and we would thus avoid the possibility of abrupt changes in industrial conditions and bring about a gradual return of international trade equilibrium.

"I cannot close without voicing what, I am sure, is the feeling of every Canadian—that the recent visit to Canada of His Royal Highness the Prince of Wales not only gave abiding pleasure to every class of our population, but rendered a great and memorable service to the Empire in strengthening the Throne in the affection and confidence of the people, and by drawing still closer the ties which bind the commonwealth of nations over which he is destined to reign."

### Many Problems to be Solved

In presenting his report to the shareholders of the Bank, Sir Frederick Williams-Taylor, the General Manager, said:

"The economic and financial difficulties that confronted the country during the war have changed in nature, but have not disappeared by any means. There

is an aftermath of problems which Canada must face and in which bankers are vitally concerned. At present there is great trade activity; yet our national debt grows apace, with attendant ills. Therefore, even with a full measure of faith in our country, I find the near future difficult to visualize. We derive a measure of consolation in comparing our lot with that of countries worse off than our own, but contiguity and ambition direct our eyes towards the country to the South which has benefited so vastly by the war.

### Exchange Situation

"The premium on New York funds, the increase in our national debt and in our Canadian currency circulation, are matters of deep interest and should be studied by all.

"The purchasing power of the Canadian dollar in the United States has decreased, as reflected in the premium on New York funds. A year ago it cost two dollars to send one hundred dollars to the United States of America; to-day the cost is four dollars.

"Exchange is now a subject which as an English authority states, 'insists on bringing itself to the attention of all kinds of people who hitherto regarded it as a sort of mysterious cryptogram with which they had no practical connection.' In elementary terms, more money continues to flow out of Canada than comes in, thus creating a net balance against us after taking all transactions into account. New York being our natural clearing house for transactions with Great Britain and the rest of the world, it is clear that the present extraordinary cost of sending money to the United States would not exist but for the fact that we cannot spare the gold with which to pay the net balance in question against this country, while, in common with all countries, our legal tenders are naturally not current abroad. We should have precisely the same conditions between our own Provinces, were it not that our legal tenders and bank notes are current throughout the Dominion.

"It will interest you to know that on my recent trip to the Pacific Coast, when I travelled nine thousand miles in visiting various branches of the Bank, I met some 110 of our Managers, and returned more than ever satisfied with the personnel, the intelligent loyalty and devotion of our ever-increasing staff of officers.

"Such meetings are advantageous to the Bank and an inducement also to close relations between the Bank and its friends at distant points.

"It is impressive and satisfying to view the Dominion's greatest quick asset, the rich wheat areas of our three Western Provinces, at harvest time. While this year the yield was not up to the mark, the Western farmers had much to be thankful for.

"In British Columbia, one is struck by the confidence of the people in the future of their rich and beautiful Province, with its wonderful climate. It is a healthy sign that the men of affairs in the West hold such sane views concerning the outlook locally and for the Dominion at large.

"I hope that time may presently permit me to visit the other divisions as I did British Columbia and the Northwest.

"In concluding, I have no hesitation in expressing the belief that the affairs of the Bank have never been in a healthier state. Our domestic business is expanding satisfactorily, our foreign branches and connections have been adequately extended to meet the development of the country's trade, and, what is more important, we are well equipped in point of staff. Altogether, I feel that we are well prepared to meet any conditions and contingencies that may arise.

### Overseas Record

"The record of the staff of the Bank overseas showed that 1,405 members of the staff had served with the colors. Of this number 1,182 had survived, of whom 663 have already been reinstated. Of the total who joined the colors it was Sir Frederick's sad duty to record the fact that 223, or 16%, gave their lives for their country. In paying tribute to them, Sir Frederick said:—

"'No words of tongue or pen can fully express our pride in, or our admiration for, these gallant young crusaders. It must suffice to say that their names are not merely written in the records of this Bank and in the history of the Empire they served so well, but 'live on far away, woven into the fabric of other men's lives. Such dead are honored with unchallenged admiration.'"

DUNLOP TIRES

SEAL OF QUALITY

CORD

# Another Milestone In Greater Tire Mileage

If you could see the painstaking activities necessary to the construction of Dunlop Cord Tires, you would readily believe they could not possibly be better.

True, we were **not the first** to announce a Cord Tire, but we **were the first** to announce a Cord Tire that, we feel, has all the unmistakable signs about it of **being absolutely right.**

More rubber goes into Dunlop Cord. More miles come out of it.

"Extra" thoroughness in the making accounts for "extra" staunchness in the using.

Less gasoline is consumed per mile.

Dunlop Cord Tires have a greater air chamber, as the cross-section is ½" over the listed size. When you purchase, say, a Dunlop 34 x 4, we really give you a 35 x 4½—and so on.

Equipped to your car with Dunlop Extra-Heavy Service Tubes or British Dunlop Red Tubes, Dunlop Cord Tires—"Traction" or "Ribbed"—make a striking appeal to your sense of tire values.

**Mileage—then "Good Measure" Mileage.**

**All sizes—30 x 3½ to 37 x 5.**

No. 501
⅞" Standard with
Three-in-One Terminal

No. 500
½" Standard with
Three-in-One Terminal

# Quicker Ignition
# Better Combustion

That is what the M. & S. Spark Plug will accomplish for you.

Isn't it abundantly worth the trifling cost of a set of plugs—just to know what the M. & S. hotter spark means to you.

Try them.

**M. & S. Spark Plug No, 500 is "Standard Equipment on Model No. 4 Overland**

No. 503
⅞" Long with
Chevrolet Ball Terminal

See that ball-point in the picture? It concentrates the current and intensifies the heat, thus giving quicker ignition and better combustion which means increased power.

The difference in pep and vim in your car will surprise you.

The interchangeable porcelain is another big convenience. Porcelains can be purchased separately. Our high heat test ensures freedom from sparking troubles.

The Center Electrode is one-piece (not welded) 97% nickel steel.

The three-in-one terminal is adapted to any style of ignition wiring. Special Chevrolet model ball terminal.

M. & S. Plugs are Canadian made by Canadian workmen. Materials and workmanship are of the highest standard.

*Our strict guarantee—complete satisfaction or free repairs or replacement.*

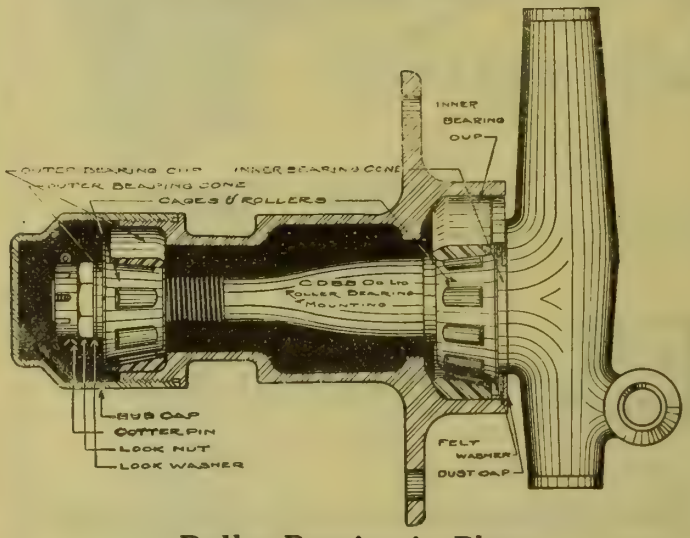
## For Big Sales and Quick Turnover Sell



# Chapman Bearings

Chapman Roller Bearing

Thrust Bearing in Place

Roller Bearing in Place

Differential Thrust Bearing

### Chapman Roller Bearing

A Ford or Chevrolet car is subject to rapid wear in the cup and cone bearings of the front wheel, because the hub is too small to take a cone bearing with a sufficient factor of safety.

Chapman Roller Bearings overcome this difficulty and are easily installed.

Every Ford and Chevrolet is a prospect.

The field for the dealer is a broad one with quick turnover and a good profit.

Consider the number of Fords and Chevrolets in your vicinity.

### Differential Thrust Bearing

Readily substituted for the plain flat washer in the differential of Ford or Chevrolet. The flat washer wears out due to heavy end thrust. When worn there is lost motion in the gears and incorrect contact of teeth, causing extreme wear, and noise.

The Chapman Differential Thrust Bearing exactly replaces the washer with no other changes required. It takes the pressure on steel balls, reducing friction to a minimum and holds the gears in perfect mesh.

**Get our dealer proposition by a post card today.**

USTUS Limousette FOR FORDS

# For Big and Profitable Business

At last—an honest-to-goodness all-season attachment for Ford Cars. The "Ustus Limousette" gives every Ford Touring Car or Roadster a closed car appearance and protection when needed. It is invaluable in Winter, Spring, and late Fall, but it is not necessary to remove any part to enjoy open car freedom during the warm weather.

After the initial attachment the Ustus Limousette becomes a permanent part of a Ford Car. Adjustments to suit weather conditions, for ventilation, entrance or exit, are accomplished by the raising or lowering of the side piece on special spring rollers. These rolling side members can be operated conveniently and easily from outside or inside the car. The action of these rollers is identically the same as the way in which the window shades in your own home are raised. When in the raised position they are entirely concealed from view by the overhanging position of the Ford Top. But they are at all times ready for instant use.

Not only does the Limousette give open car freedom when weather conditions are suitable, but it gives practically the identical appearance of an open car. Even the parts that are necessarily in full view when open car freedom is desired, add to the appearance of any Ford.

If for any reason it is desired to detach the Limousette it can be readily removed, folded, and placed under the seat. It folds into a bundle only 31½ inches overall. It weighs but 40 lbs.

Here are ten of the most interesting and important features of the Ustus Limousette:

1. It improves the looks of the car.
2. It is light in weight.
3. Gives clear vision front and sides.
4. Permits easy and quick entrance and exit.
5. Gives closed car comfort in bad weather.
6. Instantly convertible into an open car.
7. Eliminates inconveniences of awkward side curtains in summer.
8. It wears well.
9. No rattling or vibration.
10. No alteration of standard Ford equipment required.

Every Ford Touring and Roadster in Canada is a live prospect for an Ustus Limousette.

The practicability and convenience of the Limousette, plus our advertising efforts, practically assures an immediate wide-spread demand for this new addition on Ford Cars. We have a real, live selling proposition to offer you. Write or wire for our proposition.

Every dealer with half an eye can see the selling possibilities in this line.

# 1920

# The biggest year in the brake lining business

**Ordinary Woven Lining**

*Notice the loosely woven texture.*

*Wears down quickly and unevenly.*

*Loses its gripping power as it wears.*

**Thermoid Hydraulic Compressed Brake Lining**

*Notice the compact texture.*

*Wears down slowly.*

*Gives uniform gripping surface until worn wafer thin.*

***How much of the 53,000,000 feet of brake lining needed for 1919 did you sell?***

IN 1918 there was one automobile for every 18 persons in America.

In 1919 there are over 6,000,000 cars and trucks which have been in service for over one year.

1920 promises to be the biggest year in the history of the automobile industry.

If 53,000,000 feet of brake lining were needed in 1919—dealers can appreciate the phenomenal sales that 1920 will offer.

***The national brake inspection movement***

With the increase of motor vehicles and the increasing traffic and safety problems that are confronting the country, the necessity of brake legislation is emphasized.

Police chiefs in towns of 2,500 population and over, are supporting the movement for efficient brakes.

Newspapers everywhere are urging motorists to be sure of their brakes. The Thermoid Chart of Stopping Distances, now the Police Traffic Regulation Chart, is being given widespread notice by police chiefs as well as by automobile officials.

***Dealers should capitalize this movement***

Good brakes are dependent upon the most efficient brake lining—car owners appreciating the imperative need of safe brakes are bound to have their brakes inspected—and relined if necessary.

There is a big business ahead for all Thermoid dealers, because Thermoid is the one brake lining that is tied up to the brake inspection movement. It is the one and only brake lining that assures satisfaction to both dealer and customer.

Get your share of this profitable trade. Thermoid is the best known and fastest selling brake lining there is. It will build permanent good-will for you by giving your customers lasting service.

***The famous Thermoid guarantee***

Every foot of Thermoid Brake Lining is backed by our guarantee: *Thermoid will make good—or WE WILL.*

# ACCURACY-DEPENDABILITY-SAFETY-

## Thats why people who know insist on COLT'S Firearms.

EVERYONE'S home needs real protection these days. And this need for home protection demands the accuracy and dependability of a **Colt** Automatic Pistol or Colt Revolver.

And now that people are able to procure the best, they naturally insist on a Colt. That makes a heavy demand upon the Colt factories, going at full speed ahead to catch up with civilian demands. Dealers should therefore place their orders at once for all future requirements.

## The Fastest Selling All-Year Accessory a Dealer Can Handle

Small investment — Good profit — Takes up little room — Every motorist needs them — And has no excuse for being without them at this price.

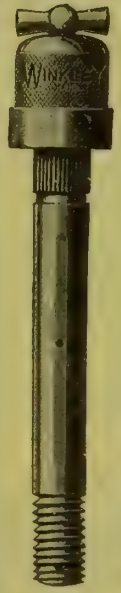
## MERCHANT'S ANTI-SKID CHAIN TIGHTENER

## $1.00 a Pair

**If dealer does not handle, sold direct prepaid on receipt of price**

Simple and easy to attach. You can slip it on a customer's car in about one minute, and it means a sale **every time.**

The Tightener catches the chain at five points, giving an easy tension all round. It holds the chain in place, prevents dragging or rattling, and yet permits the chain to creep on the tire, and carry out to the full its non-skid action. Keeps chain from pounding the fender, and prevents it from unhooking.



JOBBERS AND DEALERS:—Write at once for full particulars and generous terms, for now is the time to sell these things.

# Stanley Tools

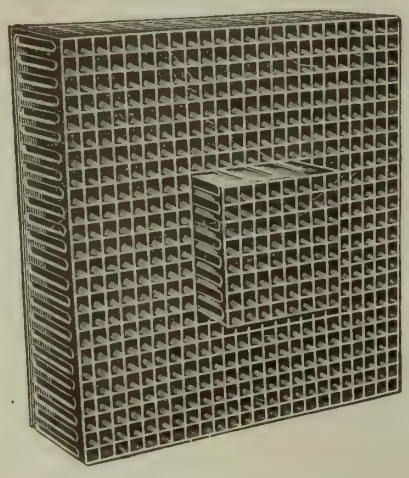
## STANLEY "PISTOL GRIP" ADJUSTABLE SAW SET No. 42

**This Saw Set embodies several unique and important features not heretofore seen in tools of this description.**

The shape of the Body and Handle enables the user to operate the tool with great ease and with the least possible exertion, and the saw is held firmly against the gauge while the tooth is being set.

It can be readily adjusted by means of the knurled thumb screw to give a greater or less set to the teeth of the saw, according as the saw is to be used for coarse or fine work. As the anvil or part against which the plunger works is graduated, the same adjustment can be easily obtained for duplicate work.

The tool is so designed that the saw teeth are in plain view which enables the user to quickly adjust the tool to the tooth to be set.



The plunger and anvil are made of tool steel—hardened and tempered. All parts are carefully **machined** and are **interchangeable.**

The tool is given a fine black finish.

# The Air Test Under Water

One dissatisfied customer means one customer less for the dealer or garage man.

Radiators that are absolutely water-tight will hold and draw customers.

You can prove to them that McKinnon Radiators are water-tight.

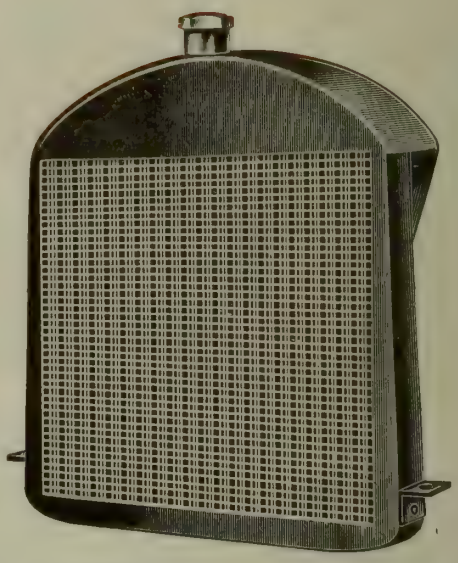
When they cannot find the puncture in their tire they put it under water and watch for bubbles.

That is the way every McKinnon Radiator is tested before it leaves the factory.

*Heavy air pressure under water is the test we apply to McKinnon Radiators.*

There is absolutely no possibility of a leak.

## McKinnon Radiators
are
## "Really Cellular"



They are made to meet emergencies.

The unforeseen accident, the punctured radiator, need not leave you stranded.

The remaining cells are as good as ever, just plug up the holes with wooden plugs or any adhesive substance, fill up the radiator and drive on.

Your garage man will replace the broken cells with new ones, and the radiator is as good as new.

All dealers should carry McKinnon Radiators.

They are proof against damage through vibration. They are made to stand hard usage.

DOUBLE BOILER No. 232

# UNIVERSAL Aluminum Ware

is new in design—new in quality-concepts—new in sanitary features—new in selling possibilities.

**Every utensil a strictly quality product.**

## A Few Features of Universal Betterness

Bodies of pots, pans and kettles are gracefully formed, seamless and leak proof. No sharp angles, cracks or crevices to collect dirt, grease or grime.
Extra large, extra strong close-fitting beads.
Handles doubly braced for double strength—made of cold rolled steel, heavily tinned.
Bails stand at any angle away from the heated vessel.
Ears with straight edges easy to keep clean—made of cold rolled steel.
Pure aluminum spouts welded to bodies.
Three sizes of knobs, a UNIVERSAL refinement, and having the white line of distinction.

**Every utensil bears the stamp**

**UNIVERSAL**

**The trade mark known in every home.**

The stamp of satisfaction that has become so well-known to every housewife using one or more appliances bearing this trade mark.

UNIVERSAL Aluminum Ware is being nationally advertised. Your local customers will respond to the advertised betterness of UNIVERSAL utensils. They will ask for the goods. Don't let them ask in vain.
This line is backed by a merchandising policy as liberal and clean as the ware is sound.

# "That's the Tool I Want"

Over and over again you will find a customer asking for a Millers Falls tool because he has seen it advertised. And the wise dealer is ready to supply this demand because he knows that the more strong selling lines he can feature, the greater his own success is bound to be.

Our fifty years leadership in tool making and our big national advertising have made the Millers Falls line the big seller in tools. And Millers Falls tools give a satisfaction that strengthens your good-will with your trade.

Millers Falls selling features and our handbook on "How to Sell Tools" are valuable helps in boosting tool sales. If they are not working for you now, write us.

*The Ford Sedan will be a constant source of pleasure in the years to come.*

*Make this Christmas the beginning of a long season of happiness by presenting the Family with a Ford Sedan—the car of comfort at a reasonable price.*

# Our Christmas Greetings

TO OUR CUSTOMERS

THAT great army of Friends who, through their Good Will and Good Wish, have made possible the successful development of our business and,

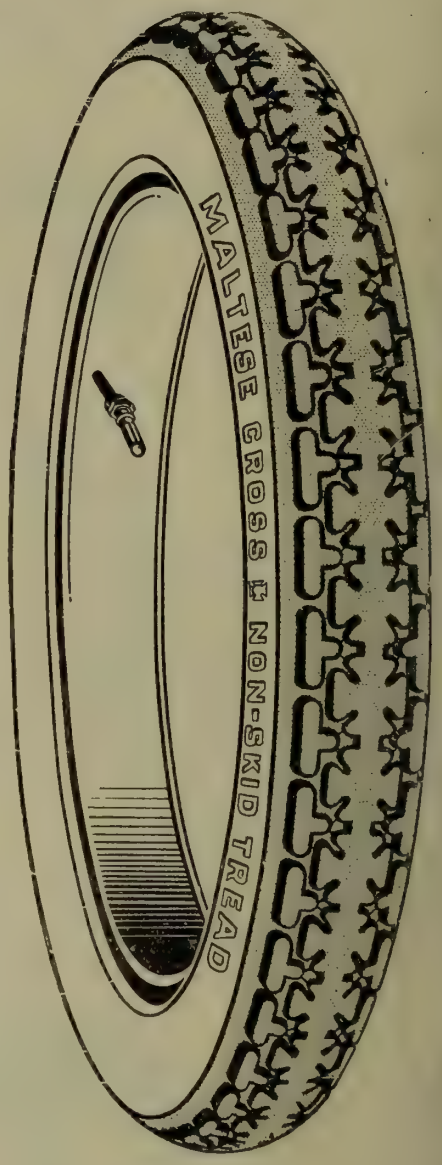
TO OUR EMPLOYEES

OUR fellow workers whose loyalty and enthusiasm have contributed so much to our success and the development of our organization,

WE EXTEND

AT this season of joyous remembrance Our Greetings. We wish you all Good Health and Happiness, in larger measure for the year to come than any of the years that have gone.

THIS WISH



IS no different to the one we, at all times, silently entertain for you, but this being the season for expression, we proclaim to you and yours----

MAY your Christmas be a Happy One and may the New Year come to you laden with Prosperity.

# "CLINTON'S DITCH" THEY CALLED IT

THE crazy notion of a visionary man. But De Witt Clinton had faith—faith that the Erie Canal would open up to America and the world the untold riches of the middle west, and on October 26, 1828, the first boat arrived at Albany.

Beside the little stream at Plymouth the wheels hummed in the rope walk (then four years old) as the fiber was spun into yarn and the yarns twisted into tow lines for use on the canal, and hawsers and rigging for the merchant marine which was to help open to the world the great riches of America.

Plymouth was good rope then, it is good rope now. It is the rope you can trust.

# Use Common Sense

## Real Hack Saw Economy requires the use of common sense in the regulation of weight on the saw.

Every machinist knows, when he is using a hand hack saw, that as the blade becomes worn, more pressure must be put upon it if the cutting speed is to be maintained, but he's very apt to overlook that point in using power machines.

As the saw is used the teeth become worn, and what we call the "contact" area, the area of the blade that actually rests on the work, becomes greater. That means friction and a necessity for more pressure to make the blunted teeth cut into the work. On a heavy saw 64 pounds pressure is generally about the right figure to start with, but to keep the saw cutting as fast, after it has made twenty odd cuts as it did at first, more pressure-weight is needed.

The Starrett Hack Saw Chart M.A. helps every user of Hack Saws to do more work at a lower cost. Copy sent you free upon request. Write for Catalog No. 21 M.A

# Portable Sewing Machines

The average housewife does not need to be told that sewing is a hard and wearying task. All those women can be sold on a Northern Electric Portable Sewing Machine, when you demonstrate that it gets them away from foot-pedal drudgery and its accompanying back-aches.

**This practical sewing machine,** electrically driven, is capable of doing all the work of a standard foot-driven machine, thoroughly and efficiently. Its simplicity appeals to women—a slight pressure of the foot starts or stops it—its lightness enables them to carry it from room to room with ease and it is surprisingly economical in its consumption of current. This ease of operation means more sewing in less time, than with a foot-driven machine.

The "Northern Electric Portable" is of the highest grade design and workmanship and is backed by this Company's guarantee of complete satisfaction. *The "Northern Electric Portable" is no experiment.*

Display the Portable in your window and demonstrate it in your store—you'll have an interested and appreciative audience. Line this profitable and growing business up—it's yours for a little effort.

***Write our nearest House for prices and artistic display cards.***

# Four Good Reasons Why You Should Sell "1900" WASHERS

1.—You want profits—the "1900" line provides fair profit on each sale and, as these machines are exceptionally easy to sell, your year's business can be greatly augmented by stocking such a line.

2.—You want to gain a reputation for selling the "Best on the Market"—and the "Best on the Market" in washing machines means "1900."

3.—You want to be able to offer a complete line of Washers. The "1900" line is complete. It includes Electric Motor, Engine Power, Water Power and Hand Power Washers. When you are a "1900" dealer you need never say, 'Sorry, Madame, but we do not sell that kind of Washer."

4.—You want the good-will of your customers. The woman who buys a "1900" Washer from you will never forget the "good turn" you did in suggesting it to her. Highly satisfied with her purchase, she will remain your customer and she'll tell her friends about her machine and the store she got it from.

**1900 CATARACT Electric Washer**

The housewife is daily confronted with the High Cost of Living, [illegible] of domestic help and the "wear and tear" on apparel, caused by the local laundries. Women are finding the "1900" Cataract Electric Washer in particular a solution of the washing problem and the dealers who stock our line are rewarded by excellent sales and profits.

Our objective—an efficient, energetic representative in every locality.

**Write to-day for catalogue and complete information.**

## May it be a Happy Year

Now that 1919 is nearly gone, our thoughts turn to the friends and customers of this past year, and it is with gladness we realize that just a little more prestige has been built for Ramsay's, a few more friends made and public confidence in our service and policies increased. With thanks for the loyalty and faith of friends we wish them a New Year full of gratified wishes and ambitions.

December 20th, 1919.

To the Trade:—

Dear Sirs:—

On looking back, we recall the feeling of great uncertainty as we entered the year which is just drawing to a close.

All our worries and forebodings have been in vain and were unnecessary—the country in general is prosperous, the individual is prosperous and but for a certain natural post-war feeling of unrest, happiness reigned supreme.

We can all do much during the coming year to dissipate the unrest cloud and to bring about a healthy national mental condition.

LET'S GET TOGETHER

To one and all a Happy New Year.

Yours truly,

G. F. Allen.

Manager.

# Jardine's

## Greetings

For the courtesy of your patronage in the past year we sincerely thank you and hope to enjoy a continuance of those cordial relations during the coming year.

# CHRISTMAS GREETINGS

CHRISTMAS *this year may truly be called the first Victory Christmas, because to many thousands of Canadians it will mark the first occasion in five years that the boys have been home. To these families the season brings added gladness and will be celebrated with more than usual good cheer.*

*To other families, and there are many of them, the boys will not come home, but the knowledge that they are resting in Flanders, and that they gave their lives to preserve life and liberty for others, keeps their memory proud and imperishable.*

*To Canadians generally the season brings real cause for joy and thankfulness. The year has been one of the busiest in the history of the Dominion and perhaps the most prosperous on record. Merchants and manufacturers from coast to coast have had all the business they can handle. Many of them have had far more than they could get merchandise for.*

*This condition still obtains and Canada is entering a New Year with prosperity on every hand and many manufacturers booked months ahead. In the midst of all this prosperity the hardware merchants have had a full measure.*

*One only needs to talk a few moments with almost any hardware merchant from Halifax to Vancouver to realize this. Practically without exception the call is for more store accommodation in order to take care of increasing business.*

*The Christmas season has been a rich one for hardware merchants. People have bought generously and one of the lessons they have learned in the past five years is to buy really useful and serviceable articles. This has meant unlimited opportunity to the hardware man, as no class of merchant has in his stock such a large variety of merchandise that is really required in and for the home. The one trouble has been that hardware merchants have been unable to get sufficient goods to take care of the business offering.*

*However, they are well satisfied with the prosperity they have enjoyed and no merchants in the whole country will join in the Yuletide festivities with more joyous hearts than the hardware merchants.*

*The editors of* HARDWARE AND METAL *extend to the hardware trade of Canada the heartiest of season's greetings and every good wish for the greatest year of prosperity in the history of the Dominion.*

# 9,000 Autos Being Built Daily

## Chairman of Automobile Accessories Branch of National Association Tells of Tremendous Opportunities for Hardware Merchants in Supplying Wants of the Car Owners

MANY matters of interest to hardware merchants, especially those handling auto accessories, were discussed at the second annual meeting of the automobile accessories branch of the National Hardware Association held in Chicago.

A. H. Nichols, chairman of the automobile accessories branch of the National Hardware Association, placed great stress upon the advantage of co-operation as a factor in establishing higher business standards and developing more satisfactory trade relations.

Discussing the business future he said in part:—

I doubt if it is within the conception of any of us to appreciate the great opportunity that this automobile industry has given to the hardware dealer. Do you know that in the year just closing, 1919, there have been 315,000 tractors manufactured, and yet the tractor has not passed the experimental stage? Perhaps the illustration could be better made in this way, that in 1916 there were only thirty thousand tractors manufactured; in 1917, sixty-three thousand; in 1918, one hundred and thirty-three thousand, and in the year just closing, as I said before, there have been manufactured three hundred and fifteen thousand tractors.

### Enormous Business

The auto truck traffic has reached enormous proportions and to-day it is giving a better service than the railroads. There are more factories manufacturing motor trucks than there are factories manufacturing automobiles. Although at the present time we only have about 700,000 motor trucks in operation, this year the production was a little less than 300,000, it is reasonable to suppose that in 1920 the production will be over twice that amount. The number of licenses issued for pleasure cars in the United States for the year just ending was 6,900,000. It is safe to say that we have at least 7,000,000 pleasure cars in operation at the present time. For the last few months the average production per day has been 9,000 motor cars, one factory alone producing 3,000 per day, and that factory has had such a large output in the past that it is necessary for them to produce 2,000 additional cars each day to equip them with the required number of repairs.

### Means Opportunity

Now when you take these things into consideration you can readily see the opportunity that the hardware dealer has. Consider, if you will, the millions and millions of wrenches, hammers, of pliers, the cold chisels, that the hardware dealer has always sold, and take into consideration the amount that is required for the upkeep of the motor driven vehicle. Then if you wish, look at the opportunities that a dealer has to expand. Kindly consider the fan bill, the spark plug, the tire, and the number of gallons of oil that he is likely to sell, and it gives you a fine idea of the opportunity that we have of increasing our business. Perhaps one of the greatest things that this association can do is to start on a campaign of education for the retail hardware dealer.

### Urges More Display

The retail hardware dealer should realize the necessity of better displaying his goods—of giving more space to this particular article, and to branch out and take advantage of the opportunities before him, and it is undoubtedly our duty to assist in this work. Constructive criticism is always desired. Our meeting here would not be a success without constructive criticism, but the manufacturer should remember that the hardware jobber, while conservative, is progressive, and he stands to-day among the foremost of all merchandisers of the world, and that his conservative methods and his careful way of doing business have placed him on a financial basis so that to-day there are fewer failures among the hardware jobbers than there are among our banks.

### Safe Proposition

Now this is something that it would be well for you to consider, because history has always told us the firm or the men who weather the storm are those who are closest to those who are on a substantial financial basis, and so as we go along we can understand why we should expect the hardware jobber to be the natural source of supply for all automobile accessories. I do not think anyone who is building just for the temporary—whose mind is only on to-day—would find any great benefit from this association, for this association's principles are built on a rock that can never change. We know the future that there is in store for us, and we are asking you to help us to restrict ourselves to what really and logically belongs to us, for we know and believe without a doubt that the hardware dealer is a natural source of supply for all automobile accessories.

### General Business Situation

I have been asked to talk to-day on the general business situation, said Major Frederick H. Payne, president of the American Hardware Manufacturers' Association. "On one point we can all agree—that as long as the shelves are empty, we are going to be busy and that is a condition that exists in every country in the world to-day. As long as the demand is more than the supply, we shall be extremely busy. I do not see how this period can be less than two years, for the reason, First, that if the railroad bill that is now before Congress, is passed, it means that the railroads will come into the market for a large supply of material. Second, there has been practically no construction in America during the war and it is estimated that in 1920, between four and five billions of dollars will be spent on new construction. This is twice the normal yearly construction.

### Getting Back to Normal Level

How we have reached the present level of prices is simple enough; how to get back to the former level is the real problem. On every hand we see powerful influences at work to make the present structure of wages and prices permanent. A considerable advance has been forced since the war ended. This has been due, first, to the fact that there has been no relief from the scarcity of goods; production has not yet caught up with demand so that stocks are accumulated. The markets are still in favor of sellers. The profits of producers are good. Labor is aggressive, stimulated by the succession of wage advances secured under war conditions, and disposed to press its advantages to the limit. Labor leaders are vying with each other, or are under pressure by their supporters to make the best showing of advances won. The restraint upon demands which was in some degree felt during the war is off, and a scramble is on for position in the reorganization which is accepted as permanent. Nobody is contemplating any reduction in his own compensation, but those who have not shared fully in the general advance, are now trying to raise themselves to the new level, while those who have bettered their position are determined to keep the advantage they have secured.

### Caused by Foolish Talk

A vast amount of mischief has been done by the foolish talk that a new social order was about to be inaugurated, that the working classes by the power of organization and a more aggressive assertion of their rights were about to claim and obtain a larger share of the product of industry. The progress of the working classes will be accomplished in the future as in the past by the accumulation of capital in the form of machinery and industrial equipment, thus increasing production. The idea that a greater share of current production shall be divided and eaten up and that less shall be used for developing more effective means of production is fundamentally wrong. It is of the same piece with the idea that the hours of machine operation can be cut down and the machine operators at the same time have more of the product.

### The Crying Necessity

I want to see prices come down, but I think the best way to accomplish it is by getting people back to work all over the world, and increasing production. That will be a gradual process, and industry will adjust itself to it in all branches together and it will be a return to normal conditions. It isn't going to reduce the price of cotton cloth anywhere to keep the cotton mills in Europe idle. We want to see the cost of living lowered by reason of an abundance of the necessaries of life for all people, rather than by a glut of products in this country while people are starving elsewhere. We can never get back to normal conditions in the market until normal production is restored.

## Allege That Prices Were Unreasonable

Pittsburgh.—Foster B. Perriott, president of the Transcontinental Oil Company, and Thomas R. Cowell, its secretary, gave bail in the Federal District Court here to answer to the charge of selling fuel oil at unjust and unreasonable prices.

The prosecution, said to be the first of its kind, was brought under the Food and Fuel Act of 1917, and alleges that the company sold fuel oil at prices ranging from $3.50 to $4 a barrel. One purchaser was an Akron, Ohio, tire company, which bought 15,000 barrels of oil at $3.50 a barrel, and another was an oil company which bought large quantities of fuel oil from the Transcontinental at prices ranging from $3.75 to $4 a barrel.

The Transcontinental Company was formed November 23, when seven oil companies were combined. Its officers are among the best known oil men in the country.

# THE CHRISTMAS WINDOW CONTEST

*ENTER your Christmas display window and go after one of the cash prizes offered by* HARDWARE AND METAL. *The field is wide open and every hardware man has an absolutely equal chance. Get the photos of your window taken NOW and mail them to* HARDWARE AND METAL. *Remember, there are no restrictions of any kind, the only condition being that the goods shown must be for the Christmas trade.*

## ENTER YOUR CHRISTMAS WINDOW NOW

*Two contests will be conducted—one for stores in places under 5,000 population; the other for places of 5,000 and over.*

**Eight Prizes Will Be Offered As Follows:**

| Places of 5,000 and Over | | Places Under 5,000 | |
|---|---|---|---|
| First Prize | $10.00 | First Prize | $10.00 |
| Second Prize | 5.00 | Second Prize | 5.00 |
| Third Prize | 3.00 | Third Prize | 3.00 |
| Fourth Prize | 2.00 | Fourth Prize | 2.00 |

*Contestants will note that an equal number of prizes are offered to the small town trimmer as to those in the larger towns and cities.*

*The contest closes Thursday, January 1. No photos received after that date will be entered unless there is proof that they have been delayed in transit.*

*All matter should be addressed to "The Editor,* HARDWARE AND METAL, *143-153 University Avenue, Toronto," and marked "For Christmas Window Contest."*

# Ontario's New Plumbing Regulations

## By-laws Which Are Expected to Become Effective Shortly Will Mark Long Step Forward —Based on "Good Practice" and Make for Standardization—Inspection Provided For and Also Examinations for Men Employed

NEW plumbing regulations, which will be far-reaching in their effects, only await the signature of the Lieutenant-Governor of the Province of Ontario to become law. It is expected that this will be attached very shortly, and the new by-laws go into operation early in the new year.

The new regulations are regarded by the men in the trade in Ontario as the greatest step forward that has ever been made in Canada in connection with plumbing matters.

### Basis of By-laws

The most important feature perhaps of the whole proposed new code from the standpoint of the man in the trade is that it is based absolutely on "good practice." It is not the good practice of any one man, but has been compiled after careful work and much conference with many of the best men in the province. These men have had to solve problems under widely varying conditions, and the new regulations are aimed to meet any and every requirement.

A very important matter is that they make for standardization, not only of pipe, but of fittings. This will, in addition to other obviously good features, go a long way toward eliminating that bug-bear of the trade, "price-cutting."

### Will Help Situation

Another factor that will bear on this situation also is the inspection that is to be provided for. The new regulations put the whole matter entirely up to the plumber. If he abides by the regulations he is all right, but if he does not, he does so at his own risk, and any citizen is at liberty at any time to call in a competent inspector, if he questions any work that is done.

A very important feature of the proposed by-laws is that which provides for examination of all men who are engaged in plumbing and heating work. One of the great complaints at the present time, and in the past, has been that men who know little or nothing about the real principles of the work they are doing, undertake all kinds of jobs, with results that are often anything but satisfactory. From the standpoint of the public, this is expensive and unsatisfactory.

### How They Work

The preface to the proposed by-laws outlines the changes to be made as follows:

"The Regulations as to sanitation are submitted as a framework upon which Ontario municipalities may erect more substantial structures adapted to their particular and individual needs.

"The present Regulations apply to all new plumbing throughout the Province, whether in the cities, towns and villages, or in strictly rural municipalities. Hereafter, when a farmer desires to install plumbing, it must be installed with the same thought and care as is bestowed on the plumbing in the residences of a well-governed city. The responsibility for conference to the Regulation rests with the plumber, and any work hereafter constructed not in accordance with the regulations must be done at the sole risk of the plumber, and an owner should, in no case, accept new plumbing until the same has been certified as satisfactory by an inspector. Municipal councils are required by the Regulations to appoint Inspectors of Plumbing for their respective municipalities. Under the Regulations, a plumbing inspector need not be resident in the municipality of which he is the inspector.

### Pass Examinations

"It is recommended that more general advantage be taken of the powers conferred on municipal councils, under sec. 420, s.s. 4, Municipal Act, and that licenses be granted to plumbers conditional upon the applicant passing a satisfactory examination as to his fitness from the point of view of protecting the public.

"The Regulations respecting plumbing and examinations do not in any way restrict the number of persons engaging in the plumbing business, and examinations merely ascertain whether persons applying for licenses are competent to be entrusted with the installation and repair of plumbing work for the citizens of the community.

### A Suggested Test

"At present, an applicant might be required to have at least five (5) years' experience as a journeyman plumber, and be able to show (a) in a practical test that he is skilled in journeyman work. The character of the practical test could be similar to the following: Bend a two-inch lead pipe about twenty inches long in a right angle. To this bend wipe a two-inch biass ferrule. The other end of a two-inch pipe branch into a four-inch section of lead pipe about ten inches long. To the four-inch pipe wipe a four-inch brass ferrule. These practical tests are best conducted in the presence of several examining plumbers who are capable of passing upon the character of the work. The applicants might do their work in the presence of each other.

### Other Features

"After an applicant has passed his practical test, he should be examined as to (b) his knowledge of the plumbing rules and regulations, the practice of plumbing, including drainage, venting, water supply, and kindred topics.

"Examinations might be held in adjoining city centres once a quarter, and should consist of two parts: (1) a set of questions upon the practice of plumbing; (2) the inspection of a plumbing plan. The usual practice is for a candidate to write his answers in English, but, in special cases, the applicant might be permitted to answer in a foreign language, or answer orally to a stenographer who takes down his answers and transcribes them to typewriting.

"All examination papers, and all records of the examining board, should be open to public inspection, under reasonable restriction, except such matters as relate to private affairs of the applicant or violation of rules.

### Should Be Able

"The suggested examinations are not intended to shut out any fit person, neither are they intended merely as a means of regulating the plumbing business, because a person with any fair knowledge of the plumbing business should be able to answer satisfactorily. The plumbing business affects the health and property of citizens. It is essential that a plumber should know the rules prescribed by the Regulations, in order that, when he is called to do plumbing work, he shall do that work in a lawful manner; and it is also necessary to determine that the plumber knows thoroughly the essentials of his business, as there are many things not covered by the Regulations.

"The examining board should be composed of the Medical Officer of Health (or the Chief Plumbing Inspector) and two plumbers, one to be a master plumber and one a journeyman plumber, of not less than ten years' experience, to be named by the Medical Officer of Health and the chairman of the Local Board of Health.

"For the convenience of Local Officers of Health and others interested in sanitation, the following extracts from the Statutes of Ontario, relating to sanitary conveniences, plumbing, and matters falling within the scope of these regulations, are given."

*"We try to make our whole store one big silent salesman," says Fred W. Karn, of Woodstock, Ont. "Always keep seasonable goods to the front." Mr. Karn gets excellent results from the display tables shown in the foreground. They are changed regularly.*

# Makes Whole Store a Silent Salesman

## Orderly, Attractive Display is a Big Factor in Helping Customers Decide Just What They Want, Says F. W. Karn, of Woodstock, Ont.—Goes After Business Also by Newspaper Advertising

Based on an interview by E. DeW. HUTT, of Hardware and Metal, with Fred W. Karn, of Woodstock, Ontario.

"A PLACE for everything and everything in its place," is the unwritten law which accounts for the orderly appearance of the hardware store of Fred Karn, of Woodstock, Ontario. It is the strongest impression which one gets on entering his quarters on the main street of this Western Ontario city of ten thousand people. And the longer one looks, the more careful the examination, the stronger becomes the impression that great care has been exercised in the arrangement of every detail in connection with an establishment that has done a thriving business for three-quarters of a century or more. To the customer, this carefully arranged display of all lines of the trade proves a great help in the selection of what articles may be required. Everything is in sight, and so convenient that little time is wasted in placing before the purchaser just what he or she may want.

### Devoted to Display

More than fifty feet of space to the left of the main entrance as one enters is devoted to this display of shelf goods, table cutlery, chisels, locks and lock sets, thermometers, hammers, etc. They fill up box after box on the long, neatly-kept shelves, and on the outside of each box are samples of the goods contained in each. Mr. Karn told HARDWARE AND METAL that this arrangement saves a good deal of time in selling, as the customer can see at a glance all there was to be seen of the particular article wanted. On the over-hanging ledge above these boxes are stock goods, which are easily accessible, and they are as neatly arranged as the shelf goods.

In the silent salesmen on the same side of the store is a display of silverware, running into the more expensive lines of knives, forks and spoons. There are also alarm clocks, razors and lanterns along this side of the store.

### Renders Service

To the right of the main entrance is Mr. Karn's stock of paints and varnish. Mr. Karn confines himself to one line of paints and says he gets the best results by so doing.

Woodstock, like many another city in Ontario, is without houses for sale or for rent; next year, it is expected, there will be a good deal of building undertaken and this means a big paint trade. Mr. Karn is ready for it, as he carries a good stock and says he makes big turnovers in the course of the year.

### Keeps Stock Displayed

As may be seen from the illustration, the paint department is well lighted and the stock well displayed. Mr. Karn

makes it a point to render as much service as possible to prospective paint buyers. When men or women come in and inquire for a certain kind of material, he always finds out about the work they are intending to do and very often can show them where a different paint from the kind they had thought will produce better results. He also tells them about preparing the work and the best ways of finishing it, the right brushes to use, and so on. Always inquiry is made to ascertain if the party has brushes, and very often it is found that while he has a brush, it is one that is entirely unsuitable for the work. It is easy then to show him how much time he will save and how much better work can be done by the purchase of the proper brush. Mr. Karn always keeps his stock of brushes prominently displayed and this frequently results in people, who came in for some other goods, remembering that they need a brush. Many sales are made in this way that would not be made otherwise.

### Advertising Pays Well

Mr. Karn states that he always gets good results from his advertising in the local paper. He usually uses a two-column space and tries to make his message as direct as he can, believing that the fewest words he can tell his story in will make it more effective. People come in from a long distance around the country, he says, in response to lines he advertises, and very frequently, especially during the busy seasons on the farm, he receives orders over the telephone for merchandise he advertised.

At the extreme end of the store, and in the right-hand corner, is a large assortment of kitchen utensils of all varieties, and boilers, tubs and other washing goods.

In the centre of the store and toward the rear, Mr. Karn keeps his stoves, which occupy a considerable space.

"When we sell a coal stove we set it up for our customer," he said, "and in the case of the gas stove, we engage a plumber to do the work, and simply transfer their charges to us to the bill of the purchaser of the stove. We find that this helps with the sale of the stoves as plumbers are very hard to get these days, and when we tell the customer we can attend to his stove at once, it means a good deal. During the last few years, the sale of the gas stoves has been the best, because we have natural gas; but the market soon fluctuates with anything that affects the supply of gas."

### Farmers' Trade Good

Oxford County is known as one of the wealthiest dairying counties in the Dominion. Farmers are very well off, and over 80 per cent. of them have their own autos. Many of them are using tractors on the land. In supplying the needs of the city customer, Mr. Karn does not forget that the farmers' trade is his big item.

"We keep the lines the farmers need," he said, "and we cater to the farmers' trade as much as possible. We have a big farmers' business and with them we carry very few accounts. They usually have the cash, and we find they want to pay cash for their goods. What we do in credit business is very short term. We have very few standing accounts. I have found during the last fifteen years that from year to year at stock-taking time we have varied very little from $200 to $300 in our accounts carried on the books. As far as we are concerned, we find that as much goes off our books each month as goes on them; it is about the same from month to month. I have advertised a cash business for years and the results of this advertising have been very satisfactory."

### The Harness Business

Not every hardware man carries harness now, but Mr. Karn still does and continues, he says, to do a good trade in it. In the spring, he sells a few full sets of harness, though he does not stock heavily on these full sets. He keeps parts more for the convenience of his former trade than for the profits involved.

West End Hardware

**BIG SHIPMENT OF ROOFING**

We have just received a large shipment of Roofing. Sorry we could not supply all our customers on Monday. It is going out very fast. Would advise securing it early as it will not last long, and it is very hard to procure.

**High-Class Roofing**

Put up in 108 square feet to the roll, with nails and cement in each roll to put it on.

Roofing is Scarce. Buy Now!

**FRED W. KARN**

"We sell many harness parts," he told HARDWARE AND METAL, "and sell some full sets in the spring of the year. These sales have decreased on account of the wide use of the automobile in this country. We also have a big sale of ploughshares to the farmers."

### Sells Many Seeds

A feature of Mr. Karn's business is his sale of seeds in the spring.

"In the spring," he said, "the clover and timothy seed and seed corn, mangolds and turnips, and other garden seeds, are a big item with us. We arrange a special department in the store for them. While there is not much profit in handling them, there is a quick turnover; but, what is more important, it brings a lot of trade in other lines for us. This is one of the oldest seed house departments in Western Ontario; we have been selling seeds in this store for the last seventy-five years. There is a small margin, but quick turnover.

"This is not a usual line for hardware men, but they have always been handled here and we have continued to keep them from year to year. Last year we sold the members of the Farmers' Club all the seed they required, and the same the year before. I feel it is better to cater to the Farmers' Club, if you can get their trade, than let it go, even though the profit be small."

### Roofing and Wall Board

"Roofing and wall board is a big line with us," said Mr. Karn. "We handle nearly the full line of one firm, as we are their sole agents, and have been for the last fifteen years. We have always had such a good trade that they have left the agency in our hands."

Mr. Karn has combined orderliness with variety to a marked degree in his store. Everything that constitutes hardware in the old-fashioned sense is to be found in his store so carefully and conveniently arranged and displayed that little is to be desired. Not a little of the success which has attended his efforts, he says, is due to the fact that his store helps the man who comes in to buy rather than confuses him. There is a place for everything, and everything must be in its place. That helps him at the same time as it is helping the customer, because there is no time wasted, no confusion. His entire display is a continuous silent salesman.

## British Prices Higher For Bars and Sheets

**London, Eng., Dec. 18.**—Welsh sheet bars have been advanced 5s., and are now quoted at £16 5s. Welsh tin plate is also 6d. higher, at £2 7s. 6d. Steel galvanized sheets are now held at £41, an advance of 10s. This price has been paid for 24 gauge corrugated, in bundles, March-April shipment, f.o.b. The price situation is difficult, owing to the scarcity of open capacity, and quotations are often exceeded.

Barrow reports a sad dislocation of trade, owing to transport deficiencies. All west coast iron and steel concerns are seriously hampered, and temporary stoppages probable, unless an early improvement is recorded. A large volume of orders is compulsorily rejected.

Reports from most other directions are only less pronouncedly pessimistic regarding the congested conditions of transportation. The foundrymen's strike is a largely contributing cause, holding up rolling stock and repair work.

# Roofings and Building Papers Are Advanced

## Increased Cost of Various Raw Materials—Same Prices of Roofing and Papers Higher—Every Indication of Market Ruling High

ADVANCES are now effective on practically all lines of roofing paper, tarred felts, tarred and dried sheathings, and building papers.

"Roofing manufacturers claim that never in the history of their business have roofing manufacturers faced such serious conditions as prevail at the present time," said D. P. Hatch, sales manager of the Barrett Company, Montreal, to HARDWARE AND METAL. "Mid-war manufacturing problems and costs were boy's play, indeed, as compared to conditions prevailing at the present time."

**Scarcity Felt-Making Materials**

Continuing, Mr. Hatch said: "Dry felt is jumping in cost almost daily, due to the extreme scarcity of raw stock. Sheathing stock, for anything like prompt delivery, can simply not be purchased on the market to-day. The sheathing and dry felt mills are all crowded with orders, and price is no longer a factor.

"The usual sources of supply for all raw material in the roofing line are doing business simply on the basis of price at the time of delivery. All these uncertain conditions of raw material supply, combined with consequent high cost, make the present situation an extremely difficult one, indeed, from the roofing manufacturer's standpoint, and it is our best opinion the situation will be worse before it is better."

# Will be Continued Steel Shortage

## So States Representative of Steel Company—Orders on Hand Will Absorb Production for Long While

THAT the shortage of steel will continue for at least the first half, if not the whole, of next year, and will be as acute, if not more so, than during any period of the war, is the statement made by Mr. Beverley Robinson, president of B. & S. H. Thompson & Co., Limited, Canadian representatives of the United States Steel Products Co., the export sales organization of the United States Steel Corporation. Mr. Robinson has just returned from New York, where he has discussed with the Steel Company's officials the question of supplying the Canadian trade with its needs.

"The serious curtailment in the output of steel in the United States, due to the recent strike, and the enormous demand which has developed the world over, are responsible for the shortage," Mr. Robinson stated to HARDWARE AND METAL. It will take the mills of the Steel Corporation the whole of the first quarter of next year to deliver material for which they are already committed, so that no further tonnage will be available for delivery during that period.

# Reappraisement Decision Means Advance of Ten Per Cent. on Goods Sent to the United States

NEW YORK.—Judge McClelland, of the Board of United States General Appraisers, has handed down a reappraisement decision which will have the effect of imposing a 10 per cent. advance on thousands of dollars' worth of automobile tires shipped to the Goodyear Tire & Rubber Co., of Akron, Ohio, by the Goodyear Tire & Rubber Co., of Toronto, Canada. As explained yesterday by Special United States Attorney Thomas P. Tumulty, brother of the secretary to the President, who argued the case for the Government, the ruling by the General Appraiser will place an advance of 10 per cent. on every dollar's worth of Canadian-made tires shipped to the Ohio concern. This decision is a severe loss to the importers and a corresponding victory to the Government.

**Frank Statement.**

"These appeals," writes Judge McClelland in explaining the issue involved in this reappraisement case, are against the appraised values on certain automobile tires entered at the ports of Buffalo and Chicago. The merchandise was exported from Canada by the Goodyear Tire & Rubber Company of Canada, Ltd. The frankness with which the manager of the exporting company has stated for the record the basis of the uniform prices charged for the various sizes of tires for export and the conditions under which such tires are sold in the home markets of Canada would seem to require the statement that there is here no question of good faith involved. It is simply a question of whether one of the varied scales of prices at which they sell at wholesale shall be taken as the basis of foreign market value or whether each of such sales shall be disregarded and appraisement made on the basis of cost of production as defined in paragraph L of section III of the tariff act of 1913. Counsel for the appellants (the importers) contends for the latter method of appraisement upon the theory that there are no such transactions in this make of automobile tires in Canada as is contemplated by paragraphs K and R of the existing tariff law."

**The Foreign Value.**

In other words, the importers contended that because of the restricted method of distribution there was no foreign market value such as could be recognized by the American customs authorities in appraising the tires for duty. The General Appraiser, after treating the subject at great length, reaches the conclusion, however, that the manufacturers' prices, plus a 10 per cent. commission allowed the jobber of the tires, represents the foreign market value for customs purposes. The jobber is allowed a 2 and a 10 per cent. commission by the manufacturer, but the 2 per cent. commission is passed on to the dealer. The 10 per cent. commission is retained.

After reviewing the record in the case, which refers in detail to the methods of distribution of these tires to Canadian jobbers and dealers, Judge McClelland writes:

**Judge's Opinion.**

"I am satisfied that there is a market value of these Goodyear tires in Canada, and now it remains to determine which one of the scales of prices must be taken as the basis of appraisement. The price for export and to automobile manufacturers must be eliminated from consideration absolutely for reasons already stated. The prices to the jobbers, I think, must also be eliminated, for the reason that they are only made to a few persons designated in parts of the Dominion where the Goodyear Company has neither established branches nor designated dealers, and the sales to them are comparatively insignificant, being only about one-fifth of the quantity sold direct to dealers. Even in the respective territories of these jobbers dealers buy from them in wholesale quantities at prices equal to those paid by all other designated dealers who buy either from the parent company or its branches.

"I find as a fact from the evidence that these tires are sold throughout Canada to dealers who buy in wholesale quantities at uniform prices, which I hold must be taken as the basis of appraisement."

---

At the Toronto offices of the Goodyear Tire & Rubber Co., it was stated to HARDWARE AND METAL that it was not expected that the ruling will make any difference, from a business standpoint, as the consumer in the United States will have to pay the ten per cent. advance.

# EDITORIAL COMMENT

*BRIEFS*

DON'T forget to send in a photo of your Christmas Window Display for the competition being conducted by HARDWARE AND METAL.

---

IN THE opinion of those in close touch with the situation, business for 1920 is going to make new records in Canadian history. Are you ready for it?

---

IF THE announcements a retailer makes are habitually newsy and interesting, his store becomes fixed in the minds of buyers as one to go to. They learn involuntarily to look for his advertisements.

---

THE most expensive thing you can do is to guess, especially if you are trying to guess at your expenses, your mark-up or your profits.

---

*THE CHRISTMAS SEASON*

THE six weeks preceding Christmas are always among the busiest of the year for hardware merchants. This season has witnessed perhaps a record volume of business. The one great trouble of the merchants has been to get enough merchandise to sell. Cutlery is one of the seasonable lines that has been particularly scarce. A notable tendency has been shown on the part of the great buying public this year to buy wisely, that is to buy practical things instead of useless articles. This, in some measure, accounts for the record trade done by many hardware merchants. As usual there have been very heavy purchases of electrical devices. Handling electrical goods is a phase of retailing that is increasing in popularity with hardware merchants every year and it has grown to such an extent that in some lines they are now the leading distributors. This trade is bound to increase as in all parts of the Dominion there is a greater demand for power than ever before. During 1920 several million dollars will be expended in extensions to power lines and power plants and in power development projects. All this means that next year the hardware merchants will have more opportunities to sell electrical goods than they have had this year. In the country districts as well as in the city comes the call more and more for the service that electricity provides and while power from waterfalls and private plants is not always available, many hardware merchants are getting around this by selling to the farmers and others domestic plants which will provide all the electricity required for lighting the home, the farm buildings, running the churn, the washing machine and other things. There is a big field open in this and it is as yet merely in its infancy.

---

*REORGANIZING OUR TRADE DEPARTMENT*

LLOYD HARRIS, Canadian Trade Commissioner, in a recent speech, unintentionally brought out one of the strongest bits of evidence in support of the criticism of our Department of Trade and Commerce and our High Commissioners and other offices in London. In all the years they have been working, he pointed out, they have never gotten into touch with the agents of the Crown Colonies of the Empire. These men have been buying millions of dollars' worth of goods that Canada could have been supplying. They were not placed in Canada because our High Commissioner and agents never took the trouble to put Canada's products before them. During all these years Canada has maintained at great expense an agency in London that is within a few blocks of all these big buyers.

HARDWARE & METAL has frequently said that we needed a practical man at the head of the Department of Trade and Commerce and practical agents to represent us abroad. What further evidence does the Prime Minister want of the necessity for an immediate change?

Our Department of Trade and Commerce has persistently put obstacles in the way of the Canadian trade and technical newspapers getting in touch with probable buyers of Canadian goods throughout the world. They even forbade the Canadian Trade Commissioners giving information direct to any Canadian business newspaper. Are these papers of use? Here is a practical example—an item from an English news bulletin:

> *"The Federal Farmers' Co-operative Association of South Africa have informed the British Board of Trade that they and other institutions in that country receive the important U.S. and other overseas trade and technical newspapers but not the British. They draw attention to the fact that numbers of merchants and others consult these copies and the absence of British trade newspapers is said to be the cause of diverting trade into foreign channels."*

Also read the following communication from the

British Vice-Consul, Liege, dated September 8, which has been received by the Department of Trade and Commerce, Ottawa:

*"Thanks to the far-seeing and patriotic support of the editors of the leading British trade newspapers, of which no fewer than 25 are furnished, the normal equipment of this section is rendered much more important than would otherwise be the case, and the journals are studied by a large number of prospective customers for British goods."*

### *MERCHANTS CALL "STRIKE"*

ACCORDING to press reports the retail merchants at Walkerton, Ont., have signed an agreement that they will not purchase, at their place of business during business hours, tickets for entertainments. The merchants claim that solicitation for affairs of one kind and another have become so numerous, and canvassers selling tickets in advance such an intolerable nuisance that they had to do something. They got together and called a "strike" against what was, it is stated, termed by some of them, nothing but a "hold up."

### *MELTING SILVER COIN*

THE record prices which bar silver is commanding in the markets of the world is resulting in a practice that is new in the history of this country and may, unless stopped, affect retail business seriously. There seems little doubt that certain parties whose identity is not known, according to the authorities at Ottawa, are securing considerable quantities of Canadian silver coins and are melting them up. If continued for very long this will result in an acute shortage of silver for commercial purposes. In order to obviate this difficulty it is not unlikely that the high percentage of silver in Canadian currency will be partially replaced by alloys, which if melted will not make it profitable for those engaged in this business. It is stated that a new issue of coins containing a much lower percentage of silver will be struck off early in the new year.

### *TERRIFIC COST OF STRIKING*

OFFICIALS of the National Coal Association after checking up carefully the results of the recent strike give it as their opinion that the walk-out of the miners cost the public at least $100,000,000. The loss to operators exceeds $20,000,000, and the loss in wages to the miners was above $60,000,000. It can readily be seen what an enormous amount would have been wasted had the strike continued for any length of time, to say nothing of the suffering and hardship that would have been occasioned. All over the country business men are watching with particular interest to see whether the plan proposed for settling the trouble by President Wilson will work out. If it does it will be a decided step forward in the very important matter of adjusting differences between capital and labor. The plan provides for a commission to be composed of three representatives, one for the miners, one for the operators and one for the public at large. The commission named to adjust the recent strike is to make a report within sixty days. In the meantime the strictest conservation of fuel is being urged in order that there may be no further dislocation of business.

### *A REMARKABLE DEVELOPMENT*

THE situation brought about by the coal shortage and by the demand for oil for fuel purposes has resulted in a remarkable boom in oil development projects. During the month of November no less than 114 companies with a capital exceeding $400,000,000 were formed in the United States and Canada to prospect and develop oil. A very large percentage of these are undoubtedly of a purely speculative nature, some fakes, but many of the others are organized with the legitimate object of meeting the enormous demands for oil. During the next few months large sums of money will be spent in various parts of Canada in seeking for oil. All of this means sooner or later of course expansion in the distribution of oil-burning equipment. In this matter the hardware merchants are especially interested and it looks as if a big field is opening up. Certainly thousands of people will be only too glad if they can do so, to get away from the annoyance of coal shortages, shovelling ashes and so on.

### *MILLIONS FOR EDUCATION*

THE will of Henry C. Frick, the multi-millionaire iron and steel magnate, which was read this week at Pittsburgh, is interesting in that it shows that Mr. Frick shared with Andrew Carnegie and other men of great fortunes, who died recently, the opinion that they could do nothing better with their wealth than to devote it to education. Out of an estate of $132,000,000 left by Mr. Frick, all but $25,000,000 goes to educational and public projects. Harvard and Yale Universities alone receive about $25,000,000. Mr. Frick, like Mr. Carnegie, in his early youth experienced the greatest difficulty in obtaining either books or instruction. During his lifetime he was a large giver to educational projects in the hope that he might be enabled to help other young men to obtain that which he had not been able to secure.

# EVENTS IN THE TRADE

## Business Changes

Leduc, Alberta.—Bouska and Bergeron have purchased the hardware, implement and harness business of S. C. Tobin.

Gladstone, Manitoba.—McAskill Bros. and Adamson have purchased the hardware business of the Williams Hardware Company, Limited.

## Obituary

The death occurred, at Ottawa, of Thomas Lawson, president of Thomas Lawson & Sons, Ltd., foundry.

The death occurred, at Quebec City, of L. H. Gaudry, president of the Eastern Canada Steel and Iron Works, Limited. He was also president of L. H. Gaudry & Co., Limited, importers of pipes and waterworks supplies.

H. W. Karch, senior member of the firm of Karch Bros., Hespeler, Ont., foundry, dropped dead on the street on Tuesday.

## Fire Losses

H. H. Robertson & Co., Ltd., Sarnia, Ont., manufacturers of asbestos and metal coverings, sustained a loss of $25,000 by fire.

Fire, which for a time threatened the whole plant of the Dominion Glass Co., Toronto, completely destroyed a large warehouse, causing a loss of $100,000.

The premises of the Emo Hardware Company, at Emo, Ont., were completely destroyed in a fire which swept away part of the business section of the village.

## Personals

M. S. Saunders, of the Ashdown Hardware, Calgary, was a recent visitor at Trail, B.C.

John White, president of the London Rolling Mills, London, Ont., has left to spend the winter in California.

W. F. Macpherson, of Prescott, secretary of the Ontario Retail Hardware Association, has returned, after spending several days in New York.
H & M

W. H. Wortman, formerly head of the firm of Wortman and Ward, manufacturers of pumps, washing machines, etc., at London, Ont., is in a very critical condition, following a stroke of paralysis.

Charles D. Home, for several years manager of the hardware department of McKelvey & Birch, Ltd., Kingston, Ont., has been appointed to the position of buyer for the company in all departments with supervision of several new sections lately added. Maj. W. A. Mitchell, returned from overseas, has taken full charge of the hardware department. Before enlisting, Maj. Mitchell was in the hardware busines for himself.

## Trade Notes

Joseph Rousseau & Co., tinshop and plumbers, has been registered at Montreal.

The Dayton Airless Tire Co. of Canada, Ltd., Toronto, has gone into voluntary liquidation.

W. Walker & Son, Ltd., hardware, 1228 Yonge St., have commenced work on a large, new warehouse.

The Crompton Car Company, Limited, has been authorized to increase its capital from $25,000 to $75,000.

Work is to commence at Hamilton, Ont., shortly, on a new factory for the McPherson Wire Company.

The surrender of the charter of the McGregor-Banwell Fence Co. has been accepted by the Provincial Secretary.

Paul L. Turgeon has been appointed liquidator of the Canada Stove and Foundry Co., Ltd., Montreal and St. Laurent.

The Grey Furniture Co., Ltd., capital $25,000, of Neustadt, Ont., has been granted a Provincial charter.
H & M

Work has commenced on the erection of a $35,000 addition to the paint manufacturing plant of the Benjamin Moore Co., Ltd., Toronto.

The Canadian Aladdin Company, manufacturers of standardized frame houses, will erect a $70,000 factory at Peterboro, Ont., shortly.

E. S. Hubbell & Sons, hardware merchants, Thamesville, Ont., have purchased the interests of G. A. Fraser in the Thames Canning Co. of that town.

The premises at St. Marys, Ont., occupied by J. M. Adam, hardware, have been sold to a bank, and Mr. Adam will move shortly to new quarters on Queen street.

Sorrey & Nugent, of Toronto, manufacturers of plated ware and sterling silver articles, have been taken over by the Canada Silversmiths, 64 Richmond Street East, Toronto.

## Western News

Work is proceeding rapidly on the new factory being built at Winnipeg by the Brett Manufacturing Co., and the firm expects to be occupying it by the New Year.

## Montreal News

J. W. Andrews, of the Remington U-M-C Co., Ilion, New York, was a Montreal visitor this week.

John Irwin, managing director of McArthur-Irwin, Limited, was in New York several days this week.

J. L. Demers, hardware merchant, Thetford Mines, Quebec, was in Montreal this week calling on the jobbing trade.

A. W. Poole, managing director of Stewart and Wood, Limited, Toronto, was a week-end visitor to Montreal.

Hugh Kearns, managing director of B. & S. H. Thompson and Co., Ltd., who underwent an operation in Montreal, is making a rapid recovery.

The James Walker Hardware Company have made a change in their annual inventory date to the end of the calendar year. This has been done to more nearly conform with the plan followed by the jobbing houses.

The Montreal Gun Club will hold a tournament on their ground at St. Laurent on Saturday, January 3. Plans are being made to afford an interesting day and an elaborate program is contemplated.

E. F. Stephenson has joined the sales forces of the Canada Paint Company and will cover New Brunswick territory. Mr. Stephenson will make his headquarters in St. John.

A Montreal representative who attended the annual convention of the automobile accessories branch of the Hardware Association of the United States, reports an attendance there of over 600, and where there were 225 exhibitors.

R. W. Gould, well known in Montreal as a newspaper man, has been appointed to the vacancy created through the resignation of W. P. Hughes as secretary to the Montreal branch of the Canadian Manufacturers' Association.

Fred D. Locker and B. K. Trotter were elected president and secretary, respectively, for the year 1920, and officers of the Mantel and Tile Dealers' Association, the annual meeting being held in the rooms of the Montreal Builders' Exchange.

W. P. Hughes, who has been secretary of the Montreal branch of the Canadian Manufacturers' Association for some time, has resigned his position. This takes effect immediately. Mr. Hughes, it is stated, will enter into business on his own account as importer and exporter.

Mr. Westman, of the Chatham Malleable and Steel Manufacturing Co., Chatham, Ont., was this week a Montreal visitor.

## Address and Cane For Mr. John Hepner

Upon the occasion of his severing his active connection with the Stevens, Hepner Company, at Port Elgin, Ont., Mr. John Hepner was presented by the employees with a handsome gold-headed cane and an address. Mr. Hepner has been in the brush manufacturing business in Port Elgin for thirty-six years and is retiring, owing to poor health. He is leaving shortly to spend the winter in the South.

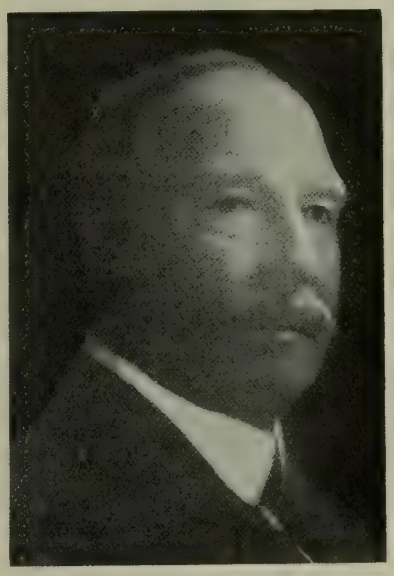
## Burglars Rob Store of Merrill & Hubbard

**Barrie, Ont.**—Some time between the closing hours of Wednesday night and the following morning, visitors called at the hardware store of Merrill & Hubbard, and relieved the firm of a number of small articles and what spare change was available. It appears that the parties had a pretty fair idea of the layout of the store. The cash register was relieved of its small change, while the cash box in the vault was also rifled of the silver which was left for early morning change. Owing to the large stock displayed for Christmas, it is difficult to know the amount of goods taken, but some small articles, such as manicure sets, etc., are known to have disappeared.

## Schwab in Control of United Zinc Smelting

**New York.**—It is learned here that Charles M. Schwab has acquired control of the United Zinc Smelting Corporation. No details are forthcoming regarding the consideration involved. It is intimated, unofficially, that plans are already under way for the immediate development of the plant and its facilities.

The smelter of the United Zinc is located at Moundsville, W. Va., and the main office is in this city. In connection with the acquisition, it is learned that United Zinc has an authorized capital of 600,000 shares of no par value. The following are understood to have been elected officers: B. Lissberger, president; Otto Proelss, vice-president and general manager; and H. W. Lohman, vice-president and treasurer.



The I. X. L. Manufacturing Company, Limited, head office Palmerston, Ont., capital $40,000, plans to manufacture and deal in woodenware, metalware, electric batteries, etc.

Border City Auto Supply Company, Limited, capital $40,000, head office Windsor, Ont., plans to manufacture and deal in automobile parts and accessories. H & M

# New Lieutenant-Governor of British Columbia Has Had a Long and Practical Experience

### Lt.-Col. E. G. Prior Combines Business Training With Technical Knowledge That Makes Him Especially Valuable to the Province

LIEUT.-COL. E. G. PRIOR, the new Lieutenant-Governor of British Columbia, is president of the hardware firm of E. G. Prior & Co., Ltd., of Victoria. He is 66 years old, and a native of Yorkshire, England. Throughout his career, he has always taken a keen and very active interest in all matters pertaining to public welfare. He is a former Premier of the province of which he is now the chief official.

*LT.-COL. E. G. PRIOR*

*As stated in last week's issue of* HARDWARE AND METAL, *Lt.-Col. Prior has been appointed Lieut.-Governor of British Columbia.*

Lt.-Col. Prior combines a business training with technical knowledge of a kind that is particularly valuable to him in British Columbia. He is a mining engineer and surveyor, and knows the needs of the Coast as few others do, having been Government Inspector of Mines for British Columbia for three years. He is a life-member of the North England Institute of Mining and Mechanical Engineers.

He has been very active in military matters, being a former commander of the 5th B.C. Regiment Canadian Garrison Artillery, twice president of the Dominion Artillery Association, and in command of the team that went to Bisley in 1890.

His public career began with his election to the Legislature as representative for Victoria in 1886. He resigned to become candidate for the House of Commons in 1888, and was returned by acclamation. He was re-elected in 1891, in 1896, and again in 1900. He was Controller of Inland Revenue under the administration of Bowell and Tupper, with a seat in the Cabinet. He was Premier of the Province in 1902 and 1903. Lt.-Col. Prior is also a past-president of the Victoria Board of Trade.

During the war, in a quiet and unostentatious way, he accomplished a great deal. His son served overseas.

# Fined $200 For Failure to Keep Proper Books of Account

### Conviction Secured by Canadian Credit Men's Association in Charge Laid Against Merchant at Sault Ste. Marie

AS stated in a previous issue of HARWARE AND METAL in connection with a charge of perjury with intent to defraud creditors, laid under the Ontario Bulk Sales Act, against L. W. Putnam, by the Canadian Credit Men's Association, Putnam was found guilty.

A conviction was secured and Putnam has been sentenced to a term of three months at the Jail Farm.

The Canadian Credit Men's Association is watching closely for cases of merchants who are inclined to be dishonest with their creditors and plan to prosecute.

**Have Another Case**

A few days ago they prosecuted in another case, that of S. Joseph of Sault Ste. Marie, Ont. Mr. Joseph, after having been in business at the Soo about nine months, made an assignment, and upon a statement being prepared, there was found to be a very large deficit. The case was followed up by the association, and while it was found impossible to secure direct evidence of fraud, they alleged that he had committed perjury in connection with his examination for discovery.

**Failed to Keep Books**

He was arrested on this charge, and was also charged with failure to keep proper books of account.

He was tried before a jury and acquitted on the perjury charge, but convicted on the other and sentenced to two months in jail, and in addition to pay a fine of $200 or to serve an additional two months in jail.

## Larger Premises For The Barrett Company

HARDWARE AND METAL is advised by the Barrett Company of Montreal that they contemplate an almost immediate expansion of their warehouse, manufacturing, and office space at Montreal. In speaking with D. P. Hatch, sales manager of the company, HARDWARE AND METAL was informed that a three-storey brick building would be erected adjoining the present plant in Montreal, and which, it is hoped, will be ready for occupation for the active season of 1920.

The new premises will cover an area of 20,000 feet, and with the three-storey structure to be erected this will afford additional accommodation of 60,000 feet. The building will be of brick construction, and new special machinery will be installed for the manufacture of prepared roofing.

**Toronto Plant to Be Enlarged**

Mr. Hatch also stated that plans were already completed for a $100,000 addition to the Toronto plant, and the extension there will be similar to that undertaken at Montreal.

## McClary's to Enlarge The Montreal Branch

The Montreal branch of the McClary Mfg. Co., located on Wellington street, have completed the purchase of a 12,000 square foot property adjoining their present plant.

In speaking with John C. Newman, manager of the local plant, HARDWARE AND METAL was informed that the new premises would be used for a new addition, of the full size of the property, the building to be of three storeys. This would afford an additional 35,000 to 45,000 square feet of space for manufacturing and warehouse purposes. The purchase price is said to be $3.50 per foot or a total of $42,000.

Mr. Newman intimated that considerable manufacturing would be done at Montreal. It is expected that building operations will commence in the immediate future.

## Incorporations

Bissell Carpet Sweeper Company of Canada, Limited, capital $80,000, head office Niagara Falls, Ont., plans to manufacture and deal in carpet sweepers.

Multiple Electric Products Company, Inc., head office Toronto, plans to manufacture and deal in electrical devices.

W. Lee, of Markdale, Ont., has purchased a factory at Aylmer, Ont., and plans to manufacture kitchen cabinets and woodenware.

Super Cement (America) Company, Limited, head office Toronto, capital $500,000, plans to manufacture and deal in compounds and preparations of cement.

## General Manager of Peckovers, Limited

Announcement is made of the formation of a new warehousing, jobbing and importing company in Toronto under the name of Peckovers Ltd. J. G. Near, for the past eighteen years with the firm of Drummond, McCall, has been named as general manager.

The principals in the firm are C. R. Peckover, of the firm of Baines and Peckover, and Mr. Near. Mr. Peckover came to Canada twenty-three years ago from Scranton, and was with the hardware firm of Rice Lewis & Son, Ltd., Toronto.

*J. G. NEAR*

*Of Toronto, who has been appointed general manager of Peckovers Limited*

The new firm's location is at Spadina Avenue and Fleet Street. The company is capitalized at $500,000.

## Montreal Association Elects New Officers

At its annual meeting in Montreal the Metal and Hardware Association section of the Montreal Board of Trade elected the following officers: President, A. Prud'homme; vice-president, Edward Goodwill; treasurer, W. J. Hayes; directors, George Childs, R. H. McMaster, W. S. Leslie, and J. W. Pyke. Mr. Leslie was chosen again this year as the association's nominee for re-election to the council of the Board of Trade.

One of the interesting features of this year's meeting was that of deciding to contribute the cost of the annual dinner, which has been discontinued during the war, for charitable purposes.

In the absence through illness of the president, Mr. Prud'homme, Edward Goodwill occupied the chair.

## Taylor-Forbes Co. Insures Employees

The Taylor-Forbes Company, Limited, of Guelph, Ont., is putting into immediate effect a profit-sharing plan by insurance for its employees. A notice to the employees states:

That the Taylor-Forbes Company has insured the lives of all its employees according to the length of service with the company, beginning after the first three months with $500, and ending with $3,000 as the maximum amount, as shown in the list below.

Medical examinations are not required.

Any employees who were in the army will be allowed full time for such service as part of their working years. Every year of continual service with the company will add to the insurance policy value up to $3,000. It will not in any way interfere with any advance in wages or earning capacity. Employees in continuous service three months to one year will receive $500; one year to two years, $600; two to three years, $700; three to four years, $800; four to five years, $1,000; five to six years, $1,200; six to seven years, $1,300; seven to eight years, $1,400; eight to nine years, $1,500; nine to ten years, $1,000; ten years' service, $2,000. For each year after eleven years $100 per year will be added, until the sum of $3,000 is reached. When an employee has served nineteen years he receives a policy for $3,000. Employees who were in the service of the company on or before April 1, 1902, will receive a $3,000 policy.

**YOUTH ADMITS BURGLARY**

Some time ago the Wells and Emmerson hardware store in Port Arthur, Ont., was entered and a number of revolvers stolen. No trace was found of the burglars until the Fort William police arrested a youth fifteen years of age, whom they found in the act of committing a burglary on the premises of Rutledge and Jackson. The lad had two loaded automatic Colt revolvers in his hip pockets. He confessed to the robbery in the Port Arthur hardware store and said the revolvers found on him were two of the fourteen taken at that time.

The boy, who is the son of respectable Fort William people and a Collegiate Institute pupil, was, evidently, prepared to undertake a complete campaign of crime. He had a brace and bit, a flashlight, a number of keys, a rat tail file and other things used by the followers of old Sykes. He was caught while endeavoring to force the back door of the Fort William store between 1 and 2 o'clock this morning. He gave the police a run, but he was captured without mishap.

# Says "The Golden Rule" is the Real Solution of Capital and Labor Problems

## Hamilton Manufacturer Tells of Remarkable Results That Are Being Obtained—Plan Has Been Followed Out Now for Five Years With Great Success

AT the present time when troubles due to differences between employers and employees are more numerous and more acute than at any time in the history of the world, it is interesting to note the results that the application of the "Golden Rule" have had in a Hamilton, Ont., factory.

At the annual dinner of the employees of the Dominion Sheet Metal Corporation, President A. T. Enlow stated that for the past five years the firm has been applying the Golden Rule in all dealings with employees, and in that time they had never been asked by any employee for an increase in wages, that no employee had ever stated that he was dissatisfied, and in no way had any complaint regarding shop conditions ever been brought to his attention.

**In New Warehouse.**

The dinner was held in the large new warehouse recently erected by the company. A unique touch was given to the gathering when as the toast to the King was being honored, the lights were suddenly turned out, and left those present standing with glasses uplifted, singing "God Save The King." A spotlight was turned on, showing Union Jacks and Canadian emblems. These were fastened directly in front of the president's place of honor. The effect was not only striking but impressive.

J. M. Paterson, of the shipping department, was chairman for the evening. The new building consists of a two-storey steel and brick structure, 50 x 140 feet. It was profusely and very attractively decorated for the occasion. Conspicuous among the flags were two showing that in both 1918 and in 1919 100 per cent. subscriptions had been obtained for the Victory Loan.

**A Fine Program.**

The program included choruses by all present, songs by W. A. McCutcheon, of Hamilton; Scotch songs by Miss Grace Miller, and a number of speeches. The toast to Canada was responded to by Mr. W. H. Cooper, the contractor, who built the new plant.

Russel T. Kelly replied to the toast, "Co-operation," in a manner which left no room for criticism. He made a hit with his finale, a recitation entitled, "Lifters and Leaners."

**Teachers' Salaries.**

The reply to the toast to the ladies could not have been handled more gracefully than by Mr. Geo. A. Simpson, of the Steel Co. of Canada. During his address, he brought out a point which should receive the attention of every hardware man in Canada who has anything to say in municipal affairs, and

*A. T. ENLOW*
*President of the Dominion Sheet Metal Corporation, Hamilton, Ont.*

that is the paying of better salaries to the women who are responsible for training of Canada's children—the school teachers.

**President's Address.**

President A. T. Enlow, in responding to the toast to "Our Company," made some decidedly interesting comments in regard to the firm's policies and especially in reference to its profit-sharing plans. He announced that every employee who has been with the firm six months was to receive an Insurance Policy for $1,000, which will increase at the rate of $100 a year until a maximum of $1,500 is reached, the benefit payable on death or total disability to his family.

The Premier Benefit Club is kept up by employees paying 50c each a month. This last year they paid in about $360, paid out $900, and have in the treasury at the present time $2,500, and the fund has only been running a year and a half.

**Other Payments Too.**

He explained that sometimes it is possible to make other payments also. For instance, if the firm is able to make a good deal, such as in the Salvage of Damaged Stock, Big Product Sales and Sales Effected, or through Shop Economies, ten per cent. of the amount was turned over to the Benefit Club.

In regard to the profit-sharing or stock proposition, he stated that the employees pay in 2% or $2 a month on each $100 share, and they get the benefit of the regular 8% dividend without any carrying charge for interest, and in addition they also are credited with all dividends paid on the common stock, so that up to date for the last half of 1919 they have paid in $12 per share and have received additional benefits of $9, a total of $21.

J. C. Edwards, Hamilton representative of HARDWARE AND METAL, was introduced, and stated that he had found much pleasure in his two years of contact with the manufacturers of Hamilton and particularly drew attention to the pronounced "get-together" spirit which was in evidence in Hamilton. This spirit, he said, when carried out between employer and employee, as seen in the splendid banquet given by the Dominion Sheet Metal Corporation, must result in mutual benefit.

In winding up the programme, a vote of thanks was given the entertainers, speakers and the men who so successfully carried out the programme.

**REED'S NEW CATALOGUE**

Reed Small Tool Works, Vine and Cherry Sts., Worcester, Mass., are sending out their new catalogue, No. 4, in which a revision of list prices is noted. This 5¼ in. x 7½ in. booklet, consisting of forty pages and twenty half tones, covers the Reed reliable line of micrometers much more fully than any of their descriptive matter heretofore issued, and shows a greatly broadened line. The front and back cover is a facsimile of the dealers' poster recently supplied the hardware trade—the design being a micrometer in gray, against a blue and black background.

Display calendars, 11 in. x 5 in., attached to posters described above, are also appearing in the factories throughout the country and are attractive enough to claim a position of prominence either in shop or office.

**Gemco Manufacturing Co.**

The Gemco Manufacturing Co., 740 South Pierce Street, Milwaukee, has issued a fifty-one page catalogue listing the lines of automobile accessories that are manufactured by the firm. The catalogue is most attractively printed, and is profusely illustrated. Copies will be sent to readers of HARDWARE AND METAL upon request.

# THE CLERKS DEPARTMENT

## Amazing Facts About Retailers Who Think They Are Making Money, But Are Losing

### Professor Melvin Copeland, Director of the Bureau of Business Research at Harvard, Tells of Leaks That Take Away Profits—There May be Ideas Here That Will Save You Money

THERE is a funny side to many of the mistakes made by some of the retailers Professor Copeland tells about, but they are serious because they mean discouragement at best to the merchant and very often failure. There is a good deal in this article for merchants to think about. Have you really got the right dope on yourself? Are you making good or can you improve?

Here is Professor Copeland's story as told in the "American Magazine":

There are more than half a million retail stores in this country; and of course it is a fact that every human being of the hundred and ten millions of our population has some contact with these establishments.

If the stores in your community are conducted on sound and progressive methods, you profit personally in the service you receive, the goods you may buy, and the prices you must pay for them.

Many of these stores are admirably conducted, and are building up their businesses on firm foundations. On the other hand, one frequently runs across examples of practices that are not in accordance with the best methods and policies.

**The Income Tax**

Last winter, when the time came to pay the income tax, a certain retailer figured out what he thought his profits had been for the preceding year, and on that basis paid a substantial sum to the Government.

He had a good deal of trouble in determining his profits, for he had no real system of accounting. Later he submitted a report to the Bureau of Business Research at Harvard University, and it was checked up with the Harvard System of Accounts for Retail Grocers. When his statement had been put into shape, he discovered to his amazement and chagrin that instead of having made the profit on which he had paid an income tax, he actually "lost money" during that year.

**Clue to Troubles**

In that man's experience there is a clue to a large share of the troubles of a good many retail stores. For the commonest fault among the owners of these stores is carelessness in accounting. A large number of merchants have no accounting system whatever. They do not know how much it costs them to run their business, and therefore, they do not know how much they are making, or whether they are making anything at all.

**Limited Details**

The only facts which many of them possess, in regard to their financial position, are these: the amount of money in the cash drawer, their balance at the bank, the amount they owe, and the amount that is due them.

It may seem incredible, but a great many merchants never even take an inventory. This is particularly common among grocers and druggists, because they handle a large number of small articles, which make stock taking difficult.

A druggist's inventory is especially hard to take, as you will realize if you go into such a store and look around at the accumulation of hundreds of small items; powders and crystals to be weighed, pills to be counted, liquids to be measured, and so on. Yet the thing can be done. And, if it is not done, the owner can only guess at the value of his stock on hand.

**Is Only One Point**

But this item is only one point which his accounts ought to cover. The essential thing for him to know is how much it costs him to run his business. There is a story which I have told so many times in my talks to merchants that probably some of the readers of this interview will recognize it; but it is worth repeating.

The proprietor of a general store in a country town was asked how much it cost him to do business.

"Why," he said, "it doesn't cost me anything! I own my store, I run it all by myself, and my team of horses does the hauling and delivering. So it doesn't cost me a cent."

**Cost Him Money**

Didn't it? If he had not occupied the store himself, he might have rented it for so much a month. In any case, the store had cost him money which, if he had not invested it in that way, he could have put out at interest. So he must charge against his business at least the interest on that money.

If he had not worked in his own store, he could have earned money in some other way; so he must charge the business with wages; or salary, for himself. If he had not used his horses in his own business, he could have sold them or hired them out. So he must charge that expense also. And yet he thought it did not cost him a cent to do business.

**A Similar Case**

Here is a similar case: A grocer told me that he was discussing business with another grocer in his town, and the latter said to him:

"Of course, it doesn't cost me as much to do business as it costs you. I own the building, so I have no rent to pay. And my son and my daughter work in the store with me, so I don't have to hire any help."

"But don't you charge yourself rent for the store?"

"Oh, no!"

"Well, your boy was earning $14 a week before you took him into the store. Don't you charge yourself with his wages?"

"No, I don't pay him anything; and I have to feed him anyway."

**Finds Many Cases**

Cases like that could be multiplied almost indefinitely. I once called on a shoe dealer in Chicago to have him fill in the question blank sent out by the Harvard Bureau of Business Research. Among other questions was this:

"Do you charge the business with a salary for yourself?"

He hesitated and then answered, "Yes, you may say I do."

"Do you rent the store, or do you own it?"

He said he owned it.

"Do you charge the business with the amount for which you could rent the store if you did not occupy it?"

He hesitated longer than before, but finally said, "Yes, you may put that down."

The next day I happened to meet him again and he said to me, "See here! I've been applying those questions to the other store I run; and I find that if I charged the business with what I 'should,' I'd have to do $30,000 worth of trade there. It can't be done! So I've decided to close out that store."

If this man had understood the right way to figure costs, he would have known in advance how much business he would have to do in that store and might have saved himself both money and trouble.

**Accounting Essential**

Here are two other cases which show the importance of having a good accounting system:

A certain retail grocer located his store at a point which proved an exceptionally good one. Soon after he opened it, several high-class apartment houses were built there, giving him an excellent trade. He was doing a business of $150,000 a year; whereas the average grocer does one of only about $30,000 a year.

As a representative of the Bureau of Business Research I called on this man five years ago to get information. I found that he had no accounting system and that he kept no record of stock. He did not know how much he had on hand in any line; and as his clerks were aware of this fact, there was a chance—and a temptation—for them to defraud him. If he left the store, they could make cash sales without recording them, pocket the money, and he would be poorer, but none the wiser, for he could not check up and find that the goods had been sold. His expenses he tried to watch from day to day, but with never any accurate, comprehensive record in black and white that could relieve the burden on his mind and serve as a guide in the future.

**Never Took Vacation**

The result was that he tried to be in the store constantly, scarcely leaving it even to get his luncheon. He never took a vacation. As he kept no accounts to speak of, he was the only person who had even a meagre idea of how his business affairs stood. I asked him what would happen if he should be sick, or should die. But, like many business men, that was something for which he had made no provision.

He clung to his method, or lack of method, of doing business; and the result was that last spring he was forced to close his store. He ascribes his failure to prohibition, which put an end to his trade in wines and liquors. The truth undoubtedly was that he had been headed for trouble for some time: but, because he had no exact knowledge of his costs, he had not realized it. The only factor he could put his finger on was prohibition, so he blamed that.

**Knew the Details**

Another merchant, with a smaller business, in a poorer location, had a thorough accounting system in "his" store. Because of that, he knew every detail of his affairs. He compared his figures, furthermore, with the averages for other stores. If one item of expense was too high, he cut it down. He knew what percentage of sales each clerk made and could push the laggards, or get rid of them altogether if they remained inefficient. Largely because he knew what was happening in every phase of his business, he made it a paying one.

When the prohibition law was about to go into effect, he told us that he was not at all worried. He knew just what that part of his business had amounted to, and he already had his plans made to take up the loss by expanding his trade in the grocery end of it. The first man had a far better opportunity than this one had, yet he failed. Not because prohibition came in, but because sound business methods did "not" come in, so far as his store was concerned.

**Primitive System**

A large wholesale doing a business of $7,000,000 a year, had been using an accounting system which was primitive and out of date. They put into effect the standard accounting system for wholesale grocers, and the head of the firm told me afterward that already it had saved them

a great deal of time, trouble and money, particularly in making out their income tax returns. They now know where they stand all the time; they can compare their results more intelligently from year to year: and they are operating more economically.

There are in the United States about 200,000 retail stores for the sale of groceries alone; and there are over 100,000 more where groceries are sold in addition to other articles. This makes the grocer the most conspicuous figure in the country, from the point of view of numbers, in retail business. He is also a leader in the list of business failures.

**Little Experience**

One reason for this latter fact is that the grocery trade attracts men of small capital and of little or no experience. A man would scarcely think of going into the drug business, for example, or hardware, or jewelry, unless he knew something about it.

But he knows he can tell tea from coffee, salt from sugar, butter from cheese. The articles he will sell are familiar friends, so he inclines toward them. He has a few hundred dollars put by, he finds that it is easy to get credit from the wholesalers, so he opens his little store. He thinks that he will make the difference between what his goods cost and the price he gets for them. He knows little about operating expenses, depreciation, turnover, interest charges, or any of the items he must add to the sum he pays outright for his stock.

**Location is Important**

Very often, too, he does not know how to choose his location. One of the common mistakes made by these amateur merchants is that of opening a store away from "the centre of trade." Almost all trade, in any line, flows to certain centres. The man who locates his store too far from one of these centres, or from a main current of traffic, is handicapping himself. He should count the number of possible customers, within a short radius of the point he is considering. Let him stand out on the sidewalk and count the people who pass. That is the way the chain store proprietors do. They don't "guess" about a location. They go after the facts.

Occasionally you will find a prosperous grocery in a purely residence district. But they are fully stocked stores, where complete orders can be filled. Their proprietors specialize in quick deliveries and give the customer the benefit, in slightly lower prices, of their saving in rent because of the cheaper location. But that is a well-thought-out plan, quite different from the haphazard opening of little shops away from the trade centres.

**Proprietor's Duties**

Another common fault in the management of retail stores is that frequently the proprietor does not seem to realize what his own duties should be. I came upon one instance which, although it is an extreme one, is a good illustration.

Going into a retail shoe store in a Western city a few years ago, I found the proprietor engaged in washing windows! When I asked him why he was doing that kind of work, he replied: "Everybody else is too busy!"

While this, I admit, is an extreme case, there are hundreds of proprietors who have a mistaken idea of the role they should play. I remember going into a dry-goods store where fourteen sales people were employed. Yet some of them were standing around idle, while the proprietor was selling goods.

**Important Matter**

This question of what the head of the business should be doing is a very important one. In this case, the man was by instinct and preference a salesman; probably he was a good one. If the store had been owned by a firm, it would have been a legitimate arrangement to divide the duties among the partners, giving this one active oversight of the selling end.

But that was not the fact in this case. The man I speak of was the sole proprietor. As such he was the manager of the store; and in an establishment of that size the managerial duties certainly were arduous enough to have demanded all his time and thought.

If he had been making a few sales merely as an object lesson to his clerks, it would have been justifiable. But he was doing it simply because he liked it. He probably excused himself by saying that sales are the most important feature in a business.

But whatever the proprietor may think of their importance, if he is to be successful, he realizes that they do not constitute his first duty, which is to manage his business as a whole.

**Get in Deep Water**

Another trouble which one sometimes finds in the retail business is that men who have made a success with a small store try to branch out and become large proprietors without appreciating the difficulties of managing a large store. There is scarcely a community of any size where such cases cannot be found. Here is a typical one which came to my notice not long ago. Not wanting to name the proprietor, we will naturaly call him Smith.

About ten years ago Mr. Smith opened a dry-goods store in a good location, but in a poor building, in a certain Eastern town of about 25,000 population. Across the street was the leading dry-goods store; a well-established concern which, however, had changed management and specialized in showy goods without much regard to real values.

Smith was a quiet, rather brusque, but conscientious man. His stock was not especially attractive, but the quality was good. Women soon began to say, "Well, you can depend on what you buy at Smith's!"

**Business Increased**

Because he was this type of man, he specialized in goods where quality counts; linens and silks, for example; and because the store was small, he spent a good deal of his time in "the front end;" not actually selling goods, but supervising his clerks and getting acquainted with customers.

Business steadily increased; he rented the two adjoining storerooms, and finally, a few years ago, bought the property and put up a modern department-store building.

From the time he moved into that building, his business has declined. Probably he has given his problem, which has become a pressing one, a great deal of anxious thought. I doubt, however, whether he has thoroughly analyzed it. This is the way in which his difficulties have probably arisen:

**Investment Too Great**

In the first place, his investment in the new building was too great for him. He was obliged to mortgage it heavily, and this put upon the business a load of interest charges, as well as of insurance, taxes, and up-keep. With this burden to carry, his resources were not great enough to enable him to put in a large stock. The result was that his big new store seemed to be all store and little merchandise! It looked bare and empty.

Moreover, it was the same kind he had carried in the old place. Then his goods had seemed better than their environment. Now the environment seemed better than the goods.

The most important cause of Smith's present distress is that he is essentially a small store man. And the proof is that his personal program is just the same now that it used to be. He spends nine-tenths of his time in the front of the store, where he really acts as a floor-walker, meeting people, directing them to different departments, and having a general supervision over that part of the business.

**Not an Executive**

He is not an executive; he is a store supervisor. When his business was small and was run on two or three settled ideas, he succeeded, because all he had to do was to supervise the carrying out of these ideas. But as the manager of a large store, his duties are quite different. They are largely questions of finance, of planning broadly, of constantly developing new ideas, and of picking the subordinates to carry out those ideas. As a careful and honest supervisor, Smith would be a success. As a broad executive, he is a failure.

## *The Shoe on the Other Foot!*

—FROM THE RETAIL PUBLIC LEDGER.

# Retail Association Urges Its Members to Keep Accurate Accounts

THE officers of the Brooklyn Retail Merchants' Association, in an effort to induce more accurate accounting methods among the members, are sending them the following "14 Points," with the request that they be followed:

First—Charge interest on the net amount of your total investment at the beginning of your business year, exclusive of real estate.

Second—Charge rental on real estate or buildings owned by you and used in your business at a rate equal to that which you would receive if renting or leasing it to others.

Third—Charge, in addition to what you pay for hired help, an amount equal to what your services would be worth to others; also treat in like manner the services of any member of your family employed in the business not on the regular payroll.

Fourth—Charge depreciation on all goods carried over on which you may have to make a less price because of the change in the style, damage, or any other cause.

Fifth—Charge depreciation on buildings, tools, fixtures, or anything else suffering from age or wear and tear.

Sixth—Charge amounts donated or subscriptions paid.

Seventh—Charge all fixed expense, such as taxes, insurance, water, lights, fuel, etc.

Eighth — Charge all incidental expenses, such as drayage, postage, office supplies, delivery expense of horses and wagons, telegrams and telephones, advertising, canvassing, etc.

Ninth—Charge losses of every character, including goods stolen or sent out and not charged, allowance made all customers, all debts, etc.

Tenth—Charge collection expense not enumerated above.

Eleventh—When you have ascertained what the sum of all the foregoing items amount to, prove it by your books, and you will have your total expense for the year.

Twelfth—Divide this figure by the total of your sales, and it will show you the per cent. which it has cost you to do business.

Thirteenth—Take this per cent. and deduct it from the price of any article you have sold, then subtract from the remainder and what it cost you (invoice price and freight), and the result will show your net profit or loss on the article.

Fourteenth — Go over the selling prices of the various articles you handle and see where you stand as to profits, then get busy in putting your selling figures on a profitable basis, and talk it over with your competitor as well.

# Equalization of Imports and Exports Only Way to Restore Exchange Rates, He Says

FOREIGN exchange is a commodity and present demoralized depreciation in rates for sterling and other European exchanges is a normal expression of the law of supply and demand, declares James S. Alexander, president of the National Bank of Commerce, New York. Restoration of an approximate equilibrium of the imports and exports between the United States and Europe and a return of the currencies of Europe to a gold basis are the fundamental factors which will restore the normal demand for foreign exchange and bring it back to normal levels, he says.

Mr. Alexander has taken a leading part in considering the foreign trade situation, having been chairman of the Committee on Credit and Finance at the Atlantic City International Trade Conference, held with unofficial representatives from Europe, under the auspices of the Chamber of Commerce of the United States, and being now chairman of the Executive Committee of the National Committee on European Finance. He is chairman of the Board of Directors of the French-American Banking Corporation and a director of the Foreign Finance Corporation. His statement in part is as follows:

"Depreciation of the foreign exchanges is primarily only a reflection of deeper problems in the relation of exports and imports between America and Europe. The problem may be simply stated as follows:

"When exporters sell to foreign buyers, they draw checks, drafts, etc., on those foreign consignees or their banks for the amounts due. These bills are drawn in foreign money, preponderantly pounds sterling, that is, on houses in London, long the world's international clearing house. Americans drawing these bills sell them in the foreign exchange market for what they will bring, which under normal conditions fluctuates within narrow limits of face value. The total volume of such checks and drafts coming into the foreign exchange market constitutes the supply of foreign exchange in existence at that time. The foreign exchange market consists of foreign exchange houses whose function is to buy exchange, say in New York, on London, and send it there for collection or the establishment of balances.

"The question as to what will correct the situation can be answered on general principles without any attempt to prophesy. Foreign exchange cannot come back to parity until the restoration of the gold standard in Europe corrects the depreciation of European currencies and until the restoration of approximate equilibrium between exports and imports in respect to Europe again makes the demand for foreign exchange approximate the supply."

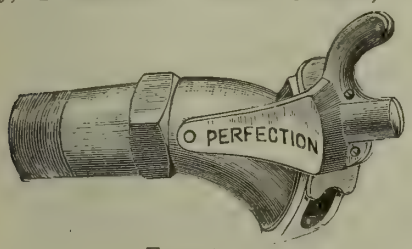
# Misuse of "Profiteer" Hurts All Business

Business men of many cities have, no doubt, many times had the feeling which recently found expression in a bulletin of the Better Business Bureau of Los Angeles, California, relative to the loose employment of the word "profiteer," both in advertisements and in editorial columns, says a bulletin from the Associated Advertising Clubs. Just such action might be taken by other advertising clubs, as well as other local bodies of business men, the National Vigilance Committee suggests. The statement, signed by A. H. Wilkins, secretary of the Bureau, is as follows:

"For a considerable time past, a vast amount of publicity has been attached to the term 'profiteering.' A careful study of this publicity has, in the opinion of well-informed business men, failed to show facts that would give reason for the claims and arguments that have been used in connection with this work.

"The effect of this publicity, without question, has been very broad, and it is hard at this moment to determine just what per cent. of this effect has been good and what per cent. has been bad.

"Believing that publicity surrounding this word, which is not based upon absolute fact, reflects unjustly on the reputable and honorable business houses of this city, and has a great influence in creating a lack of confidence in all business and advertising, the Better Business Bureau, at this time, respectfully suggests to the publishers and publicity agents that all such publicity should be discouraged, except in cases where evidence and facts are actually in hand, and that in its place every effort be made, through the editorial and publicity channels, to stimulate production, the shortage of which has been proven as the real fundamental cause of the high cost of living."



W. T. Evans, who represents several British houses in Montreal, has sailed for Great Britain, where he will confer with his principals relative to the lines he is handling in Canada. Mr. Evans will be absent from Montreal for some weeks.

# NEW HARDWARE GOODS

## OFFERED TO CANADIAN HARDWAREMEN

### FAUCETS

"Perfection" Oil and Molasses Faucets are now being manufactured in Canada by the Adamson Manufacturing Company, of Hamilton. These are made, it

*Faucet*

is stated, of all iron construction japanned. Special claims are made regarding the workmanship of these faucets, and the manufacturers guarantee them against defects.

### CHICKEN WATERER.

The "Milcor" Chicken Waterer is a new product, being manufactured by the Milwaukee Corrugating Company, of Milwaukee. It is stated that this device has a capacity of three gallons, that it is 11 inches in diameter, 9½ inches high,

*Chicken Waterer*

with a 1¾ inch trough. Made from galvanized iron this waterer works on the vacuum principle. It is equipped with kerosene burning lamp which burns for 40 hours without refilling and keeps the water at a drinkable, even temperature.

### SELF-ACTING PUMP

Arthur Petrov, of Wapella, Saskatchewan, has invented a pump which is to be put on the market and for which the following claims are made: The appliance consists of a pump cylinder with a capacity of 50 gallons of water, the usua. pump pipe to the surface, an ordinary water tap, and a weight which is raised by a wheel operating an ordinary jack-screw. When water is desired the tap is turned on and this causes the weight to descend, thus forcing at one stroke, 50 gallons to the surface. If more water is desired, whirl on the wheel again elevates the weight. For a well 100 feet in depth a weight of 1,000 pounds is required.

Mr. Petrov says there is no danger of his new type of pump freezing, for by shutting of the tap and raising the weight, all water in the pipes drains back into the well.

### CAN OPENER.

The "Perfect" Can Opener, manufactured by Bouquet Brownson Co., Inc., St. Paul, Minn., has the following new fea-

*Can Opener*

tures, the manufacturers claim: (1) Cuts top off of can from the side; (2) Cuts top out of can; (3) Has claw knife for square cans; (4) Unique cap lifter; (5) Adjustable to any size or shape, simple, well made and durable; (6) Nickel plated. It is stated that the opener may easily be operated by children.

### Demand For Skis

Owing to activity upon the part of ski enthusiasts, Montreal dealers will doubtless have an increased demand this year for skis. The Montreal Ski Club have already opened their new quarters at their club house near Mount Royal, and the season promises to be an interesting one. Interest was taken in this popular Canadian sport last winter, but it bids fair to be an increased interest for the coming winter.

### Wants Mayo Lamps

Mason & Dale, Bowmanville, Ont.—Where could we procure Mayo lamps, formerly handled by the Imperial Oil Co.?

These may be procured from Bradley & Hubbard, Meriden, Connecticut, U.S.A.

The R. & H. Hot Water Generator Co. has been registered at Montreal by James W. Donnelly, Jr.

### Name Plates

C. P. Moore, Sydney, Nova Scotia.—Please give us the names of firms manufacturing name plates for house doors.

The following are some of the manufacturers: Hamilton Stamp and Stencil Works, Hamilton, Ont.; Hamilton Stove and Heater Co., Ltd.; Stratford Brass Co., Ltd., Stratford, Ont.; Canadian Yale and Towne, Ltd., St. Catharines Ont.; Jas. Morrison Brass Mfg. Co., Ltd., Toronto, Ont.; the Belleville Hardware and Lock Mfg. Co., Ltd., Belleville Ont.; McClary Mfg. Co., London, Ont.; Sheet Metal Products Co., Ltd., Toronto, Ont.; Taylor-Forbes & Co., Guelph, Ont.; Dennis Wire and Iron Goods Co., London, Ont.—Ed.

### Wants Hammocks

J. E. Beauchamp & Co., Montreal.—Please advise where Palmer's hammocks are manufactured.

These are manufactured by J. E. Palmer Co., Middletown, Conn. New York office, 334 4th Ave., New York. —Editor.

### Stainless Steel

Sumner Company, Moncton, N.B.—Will you advise us who are the makers of white stainless handle table knives? of White Stainless Handle table knives?

These are made by George Wostenholm & Sons, Ltd., Sheffield, England. Their Canadian representatives are A. McFarlane & Co., Coristine Bldg., Montreal.—Editor.

### Ice-Cutting Tools

The Wells Hardware Co., Limited, Fort Frances, Ont.—We would be glad to have names of some of the manufacturers of ice-cutting tools.

Robert Donaldson & Sons, Montreal, manufacture a line of ice-cutting tools. —Editor.

### Stove Repairs

Fenn Hardware Co., Galt, Ont.—Kindly inform us where we may procure repairs for Splendid Garland coal and wood range.

This may be procured from Canadian Stoves, Limited, Grimsby, Ont.—Editor.

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

VERY important changes have taken effect this week and lower prices are out of the question. Amongst the many lines that show higher prices are: Cut nails, building paper, heavy coil chain, poultry netting, sheets and plates, silver-plated ware, plumbers' supplies, ingot tin and lead, galvanized sheet iron and enamelwares.

A new revised list is issued on ammunition, clothes wringers and washing machines. Butts and hinges may advance and higher prices may be expected on range boilers, conductor pipe and boiler tubes.

Shellac is up 50 cents per gallon and linseed oil is 5 to 10 cents higher. Turpentine is down 5 cents per gallon and is showing weaker tendencies. Barb wire is quoted at new prices. Stove pipe dampers, plate glass, electricians' bits, foot warmers, oakum, scissors and spooled wire are all higher.

Further advances are looked for, although it is believed that varied advances will work their own cure. It is stated that owing to so many disturbances, numerous mills have been unable to fill their 1919 orders. It is also stated that new steel orders, no matter how attractive in size or price, have gone begging, as mills have already capacity bookings of the 1919 business.

The present high rate of exchange is causing great inconvenience and has not a little to do with the strengthening of prices.

# MONTREAL MARKETS

MONTREAL, Dec. 18—Many important changes have been made during the week and among the important items is that of wrought iron pipe, on which new price lists have been issued. The net prices will be found in the current lists. Couplings and nipples, also, have been revised through a reduction in the discount. Lead pipe and waste and also bar solder are higher, due to the higher prices ruling for pig lead and tin. Spooled wire is also advanced. Plumbers' oakum is 50c per cwt. higher. Cheap grade scissors and saddlers', kitchen and a number of other knives have been advanced. Roofings and sheathings, building papers, etc., are marked up this week and the markets are firming. Oil stoves are firm—that is the heater variety, but there has been no change. Stoves are very firm; so, also, are wares and there is an active movement, seasonably speaking. Refined oil is firm and may advance. Old cast iron and steel are very firm and in demand. Pig tin and lead are higher at outside points and will perhaps advance here. Cotton rope is very high and increased prices are not improbable, in addition to the higher prices already announced last week. A new set of discounts, with new price list, has been issued by the Dominion Cartridge Company.

The demand for Christmas goods has been very excellent and particularly for cutlery, for which the demand exceeds the supply. Price tendencies are of a firming nature, particularly on lines imported, the exchange situation making increased prices necessary on many commodities and specialties.

### *Advance is Made on Plumbers' Oakum*

**Montreal.**

OAKUM.—Plumbers' oakum has been advanced in price in this market, and the new quotation on ordinary quantities is now $10.75 per hundred pounds, or an advance of 50c per cwt.

### *New Cartridge List With Revised Discounts*

**Montreal.**

AMMUNITION. — The Dominion Cartridge Company has just issued its new price list, and this covers the change made in November, and already reported in HARDWARE AND METAL. The new discounts, just to hand, give the dealer a discount of 30 per cent., 10 per cent. and 20 per cent., while an additional charge of 5 per cent. is added for broken lots. These discounts apply to all metallics and shot shells, and the terms are 60 days net; 2 per cent. 30 days. All prices are based on factory shipment, f.o.b. Staynerville, Quebec.

A complete price list has been issued by the Dominion Cartridge Company, Montreal.

### *Spooled Wire Higher; Scissors and Knives*

**Montreal.**

WIRE, KNIVES, SCISSORS.—Higher prices are effective for spooled wire, the approximate advance being about ten per cent. Copper wire on spools is now selling at $2.60 per dozen for the 18 and 20 ounce sizes, and at $2.75 for the 22 ounce. Tinned ware, in half pound balls, is quoted at $4.80 per gross for the half pound balls, No. 28, and at $5 per gross for the No. 34.

Putty, shoe and kitchen knives are advanced about 15 to 20 per cent., and cheap scissors are also higher to this extent.

### *Prepared Roofings and Building Papers Up*

**Montreal.**

ROOFING, BUILDING PAPERS.—Advanced prices are effective for various grades of roofings, and for sheathings and building papers. This is due, as far as the felt products go, to the scarcity and high price of old rags, and

with papers the scarcity and continued high price of pulp. The advance is equal to ten per cent. for most lines, and in some instances a little more. The market is firm.

## *Wrought Pipe and Fittings Higher*

**Montreal.**

PIPE, COUPLINGS, NIPPLES.—Prices are advanced for wrought iron pipe, and the increase is in accord with recent forecasts made in HARDWARE AND METAL. The changes are effective from December 9, and the new prices appear below, these quotations being on standard buttweld S-C.

Wrought nipples are now quoted as follows: 4 in. and under, 70 per cent.; 4½ in. and larger, 60 per cent. Wrought couplings are selling at 25 per cent. discount for 4 in. and under, and for 4¼ in. and larger the discount is 15 per cent.

Net prices, in random lengths. Terms: 2 per cent. cash discount allowed if paid within thirty days. Approved credit. Standard buttweld pipe S-C: Steel, Black ⅛ in., $6.00; ¼ in., $4.65; ⅜ in., $4.65; ½ in., $6.16; ¾ in., $7.76; 1 in., $11.48; 1¼ in., $15.53; 1½ in., $18.56; 2 in., $24.98; 2½ in., $39.49; 3 in., $51.64; 3½ in., $65.78; 4 in., $77.94. Galvanized—⅛ in., $8.00; ¼ in., $6.78; ⅜ in., $6.78; ½ in., $7.74; ¾ in., $9.89; 1 in., $14.62; 1¼ in., $19.78; 1½ in., $23.65; 2 in., $31.82; 2½ in., $50.31; 3 in., $65.79; 3½ in., $82.80; 4 in., $98.10.

General Wrought Iron: Black—¼ in., $5.13; ⅜ in., $5.13; ½ in., $6.84; ¾ in., $8.68; 1 in., $12.84; 1¼ in., $17.37; 1½ in., $20.76; 2 in., $27.94. Galvanized—¼ in., $7.26; ⅜ in., $7.26; ½ in., $8.42; ¾ in., $10.81; 1 in., $15.98; 1¼ in., $21.62; 1½ in., $25.85; 2 in., $34.78.

## *Firm Oil Stove Market; Have Been Very Active*

**Montreal.**

OIL STOVES.—The demand for oil heaters at the present time is a very brisk one, and manufacturers report that, while the supplies are adequate, the present business is absorbing much of the stock. Under the difficulty of obtaining sheets and raw material, and also owing to higher wage costs, the market is firm.

## *Barbed Wire Booked At the New Prices*

**Montreal.**

BARBED WIRE.—Jobbers are accepting orders for barbed wire at the new basis, and it is expected that there will be a gradual elimination of the "catch weight" spools in favor of the 80-rod sizes, and which many prefer. Present prices are as follows: Catch weights, per 100 lb., 2 x 5, $5.90; 4 x 4, $5.90, and 4 x 6, $5.90. The new prices on 80-rod rolls, as recently reported, are 18c, 20c and 22c per spool higher, for the various sizes as above.

## *Galvanized Sheet Iron Enamelwares Up 5 to 10%*

WARES.—An advance of 5 to 10 per cent. on all lines of sheet iron, tin, stamped, copper, galvanized and enamelwares, has taken effect. This, it is stated, is due to increased wages, and the very great shortage of raw material.

The cost in stoves is bound to increase owing to scarcity of plates, higher cost of labor, and many other indirect factors.

The high rate of exchange is proving a strong factor in the tendencies for higher prices, and is, in many cases, equal to an advance in itself.

## *Jobbers Report Sales; Good For Wire Nails*

**Montreal.**

NAILS AND WIRE.—The movement of wire nails is still active, and jobbers are doing much business. Stocks are fairly adequate, it is understood, and the base price of $5 per keg for both wire and cut nails is held. At $5.25 per cwt. for smooth steel wire, there is a fair and seasonable demand.

## *All Ropes Quieter; Cotton May Advance*

**Montreal.**

ROPES AND CORDAGE.—There has been quite a quieting down of demand for various grades of rope, but it is stated that bookings for spring shipment are very satisfactory. The basis for sisal is still 22½c per pound; British and Beaver manila, 26c, and pure manila, 31c.

Cotton rope is decidedly firm, and the outlook is such as to indicate that there will soon be advances for the various sizes. The excessive demands from all sections of the world are absorbing the supplies of raw cotton, and with a curtailed production, it is unlikely that cotton goods, and rope, along with other lines, will tend downward.

## *Refined Oil is Firm; It and Gasoline Hold*

**Montreal.**

OIL AND GASOLINE.—The markets are without change for coal oil, although changes made in the States suggest that increase might come in this market ere long. Prices, according to quality, are ruling at 22c to 25c per gallon.

The demand for gasoline becomes more restricted with the arrival of severely cold weather. Price still holds at 33c per gallon.

## *Steady Enquiry But Difficult to Get Sheets*

**Montreal.**

SHEETS AND PLATES.—Developments have not been such as to reveal any considerable quantity of sheets or plates, the jobbers passing out what odd gauges they have to rather eager buyers, and at prices which may, or may not, conform to the average quotation. The holder of supplies can get a good price for his stock, and therefore it is difficult to define the market, suffice it to state that the undertone is very firm, and the outlook unpromising.

| | | |
|---|---|---|
| **BLACK—** | | |
| 10 gauge | 5 90 | 6 20 |
| 12 gauge | 5 95 | 6 25 |

| 24 gauge | .... | 9 15 |
| 22 gauge | .... | 8 80 |
| 18 and 20 gauge | .... | 8 60 |

**NOTE——These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.**

## *Immediate Sales Stoves And Wares Quite Heavy*

**Montreal.**

STOVES AND WARES.—The manufacturers of stoves have been doing much business, even though the season is so far advanced. Stove-making material is not easy to procure, and it will be fortunate, indeed, if the makers are able to supply the trade with even a fair proportion of their wants. Labor still is high, and will so continue, it is expected. The settlement of the coal strike, naturally, is a relief that is greatly appreciated.

Wares, particularly such as may be classed holiday lines, are active, and the market undertone is so firm as to suggest further advances of price, for some lines of sheets are not procurable.

## *Iron and Steel Strong; Has Been Good Demand*

**Montreal.**

IRON AND STEEL.—Prices have been steadily held on the basis adopted a few weeks ago, and the mills are turning out a big tonnage of bars. This is going into the hands of jobbers, and the movement, in turn, to the retailer is a heavy one, despite the stopping of much outdoor work.

IRON AND STEEL

| | |
|---|---|
| Iron finish machinery steel | 4 10 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 25 |

| Common bar iron, per 100 lbs. | 3 90 |
| Refined iron, per 100 lbs. | 4 90 |
| Mild steel | 4 05 |

## *Old Cast and Scrap Are the Big Sellers*

**Montreal.**

OLD MATERIALS. — Among the movers in old material, scrap steel and old cast iron are the leaders. These seem to be in demand quite actively by the manufacturer, and he is paying good prices. But aside from these items there is little movement of other lines, the markets being quite dull.

| Dealers' Buying Prices— | | |
|---|---|---|
| Old rubbers, boots and shoes | 0 07 | 0 08 |
| Overshoes, lumbermen's rubber boots | .... | 0 05 |

| No. 2 busheling | 7 00 | 8 00 |
| Machinery, cast (ton) | 29 00 | 30 00 |

## *Lead Pipe and Solder Have Been Advanced*

**Montreal.**

LEAD PRODUCTS.—As pointed out last week, and very definitely forecast in HARDWARE AND METAL, the lead products market has advanced, lead pipe and lead waste being marked up one cent a pound. This has been coming for some time, and is the result of advances for pig lead. The new prices are: For lead pipe, 13½c per lb., and for lead waste, 14½c.

Solder, too, is marked up half a cent, the present price for "strictly" being 38c, and for commercial, 36c.

Lead traps and bends, too, are up, the discount now being 5 per cent. off.

| | | |
|---|---|---|
| Lead pipe | .... | 0 13½ |
| Lead waste | .... | 0 14½ |
| Note.—Lead pipe is subject to a discount of 10%. | | |

| Do., broken lots | .... | 0 16½ |

## *Pig Tin Moves Upward; Copper and Lead Firm*

**Montreal.**

INGOT METALS. — The London price on pig tin is higher, and tendencies are strong here. Copper, too, while not active, is holding firmly, and pig lead shows strength. The markets are rather quiet.

COPPER. — While no change has been made in the basic price here, the market is quite firm. Producers' prices are held firmly. Local prices, 24c for casting, and 24½c for electrolytic, with tendencies of a firming nature.

TIN.—London cables are higher this week again, and there is strong probability of an advance in this market. Present prices are 60c for average quantities.

LEAD.—The prices at producing points have held firmly, and in this market it will not be a surprise if the existing quotation of 8½c is marked up within the week.

SPELTER.—Still holding at 10½c, with a limited demand prevailing.

ANTIMONY. — A strong market undertone applies to this, and English basis is 11½c per lb., and Chinese, 11¼c.

ALUMINUM.—Little feature of note, and price quoted in this market is 33c per lb.

# TORONTO MARKETS

TORONTO, Dec. 18—Very important changes have taken effect this week and no lower prices are looked for for some time to come. Among the many advances noted are: Ammunition up 10 per cent.; cut nails, building paper, shoe findings, washing machines and wringers, poultry netting, heavy coil chain, sheets and plates, traps and bends, lead and waste pipe, lead and tin, all showing higher prices.

The great shortage of goods is very inconvenient, to say the least, and it is stated that stocks were never lower in the recollection of some of the oldest business men. Some have it that owing to so many disturbances the mills have been unable to fill their 1919 orders. And it is also stated that new steel orders, no matter how attractive in size or price, have gone begging and many mills have closed their badly congested order books till they can promise better delivery.

The high rate of exchange is a very large factor in pricing all goods of United States manufacture and some claim it will be almost prohibitive if it continues to strengthen.

## *Cut Nails Advance; New Base $5.35 Montreal*

**Toronto.**

CUT NAILS ADVANCE. — An advance is reported on cut nails, and the new price is quoted at $5.35 base Montreal.

The nail situation has not improved, and nails are said to continue very scarce. A brisk demand is reported for delivery to the United States.

## *Ammunition Up 10%; New Revised List Issued*

**Toronto.**

AMMUNITION—As announced in last issue of HARDWARE AND METAL, a new ammunition list has been published. It is stated that this will be more convenient, as prices are controlled by one discount. The discount applying to this list is 30-10-12 per cent.

This makes an advance over old prices of, approximately, 5 to 10 per cent.

## *Building Paper Selling at Higher Prices*

**Toronto.**

BUILDING PAPER.—Both plain and tarred have advanced. This may be accounted for, it is stated, by the shortage of raw materials, especially waste materials and scrap paper. The new prices are quoted on some lines as follows: Plain, 72 cents per roll; tarred, 90 cents; Surprise, Stag, and similar lines, 80 cents per roll; tarred felt, $4.65 per 100 lbs.; carpet felt, $5.75 per 100 lbs.

## *Shoe Tacks, Hungarian and Hob Nails, Up 10%*

**Toronto.**

SHOE FINDINGS.—Shoe tacks, Hungarian nails, and hob nails have advanced 10 per cent. This is not unexpected, as there are great scarcities reported in iron and steel, and nearly all manufacturers have suffered from the previous labor unrest.

## *Butts and Hinges May Advance Soon*

**Toronto.**

BUTTS AND HINGES.—There is some possibility, it is stated, that an immediate advance will take place in butts and hinges. This, it is believed, may be caused by the high rate of exchange, also the great scarcity of raw materials, which are very noticeable.

## *Heavy Coil Chain Advances 10 Per Cent.*

**Toronto.**

CHAIN.—An advance of 10 per cent. has been recorded in heavy coil chain. Business has fallen off slightly, but it is believed this is only temporarily.

## *Range Boilers Firm; May Soon be Advanced*

**Toronto.**

RANGE BOILERS.—Owing to the unsettled condition of the iron and steel market, range boilers may advance, and this may take place any time soon, it is expected. Any orders taken now are contingent with the exchange rates.

which, of late, have soared to such heights. There are many houses that are covered, and range boilers continue in excellent demand for this season of the year.

## *Conductor Pipe Scarce; May Advance Soon*

**Toronto.**

CONDUCTOR PIPE.—The sales of this commodity have been excellent, even through most of the cold weather. So far, no change in price is noted. It is stated by the manufacturers that they had anticipated a large volume of business, and had made preparations accordingly. When the strike came, causing the extreme shortage in galvanized sheets which now exists, it is stated they had considerable stock made up, and did not take advantage of the scarcity to charge premiums on this stock. It is hard to state what will happen, though, as it is claimed these stocks are nearly exhausted now, and when new stock is made up, unless the situation is relieved, manufacturers will be forced to purchase on a higher market, and naturally would have to base their product on actual costs.

## *Sheet Iron, Galvanized and Enamelware Advance*

**Toronto.**

ENAMELWARE, SHEET IRON AND GALVANIZED WARE are very unsettled, and HARDWARE AND METAL has it on good authority that a revision in price is taking place. This will be quite in order, with present conditions. The situation only need be slightly reviewed in order to note the effects of present conditions on the manufactured products.

Manufacturers state there never was a time in the recollection of the oldest business men when the shortage of raw material was so scarce. The high rate of exchange is also a decided factor.

It is stated that some manufacturers and jobbers are adopting a system of adding the exchange at time of shipment to the net price of goods. Others, who have different costing systems, are revising their prices, to include the exchange. The exchange is practically equal to a 7 to 10 per cent. advance, as the rate of exchange has been holding around the 10 per cent. mark.

## *Hockey Sticks, Skates Show Heavy Demand; Scarce*

**Toronto.**

HOCKEY STICKS AND SKATES.—A considerable scarcity is noted in these lines, especially the former. It is stated that dealers did not order their supplies in accordance with other years. This, it is stated, did not give manufacturers a chance to judge the demand or place orders for raw material, with the result of higher prices and shortage of supplies.

## *Washing Machines' New List About 10% Higher*

**Toronto.**

WASHING MACHINES.—A new and higher list is effective in washing machines, which show an advance of, approximately, 10 per cent. No change noted in the former discount, which is quoted at 30 and 5 per cent. off the list.

## *Community Plated Ware Prices Withdrawn*

**Toronto.**

PLATED WARE.—Prices on Community silver-plated ware have been withdrawn, and new higher prices will soon be in effect, it is stated.

## *Poultry Netting Again Advances About 2½%*

**Toronto.**

POULTRY NETTING. — A further advance has been reported on lay flat poultry netting, and the new price is now 5 per cent. additional to list. 2-inch hexagonal regular mesh, net list; 1-inch hexagonal, add 5 per cent. to list.

## *Clothes Wringers Advance About 10%*

**Toronto.**

CLOTHES WRINGERS. — An advance, approximating 10 per cent., has taken effect in clothes wringers. The list has been revised, and a new list is in effect, dated December 4. The former discount of 30 and 5 per cent. is still in effect, and is applied to the new list.

The following is the new list on some of the better-known lines:

| | Per doz. |
|---|---|
| Royal Canadian | $ 92 80 |
| Eureka | 71 40 |
| Crest | 80 80 |
| Eze | 99 80 |
| Imperial | 99 80 |
| Gem | 99 80 |
| Safety | 103 50 |
| Bicycle | 109 30 |
| Rival | 109 30 |
| Warranty | 120 80 |
| Crescent | 120 80 |
| Jupiter | 120 80 |

Terms—2 per cent. 30 days. Freight equalized on ½ dozen wringers and upwards, with the nearest of the following places to point of destination: Montreal, Kingston, Ottawa, Toronto, Londan and St. Marys. Discount 30/5%.

## *Sheets and Plates Advance 75c Per Pound*

**Toronto.**

SHEETS AND PLATES. — 75 cents per 100 pounds is the advance reported on galvanized sheets.

The high rate of exchange is a new factor the manufacturer and jobber have to contend with. Although this has been fluctuating continually, it has seldom been far from the 10 per cent. mark; this naturally makes the goods coming from the States higher in price.

The serious shortage in this commodity may be slightly relieved, for immediate delivery, in small quantities. Booked orders and all future deliveries seem out of the question for at least two or three months.

Owing to the scarcity and unsettled conditions of the markets locally it is almost impossible to quote accurate prices, as nearly all who have stocks have procured them under unusual conditions, and sheets, galvanized, 10 oz., for instance, are quoting anywhere from $9.25 to $10.00 per 100 lbs.

The following are the prices:

**BLACK SHEETS—**

| | | |
|---|---|---|
| 14 gauge | 6 30 | 6 50 |
| 16 gauge | 6 65 | 6 95 |
| 18-20 gauge | 6 30 | 6 85 |
| 22-24 gauge | 7 25 | 6 90 |
| 26 gauge | 7 35 | 6 95 |
| 28 gauge | 7 50 | 7 05 |
| 3-16 inch plate | 5 95 | 5 55 |
| ¼-inch boiler plate | 5 45 | 6 10 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

**GALVANIZED SHEETS—**

| | Premier | | Apollo | |
|---|---|---|---|---|
| 10¾ oz. | $9 20 | $9 80 | $9 25 | $9 55 |
| U.S. 28 | 8 60 | 10 20 | 8 85 | 8 85 |
| U.S. 26 | 8 20 | 8 80 | 8 55 | 8 50 |
| 22 nad 24 | 8 00 | 8 20 | 8 40 | 7 30 |
| 18 and 20 | 7 80 | 8 00 | 8 25 | 8 10 |
| 16 | 7 55 | 7 80 | 8 10 | 7 90 |
| 12 and 14 | 7 35 | 7 55 | 7 95 | 7 65 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Iron and Steel Bars Advance 25 to 40c at Mill*

**Toronto.**

IRON AND STEEL BARS, ETC.—Toronto jobbers say there should be an advance of from 25 to 40 cents per 100 lbs. on iron and steel products, but feel diffident about making any change till the New Year at any rate.

It is said there is a feeling, now that the strike is over and miners have resumed operations, that jobbers in this commodity will possibly be able to continue busines at the present prices through the early part of 1920. And to say the least are hopeful that the situation caused by the past strikes will be relieved.

It is stated by some of the best informed that stocks were never lower and at present some of the lighter grades are practically off the market.

The high U.S.A. exchange rate is a serious factor with many who depend on this market for supplies. Some are not taking advantage of this rate for goods in stock, but say they are forced to charge extra for shipments coming.

The following are the quotations:

| | | |
|---|---|---|
| Common bar steel | .... | 4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | 4 25 | 4 50 |
| Band steel | 4 25 | 4 50 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Boiler Tubes Unsettled; May Advance Soon*

**Toronto.**

BOILER TUBES. — An advance in boiler tubes would not surprise many of the best informed, and it is believed that some expect a change almost daily.

Boiler tubes have been notably scarce; no business is being turned down. The coal and other strikes appear to be the main factors.

Owing to the high rate of exchange, manufacturers and jobbers, generally, are charging a higher price for goods coming from the U.S.A. in order to overcome this high rate, which is about equal to a 5 per cent. advance.

| BOILER TUBES— | Per 100 feet Seamless | Lapweld |
|---|---|---|
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *Barb Wire Higher; Advance Prices Named*

**Toronto.**

BARBED WIRE.—New prices are named for barbed wire, and the new price is quoted at 80-rod spools, $5.20; catch weight spools, $5.90 base.

## *Stove Scrap and Other Metals Firm; Quiet*

**Toronto**

WASTE MATERIALS have shown considerable activity lately and scrap iron and other scrap metals are quoting at slightly higher prices, but showing stronger tendencies, it is stated. Copper, lead and zinc, are showing weaker tendencies and are apparently awaiting developments, whether they will advance or decline. The market for old boots, rubbers, etc., is very quiet. The following are quotations:

| DEALERS' BUYING PRICES | |
|---|---|
| Pipe scrap | 11 00 |
| Stove plate, per ton | 18 50 |
| No. 2 busheling | 13 00 |
| Yellow brass | 0 10 |
| Red brass | 0 15¾ |
| Light brass | 0 07 |
| Scrap zinc | 0 06½ |
| Heavy copper | 0 17 |
| No. 1 machinery cast | 24 00 |
| Heavy melting steel | 15 00 |
| Wrought iron, No. 1, per gr. ton | 15 00 |
| Heavy lead pipe | 0 06 |
| Old rubbers, boots and shoes | 0 06 |
| Overseas, lumbermen's rubber boots | 0 04 |
| Bicycle tires | 0 01½ |
| Automobile tires | 0 03 |
| Tea lead | 0 04 |
| Heavy lead pipe | 0 05¾ |

## *Traps and Bends Advance; Lead Pipe Up 1c Pound*

**Toronto.**

LEAD AND ZINC PRODUCTS.—An important advance has taken effect on some of these products. Lead pipe and waste pipe is now quoted at 1 cent per pound higher. Lead traps and bends have also advanced, approximately, 10 per cent.

Although the coal crisis is practically over, and other labor unrest, is becoming more settled, a new contingency has cropped up. The higher rate of exchange is generally causing manufacturers and jobbers to charge a higher price for goods coming from the United States. The following are the new quotations:

| | |
|---|---|
| Lead pipe, list, per lb. | 0 13½ |
| Lead waste pipe, list, per lb. | 0 14½ |
| Do., over 8 inches, list, per lb. | 0 15½ |
| Above subject to discount of 10%. | |
| Lead traps and bends | 5% |
| Lead wool, lb. | 0 16 |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 10½ |
| Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra. | |
| Solder, guaranteed, lb. | 0 34 — 0 35½ |
| Solder, strictly, lb. | 0 33 — 0 34½ |
| Solder, commercial, lb. | 0 31 — 0 32½ |
| Solder, wiping, lb. | 0 30 — 0 31½ |
| Solder, wire, lb. | 0 35½ — 0 42¼ |
| Zinc sheets, per lb. | 0 17 |

## *Tin Stronger, Lead Up ¼c; Spelter Weaker; All Scarce*

**Toronto.**

INGOT METALS.—Lead has advanced ¼ cent and is now 9 cents per pound. Tin continues to advance and as exchange improves the advance is noted both ways. Copper is unchanged, showing a good demand. Spelter is weaker and the price is ¼ cent off. Antimony and aluminum show no change.

Stocks are very low, in fact, it is said that warehouses are bare. Even further advances are looked for generally, and these varied advances will have to work their own cure.

LEAD has advanced ¼ cent per pound and is showing good demand. The quotation is now 9 cents per pound.

COPPER remains unchanged. A good demand is noted. The present price being quoted at 24 cents per pound, which is said to be a reasonable figure.

TIN continues to advance, and as exchange improves advances both ways are noted. The present price is 60 cents per pound.

SPELTERS is weaker, the price being ¼ cent off and quoted at 10¾.

ANTIMONY.—A fair movement is noted on antimony and the demand continues to be a fair one. The present price is 11½ cents per pound.

ALUMINUM remains quiet with low stocks reported. The price being quoted is 34 cents per pound.

# LONDON MARKETS

LONDON, Ont., Dec. 18—Advances are again numerous this week and among the lines revised upwards are noted screw and strap hinges, soapstone, foot warmers, wrought iron nipples, steel buttweld pipe, cut nails, cast stove pipe dampers, hockey pucks, building paper, washing machines, electricians' extension bits, poultry netting and Dominion ammunition. Shellac has also been advanced. Meakins' brushes are up and an increase of 20 cents a gallon is shown in turpentine.

Business all through this district continues very active and hardware merchants are looking for it to continue so even after the holiday rush is over. There is an excellent demand for seasonable lines and difficulty is experienced in obtaining sufficient to meet requirements in some cases.

## *Ammunition Higher; New Lists Issued*

**London, Ont.**

AMMUNITION.—New lists have been issued, and it is stated these will be more convenient as one discount covers the full line. The present discount is quoted at 30/10/20% off this new list.

## *Meakins' Brushes Have Advanced*

**London, Ont.**

MEAKINS' BRUSHES show higher prices and quotations are 30% discount off the new catalogue prices.

## *Shellac Again Shows Advances*

**London, Ont.**

SHELLAC.—New and higher prices are now being quoted on shellac and are as follows:

| Pure Orange — | gal. |
|---|---|
| Gallons | $7 05 |
| Half gals. | 7 15 |
| Quarter gals. | 7 35 |
| Pints, doz. | 12 20 |
| Half pints, doz. | 6 50 |
| Quarter pints, doz. | 3 65 |
| Eighth pints, doz. | 2 25 |
| Pure White— | gal. |
| Gallons | $7 80 |
| Half gals. | 7 90 |
| Quarter gals. | 8 10 |
| Pints, doz. | 12 90 |
| Half pints, doz. | 6 85 |
| Quarter pints, doz. | 3 85 |
| Eighth pints, doz. | 2 35 |

## *Building Paper Has Advanced*

**London, Ont.**

BUILDING PAPER. — New higher prices are now quoted on building paper as listed below. Tarred felt, $4.65 per 100 lbs.; carpet felt, $5.75 per 10 lbs.; dry fibre, D2, 72 cents per roll; Surprise paper, 80 cents per roll; tarred fibre, E2, 90 cents per roll.

## *Hockey Puck Prices Advanced*

**London, Ont.**

HOCKEY PUCKS have advanced the new prices being quoted at: Boys', $1.15 per dozen; Men's Regulation Black, $3.00 per dozen; Men's Regulation Red, $3.35 per dozen.

## *Community Silverware Prices Withdrawn*

**London, Ont.**

COMMUNITY PLATED SILVERWARE.—Prices have been withdrawn,

and new higher prices will soon be in effect.

## *Washing Machines Have Advanced* 10%

**London, Ont.**

WASHING MACHINES, as quoted in HARDWARE AND METAL last week, have advanced 10%, and the new list, on some of the better known lines, are as follows:

Jubilee, $11.25 each; Canadian, $12.50; Dowswell, $12.50; Hamilton, $13.50; New Century B, $20; New Century Junior, $20; Patriot, $23; Noiseless, $16.25; New Idea B, $22; Ideal, waterpower, $30; Velox, water power, $32; Seafoam B, gas engine drive, $55; New Century, electric, $155. Discount less 30 and 5 per cent.

## *Stove Pipe Dampers Show an Advance*

**London, Ont.**

CAST STOVE PIPE DAMPERS have advanced, and the new higher prices are: 6-inch, $1.35 per dozen; 7-inch, $1.65 per dozen.

## *Cut Nails Nok* $5.35 *Per Keg, f.o.b Montreal*

**London, Ont.**

NAILS.—Cut nails have advanced, and are selling from a base of $5.35 per keg, f.o.b. Montreal.

Nails have been showing excellent demand, and large orders are being shipped to the United States. The local demand is very good, and prospects for next year are very promising.

## *Plate Glass Has Advanced; New List*

**London, Ont.**

PLATE GLASS.—An advance in plate glass is noted, and it takes the form more of a revision, as it is stated small cut sheets are exhausted, and it is necessary to cut larger sheets, which are worth more per square foot. The new prices are as per current quotations.

WINDOW GLASS continues very scarce, although the price is unchanged. Prices are as follows: Single diamond, 25 per cent.; double diamond, 25 per cent.; Cut lights, 10 per cent.

## *A Further Advance of* 2½% *in Poultry Netting*

**London, Ont.**

POULTRY NETTING.—New higher prices are quoted this week over those shown in HARDWARE AND METAL in last week's issue. The new prices are now quoted at: 2-inch hexagonal regular mesh, net list; 1-inch hexagonal regular mesh, add 5 per cent. to list; Lay Flat netting, 2-inch and 1-inch mesh, add 5 per cent. to list.

## *Electricians' Extension Bits Have Advanced*

**London, Ont.**

BITS, ELECTRICIANS' EXTENSION, are quoted at new higher prices, as follows: 5-inch by 15-inch, $2.00 each; 18-inch, $2.05 each; 21-inch, $2.15 each.

## *Advance is Shown in S. and S. Hinges*

**London, Ont.**

SCREW AND STRAP HINGES.—New net prices on screw and strap hinges are figured at 25% off list as follows:

6 in., $3.22 per dozen pair; 8 in., $3.60; 10 in., $4.80; 12 in., $5.25; 18 in., $8.25; 21 in., $9.30; 24 in., $12.

## *Foot Warmers Are Revised Upward*

**London, Ont.**

SOAPSTONE FOOT WARMERS.—New and higher quotations are in effect on this line as follows: 8 in. x 10 in., $7 per dozen.

## *Firm Prices Rule For Linseed Oil*

**London, Ont.**

LINSEED OIL.—Quotations on linseed oil show no change. The market is very firm. Prices are as follows:

| | Per Imp. gal. | |
|---|---|---|
| 2 to 2 barrels | 2 67 | 2 70 |
| 3 to 5 barrels | 2 66 | 2 69 |
| 6 to 9 barrels | 2 64 | 2 67 |

Less than barrels add 15 cents per gallon.

## 10 *Per Cent. Advance in Clothes Wringers*

**London, Ont.**

CLOTHES' WRINGERS.—New quotations on clothes wringers show an advance of ten per cent. Figures on some of the best sellers are

Royal Canadian, $92.80 per doz.; Eureka, $71.40; Crest, $80.80; Eze, $99.80; Imperial, $99.80; Gem, $99.80; Safety, $103.50; Bicycle, $109.30; Rival, $109.30; Warranty, $120.80; Crescent, $120.80; Jupiter, $120.80, less 30/5%.

## *Wrought Nipples Are Up Twenty Per Cent.*

**London, Ont.**

WROUGHT NIPPLES.—Wrought nipples, 4 in. and smaller, show an advance of 20%. The new discount is 70% off list. The old discount was 75%.

## *Turpentine is Up* 20 *Cents Per Gallon*

**London, Ont.**

TURPENTINE.—An advance of twenty cents per gallon is shown in turpentine. The new quotations are:

| | Per Imp. gal. |
|---|---|
| 1 barrel lots | 2 70 |
| 2 to 4 barrel lots | 2 69 |
| 5 gal. lots | 2 85 |

## *Putty Sales Active; Prices Holding Firm*

**London, Ont.**

PUTTY.—There is a good demand for putty. Prices show no change and are as follows:

| | Per 100 lbs. |
|---|---|
| Standard, 100-lb. drum, | 6 80 |
| Do., 25-lb. drums | 7 05 |
| Pure, 100-lb. drums | 9 30 |
| Do., 25-lb. drums | 9 55 |

## *White Lead in Oil Holding Unchanged*

**London, Ont.**

WHITE LEAD IN OIL.—While prices for white lead in oil are very firm, no change is shown in quotations, which are as follows:

| | Tons. | Less Tons |
|---|---|---|
| Pure | $17.45 per 100 lbs | $17.80 |
| Elephant | 17.95 " | 18.30 |

# WINNIPEG MARKETS

WINNIPEG, Dec. 18—Important price changes have taken effect this week and the tone of the market is for higher prices. The fact that the coal strike is over is no indication of an immediate decline in prices. It is stated that mills have enormous orders yet to fill for 1919, which were held back by the labor unrest all through the year.

Some of the goods showing changes are: Stillson wrenches have advanced 7½ per cent. Harvest tools are now quoted 10 per cent. higher, while black sheets, wrought iron pipe have also advanced.

Rope, which recently showed lower prices, has again advanced. Padlocks, plumbing goods and brass cased tubing are also higher.

## *Black and Galvanized Wrot. Iron Pipe Advances*

**Winnipeg.**

BLACK AND GALVANIZED WROUGHT IRON PIPE ADVANCES.—The market again shows further and decided advance on previous prices. This change is general, all sizes being affected. Following are new quotations:

| | Per 100 ft. Black | Galvd. |
|---|---|---|
| ¼ inch | $5 13 | $7 47 |
| ⅜ inch | 5 27 | 7 61 |
| ½ inch | 7 02 | 8 73 |
| ¾ inch | 8 82 | 11 12 |
| 1 inch | 13 05 | 16 43 |
| 1¼ inch | 17 64 | 22 23 |
| 1½ inch | 21 06 | 26 55 |
| 2 inch | 28 35 | 25 78 |
| 2½ inch | 45 99 | 58 01 |
| 3 inch | 60 12 | 75 87 |
| 3½ inch | 76 50 | 96 30 |
| 4 inch | 90 68 | 113 40 |
| 4½ inch | 102 60 | 130 50 |
| 5 inch | 119 70 | 152 10 |
| 6 inch | 155 70 | 197 10 |

## *Harvest Tools Advance Approximately* 10%

**Winnipeg.**

NEW PRICES ON HARVEST TOOLS.—As indicated in last week's report, prices on harvest tools have

((Continued on page 94)

# Getting Business During the Winter

## A Great Deal of Indoor Work Can be Done and the Dealer Who Goes After the Trade May Secure a Nice Increase in Sales—Display Will Help in Speeding Turnover and Arousing People's Interest

THE opinion seems to be unanimous among those who are in the closest touch with the outlook for business that 1920 is going to see new records made all over Canada. This applies to sales of paints just as much as to any other commodity. The year just closing has, for merchants generally, and for hardware men in particular, been one of the most prosperous they have ever known. And with most of the hardware merchants paint sales are showing increases that run well over twenty-five per cent.

### ARE YOU READY?

Are you ready for the still bigger business that is to come in the New Year? Are there any ideas that you can work out that will help you to handle the business better or to handle more business? Now is the time, during the next few weeks while there is a seasonable lull due to the cold weather to get busy and think all these things out and plan what you are going to do. Work done now while you have a little time will save you considerable time later on, and perhaps a good deal of money, to say nothing of increasing turnover and profits.

### KEEP THINGS MOVING

Just because it is winter time is no reason why the paint business should be shelved. If you have planned to stop pushing the sale of paints during the cold weather, change your plan. Instead, try pushing paints, especially the kinds that can be used for indoor work and you will probably be surprised at the results. Getting trade very often depends upon the attitude of mind of the merchant. If he thinks he can get the business and goes after it, he will find that he will get it.

If you are out driving in your car and come to a hill, you just naturally turn on more gas, don't you? The same thing applies in the matter of selling paints in the winter time. If you think you can sell more and put on a little extra effort to do it you will get results.

### MUCH INDOOR WORK

Because many people have been unable to secure help during the summer and fall they have left over painting they had intended doing sooner. This is especially the case with farmers, and right now the farmers are one of the largest buying forces in the Dominion. Interest them in your paints, and don't be afraid to tell them and show them what they can do.

Try putting a display table right up at the front of the store as soon as your holiday trade is over and watch the results. Place a few cans of your most popular wall tints on the table and a bunch of color cards to hand out, or for people to help themselves to. Have samples of all the stencil designs you carry handy, and also the suggested color combinations which many manufacturers furnish. Customers never fail to stop at a demonstration table of this sort. Both men and women are instantly reminded of a certain room or rooms in their home that needs some sort of beautification. Only they don't know just how to do it—and it's up to you to show them how easily and inexpensively it really can be done. You can keep this table working profitably all winter long and will be surprised at the attention that will be given it, as well as the additional sales naturally resulting therefrom. Even an attendant is not necessary—they'll come to any clerk and ask to be put wise on what they have observed on entering or leaving.

### KEEP THEM INFORMED

Keep people informed about your stock. You may do this by advertising or by sending out printed matter, or both. There are any number of women keenly interested in the matter of painting floors. They want to get things in shape for next summer and realize that there is no better time than the winter months for doing the work.

One merchant who pushes floor paints during the winter sends out a circular telling about the advantages of doing the work in the cold months when a room may be kept closed off without causing any inconvenience. In part, his talk is of a practical nature also, and among the points he makes are the following:—

"The most inexperienced person can apply a good floor paint successfully, and once applied it forms a tough film, dries hard over night, effectively seals the surface against the absorption of foreign materials which may be carelessly spilled upon it.

Frequent washing will eventually dull its gloss; in time the film will disappear, but a high quality interior floor paint will never crack, check or peel off, it will never fade, and it will aways give you satisfaction and service.

"Paint suitable for use on interior floors will not give satisfaction when applied to exposed or partly exposed surfaces; similarly one manufactured for outside use in unsuitable for inside work. Therefore, floor paints are made for both inside and outside work by separate mixtures and processes.

**Some Good Advice**

"Do not attempt to make one grade of paint answer for both class of work, for dissatisfaction will surely follow, and the small amount of money saved will not begin to repay you for the trouble. The primary requirement of any paint is protection, and this is not hard to obtain in paints to be used on wall and ceiling surfaces.

"A floor paint, however, is subjected to the wear of many feet. Every time you walk across a floor which has been painted, there is an abrasive action which tends to disintegrate the paint film. This abrasive action would be reduced to a minimum if paint were made of a soft texture, so that the film itself could absorb this grinding action, but the result would be a sticky, tacky condition. A floor paint must be hard, but if too hard it becomes brittle and does not adhere to the surface.

**"Come in and talk over with us the work you have in mind and we will be glad to give you all the advice we can."**

# Record Demand for Turpentine in 1920 is Expected

## Huge Supplies Will be Required for Paint and Varnish Manufacturers and in Addition There Will be Many Other Demands to be Filled

DISCUSSING the outlook for turpentine in 1920, the Naval Stores Review of Savannah, says:

"Reports from throughout this country and Canada show the manufacturers consuming naval stores busily planning for an extraordinary season next year. Not a contrary ripple is found in the great stream of optimism that dominates the outlook for 1920. The extraordinary building activities of this year are expected to be surpassed the coming year, and it is freely predicted that the construction operations in 1920 will surpass anything yet seen.

Paint and varnish manufacturers are preparing for a demand for their goods beyond their present capacity to supply. A number of factories are being enlarged, and everywhere there are indications that the strain of meeting requirements next spring, summer and fall will probably be the most severe the plants have been put to. Studied from every angle, one finds no reason to look for anything but a much greater demand for rosins and turpentine in the United States and the Dominion than that which will completely absorb the crop of 1919 and cut into the old reserve supplies.

The consuming powers of the 115,000,000 people of this country and Canada are simply tremendous, and if the world beyond the confines of North America increases its calls for naval stores, it is very plain that a larger crop than that made this year can be easily absorbed at values remunerative to the producers. As with cotton, there is no reason why 1920 should not see naval stores prices that will seem very high as compared with the old range of quotations, but which will be amply justified, both by the natural law of supply and demand and by the increased cost of production.

# Urges More Extensive Use of Paints for Industrial Plants

ROTARY CLUB members in Montreal were given an address on "Industrial Paints" by Rotarian Grieve at the regular meeting. In the course of his remarks he pointed out that Canadian manufacturers, in preparing goods for export, should give close attention to the finish of the goods which were exported, and that such finish should be in accord with the character and quality of the goods. Following this assertion he stated that goods were often purchased because they were well finished and attractive, even preferably to an article of equal quality, which was not offered in this better and more attractive manner, to the buyer. Paint, possessing as it does the quality of making an article look well, was therefore a most important item.

Mr. Grieve also contended that in industrial plants a much more extensive use of paints and finishes might be made to brighten and attract the environment for employees. This is one of the things which might help to stay the present unrest among industrial workers.

# $160,017,178 Invested in Lumber Industry

**Ottawa.** — A preliminary report on the lumber industry in Canada has been completed by the Dominion Bureau of Statistics, covering the returns of 3,086 operating plants for the last year. A detailed report by provinces is in course of preparation.

The total capital invested in the industry amounted to $180,017,178, of which logging and timber plants contributed $36,516.01, mill equipment $55,793,373, materials on hand, stocks in process, finished products, and miscellaneous supplies $54,147,889, and cash trading and operating accounts and bills receivable $35,561,215.

The aggregate value of production for the year was $144,908,864, comprising the following principal items: Sawn lumber, $102,335,772; shingles, $8,124,968; lath, $1,560,136; pulpwood, $18,416,438; and miscellaneous products, including cooperage stock, poles, cross-ties, posts, veneer, etc., to the value of $14,471,550.

The principal kinds of lumber cut during the year were, in order of the cut: Spruce, 1,140,063 M. ft.; white pine, 783,482 M. ft.; Douglas fir, 707,373 M. ft.; hemlock, 255,356 M. ft.; cedar, 230,204 M. ft.; red pine, 99,780 M. ft.; balsam fir, 94,774 M. ft.; and all other varieties, including custom-sawn lumber, 618,426 m. ft.

# R. W. Rose Goes With Benjamin Moore & Co.

Richard W. Rose, until recently with the firm of Berry Brothers, Inc., of Toronto, has been appointed specialty salesman for Toronto and Western Ontario for Benjamin Moore & Co., Limited. Mr. Rose commences his new duties immediately.

**Open Branch at Winnipeg**

The Glidden Varnish Company, Limited, has opened a branch warehouse at Winnipeg, at 44 Princess Street. It is in charge of R. S. Grant, who was formerly with the Canada Paint Company.

Dominion Engineering and Machinery Company, Limited, head office Montreal, capital $3,000,000, plans to manufacture and deal in plans to carry on a general business in smelting, refining and manufacturing.

# South American Trade for Canada

## Manufacturer Outlines His Views to Montreal Business Men Regarding Possibilities in Southern Continent

"THE only way to get into business relations with South American countries is to go there yourself. Get in on the ground; have someone who knows you, and then get people who know the country to handle your business. It is useless to try to work through consuls or trade commissions. If you want to do business there you must do the work for yourself."

H. J. Fuller, president of the Canadian Fairbanks-Morse Company, Ltd., outlined his impressions as above to a large gathering of business men at a meeting of the Montreal Canadian Club. The topic taken by Mr. Fuller was, "A Business Trip to South America." The speaker had been there for a considerable time looking over trade possibilities, and the message which he brought back was one fraught with decided interest for manufacturers who contemplate trade expansion in an export way.

### There is a Big Field

Mr. Fuller stated that, during his trip in the Southern Continent, he had encountered a great many Japanese, who were establishing themselves in a trade way in South America. He believed that they would, in the future, be a factor to reckon with, so aggressive were they in this policy. There were also many Italians seeking trade in that country, and they were making a strong effort to establish themselves among buyers for various products.

In catering to this trade Mr. Fuller pointed out that among the requirements, long credits, early shipments and satisfactory service were three prime necessities. It was his say to get into this market early, because once a firm was established it would hold the trade if its products were of the proper standing. One of the things which he had noted while in South America was the great damage done to goods coming from the United States in a poorly packed condition. In some cases this had even led to the loss of goods forwarded, and in more than one case heavy machinery has gone through the bottom of lighters and sunk to the bottom of the sea.

### Made Exhaustive Study

In the course of his visit to the Southern Continent Mr. Fuller covered 14,000 miles. He had passed through various countries of the Southern Continent and had studied each from a business point of view, a trip, which, he said, would be well worth any Montreal business man's taking. There is nothing like the personal contact in matters of this kind, and such a trip would repay a manufacturer if he were in earnest and desired to really undertake the trade expansion in such a large country.

It was pointed out that if one were seeking trade in South America he could make but little headway through consular agencies, the only method being to send agents who are conversant with the language of the people, learn their customs and requirements, and build up business as it is being done by Japanese, Italians, and other foreign interests.

### War Had Its Effect

Surveying the various countries he visited, Mr. Fuller referred to the possibilities in Peru, Chile, Bolivia, Argentina, and Brazil. Due to the war and

*Do you know this phone service?*
Chamberlain in Cleveland "Press."

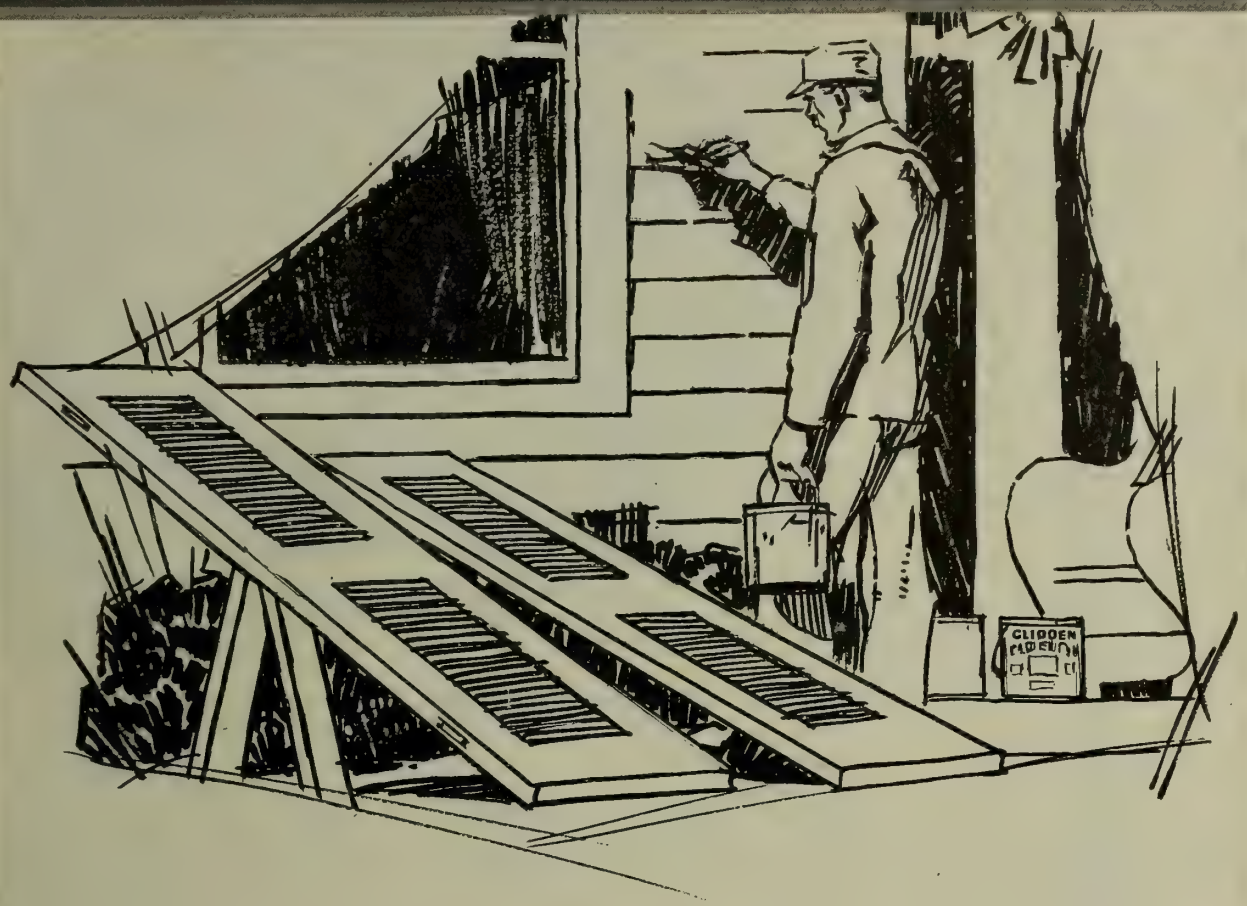
to the lack of shipping, because of this the business had been much dislocated in the Southern Continent. While passing through the country, Mr. Fuller had noted that locomotives had even been burning corn for fuel, and enormous quantities of grain had been standing in the fields.

Incidentally Mr. Fuller referred to the South American way of dealing with Bolshevists. He stated that in one of the countries he had visited near Argentine, the Government had collected some sixty Spanish Anarchists for deportation and had towed them out to the sea in a barge. The tow-rope broke, "unfortunately," with the result that the barge was lost and nothing has since been heard of the party.

### OFFICIAL FIGURES.

Official figures regarding Canadian importations of tinplate indicate the extent to which the Dominion has been purchasing from the United States. In the fiscal year ending March, 1914, shipments of plate and sheets from Great Britain amounted to 204,017 hundredweight, valued at $694,947; this decreased steadily during the war years, and was only 12,321 hundredweight valued at $84,116 in the fiscal year ending March, 1918, and 895 hundredweight, valued at $11,176 in 1919.

Imports from the United States increased during the same period, with the quantities and values as follows: 1914, 853,517 hundredweight, valued at $2,859,061; 1915, 848,107 hundredweight, $2,580,909; 1916, 981,499 hundredweight, $3,256,156; 1917, 1,178,366 hundredweight, $6,344,732; 1918, 1,270,796 hundredweight, $9,853,547; 1919, 1,448,880 hundredweight, $11,263,164.



Imports of flat galvanized sheets, which were free under the preferential tariff (British) and dutiable under the general tariff, were largely in British hands prior to the war. Imports in the fiscal year ending March, 1914, were valued at $3,073,268, of which $2,054,508 were from Great Britain. They decreased to $986,264 in the fiscal year ending March, 1918. Rolled sheets, whether polished or not, of No. 14 gauge or thinness, have averaged over 1,000,000 hundredweight a year during the last fiscal years. In this commodity the United States has taken the largest share of the trade.

# Predicts That End is Already in Sight For Supplies of Crude Turpentine

SOME interesting predictions in regard to the future of turpentine and rosin production were made at a meeting in Savannah this week by Dr. Arthur D. Little, of Cambridge, Mass.

Application of chemical research to the utilization of rosin and turpentine was suggested as a productive field. "The end of the virgin supply of crude turpentine," Dr. Little said, "is already in sight, and much nearer than is generally realized. Fortunately for the South, and for the world, chemistry has performed the double service of demonstrating that cut-over lands may profitably be cleared and new supplies of rosin, turpentine and pine oil extracted from the encumbering stumps of long past lumbering."

Wastes are colossal, he pointed out, in the lumber industry, in gas and oil, and agriculture, and he suggested that the South's prosperity would be dependent on the utilization of these wastes. "A ton of straw, for example," he said, "will yield 1,100 feet of gas, or 800 pounds of high-grade paper. Great stores of ethyl alcohol, rosin, turpentine, gas and tar, and many thousand tons of paper, container and building boards, fruit wrappers, bags and twine are potentially present in the wood waste burned in the South each day."

# Confidence in Paint

Because the name Glidden is known throughout the Dominion for good quality in paint and varnish materials is one reason why you can have every confidence in Glidden Endurance Paint. Glidden Varnishes stand in high esteem by painters everywhere. So with Glidden Enamels. Glidden Jap-a-lac is a household word. Now this word stands for Paint —Glidden Endurance Paint—a pure lead and pure zinc paint having just the right proportions of those paint pigments and paint liquids that produce enduring ability.

Not the cheapest paint you can sell per gallon, but by far the most profitable paint you can handle when "turn over" and general consumer satisfaction are considered.

Let us mail you our special paint proposition.

## WINNIPEG MARKETS

((Continued from page 89)

undergone a substantial advance. New prices are on the basis of 17½ per cent. off list prices, as compared with a former discount of 20 per cent. and 5 per cent. off list.

### *Stillson and Trimo Wrenches Up About 7½%*

**Winnipeg.**

STILLSON AND TRIMO WRENCHES ADVANCE. — Indications last week pointed to the probability of a slight drop in Stillson and Trimo wrenches and parts. This week's market tendency, however, dispels any such hope, as the latest quotations show a decided advance of approximately 7½ per cent. on previous prices. No further changes are anticipated at present. The following are quotations:

Stillson wrenches.—6-inch $1.05, 8-inch, $1.18, 10-inch $1.31, 14-inch $1.84, 18-inch $2.62, 24-inch $3.81, 36-inch $7.09. Jaws for same, 6-inch 39c, 8-inch 42c, 10-inch 45c, 14-inch 60c, 18-inch 92c, 24-inch $1.18, 36-inch $2.28.

Frimo Wrenches.—10-inch $1.56, 14-inch, $2.19, 18-inch $3.13, 24-inch $4.53. Jaws for same, 10-inch, 53c, 14-inch 72c, 18-inch $1.09, 24-inch $1.41.

### *Black Sheet Steel Shows Further Advance*

**Winnipeg.**

BLACK SHEET STEEL shows further advance. Another general advance has occurred on sheet steel, and although the change is not of large proportions, it indicates to a certain extent the future prices to which this line may advance if supplies are not forthcoming in larger and more regular quantities. Current prices are as follows: 10-gauge, $7.30; 12-gauge, $7.35; 14-gauge, $7.40; 16-gauge, $7.50; 18 and 20-gauge, $8.10; 22 and 24-gauge, $8.15; 26-gauge, $8.20; 28-gauge, $8.30.

### *Rope Unsettled Again Advances*

**Winnipeg.**

ROPE takes a substantial jump upwards. After a short period of apparent stability shows substantial advance in this week's quotations. All lines change, with the exception of lath yarn, which it is anticipated will advance in the near future. The new quotations are: Sisal rope, ¼ in. and 5-16 in., 25½c; ¾ in. and larger, 23½c.

British manila and African hemp, ¼ in. and 5-16 in., 29¼c; ⅜ in., 28¾c; 7-16 in., ½ in., and 9-16 in., 28¼c; 5-8 in., 27¾c; ¾ in. and larger, 27¼c.

Pure manila, ¼ in. and 5-16 in., 29¼c; ⅜ in., 33¾c.

Lariat sisal fry, 3 x 7-16 in., 28½c; 4 x 7-16, 29½c.

Lariat manila fry, 3 x 7-16 in., 37¼c; 4 x 7-16 in., 38¼c.

Lath yarn, 23½c per lb.

### *Plumbing Goods Take Upward Turn*

**Winnipeg.**

PLUMBING GOODS take upward turn. Many plumbing fixtures and parts show an advance for the week, the lines affected being: closets, closet tanks, bibbs and cocks, supplies, traps, baths, sinks and trimmings. Plumbing goods, for the past few weeks have been quiet, wit ha firm market. This week, however, shows a general advance of approximately 10 per cent. on previous prices. Plumbing goods are at present in good demand, but with the advent of spring, unusually large business is anticipated. Greater production will be necessary to meet the demand, and further advances are expected at no distant date.

### *Brass Cased Tubing Shows Further Advance*

**Winnipeg.**

BRASS CASED TUBING.—This line has been steady for some weeks, although indications pointed to further advances at no distant date. An advance has now occurred and further advances are anticipated in the near future. The new prices are as follows: Brass cased tubing, ¼ in., 12c; ⅜ in., 14c; ½ in., 16c; ¾ in., 24c; 1 in., 28c; 1¼ in., 45c; 1½ in., 55c.

### *Padlocks Some Lines Show Slight Advance*

**Winnipeg.**

PADLOCKS.—Some lines of padlocks again show an advance. This line of goods, although they have shown steady advance in the past, have been for some time quiet, with little noticeable change. Recent changes, however, show another 8 per cent. increase on previous prices, the Yale lock being the most affected.

### *Turpentine Shows Higher Prices*

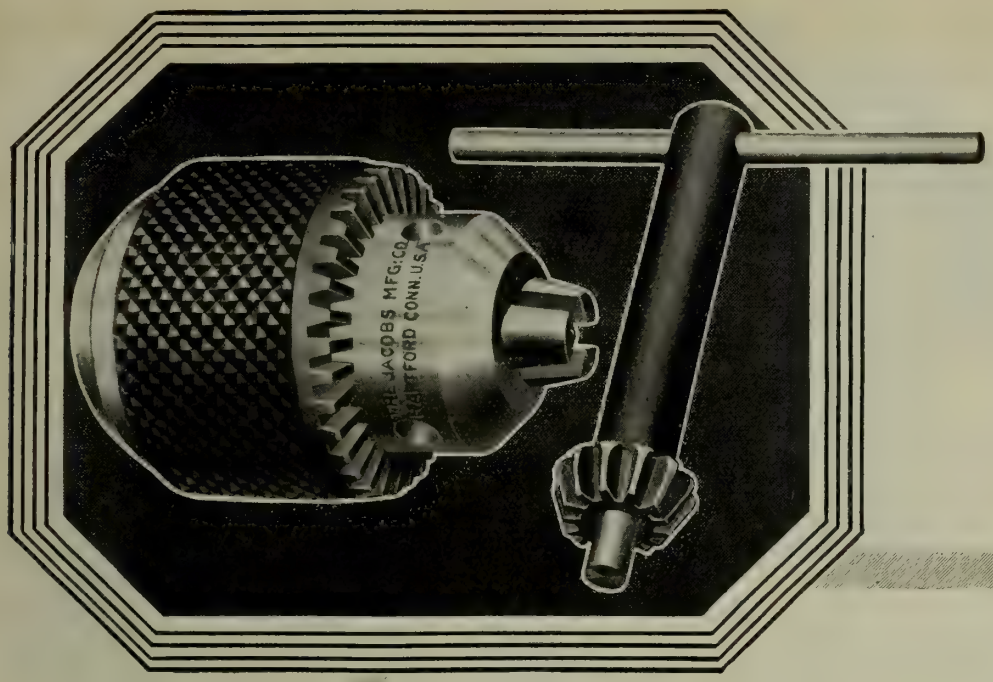
**Winnipeg.**

TURPENTINE in the past has shown regular and marked advance, the market for the present is somewhat unsettled and further advances are anticipated in the near future. Present listings are: Barrel lots, $2.65 per gal.; less than barrel lots, $2.70 per gal.; one case of 2 5-gals., $27.70; one case of 1 5-gal., $13.95.

# PITTSBURGH MARKETS

PITTSBURGH, Dec. 18.—An intense feeling of relief pervades the iron and steel industry. The coal strike is off, and probably carries with it what little was left of the iron and steel strike. What remains to be done is to complete the organization of working forces for efficient operations. Full output may not be reached until March, ut steady progress is expected to be made. The steel trade feels as if it would be leaving behind it, with the old year, most of its troubles.

#### Steel Production



The coal strike can hardly have made steel scarcer, though there are no visible signs of it having made steel more plentiful. On the whole, the shortage of coal restricted the consumption of steel more than its production. A number of steel mills have been affected, but the finishing of steel has been restricted more than the production, through some works keeping their open-hearth furnaces, or Bessemer converters, going when they closed rolling departments to save coal, and the unfinished steel accumulated can be rolled later.

#### The Iron and Steel Strike

Before the coal strike began to restrict steel mill operations, the iron and steel strike was practically over, except in the Wheeling districts. Strikers in that district have been making investigations as to operations elsewhere, and find that the strike leaders grossly misled them by insisting that operations were poor in other districts. The Wheeling district strikers are, therefore, ready to go back to work, and plants in the district will be started as rapidly as fuel supplies permit.

While the strike is over, the steel producers explain that it will be some time before full production can be reached, as working forces are badly demoralized on account of so many men having shifted in employment, while the morale is low at some works through the men taking advantage of the knowledge that the employers preferred them to be on the payroll and doing indifferent work rather than to be on strike. The situation is probably not as bad as it is painted in some quarters, however, for it must be remembered that in August the production of steel, although greatly increased over the rate in May, was only about 80 per cent. of rated capacity, and in the first three weeks of September, just before the strike, it can hardly have been as much as 85 per cent. Thus the mills have no high mark to aim at in order to regain the rate of production before the strike.

It is now possible to make a fairly close estimate of the amount of steel production lost on account of the iron and steel strike. From its inception, September 22, until December 8, when the coal situation became altogether the dominant influence, there was a period of 11 weeks. The rate of finished rolled steel production just before the strike was about 600,000 gross tons a week; so that in the 11 weeks, normal production would be taken at 6,600,000 tons. Actual production may be estimated at about 4,000,000 tons, showing an apparent deficit of 2,600,000 tons. However, part of the production before the strike, perhaps 10 per cent. or more, was for the purpose of accumulating stocks, since the strike was expected, and in many quarters even a greater strike than occurred. Production for consumption was only between 500,000 and 550,000 tons, and stocks were drawn upon during the strike.

# MORE PRODUCTION

## Increased production is the world's crying need to-day.

In industry it is to be gained in great part by the adoption of time-saving methods.

In selling to the drill user Jacobs Chucks you are selling him greater convenience and a time-saving device as well as a firm-gripping, dependable tool.

You will understand his appreciation when he calls for more of the same sort.

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, Dec. 18.—Definite changes in the paint market are practically nil this week, that is, in the matter of quotations. Linseed oil is selling at the same prices as quoted last week, but little relief has come in the way of increased seed supplies. It will be several weeks, in all probability, before there is measurable improvement.

Turpentine shipments still are light, and the outlook for stock is little, if any, better. The basis is unchanged in this market.

Putty has been selling so well that some of the jobbers are short of supplies, and this is due, in part, to the scarcity and high cost of whiting, also to the scarcity of linseed oil. Glass markets are active. Some shipments are reported to have arrived from Belgium. Shellacs are scarce and firm at the recent advances. Manufacturers are very busy on actual orders for prepared paint for next year, and the outlook is very promising for a big season.

### *Some Argentine Seed; May Come to Crushers*

**Montreal.**

LINSEED OIL.—Movement of flax from the lake head is bound to be of limited quantity for the coming weeks. The dependence of the crusher is on supplies from the south, and it is stated that some seed is looked for, with probability of improvement coming later. In the meantime supplies are light. However it is quite likely that, for awhile, there will be little surplus oil, and manufacturers, in the meantime, are having all they can do to secure such quantities of oil as they need for winter menufacturing. Prices are unchanged this week, but altogether, the market is very strong.

| Raw— | Imp. Gal. | |
|---|---|---|
| Single barrels | 2 47 | 2 50 |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |
| **Boiled—** | **Imp. Gal.** | |
| Single barrels | 2 49½ | 2 52½ |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |

NOTE.—Owing to fluctuations seed markets jobbers, generally, are not quoting.

### *Not Heavy Demand But High Turpentine*

**Montreal.**

TURPENTINE.—Prices have been continued firm throughout the week, but there has been no change, quotably. Manufacturers have required more stock than they have been able to procure from the south, but there seems little promise of improvement, as far as augmenting supplies is concerned. Were it not for the fact that demands from the trade are seasonably small, the market would tend to firm. In the meantime, estimates of production in the South are placed at 337,000 casks for the season just closing.

| Turpentine— | Imp. Gal. | |
|---|---|---|
| Single barrels | 2 35 | 2 40 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Glass Rules Strong; Putty Supply Smaller*

**Montreal.**

GLASS AND PUTTY. — Strength characterizes the glass market, and the jobbers report a healthy demand for both box and plate. The arrival of glass from European sources seems more promising, and if this is continued on an increasing scale, the market ought to be more freely supplied than heretofore. Importers have been besieged with repeat orders, and the movement has been heavy.

Putty sales have been so heavy as to materially reduce the stocks of jobbers, and there is much difficulty, it is said, in procuring whiting. Under this scarcity whiting markets are firm. No putty price changes have been registered this week.

| | 5 ton | 1 ton | Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 6 30 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do., 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 3 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 10 20 |
| Do., in 100 lb. cases | 7 15 | 7 40 | 7 75 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

### *Shellacs Very Firm; Prepared Paint Selling*

**Montreal.**

SHELLACS, PAINTS.—There is decidedly great difficulty in procuring adequate stocks of shellac, and the market is very firm at the advance of fifty cents, recently made. This commodity, it would seem, will continue to be scarce for some time yet.

Paint makers are still working actively on orders in hand for the coming season, and the basis is steadily firm, with many raw materials higher and scarcer than ever.

### *White Lead in Oil is Firm and Steady*

**Montreal.**

WHITE LEAD IN OIL.—With the jobbing trade, the market is ruling without basic change, but the undertone is steadily firm. Sales have been maintained well all through the season, and with high labor, high oil, and high pig lead, the commercial product is naturally bound to hold high. Sales are made on the following basis: Five ton lots, per cwt., $16.50; ton lots, $17, and smaller quantities, $17.35.

## TORONTO

TORONTO, December 18.—Some important changes are noted this week in the oil and turpentine market. Linseed oil has advanced from 5 to 10 cents per gallon; turpentine shows a decline of 5 cents per gallon, while shellac has climbed 50 cents per gallon higher. White lead in oil is showing good demands, also prepared paint, putty, glass, etc. Plate glass list prices have been changed and are now quoting on a new net list.

Indications point to a great year of expansion for 1920, and many are preparing for this, judging from the number of booked orders that are reported. Now that the coal crisis is over and other labor is getting more settled, manufacturers, it is believed, will be able to concentrate on production in all lines, which will naturally reflect in the prices.

### *Rosin Unchanged; May Go Higher*

**Toronto.**

ROSIN has shown some fluctuations but many believe that a decline would not be in order and are more prepared to look for higher prices.

### *Turpentine is Weaker; Showing Decline of 5c*

**Toronto.**

TURPENTINE is weaker and has been easing off some this last day or so. One of the reasons given is the fact that very warm weather has prevailed till a late season in the South this year, and this has enabled the workmen to get supplies out more rapidly. It is hard

# Refinishing Jobs

Much of the varnish sold by the dealer is used for refinishing purposes, and is bought by consumers who are not finishing experts. It is to such consumers that Berry Brothers' Varnishes, Stains and Enamels are especially adapted.

While "Berry" finishes have been for a great many years appreciated by the experienced painter because of their uniform quality, their easy working and excellent drying properties are additional buying inducements among house owners who are unskilled with the varnish brush and do their own refinishing.

**Partial List of Distributors of Berry Brothers' Products**

Liquid Granite FLOOR VARNISH Luxeberry WHITE ENAMEL

to state what will take place in the near future, but present indication are for weaker prices for a few weeks at least. The supplies on the local market are said to be sufficient to cover all present needs. Following are the present quotations:

| | Per Imp. gal. |
|---|---|
| 1 barrel lots | 2 55 |
| 2 to 4 barrel lots | 2 54 |
| 5 gal. lots | 2 70 |

## *Prepared Paint Shows Continued Good Sales*

**Toronto.**

PREPARED PAINT.—The demand for this commodity continues to be a large one, and a large volume of business is being expected during the coming year. The present price, although a firm one, is holding steady, and no immediate change is expected.

## *Linseed Oil Again Advances 5 to 10c Gallon*

**Toronto.**

LINSEED OIL.—An advance of from 5 to 10 cents per gallon has taken place. The main cause for this, it is stated, is the persistent advance of flax seed, and last week's market reported advances as high as 18 cents on seed. The situation, however, is a quiet one, and business is expected to be rather dull till at least the new year. No lower prices of any marked nature are expected till near the spring, when it is possible that the Argentine crop may affect prices. The following are the new prices:

| Linseed Oil— | | Raw |
|---|---|---|
| 1 to 2 barrels, gal. | 2 70 | 2 80 |
| 3 to 5 barrels, gal. | 2 69 | .... |
| 10 barrels and over | 2 67 | .... |
| | Boiled | |
| 1 to 2 barrels, gal. | 2 73 | 2 83 |
| 3 to 5 barrels, gal. | 2 72 | .... |
| 10 barrels and over | 2 70 | .... |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

## *Good Sales Noted For Putty*

**Toronto.**

PUTTY shows very good sales and the price remains unchanged. The following are present quotations:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels | $5 85 | $5 60 | $5 95 |
| Do., 100 lb. iron | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels | 7 10 | 7 35 | 7 70 |

## *Shellac Has Taken Advance, 50c Gallon*

**Toronto.**

SHELLAC.—An advance has taken place in shellac of 50 cents per gallon. It would be hard to state the reason for this advance but one of the main factors is the shortage of raw material, as well as the present high rate of exchange on the New York market.

## *Plate Glass Advances; Window Glass Unsettled*

**Toronto.**

GLASS.—Plate glass has shown an advance. Jobbers state this is more of a revision, and while some sizes are higher others are very slightly less. One of the main factors is that the smaller cut sizes are practically off the market and are impossible to procure. This being the case, it is necessary to cut the larger sizes, which will sell at a higher rate per square foot. Window glass at present remains firm and unchanged, although higher prices are daily looked for. It has been stated by some jobbers that only shipments for prompt delivery in both plate and window glass will be accepted. The new prices on plate glass are as follows:

| | Per sq.ft. |
|---|---|
| Plates from 1 to 15 feet | 1 65 |
| Do., 15 to 25 feet | 1 85 |
| Do., 25 to 50 feet | 1 95 |
| Do., 50 to 100 feet | 2 20 |

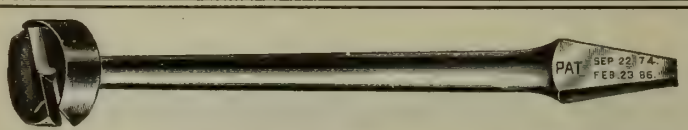
These prices are net. F.o.b. Toronto. Casing and freight charges extra.

## Enormous Increase In Demand For Rubber

Owing to the enormous increase in the demands for rubber for automobile tires and other purposes, the supply is barely keeping up with demands.

At the annual general meeting of Harrisons & Crosfield (Ltd.), London, Eng., the chairman of the company dealt with the position of rubber and gave interesting details of world production and consumption. He pointed out that in 1918 he had predicted, subject to there being no artificial restriction of output, that the production in 1919 of plantation rubber would be 314,000 tons; for 1920, 354,000 tons; in 1921, 381,000 tons; in 1922, 403,000 tons; and in 1923, 430,000 tons; that in 1917, the world's consumption of rubber was 255,000 tons, 52,000 tons of which were derived from sources other than the East. After allowing for the accumulated crop of 1918, which was exported from Eastern countries in 1919, he estimated the plantation production for the present year will reach 320,000 tons; with 40,000 tons of wild rubber, the aggregate for the year will therefore total 360,000 tons. As to subsequent years he did not revise the estimates he gave on the previous occasion except that in 1920 production will probably reach betwen 360,000 and 370,000 tons.

Concerning consumption, the chairman stated that the United States has imported over 150,000 tons during the first eight months of the current year, and the total for the twelve months would aggregate about 220,000 tons. Against this the net imports of the United Kingdom were only 40,000 tons, which he estimated would meet the year's consumption. France took 14,500 tons in the first six months and for the year may need 30,000 tons. Italy's requirements he estimated at 15,000 tons; Canada, 10,000 tons; Japan, similar amount; and, allowing 25,000 tons for the rest of the world, the total consumption would reach 350,000 tons, against a production of 360,000 tons. He pointed to the increasing demands and needs of the United States for the raw product, comparing it with the lower requirements of the United Kingdom. He concluded by expressing the opinion that, owing to the greater use of rubber for transport vehicles as well as for new purposes, the rubber industry is likely to be faced with a shortage of raw material rather than of oversupply.



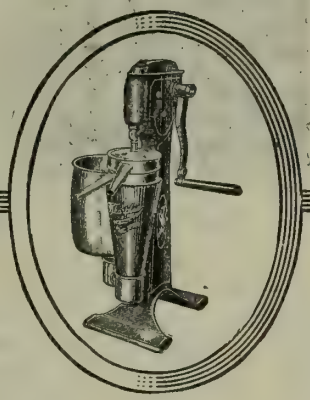
## Britain Still Leads in Trade of World

NEW YORK.—The foreign trade of the United States for 1919, the first year following the war, will probably exceed $11,000,000,000, compared with $4,259,000,000 for the fiscal year of 1914, all of which preceded the war, according to approximate figures compiled by the National City Bank.

Despite this great gain, which is partly due to increased prices, Great Britain still retains the leadership in world trade, according to the bank's statistics, with a total for 1919 that probably exceeds that of the United States, possibly the twelve billion-dollar mark.

Exports form two-thirds of the United States trade, while imports attain the same ratio in Great Britain's figures. American exports approximate more than $7,000,000,000 as against $2,365,000,000 for the 1914 fiscal year, and imports $3,800,000,000 against $1,894,000,000.

The international trade of the world has advanced to $70,000,000,000, a gain of $30,000,000,000 over the year preceding the war and $1,000,000,000 over 1918. As these figures include exports and imports of all countries, thus counting all merchandise twice, the 1919 total represents $35,000,000,000 worth of merchandise.



THE PROGRESSIVE MANUFACTURING CO.

# SHARPLES CREAM SEPARATOR — SUCTION-FEED —

***Skims Clean at Any Speed***

No other separator manufacturer could put into five words or *fifty* words, as convincing an argument as "Skims clean at any speed." They tell the farmer about the durability of their separator, that it is well known, that it costs less and everything else *but* the *one* big reason for purchasing a separator—to get *all* the butterfat out of the milk. Sharples *also* has the exclusive advantage of no discs in the bowl; knee-low tank; once a month oiling system; durable construction and, besides, it is the pioneer North American Separator.

It is profitable, indeed, to handle the separator backed by provable sales points, such as outlined above. These points are constantly being placed before Dairymen through extensive Sharples Advertising.

# Stock this Mayhew
## *Bit Extension*

Your customers need this Mayhew Bit Extension—the most nearly perfect on the market.

The forged steel jaws completely close on the shank of the bit. A flexible connection between jaws and shank of the extension insures centering the bit. Sleeve runs on a quick-acting multiple thread. Extension will follow a 5/8" hole. Made in all lengths from 12" to 36".

Regular Mayhew quality. Meets a definite demand. It should be in *your* store.

# Sell the Favorite

Were you to take census now and then of the members of the best hockey teams you would confirm what we have ascertained—that

**Automobile Skates**
The Skate with Aluminum Tops

***Are the Favorites***

Nothing but the supreme test of hockey could bring out the favorite so decidedly.

The vast majority of hockey men prefer Automobile Skates because they stand the test.

The blades keep their keen edge because they are of chrome steel tempered to wonderful hardness. Yet the blades are not brittle because the core is soft and tough and practically unbreakable.

# Defies Destruction

## The Bristles in the SIMMS PAINT BRUSHES

are set in by a unique and exclusive process which has been developed by the expenditure of a large amount of money, and genuine hard work.

The setting is as strong as adamant, and cannot be destroyed.

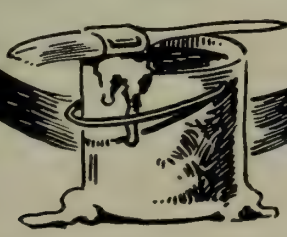
This brush can be used for years in all kinds of paints, varnishes, oils, hot water, paint removers, etc., and never release a single bristle.

TRADE SIMMS SET IN RUBBER MARK

is the brush your painter customer wants. Stock it for him, and get his trade and appreciation.

For your general trade, we have the following line of high quality products—

BROOMS
WHISK BROOMS
LATHER BRUSHES
SHOE BRUSHES
STOVE BRUSHES
SCRUBBING BRUSHES



Communicate with our nearest branch, for prices, etc.

# Electric Weld Range Boiler

# The Quality

## MADE IN CANADA

**We desire to announce the opening of our new factory in Toronto for the manufacture of the famous "Electric-Weld" Range Boilers and Tanks**

Class A 20

The Electric Weld Boiler is extra heavy weight, full wine gallon capacity, rugged and strong, built on the "No Rivet—No Leak Principle," and is furnished you at no greater price than you are asked to pay for the smaller, lighter, less durable, riveted product.

The "Quality Range Boiler" has electrically-welded seam. Has brazed head and bottom. Has hydraulic-driven pipe connections.

Is completely galvanized inside and out after manufacture. Is rigidly tested and inspected.

The cut showing the strip of metal is proof of the strength of the Electric Weld Under mechanically applied tension the weld sustained a pull of 54,160 lbs. per square inch and even under that tremendous load remained intact and the rupture occurred, not in the weld, but in the body of the sheet itself.

The Electric Weld principle of manufacture explains the dominating position held by these boilers and for this reason you will find Electric Weld construction in high pressure air tanks, oxygen tanks and wherever freedom from leaks is the paramount need. A service record of seventeen years and five million boilers and tanks in use is evidence that the Electric Weld is the superior of every other type of construction.

# TINKER TOM'S TALKS.

*No. 238*

On the evening of December 12th the Annual Banquet of the Employees of our Company occurred—Much of the pleasure on this glad occasion was due to the splendid way the trade generally has supported Premier Made-in-Canada Galvanized Sheets. The Employees unanimously asked me to say to you all most heartily and gratefully—

*"Thank you, gentlemen!"*

TINKER TOM

# They See The Can—
# Recall The Brand—
# *And You Record a Sale*

**Stephens** REGISTERED TRADE MARK has already impressed many minds favorably. An average display is all that's necessary to start a train of thought in the customer's mind that leads from your store to an unpainted home. Your cash register becomes the closing link in the series of events suggested by your display of **Stephens'** Paints. This doesn't happen once—it happens many times. Are you making the most of such opportunities? Have you the right brand of paint? If not, your paint turnover is not all it might be.

*Suppose you write us about an agency. There's money in it.*

## G. F. STEPHENS & CO., LIMITED

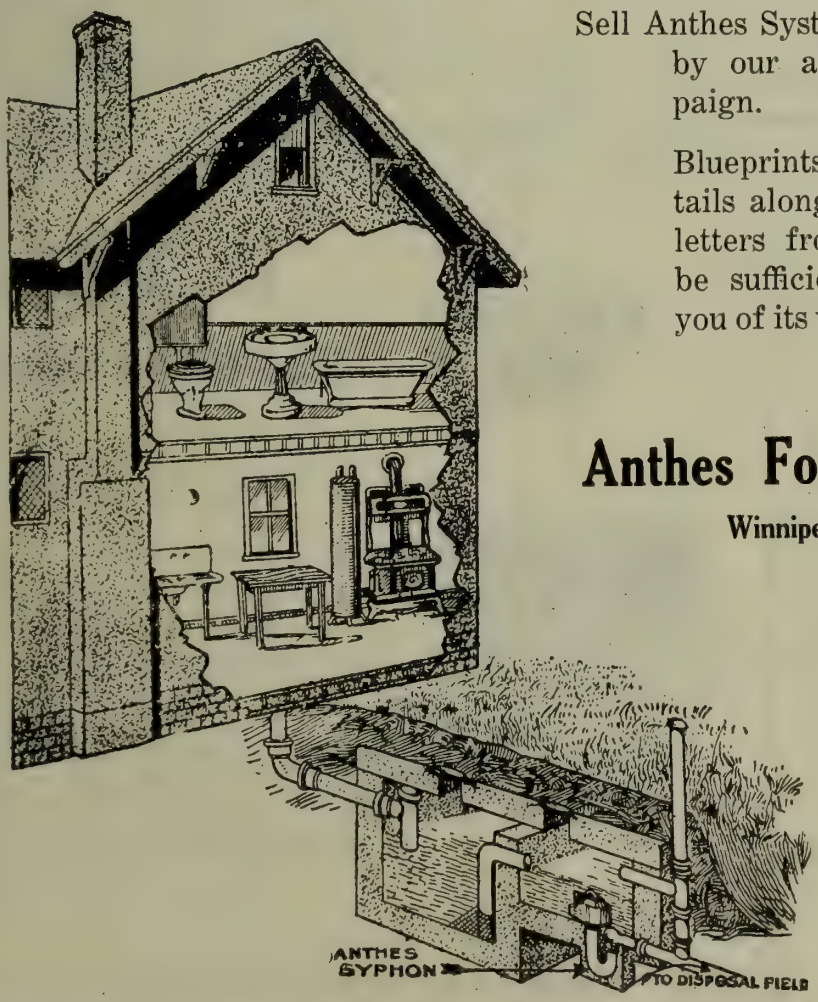
# The Campaign for Bigger Business and More Profits for You

## Our advertising campaign will forge a strong link in the campaign to make Western homes have real city conveniences.



You should profit by this campaign by selling Anthes Sanitary Septic Tank Systems to your customers.

The special construction of the Anthes Syphon makes the system quick acting, thorough and efficient. Approved by Health Authorities.

One of our customers last year installed 14 equipments.

Sell Anthes Systems and benefit by our advertising campaign.

Blueprints giving full details along with copies of letters from users would be sufficient to convince you of its value. Write us.

# Steady Demand For Famous Five Files

The demand for famous Five Files is greater than ever.

Unvarying quality has made them the standard files for all kinds of work in wood or metal.

The dealer who stocks Famous Five Files does not need to explain and apologize. The market is there; he has only to supply it.

Sell them. They are:

# A Quality Article and Well Advertised

## That's Why It Sells so Well

TAPATCO STAPLING Device for attaching hooks gives a firm hold long after the fabric itself has become weakened by use.

The demand for stuffed collar pads is certainly on the increase and is destined to grow still more as horse owners come to realize that this type of pad is the best safeguard against bruised, chafed and galled shoulders.

But why do people usually ask for Tapatco Pads?

Some, because they read our advertisements that tell in a sincere and truthful way, the story of Tapatco superiority.

Others are led to try Tapatco Pads by what they hear of them from neighbors and friends who have used them on their horses and found them to be all we claim—soft, pliable, cushion-like—the best of all protection against the rubbing of the collar.

TAPATCO BRAND REGISTERED TRADE MARK

**COLLAR PADS**

TAPATCO GLOVES

Our varied and complete line includes styles that cover all your customers' requirements in the way of work gloves.
STYLES—Gauntlet, Knit Wrist, and Band Top.

# More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

# You Will Sell More Waffle Irons
## If You Sell the Stover

Look at this cross-section of Waffle Iron Plates. It shows how uniform the STOVER makes waffles.

You will satisfy your customers and increase the popularity of waffle baking by selling this iron. They are made with wood or wire handles, high or low bases, and round or square shapes. Send for our special waffle iron circular.
Then you need our R-19 catalog. We also make windmills, feedmills and gasoline engines.

| | |
|---|---|
| Mop Sticks | Door Pulls and Latches |
| Meat Broilers | Coat and Harness Hooks |

# Williams' "Agrippa" Tool Holders

**"The Holders that Hold"**

TO keep pace with the rapid progress of the metal-working industries, speed—and hence economy—in production is essential. In modern shops, using heavy cuts and continuous high speeds, Williams' "Agrippa" Tool Holders meet the most exacting demands satisfactorily.

They are sturdy, dependable tools, the result of nearly half a century of experience in the specialized production of *Superior* Drop-Forgings, and are made in a wide range of sizes for all regular machining operations:—Turning, Boring, Planing, Threading, Knurling, Cutting-off and Side Work.

Our Booklet describes them fully—may we send it?

*"Agrippa" Turning Tools are furnished in either Cam or Set Screw Pattern.*

## TINOL SOLDERING PASTE (Flux)
(NON—CORROSIVE)

TINOL Soldering Paste has a new and important action; as it evaporates it leaves behind it a thin coating of clean bright tin, to which solder takes readily. With regard to the chemical properties it should be mentioned that an acid reaction is avoided completely. This fact is of the utmost importance, for instance, for soldering joints which must remain permanently free from oxides and harmful salts as in the case of electrial work. Packed in 2 oz., 4 oz., 1 lb. cans and bulk.

**A Perfect Solder Joint is Sure If Soldered With "TINOL"**

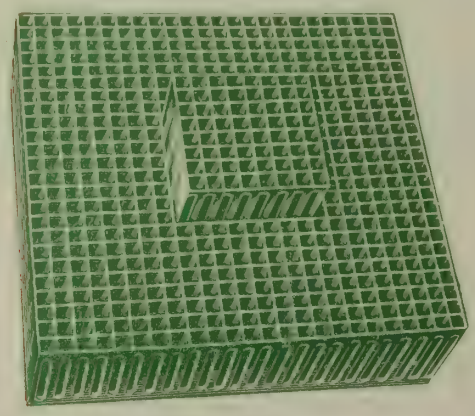
# McKINNON RADIATORS

## *Really Cellular*



It is easy to break an ordinary radiator beyond repair, a condition that entails wholesale waste, because scrap-ing an ordinary radiator entails scrap-ing the expensive tanks and other accessory parts.

The McKinnon Radiator solves this big waste problem—Its core is made up of individual cells, which can be fitted into any radiator frame work—

This is very valuable information for the auto owners and garage men — We supply new cores that will fit ANY RADIATOR SHELL.

Corrosion is also one of the evil influences of water on the radiator—We overcome this by careful tinning of the inside and outside of McKinnon Radiators. The sides are straight downward, and corrugated so that the water is constantly in agitated action carrying sediment away from the sides, so that the heat can be transferred to the sides and carried away by the cool air passing through the air cells, keeping the engine cool.

The water pockets are also constructed to permit of an outward strain many times before a burst will take place—

Vibration has no terrors for the McKinnon Radiators—because it is a solid unit not an aggregation of tubes, fins and separate pieces.

This is one line every garage man and dealer should carry.

# Co-operating for Results—
## Our Common Objective—
# SALES

"Co-operation" is the keynote of modern business. The manufacturer, the wholesaler and the hardware dealer are all interested in the one objective, **Sales.** Their ultimate interests are identical—their dependence one upon the other makes them work together for the consumer's satisfaction.

Now of these three, the hardware dealer is the one close to the consumer. Therefore, on him rests a big responsibility; without his intelligent effort, the endeavors of the wholesaler and manufacturer come to naught.

The manufacturer is responsible for the **quality** of the product—also for the advertising of that quality to the consumer.

The wholesaler makes it easy for the merchant to obtain his supplies—enables him to have the product always in stock.

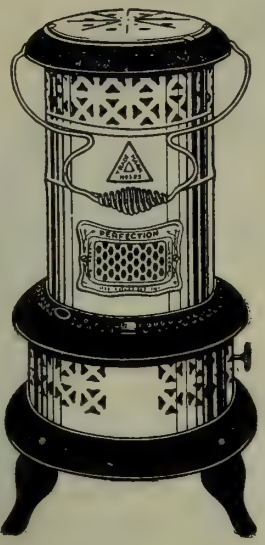
The hardware dealer's job is the proper introducing of the product to his customers. No matter how well the manufacturer and wholesaler do their part, many sales may be lost if the dealer is lukewarm about the introduction.

Take O-Cedar Products as an example.

**If,** instead of merely stocking these Quality Products and selling them when they are asked for, **hardware dealers will mention O-Cedar when talking to or 'phoning a customer,** the work of the manufacturer and wholesaler will have been worth while.

The chain of co-operation may be strengthened, so far as O-Cedar is concerned, by the dealer mentioning O-Cedar in his advertisements in the local paper, for which we furnish electros and plates of advertisements free of charge.

Another way of carrying out this mutually-profitable co-operation is for the dealer to put in window displays that feature O-Cedar Products along with the attractive O-Cedar signs and hangers—and by placing O-Cedar Polish and O-Cedar Polish Mops where they can be readily seen by the customers.



These suggestions are not selfishly offered—they are all a part of "Good Merchandising"—they represent the dealer's end of the co-operation idea.

And it's an idea that, fully and properly worked out, means real money for the hardware dealer himself.

## VICTORIA ST., TORONTO

The Trade Mark known

**UNIVERSAL**

in Every Home

DOUBLE BOILER No. 232

# UNIVERSAL Aluminum Ware

is new in design—new in quality-concepts—new in sanitary features—new in selling possibilities.

**Every utensil a strictly quality product.**

## A Few Features of Universal Betterness

Bodies of pots, pans and kettles are gracefully formed, seamless and leak proof. No sharp angles, cracks or crevices to collect dirt, grease or grime.
Extra large, extra strong close-fitting beads.
Handles doubly braced for double strength—made of cold rolled steel, heavily tinned.
Bails stand at any angle away from the heated vessel.
Ears with straight edges easy to keep clean—made of cold rolled steel.
Pure aluminum spouts welded to bodies.
Three sizes of knobs, a UNIVERSAL refinement, and having the white line of distinction.

**Every utensil bears the stamp**

UNIVERSAL

**The trade mark known in every home.**

The stamp of satisfaction that has become so well-known to every housewife using one or more appliances bearing this trade mark.

UNIVERSAL Aluminum Ware is being nationally advertised. Your local customers will respond to the advertised betterness of UNIVERSAL utensils. They will ask for the goods. Don't let them ask in vain.
This line is backed by a merchandising policy as liberal and clean as the ware is sound.

## LANDERS, FRARY & CLARK

NEW BRITAIN, CONNECTICUT

# 1920

AT this season of the year most people are wishing one another a HAPPY AND PROSPEROUS NEW YEAR, and we extend to you this greeting and we will go further and will tell you how, in our opinion, you can add to your prosperity.

Place your orders without delay, to cover your requirements for 1920——at least, buy all that you can afford——not particularly on account of the prospective advances in prices, but to be sure that you will have the goods. There never was a time when staple lines were harder to get than the present, and these conditions are growing worse.

This is not a bid for business——it is good advice. It is advice that is not needed in some quarters, as we are busier to-day than we have ever been before at this season of the year.

# "America" Trolley Hangers

## The Largest Sales of any Trolley Hanger in the Dominion

### For Warehouse, Factory, Garage and Barn Doors

The "America" operates in the Hatch Trolley Track—the only track supported by the famous corrugated track brackets. These brackets are, naturally, much stronger and better than ordinary, plain track brackets.

### Tandem Trucks, Hardened Roller Bearings

Apron 6 in long, 3¼ in. wide. This hanger appeals to customers because of the simple adjustments, anti-friction forged steel yokes, and ability to stand hard usage.

Its popularity with consumers and its great demand are well founded—on merit.

With each pair of Hangers are included two End Caps, Bolts for Hangers and Lag Screws for Brackets.

Packed one pair in a box complete with Screws and Bolts.

Weight per dozen pairs, without Brackets, 95 pounds.

# TONCAN METAL

*Resists Corrosion*

## Isn't there something better than ordinary sheet metal?

Ever have a customer ask you that? He's tried ordinary sheet metal and found it good **while it lasted.**

Now he wants sheet metal, but he wants "something better" and you can give it to him. Just say without hesitation

## There is--It's called

TONCAN METAL

It will give you years of satisfactory service where ordinary sheet metal gives months.

Its use is true economy, for it costs much less per year of service than ordinary metal sheet.

It can be used for every sheet metal service from ridge roll to down spout, from roofing and siding to culverts.

And it has proven its worth in thousands of structures.

Let us send you our book, "Corrosion—The Cause—The Effect—The Remedy." It is full of interesting material about Toncan Metal and its use.

# ARMCO IRON

## AND ITS FIVE POINTS OF SUPERIORITY

**Chemical Purity** **Rust-Resisting Property** **Welding Quality**
**Electrical Conductivity** **Enameling Property**

IS this the view of a city street?
No, it's only the roof of a building!
You don't say so! Where?
The Atlanta warehouse for the storage of cotton.
Whew!
It's the biggest building of its kind in the world—covers forty acres.
Mr. Arthur Tufts of Atlanta is the engineer.
Dowman & Dosier Manufacturing Company of Atlanta are the builders.

Several hundred tons of Rust-resisting ARMCO IRON were used for skylights, conductor pipes, ventilators and fire doors.
In all there are six hundred Dixie ventilators and twelve hundred and fifty fire doors, and **all** made of ARMCO IRON.
This speaks well for the faith of the builder and engineer in ARMCO quality. They wished to be sure of no disappointments.
The Atlanta warehouse is built for permanence.

**Armco Iron Blue Annealed, Black, Galvanized, Polished and Special Finished Sheets, Roofing and Siding**

**OPEN HEARTH STEEL CASTINGS TO SPECIFICATIONS**
**300 lbs. to 80,000 lbs.**
**PROMPT SHIPMENTS**

Our specialties are: Rolling Mill and Steel Works Castings, including annealing boxes and bottoms. Ship, dock, machinery, railroad, mine, engine, crane and miscellaneous heavy castings.

The trade mark **ARMCO** carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

## Butterfield & Co., Inc.

**Rock Island, Quebec**

# Your Salesman—

and the things you sell are two big factors influencing the growth of your Hardware Business. In fact the article you sell is a salesman itself. Why?

In the first place the articles you sell must be distinctive for their superiority; they must have the qualities that draw trade, that make it worth while for people to come a long way to your store and your store alone, to get them.

When your store is full of such articles your salesman's work becomes a pleasure to him, and only inasmuch as his work is a pleasure can you expect to get his full measure of co-operation, which will make your store more successful than those around.

The Tight-Lock feature in FROST FENCE gives it a distinctive selling point. Your customer compares it in use with other fences, and not only comes back for it, but says many a good word to his neighbor, which will lead to a sale.

Your salesman is glad to sell FROST FENCE because *its own good qualities help him to sell it.*

**FROST FENCE is a business builder.**

**Territory still open.**

## Hamilton, Canada

# Use Common Sense

## Real Hack Saw Economy requires the use of common sense in the regulation of weight on the saw.

Every machinist knows, when he is using a hand hack saw, that as the blade becomes worn, more pressure must be put upon it if the cutting speed is to be maintained, but he's very apt to overlook that point in using power machines.

As the saw is used the teeth become worn, and what we call the "contact" area, the area of the blade that actually rests on the work, becomes greater. That means friction and a necessity for more pressure to make the blunted teeth cut into the work. On a heavy saw 64 pounds pressure is generally about the right figure to start with, but to keep the saw cutting as fast, after it has made twenty odd cuts as it did at first, more pressure-weight is needed.

The Starrett Hack Saw Chart M.A. helps every user of Hack Saws to do more work at a lower cost. Copy sent you free upon request. Write for Catalog No. 21 M.A.

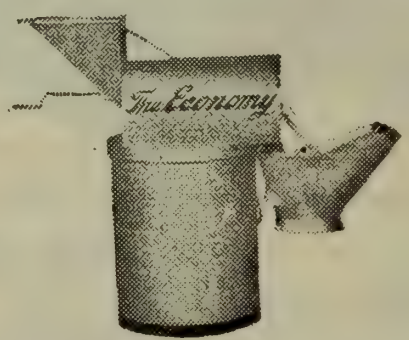
# 4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.



NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

# Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

## Mr. Stanley Worker Says—

ANOTHER year has gone around—a year which marks in history vital advances in civilization, in methods of governing and in methods of dealing with each other. It is our hope that the new year that approaches will deal with you generously, profitably and will find you in good spirits and help to increase your success in your business.

We look upon the coming year as one which will be of phenomenal progress to all of us in the building and builders' supply field. You can see it yourself.

There are not nearly enough buildings for people to live in and the prosperity of your community has brought more automobiles than there ever were there before. And all this means more garages, more garage hardware and more hardware of all kinds to be sold by you.

We thank all of the many friends who have made possible our steady growth during the seventy-six years in which we have specialized on making Wrought Steel Butts, Garage Hardware and Wrought Steel Specialties as good as we possibly can make them.

# Now for the Annual Reckoning

## Inventory Season is the Time to be Honest With Yourself—It is Vital That You Should Know Just Where You Stand—Points to Watch in Pricing Your Stock—Taking the Inventory

THE time for inventory taking is at hand and rapid changes in prices, and a record demand for merchandise and general business conditions make it imperative that hardware merchants should give special attention to this matter. It is of vital importance for merchants to know just where they stand, what merchandise is making profits, and what is "warming shelves." It is obvious that shelf warmers do not make money, and if any are in stock they should be gotten rid of and replaced with goods that will bring in money.

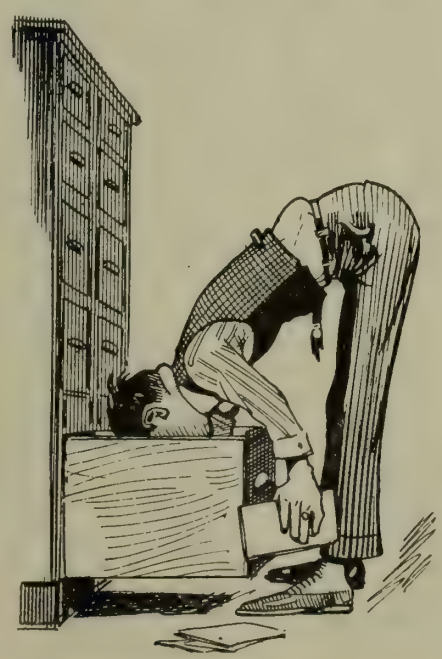
While stock taking is not an easy job, it is essential that it should be done with accuracy and thoroughness. From a business standpoint, 1919 has been one of the best years on record, especially for hardware merchants. Unless the ppredictions of some of the best men in the commercial world are very far astray 1920 will be even better. It is then up to every merchant to get away to a good start and to know just exactly what he has on hand, what his requirements are going to be, and what is equally important perhaps, what he is not going to need.

### Planning Ahead

"In my own case," said one merchant to HARDWARE AND METAL, "I always fix the actual date on which the inventory is to be written up. I begin by marking out the work fully a month before hand, and we make a start by grouping everything together in our cellar and store-room, keeping a sharp eye on the actual conditions of the various goods, so that if it should happen that anything is out of order when the day of writing up the stock arrives, the real value of the goods will be noted. In this way one is in a position of knowing clearly and correctly the actual value of the stock.

At this time, or rather just before it, I take care to buy as little as possible from the wholesaler, so that it makes it easier for my assistants to carry out their part of the work properly.

All containers should have a label placed on them showing the contents of the receptacle in each case, and marginal space left, so that in the interval, if anything is taken from stock, it may be noted accordingly. Thus, by the time stock-taking day arrives, everything outside and within the store is in good shape in the writing up of stock.



### Exercising Care

In the evening, after the store is closed we proceed in earnest at writing down everything in the store, great care and system being taken so that no small corners are being missed. This might mean quite a considerable loss in the final total, if not carefully checked up.

I always begin right in one corner of the store, close to the front, and go over the stock shelf by shelf, beginning at the top shelf and coming right down to the floor.

### Slip in Each Drawer

It is very necessary to have a slip in each drawer with a sufficient margin to mark off any goods sold in the interval. In the case of shelving, where there are no boxes, it is well to decide on either the left or right hand end of the shelf, for placing the sheet containing the list and carry out this system throughout the store and thus eliminate counting some stock twice and in other cases missing it entirely.

It often happens that several cases of the same article have been opened and some of the goods removed. It is well to go over all such cases and fill as many as possible to standard count, leaving as few as possible to count at the last minute.

Stock taking is almost invariably done during the quiet seasons, and it should be a house cleaning time as well. A good suggestion is to house clean first, starting a few weeks in advance, to clean out shelves, bins and drawers, etc., laying aside any articles that are slow sellers, shop-worn, or the tail end of a line of goods, etc.

### May Be Surprised

If this policy is adopted the merchant will often be surprised at the amount of cash he has tied up in dead stock. A very successful idea has been to put this line of accumulated stock out on display and advertise it, either in the local paper or by table or window display, using cards with attractive slogans, advising the public of the chance to buy these goods. It will be found that it is not always necessary to greatly reduce the price, especially at the present time, when goods are so scarce. It is stated by some of the most experienced merchants, that if this plan is carried out before starting to count the stock that the clerks and even the "boss" himself will take more interest in trying to push the sales of these odd lines, with the final result that the new fiscal year will be started off on a paying basis with all clean and up-to-date stock.

### Making the Entries

In entering goods in the stock book, it is a good idea to have sections of each portion of the store recorded separately, for the convenience of reference later, or, in case of fire or burglary. It might be necessary to check up for any one of the foregoing reasons at any time, and this separate recording of various parts of the stock would thus be of value.

The work of actual stocktaking does not mean, by any means, that the work is over. There remains much office

work to be done, and this should be tackled right away. Of course, it is always assumed that books are posted right up to date, or as nearly as possible. All work of finding the amount of ledger accounts will have been done and these recorded.

Great care ought to be taken with regard to the exact amount of cash on hand and in the bank, it being fully verified right away, so as to avoid any error.

Once all the data of the wholesale and retail ledgers is ascertained, the work of making extensions of the stock can be proceeded with, a little more leisurely, and all the work leading up to your final balance is done at one's own convenience. Naturally, one wishes to get through with the various work as rapidly as possible, as there is a natural anxiety to ascertain the result.

The aim is, of course, that every article should be priced at the amount it would cost to purchase at time of stock-taking, and always allowing for discounts where they are allowed.

### How to Take the Inventory

Accuracy always is the keynote of inventorying. The object is to ascertain, beyond the slightest doubt or reasonable question, just what merchandise and other things you have. The count must be right. Nothing else will do. Where it is necessary to estimate, like when we have a barrel of oil partly used, the estimate must be conservative. If it looks like somewhere between 15 and 20 gallons, put it down at 15. Get on the inside always where there is doubt. Otherwise, where it is possible to weigh or count, get down the exact amount of saleable goods. If there are damaged items, put them in below the sound ones, indicating, as nearly as you can, what they are worth.

These are rules always to be observed; but if ever there was a time when one should be extra conservative, that time is right now. Things have been advancing rather steadily for a long time. Men have become a little liberal, sometime reckless, about ordering. They have felt that everything was "a safe buy" until some are loaded up heavily. Nothing is "good property" which does not turn normally. Some lines have the disadvantage that they deteriorate steadily.

Now, I am not going to prophesy that things are due for a slump. It is always foolish to prophesy and right now it is absolutely superfluous, for one mighty cogent reason—this:

### Loss and Shrinkage There Already!

That on such goods as you have in excess of normal current requirements, you have sustained the loss already, regardless of the market! Get that? Every day you keep goods on hand costs money. Therefore, any goods you hold beyond the normal time of turnover have piled up against them an abnormal expense. When this extends beyond a certain very narrow limit, your loss is just bound to exceed any advantage that can possibly accrue from what you like to call "good buying."

There is, as a matter of fact, just ONE kind of good buying. That is underbuying. That makes for the quick turn, and the quick turn is the whole law and profits in retailing.

So there is no use trying to sidestep the fact that excess stocks stand you a loss; that the loss is there now, whether you admit it or not. So we need not speculate on what the market is going to do in that connection.

### How Shall We Price Our Stocks

All these factors influence the value of your stock on hand. If you have goods enough to cover your normal sales for five months ahead, that stock should be taken in at not more than 80 per cent. of its replacement value, and 75 per cent. would be better. Such facing of plain facts may cause you to slow up on liberal buying for a long time. If you slow up as a permanent habit you will make more real money out of your business!

These are hints at how to price your goods. How far you will go on other lines depends on your own circumstances and environment; but a hint or two from some very successful people always must be of value.

### Here's One Plan

In one big jobbing house the practice is this way: In case of goods which have advanced since they were purchased, the value is put in on original cost. Where goods have declined since they were bought they are priced on the basis of replacement costs. This, you see, is working against the stock with a vengeance, but this is done by a very successful concern.

Remember, too, that whatever value you put into your inventory you will not change the actual value of the merchandise. If, therefore, you value it too high, the stock will not pan out and you will be badly fooled. If you undervalue it the stock will come up better than you calculated. That is the only kind of self-fooling that you can afford to have around your shop.

What will you do when you have the lists completed? Obviously, you yourself must work nights and at every odd moment pricing and totalling the sheets so you can balance your books. This work always is most valuable to every thoughtful merchant, for it will show him precisely where he has too much stock—and practically all of us are subject to this weakness.

This is the finest time of the year to see just how much more than you should have is in stock. As a preliminary, you might figure out what you should have, based on your sales.

### Keep It Normal

Having set down that kind of figure for your own business, you will be astonished to find how much you have in excess of what you should have. Then, when you have found this out you will begin to reduce stocks. It is not so desirable that you make cut price sale, though you may have to reduce some items to clean them out, as it is that you stop buying. Cut every order down to just what you must have. When you have reduced stock to normal, keep it there. That is perhaps as valuable a result as you can expect to get out of the habit of taking an inventory.

But take the inventory anyway. Know where you stand at least once annually.

## Says Auto Designs Changed Too Often

Harrison Watson, chief trade commisioner for Canada in Great Britain, stated to HARDWARE AND METAL that standardization of output to the minutest degree is necessary before Canada can hope to turn out manufactured products cheap enough to get in on world trade. Does standardization mean cutting out the frills that each manufacturer likes to put on his own product to distinguish it from the other fellow's? If it does many designers of automobiles are due to lose their jobs, for there are few industries where little changes of design introduced yearly are not costing more money.

One Canadian automobile manufacturer estimates that millions of dollars are spent every year by motor car makers in making trivial changes in design, merely to enable the advertising departments to call one car a 1919 or 1920 model in contra-distinction to another in all essential details the same car, known as a 1918 or 1919 model. "These little changes involve changes in machinery, and also a lessening of efficiency on the part of the workers until they are accustomed to the new models," said this auto maker, pointing out that the world's cheapest car is the same year after year, and still gives the same service under present-day conditions that it gave a few years back.

## SUBSTITUTING NICKEL

According to a London, England cable the question of substituting nickel coins or reducing the quantity of silver in the present coinage is under consideration by the British Government, and it is reported that the Mond Nickel Company of Canada will be given a contract for the provision of a reserve supply of nickel coins. It is understood that the company already has such a contract for French nickel coinage.

The British Government's action was taken after the council of the London Chamber of Commerce recommended that in view of the present price of silver and the possible disappearance of the silver currency, the Government should prepare and have ready for issue, when required, a nickel coinage of the lower denominations instead of issuing notes of a lower value than 5s. It has taken this position, first, because the Government loses on every piece coined when it buys silver and melts it; secondly, because of the incentive to unscrupulous persons to melt the coin, and, finally, because of the probability of hoarding.

*Keeping seasonable lines well displayed is the best way of speeding turnover, says J. G. Steele of London, Ont. His silent salesmen have proven such good business getters that he is planning to put in more of them.*

# Holds Two "Special" Sales Weekly

## J. G. Steele of London, Ont., Says He Has Obtained Excellent Results From Them and That in Dull Seasons They Keep the Volume of Sales Well Up—Attractive Window Display and Seasonable Advertising Very Important

Based on an interview by C. E. PARSONS, of Hardware and Metal, with J. G. Steele, of London, Ont.

TWO special sales each week are held by J. G. Steele, hardware merchant, at London, Ont., with excellent results, he says. The success of the sales depends to a large extent upon the weather, but given any kind of a reasonably fair day, proper advertising and backed by a window and store display, the sales are profit getters.

"We hold sales on Wednesdays and on Saturdays," said Mr. Steele in discussing the matter with HARDWARE AND METAL. "Those held on Wednesday are aimed especially to attract people from the city, while on Saturdays we get both city and country trade."

### Come in to Market

It might be explained that Saturday is the main market day in London, Ont., and that while markets are held on Tuesdays, Thursdays and Saturdays, the end of the week is the big day. On that occasion farmers frequently come in by train and by auto from points as far out as forty miles. These farmers are prosperous, their farms being located in some of the finest farming territory in the Dominion. They find a ready market for everything they have to sell and at prices they have never realized before. As a result they are good buyers and in the great majority of cases have the cash and are willing to pay for what they buy.

### Advertises Regularly

In order to reach these people Mr. Steele advertises regularly in the local papers, which have a big circulation on all the rural routes through the townships.

"I find that I get excellent results from advertising," he said. "I am planning in 1920 to use larger space than ever before. People read the papers closely, and I can tell from the things they ask for and in other ways that we get direct results from our copy. We find that it is a good plan to use illustrations in our copy and always to give prices. People like to see a picture of what is offered and they are always interested in knowing how much it is going to cost. We find that the farmers' wives are buying a great deal of merchandise of one kind and another. This may be due to the fact that the men are very often too busy to do the buying.

### Women Buy Paints

Mr. Steele states that women are buying more paint than ever before and are much interested in such lines as floor finishes and varnishes for all kinds of indoor work.

He has frequent inquiries for information about floor finishes, stains, etc., and always makes it a point to give the purchaser all the advice he can about the best ways of preparing the work, finishing it, etc., and he always inquires if brushes are required.

"People appreciate any information we can give them that will help them do a better job," he said. "Comparatively few persons know what they should know about painting or the right brushes to use. If left to their own devices the chances are they would get a paint entirely unsuitable for the work they intend doing, and then when they did not get satisfactory results they would blame us. By advising them we make satisfied customers, and this means that when they have any other work to look after later they come back to us for information and buy their paints here.

### Buying Good Things

"My experience indicates that all classes of buyers are demanding better merchandise than ever," said Mr. Steele. "People seem to have plenty of money and are willing to pay fair prices for things. This tendency to demand quality

articles is very marked sometimes. For instance I simply cannot sell the workmen in a certain part of the town a razor that I ask less than $2 for. They will not buy it because they think they will not get the quality they want for less than that price. If I ask them $5 they will buy without question as a rule. The same things applies to other merchandise. People look on any cheap article with decided suspicion and in the majority of cases, will pass it by and willingly pay a higher price if they can get a better article."

### Six Times a Year

Many of the "specials" put on by Mr. Steele are in tinware, enamelware and graniteware, and these prove big drawing cards with the women.

"We figure on turning our stock in these lines at least six times a year," said Mr. Steele. "I find that 'specials' are excellent for boosting turnover and also for keeping up the volume of trade during periods of the year, when otherwise, trade would be a little quiet."

Just inside the front door of the Steele hardware is a wall display cabinet filled with bathroom fixtures of the best quality.

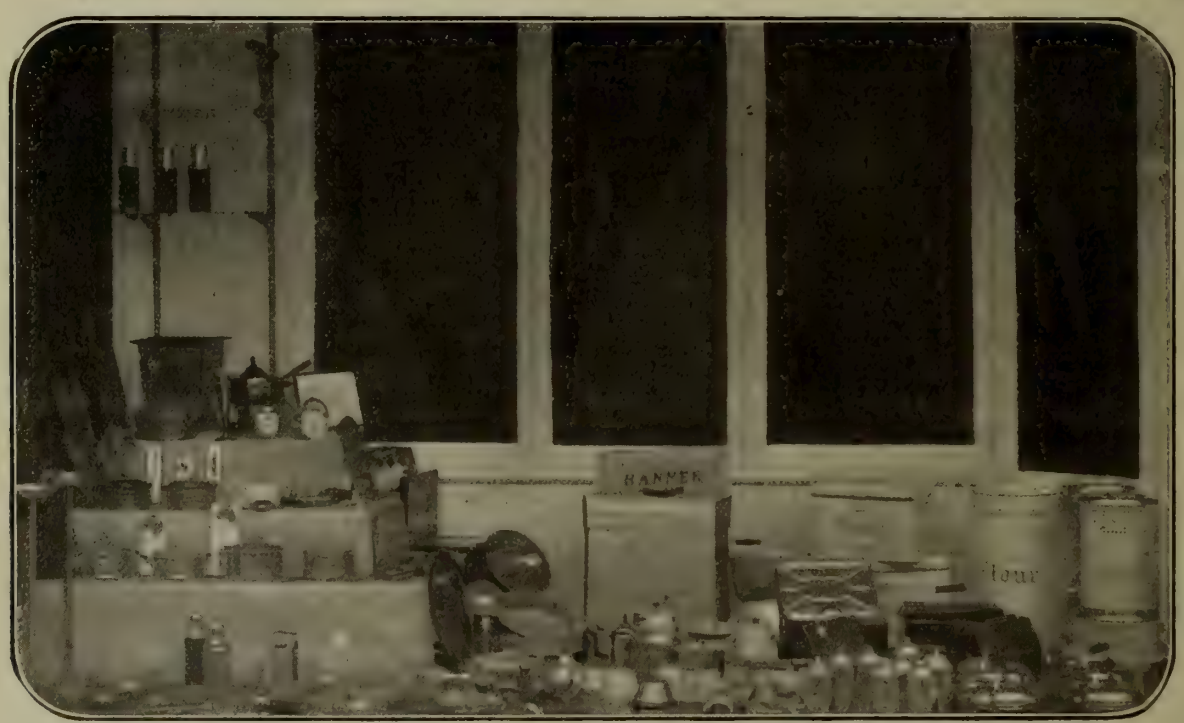
"That has proved an excellent business getter," said Mr. Steele. "People come in for some other lines and see the display of fixtures and are at once interested. We find our sales in bathroom fixtures greatly increased since we arranged the display cabinet. It is an all-year-round business with us now. People who are building new homes are interested as well as those who have homes. Many people who have homes will buy perhaps a piece at a time until they get a complete set. We find that it pays well to handle only the high-grade fixtures. Occasionally we advertise them and always get good results."

*The illustration is half the size of the original. Seasonable copy with prices given, and illustrations, bring excellent results, says Mr. Steele.*

### Features Cut Glass

As may be seen from the illustration, Mr. Steele keeps a silent salesmen filled with cut glass right up at the front of the store. Women are keenly interested in these goods, he says, and besides increasing sales, the display is very attractive and creates a favorable impression on all entering the store.

"Our sales of cut glass have grown steadily," said Mr. Steele. "It is an all-year-round business with us now. During the Christmas season business was particularly heavy, but people buy it for gift purposes, for wedding presents and for other purposes throughout the year."



### On Cash Basis

Except for the business that is done with contractors and similar accounts, the firm's trade is on cash basis, and Mr. Steele figures that in following this plan, he is saving himself a good deal of time and worry, besides having the money he needs for carrying on his business and replenishing his stock.

"If you buy right you can sell right," he says, "and to buy right you need money. If I had a lot of money on my books I could not use it for keeping up my stock, and in addition I would have a lot of real work collecting it and chasing up those who owed me."

### Location Important

Mr. Steele regards location as one of the most important matters in connection with the successful carrying on of business. He moved from a location on the main street to his present location, farther down on the same street, because the first building was sold. He plans to move again in the spring to a new and larger store which will be within a couple of hundred feet of the junction of the city's two main thoroughfares

*Window displays never stop working. The arrangement shown above of using steps to display small articles has produced splendid results, says J. G. Steele of London, Ont. Note also the glass shelves just above the steps. Mr. Steele uses price cards freely.*

*Wall displays and store display are big factors in helping sales, says J. G. Steele of London, Ont. People, he says, are always interested in them. Note the attractive show cards. A number of these are kept on display at vantage points in the store all the time and have produced most satisfactory results.*

and right in the heart of the business section.

"It pays to have a good location," he said. "It pays also to keep one's store bright and attractive. It pays well to advertise and let the people know about your store and your stock, and it pays to arrange attractive window displays. I think our window displays are perhaps one of the best advertisements the store has. We change them regularly every week and aim always to keep seasonable goods before the buying public."

### Dressing of Windows

As may be seen from the illustration, Mr. Steele uses methods that are a little different from many merchants in arranging his window. By using the step plan at the back, he is enabled to show a much larger number of small articles and display them to greater advantage than if they were placed on the floor of the window. The floor is used for the larger articles, which will, to a considerable extent, display themselves and not get lost. At the rear of the window and against the wall, Mr. Steele has arranged an adjustable shelf which enables him to display a number of articles in addition to those on the "steps."

Particular attention is given to lighting effects and the window is kept brilliantly illuminated by seven large globes arranged in the ceiling.

### Lighted Every Night

The lights are kept burning until 11 o'clock every night. Mr. Steele says this works out well, as a great many people who come down to the theatres or other places are interested in "window shopping," and either call in and ask for things they have seen or telephone to have them delivered.

"I believe thoroughly in the value of display tables," said Mr. Steele, "and in the new store, where we will have more space, I am planning to have a number of them. They are excellent for keeping various articles turning over and also save the salesman's time."

### Sells Many Trays

The serving trays, which may be seen in the illustration, have proven good sellers. Mr. Steele says there is a demand for them throughout the year.

"Our sales for the past twelve months in this line will run well over the 300 mark," he said. "We get this business by keeping the trays out where people can see them, by advertising them, and by putting them in the windows."

Washing machines is another line that Mr. Steele has found are profitable.

"We have sold more than fifty hand and water power machines during the year," he said. "We find this a steady business and the more machines we get out the more we expect to sell, as women who are satisfied with the washer they have purchased tell their friends about it."

### More Auto Accessories

Mr. Steele is just started in the selling of auto accessories. He finds the business so satisfactory and growing so steadily that in his new store in the spring, he plans to put in a much larger stock than he has at present.

"I think there is some splendid business to be had in auto accessories," he said, "and I expect our accessory department to develop steadily. Our sales of auto finishes have shown a splendid growth."

One of the first things a visitor to the store notices is the number and the quality of the display cards. They are to be seen all about the store. Not ordinary hand-printed cards, but neatly printed display cards about 9 x 12 inches, many of them in an attractive little frame.

### Helps Get Business

Such messages as "Sift and Save With One of Our Ash Sifters," "It Pays to Get a Good Coal Hod," "Keep Your Furniture Shining With Our Furniture Polish," and so on may be seen everywhere one looks. In many instances the cards are in two colors with the feature of the message in large red letters.

"People are much interested in these," sad Mr. Steele, "and they are a real help in suggesting seasonable purchases. We keep the cards changed frequently so that they are always carrying a seasonable message and have had excellent results from them."

As an evidence of the value of displaying merchandise, no matter how small it may be, Mr. Steele instanced his sales of shaving brushes. He keeps these dis

played up near the front of the store in a silent salesman with razors and cutlery, and frequently puts them in the window.

"Shaving brush sales," he said, "have increased steadily and we are now selling more than 300 every year."

Another instance of the same kind is the increase in the sale of children's waggons.

"By keeping them out where they can be seen," said Mr. Steele, "we have boosted our sales over fifty mark each season."

# Toymakers at Annual Meeting Claim German Goods Are Being Sold

SERVING warning upon the buying public that a lot of German toys are being surreptitiously foisted upon them under the guise that they are manufactured in France, the members of the Toy Manufacturers' Association, at their annual meeting in New York on Tuesday announced that they would take legal or other necessary steps through their tariff committee, to prevent the sale of imported toys that are misrepresented by false markings as to their place of origin.

### Buyer Should Know

They claim that they have no intention to boycott or to interfere with German trade but that the buyer should know, by true markings, where the toys offered to him are made. They point out that a test made in the purchase of certain toys has shown on investigation that the markings "Made in Germany" have been changed. In one instance a toy railway train market and lettered in French was found on close examination to be marked "Made in Bavaria."

### From Rotterdam

Some of these German toys, it was stated at the meeting, had come from Rotterdam this year, where they had been stored in warehouses since the beginning of the war.

The bulk of toys on sale in the stores this Christmas are made at home. A few of them came from Japan. Department stores generally agreed this year to pledge themselves they would not knowingly sell German toys. The general impression was that before the war 90 per cent. of the dolls came from Germany. As a matter of fact, only 44 per cent. came from Germany and other parts of the world; the rest were made in America. German dolls, it was asserted, are being offered as French dolls, and legislative action would be sought to prevent this imposition on the public.

### Developing Rapidly

As showing the development of toy manufacturing, it was mentioned that the toys manufactured at home in 1913 were valued at $13,000,000, whereas the last report shows a value of $21,000,000. There are 330 toy manufacturers in the country, and of these 128 are members of the association. A firm must be two years in business before it can become a member of the association.

### Want Higher Tariff

The manufacturers closed their meeting with a discussion of the tariff question as affecting their industry. The present duty is 35 per cent., but some members of the association would like to see this raised to 50 per cent., and a suggestion has been made that the matter be laid before the proper committees in Congress, so that when revision comes up, as it may do this coming year, due regard will be paid to giving ample protection to the infant toy industry here. The future of tariff legislation is, however, regarded by other manufacturers with a great deal of doubt and misgiving, the belief being that not much is likely to be done this coming year to raise the tariff.

# Sees Splendid Roofing Trade in 1920

## Nearly 400 Attend Function Held at Montreal—Lt.-Col. Robert Starke Makes Address of Welcome

IN an interview with D. J. Munn, president of Alex. McArthur & Co., Ltd., wholesale paper and roofing manufacturers, Montreal, HARDWARE AND METAL was informed that the outlook for roofings and papers for a great many months to come was very excellent. Mr. Munn states that the indications are most encouraging from all sections of the country, both east and west. Not only in the city are the indications good, but from all rural centres as well. A survey of the situation is such as to promise for 1920 one of the biggest seasons on record.

### Prices and Material

"People have come to realize that they must build regardless of the price of material, and they also realize that there is not likely to be very much change. Prices cannot be lower than they are at present and with raw material so scarce and difficult to procure, and with prices for these commodities so high, there can be no low prices on the manufactured goods.

Continuing, Mr. Munn stated that there was no surplus of material on hand to speak of. The demands of the past season have been very heavy, and it has not been possible to secure deliveries of raw material to such an extent to lay aside any considerable stock. This means that anyone wanting material will require to buy it according to his probable needs, and it is those who so provide for their wants who will have a stock when it is called for.

### Exchange Situation

One of the big factors entering into the cost of the manufactured product to-day is that of the high rate of exchange which has existed for some time. For considerable length of time manufacturers have been absorbing this, but now with the rate so high it is necessary to readjust prices to take care of this increase. Then there is the matter of heavy freight cost, and added to this, of course, there are heavier charges for labor and for raw material. With regard to the matter it is just a question of getting supplies, and Mr. Munn pointed out that the cost of those rags, and which are so extensively used in the preparation of felt roofing and other felt material, was now selling as high as $75.00 per ton, and which is a record price. The demand for this product is so great that it is unlikely to be any lower in price than at present, and it may be much higher.

### Architects Busy

Mr. Munn referred to the fact that at the present time architects are very busy with actual work of getting out plans for new buildings. This was for work which is contemplated, and it will be simply a matter of going ahead with the work as soon as weather conditions permit. Mr. Munn thinks that labor troubles are practically at an end and that there will not be any necessary delay from this cause. This is a factor which has entered very seriously into any plans which were laid by those wishing to build during the past season. With the settling down of this difficulty there should be great activity in the immediate future. It was pointed out for the first six or eight months of 1920 and perhaps for the whole twelve months there would be a decidedly active movement of all these materials.

# British Iron and Steel Prices Show Advances

LONDON, Dec. 24.—The Birmingham iron and steel busines is limited. Producers are declining orders and freight congestion is causing a shortage of fuel supplies making distribution of output difficult.

Some Midland pig iron quotations have been withdrawn and in consequence nut and bolt bars show an advance of 10 shillings in price.

Glasgow reports the ship plates demand abnormal and steel sheets demanded by India, Australia and South America, with good orders noted.

Malleable bar iron has advanced to an export price of £23 per ton f. o. b. Glasgow.

# Boosting Winter Accessory Sales

## Educate the Customer and Sales Will Follow—Montreal Accessory Man Says There Is Big Opportunity and Room For All

Based on an interview by A. H. ILLSEY with Alex. Renaud, of The Renaud Motor Supply Company

"CAN the sale of winter automobile accessories be made successful on the part of the dealer?"

"The dealer must tell the customer what he needs, for he usually does not know."

The question of the writer, answered by Mr. Renaud in the second, brief, and definite sentence, suggests an important consideration, and at a season when it is very "timely."

Mr. Renaud has been selling accessories on his own account for the past six years. Each year has recorded an increase of turnover. And this year's records, already, in those lines that may be styled as "Winter Accessories," prove that the business is increasing. And this, let it be emphasized, when there are more dealers handling the lines than ever there have been, since automobiles became so numerous as to demand that many dealers handle repairs and supplies for the upkeep of these cars. "We are all getting good business," continued Mr. Renaud, "and there is a big future ahead."

### To Make a Beginning

"Some dealers have hesitated to put in a stock of accessories, feeling that the cost would be too great, and that this might get beyond reasonable bounds. Is that the case, and what investment would you say is necessary to put in a stock?"

"For two thousand, or twenty-five hundred dollars," replied Mr. Renaud, a good stock of accessories can be bought. And the best way, if the dealer has confidence in the salesman, is to let him select a stock that will suit his needs. Of course this depends upon the salesman being fair with his customer."

There is much soundness in this suggestion. For the dealer who has not handled accessories will not know just what he requires, while the travelling man, having sold others along the line for several seasons, and being conversant with their sales, is in the very best position to help the dealer in his selections. Such a plan, if adopted, would quite probably overcome a stocking of unsaleable lines which would only keep good money tied up. Therefore, even a somewhat more modest beginning could be made than that suggested, and the extent of stock will be determined, quite naturally, by the district in which one is located.

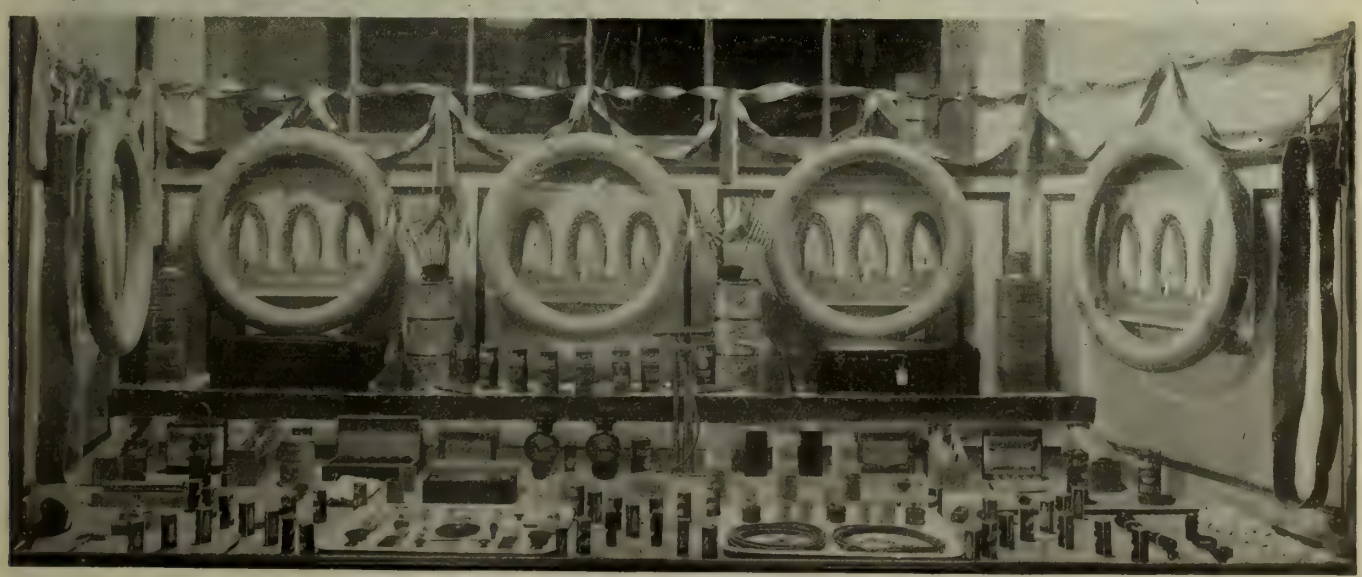
### Will The Trade Last?

The modern hardware merchant has had to cultivate more shrewdness in many ways (and that is using the term in its most proper sense), than was found necessary in past years. He must, to be right to the point, be presented with "show me" argument that holds water, if he is to stock new lines and which he hopes to sell the consumer. Therefore, it is pertinent to this article that a little survey of the field be taken.

"The sale of automobiles is increasing all the time," said Mr. Renaud, "and next year will be a bigger one than ever, and perhaps for the next two years."

### Steadily Increasing

The use, and quite naturally the sale of automobiles is increasing every year. "Oversold." What a distasteful word that has come to be for the man who wants stock; for the man who has the orders either in hand or to be had for the going after; for the live-wire merchant, who has, indeed, had few quiet months during the past two or three years. And, from the best authenticated sources, the demand will not only continue; it will increase, that is, if the capacity of the motor car makers can be so increased as to meet the seeming, unceasing demand.



### Increase of 100,000

Up to the end of December, 1918, the number of cars in use throughout Canada was over a quarter of a million; in exact numbers, 269,727. It is estimated that not less than 100,000 cars were added during the present year 1919. With even a fair increase added to this in 1920, it will be no length of time before Canadians are the owners of half a million cars. Think of it! What does this mean to the hardware merchants? It means, in a sentence, that there will be an enormous and increasing demand for accessories, and it is the man who goes after this business strongly who will acquire the profits.

### Concentrate On These

Mr. Renaud, in developing his business for automobile accessories, has issued what he calls a "Winter Catalogue." This contains illustrations of such lines as are required by the auto owner. Mr. Renaud stated that, with three or four exceptions, the lines shown were real necessities.

Aside from tires, which are always seasonable, there will be a big sale for warm robes, as in the Canadian climate

*A window display of auto accessories carries a real interest for every car owner. Do you know that there are 9,000 cars being turned out every day and that the auto factories are still away behind with orders?*

these are indispensable. Non-skid chains will be a big seller, also lifting jacks. An extensive demand is bound to develop for trouble lamps and bulbs for these, and for headlights, tail-lights, etc.

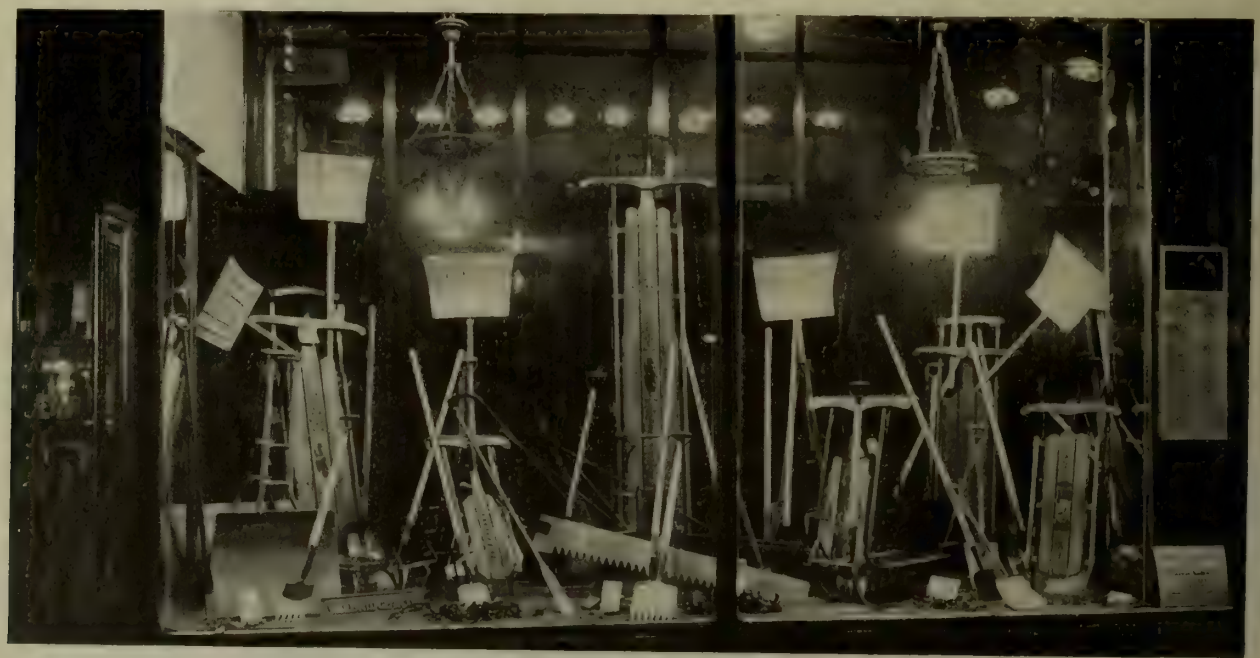
A line of radiator covers, the extent of which will depend upon the probable trade to which one may cater, will prove to be good profit-yielders. Then follow windshield wipers, side, rear, and front curtains, celluloid for windows, electric radiators and foot warmers, charcoal heaters, driving gauntlets, packings, oilers, etc.

One of the best sources of turnover is that afforded by oils. The hardware merchant can easily secure a reliable line of oil which will prove good advertising, that is, if he can offer his customers a brand of oil which will be non-varying and of uniform good quality. Graphites, non-freeze radiator compounds, etc., all come under this head. And there are, in addition, the many kinds and grades of tools, including pliers and wrenches. Added to these, packings and various nuts, washers, copper gaskets, and many other staple, as well as some special lines, will be in regular and steady demand.

In getting out after winter accessory business, two things are very important. Mr. Renaud, himself, realizes the importance and value of good window display, and he spends a considerable amount of money in this way. If you have the prospects passing your window, that's the time to seek their interest; the window is an excellent medium, and as you must pay rent for the store, make its "face" so attractive that the buyer will have the very best excuse in the world for entering your store and making the purchase.

Then there is advertising. This must be made as effective as is possible, and the plan of hitching up to this "Winter Accessories" caption will appeal to many. To use the words of Mr. Renaud again: "Some think that we ought to create a demand on the part of the consumer, and then they—the dealers will buy, instead of the dealer getting out and showing the car owner what he needs. There are many things that can be sold and which will readily meet the wishes of the car owner if he be shown them. Through pointed, effective advertising, great improvement of sales can be effected, and it is now the eleventh hour, so to speak, if the hardware dealer has not already mapped out his campaign.

Mr. Renaud is one of those who is convinced that, in the immediate future, lies an opportunity for the aggressive dealer to exert his initiative, and to secure business for the going after which will yield excellent profits. There has been great growth in Quebec and Eastern Ontario, Mr. Renaud says; and there should be a growth in every part of Canada. The hardware merchant has a mine-field before him which only needs consistent, relentless mining, to reveal the hidden profit nuggets.



# Little Chance of Important Tariff Changes in Near Future

OTTAWA.—That there is very little real danger of the tariff being seriosly interfered with just now is plainly intimated in Sir Henry Drayton's recent statement on the subject of revision. To assure the public that the work of inquiry would be started by inviting it to send in written opinions as to what should be done certainly did not indicate that strenuous action was in prospect.

Sir Henry's statement shows that he sees just as many obstacles in the way of reduction as Sir Thomas White did last June. Indeed, as far as the exchange situation goes, matters are much worse than they then were. In addition the Minister of Finance has been in office long enough to realize that the problem of raising the necessary revenue is becoming more difficult. It is so if for no other reason than that expenditure took quite a leap after Sir Thomas White delivered his budget speech.

In the meantime the much-assailed tariff is gathering in revenue at a much more rapid rate than it did last year, and that, in spite of the fact that considerable reductions were made in the duties last session. During the first eight months of the present fiscal year $7,000,000 more were collected in customs' duties than was the case during the same period last year.

Being comparatively prosperous, people are buying far more heavily of dutiable goods than they were a year ago. During the last eight months the importations of free goods have fallen $57,000,000 below those for the same period last year, while the importations of dutiable goods have gone up nearly $60,000,000. Sir Thomas White estimated that this year's customs revenue would come in at the rate of $12,000,000 a month, but, so far the receipts have been at the rate of over $14,000,000 monthly. Such a showing is unlikely to make the tariff unpopular with a Finance Minister hard pressed for revenue.

*Keeping seasonable window displays before the public is one of the very best methods of advertising and also of increasing turnover. The setting in of winter means a demand for merchandise such as shown in illustration.*

# 100 per cent. Increase in Building

## Figures for 1919 Are Remarkable When Labor Troubles, Difficulty in Obtaining Materials and Other Troubles Are Considered—Indications Are That 1920 Will Smash All Previous Records

THERE is little doubt that when the building figures for 1919 are in that the total will exceed $75,000,000. This will be an increase of more than 100 per cent. over the totals for 1918, when the figures were approximately $34,944,212.

November, owing to weather conditions, is usually an unfavorable month for building, but this year the total was $6,889,000, an increase of no less than $4,690,000 over the same period a year ago.

### Making New Records

All this activity means just one thing in the opinion of those who are in touch with the situation and that is that 1920 is going to see all previous construction records shattered.

This means opportunity for the hardware merchants, not only in the sale of tools and materials required for the new homes and other structures, but in supplying the needs of those who are going to occupy the homes.

Architects have never been busier and plans now being prepared run into many millions. A feature of the work in hand is the large number of residences that are planned. Hundreds of these are for people who are tired of paying excessive rents. They would rather put up with the high cost of building and have a home out of which they cannot be ordered by landlords, than to continue paying huge rents and at the end of a few years have nothing to show for their expenditure.

### Many Small Homes

The coming year will see the erection of a large number of homes of the smaller type also, especially those suitable to the requirements of the workingman. This is one of the big problems in connection with the whole acute housing situation. Scores of manufacturers are at their wits' end to find accommodation for their employees. Some firms are erecting dwellings for their employees. Others are working through the municipal councils and the Housing Commission and, in many cases, the workers themselves are planning to build.

### Many Private Garages

A feature of this year's building that has exceptional interest for hardware merchants in the large number of private garages being built. In the city of Toronto alone more than $1,000,000 has been spent in eleven months for garages alone. To the hardware merchant who is handling auto accessories this means only one thing, more and still more business, as every auto which is sold requires supplies and accessories. What has happened in Toronto in regard to the building of private garages is happening in proportion all over the country and even greater expenditures are expected in 1920.

### Activity Is General

The building activity and prospective building activity for 1920 is not confined to any particular areas. It is general and from all parts of Canada is reported a demand for more homes and more factory accommodation.

In view of the fact that Canadian builders have had exceptional problems to face this year in the way of labor troubles, difficulty in obtaining materials and similar conditions, this year's showing is a remarkable one.

With many of these matters adjusted and conditions improved, there seems little to prevent 1920 far outstripping this season.

### Are Working Together

The fact that the various organizations in connection with the building trades are working together to facilitate construction work is a most encouraging feature. During the past season in many cases the men in one trade made demands which resulted in large amounts of work being held up because people who planned to build were not sure where they were going to finish in case they started. This also affected men in other trades. It is realized apparently that this is a situation that is not conducive to good business generally, and with a view of eliminating any such troubles discussions have taken place recently which are expected to result in a working agreement that will not hold up construction.

## BUILDING PERMITS ISSUED IN NOVEMBER, 1919

**EASTERN CITIES**

| | November 1919 | November 1918 | Change | 1919. 11 months | 1918. 11 months | Change. |

# EDITORIAL COMMENT

### *THE OLD AND THE NEW*

HARDWARE merchants, at least many of them, are going to remember 1919 as a year of changes and surprises. Twelve months ago many merchants, hardware merchants along with the others, were looking with a good deal of uncertainty into the future. The things that troubled them most were the future of prices and also the ability of the public at large to continue buying. There were those who freely stated that prices were due to slump and that the bottom was going to drop out of the markets.

Just the contrary has happened. Price changes have been very, very numerous, but in the great majority of instances they have been higher instead of lower. Any quotations that are lower have not been materially reduced, that is reduced sufficiently to cause any merchant carrying the stock to sustain any serious loss. Any loss in this direction has been more than made up by increased business and higher prices on other lines.

Throughout the whole year merchants, hardware merchants especially, have found it difficult to get anything like the shipments of merchandise they have required. As for the bottom dropping out of markets, the markets were never stronger. There is a world-wide demand for hardware products and manufacturers have been building extensions to their factories and increasing their staffs and doing everything they could to take care of the orders that have been coming in.

And what of the future? No year in Canada's history is opening more auspiciously than 1920. From a trade standpoint it seems certain that new records are to be made. No merchants are looking forward more optimistically than the hardware merchants and with good reason. The demand for the merchandise handled in hardware stores simply cannot be met. Indications are that this condition will obtain for a long time. The buying public generally was never so prosperous, especially the farming communitites and the farmer is one of the greatest purchasing forces in the Dominion to-day and will be even more so. While the farmer may be the backbone of the country from a business sense, the hundreds of thousands of workers, who to-day are making higher wages than they ever thought possible a few years ago, are a big factor. These people are buying and will continue to buy. Added to these very important considerations is the fact that Canada's vast resources are only beginning to be developed. Mining is having an impetus it never had before. There is a demand for lumber that cannot be met and pulpwood exports are running away over the $100,000,000 mark. These are merely a few of the outstanding features of a development that seems to be gathering momentum every day and all make for one very important thing, from the merchants' standpoint—PROSPERITY.

---

### *THE HALF-MILLION MARK*

THE half-million mark for automobiles in Canada is now in sight and there is every indication that it will be passed in 1920. While complete figures are not yet available as to the number of new cars in use during the present year, there is little doubt that more than 100,000 were turned out. And still the factories are a long, long way behind with their orders. Up to the end of last year the auto licenses in Canada numbered 269,727. This year's licenses will bring the total close to 400,000 and at the present rate of growth there is little doubt that the 500,000 mark will be passed in 1920.

The growth of the automobile business is one of the commercial wonders of the last decade and yet the explanation is very simple. The automobile has won popularity because it fills a real place in the lives of a very large percentage of the people. The farmer as well as the city dweller can use it with economy and advantage. This accounts for the figures showing that the number of licenses in Ontario have doubled every two years. Ontario leads in the number of cars in use, but the other provinces have a proportionate quota.

There is little doubt that the automobile business is going to grow and keep on growing. The demand is ever for a better or more complete car. This means enormous opportunities in the sale of accessories and supplies and in this field the hardware merchants of Canada are now one of the most important factors. The story of the auto accessory departments in most hardware stores bears a striking similarity in that it is one of steady growth from small beginnings. It developed itself as the number of cars in the district increased and the number of cars has been increasing very, very rapidly. In

last week's issue of HARDWARE AND METAL figures were presented, showing that at the present time no less than 9,000 autos are being turned out every day in Canada and the United States. And many factories are months behind with their orders.

Added to this immense and steadily growing field is the tractor accessory business. True, it is small yet. But ten years ago the auto accessory business was small. Those in the trade say that the tractor business is going to develop a great deal faster than the auto business did, for the simple reason that the auto has made good and the farmers are "sold" on it. This means that the campaigns of education that were necessary to bring them to a realization of the value of the automobile will be unnecessary with the tractor. Many hardware merchants are already experiencing steadily increasing calls for oils, spark plugs and other supplies required for tractors. As stated, this trade is merely in its infancy, but it is one of the lustiest youngsters in sight to-day and well worth watching.

### *A COMPLICATED SITUATION*

"THE business world at the beginning of 1920 finds itself confronted with fifty new political divisions with newly defined areas, new ethnic groupings of population, and therefore with new industrial and commercial activities, new forms of Government, new political managers and law makers, new forms of currency, and new relations to world commerce, industry and finance.

"Thirty of these new political divisions have declared themselves as republics; certain others as kingdoms or under the direct control of local rulers; others, classified as 'colonies, protectorates, and dependencies,' have passed under new political control; and still others are awaiting anxiously the determination as to the political power which is to exercise the 'mandate' under which their political and industrial future is to be developed.

"Of these fifty new divisions, thirty occupy that formerly great industrial and commercial area, Central Europe, and the remainder are scattered over Africa, Asia and the islands of the Pacific. They aggregate one-fifth of the land area and have one-fifth of the population of the globe, and their imports and exports formed one-fifth of the total international trade immediately preceding the war.

"Twenty of these new republics have been established upon a territory formerly that of a single empire, Russia; a dozen others have been created from sections of three other empires, Germany, Austria-Hungary and Turkey; and the remainder, which is practically a score in number, represents pre-war colonies, protectorates or dependencies of Germany and Turkey respectively.

"Most of these new political divisions lie within the interior of Europe, separated by long distances from the ocean; their railroads disorganized; their currency in a state of extreme disorder; their population unaccustomed to the new form of Government; their legislators inexperienced in national and international affairs of Government.

"What will the world, the industrial, the financial, and the commercial world, do with them and for them?

"It is easier to ask this question than to answer it. It cannot now be answered, in fact, with anything like accuracy or even a safe prediction."

### *MAY MAKE IRON AT THE COAST*

CONSIDERABLE interest is being shown at the present time in the possibility of iron and steel industry being developed in British Columbia. At the recent meeting of the Canadian Mining Institute the question was discussed at length and particular attention was given to remarks of Dean Roberts, of the University of Washington, who gave it as his opinion that it is only a question of a very short time before iron will be produced on the coast. No less than one-third of the exports of British Columbia this year, he pointed out, are minerals. He strongly urged merchants and business men to co-operate in every way in the development of the Province's resources, as it has an abundance of fuel, a large amount of potential cheap hydro-electric power and inexhaustible supplies of minerals. Lead and copper, he stated, are being produced in ever-increasing quantities and conditions are fast developing which point to iron smelting being engaged in. In connection with Dean Roberts' remarks, it is interesting to note that a representative of one of the largest British firms has been on the coast for some weeks and is reported to be investigating closely ore supplies and conditions generally.

### *A WORD OF ENCOURAGEMENT*

DISCUSSING the problem of apprentices in the hardware business a writer in a contemporary says: "My work invariably drew a comment from my employer which was a stimulant for me to try and do better all the time. To all employers I would say: 'Don't forget the word of encouragement.'" There is a great deal of truth in this. Very often the busy merchant immersed in the thousand and one details of carrying on his business loses sight altogether of the juniors of the firm and the work they are doing. If a boy or young man is trying his best to make good, a word of appreciation, even if it only comes occasionally, is a tremendous incentive. He not only knows that what he had done has been noted and appreciated, but it will spur him on to do better work. The few seconds that it will take to make a kindly comment on the young man's work and to say a few words of commendation are, if the head only realized it, worth more to him than any other time in his whole busy day.

# EVENTS IN THE TRADE

## Business Changes

Airdrie, Alberta. — Wilson and Stewart have purchased the hardware of R. B. Wilkinson.

Odessa, Saskatchewan. — Fitch & Schroeder, hardware and implement dealers, have dissolved partnership, the business being continued by Mr. Schroeder.

## New Firms

B. W. McClennan has opened a hardware store at 232 Charlotte Street, Peterboro, Ont., under the name of the McClennan Hardware.

## Personals

Among the officers elected by the Empire Club of Canada, at its annual meeting in Toronto, were the following: 1st Vice-president, A. E. Gilverton, president of Rice Lewis & Son, hardware; executive committee, S. R. Parsons, president of the British American Oil Co., Ltd., and A. S. Crighton, secretary of the Canadian Credit Men's Association.

## Trade Notes

Foundries Building & Supply Co. has been registered at Three Rivers, Quebec.

The Congoleum Co. of Canada, Limited, has been registered at Montreal .

H. R. St. Michel & Co., brush manufacturers, Montreal, have dissolved partnership.

The Breakeyville Steel Co., Ltd., of Breakeyville, Quebec, has been registered.

The Westmount Hardware (Reg.), Montreal, has assigned to Vinet & Dufresne.

The eighth annual meeting of the Provincial Builders and Supply Association will be held at London, Ont., on February 10, 11 and 12.

The Kipawa Fibre Company, of Lake Temiskaming, New Ontario, plans important extensions to its plant.

Scythes & Co., Ltd., of Toronto, manufacturers of twines and waste, have presented each of their employees with a life insurance policy. The plan adopted is such that the policy will increase automatically with each year of service.

Frank O. Wells, president of the Greenfield Tap and Die Corporation and one of the prominent figures in the screw thread industry in the United States, has sold his entire holdings to Frederick H. Payne, vice-president. Mr. Wells retires as president and member of the board of directors and Mr. Payne has been elected president in his place. F. G. Echols, vice-president and general manager, has been elected a director of the Corporation to fill the vacancy caused by the resignation of Mr. Wells, but Mr. Wells will remain with the Corporation in an advisory capacity.

## Obituary

The death occurred at his home, 904 Yonge street, Toronto, following a stroke, of John Hewitson, for more than fifty years in the hardware business in Toronto. He was 78 years old and came to Canada from Carlisle, England.

James E. Anderson, J. P., of Port Dover, died very suddenly at his home, from the effects of heart weakness. He was 82 years old and was in the hardware business at Port Dover for many years. He took an active part in municipal matters. Besides his wife he leaves one son, Arthur G., of Port Dover, and one daughter, Louise, of Hamilton.

The death occurred at Forest, Ont., on Thursday, of William Scott, Sr., aged 86, the pioneer hardware merchant of the district. He came from Scotland as a young man and until a few years ago, conducted both a hardware and tinsmithing business. Mr. Scott took an active interest in public and fraternal vce-president, A. E. Gilverson, president of the Forest Liberal Association, and was a member of Royal Oak Lodge I.O.O.F. His wife died some years ago. He is survived by two sons and three daughters, William and Lorne of Forest, Mrs. D. Cooke and Mrs. Bruce Thompson of Edmonton, and Mrs. John Cooper of Toronto.

## Western News

F. Manley has recently opened new quarters in the Sylvester-Wilson Bldg., Winnipeg.

C. A. Pratt, Western manager of Lamontagne, Winnipeg, has been visiting the head office of the firm in Montreal.

H. F. Moulden, who represents several Eastern manufacturers in Western Canada, is now on a return journey from Halifax, Nova Scotia. He has been visiting factories and principals in Eastern Canada.

J. H. Breadner will handle sales of the Glidden Co. paints, varnishes, etc., in the Saskatoon district. Dave Corbett will cover the Moose Jaw territory. A. Gregg has been appointed assistant sales manager to R. S. Grant. These appointments have been announced by W. J. Bland, manager of the Glidden Co. business in the West.

R. S. Grant has been appointed sales manager for Western Canada, of the International Division of the Glidden Co. He will have charge of the territory from Fort William to the Pacific Coast with office and warehouse in Winnipeg. Mr. Grant formerly represented the Canada Paint Co. in the West.

C. C. Craig of C. C. Craig & Co., Winnipeg, has returned from a trip through the Western Provinces, including British Columbia, and brings back very encouraging reports of trade conditions in practically all sections of that country. Business is reported better than could be anticipated at such points as Saskatoon and Calgary, where the past year's crops were very poor.

## Montreal News

The annual convention of Lewis Bros., Limited, of Montreal, is scheduled to begin on Monday, January 5. Salesmen are expected in from the various territories served by the company for the conference of several days.

The meeting of the council of the Montreal Board of Trade was held on Monday, when the Minister of Finance, Sir Henry Drayton addressed its members on the exchange rates, as it refers to customs valuation for duty purposes. The matter was discussed quite extensively, but any definite action was deferred until further consideration was given.

Archie MacFarlane, of A. MacFarlane and Co., has returned from a trip to Winnipeg. Mr. MacFarlane states that the Western metropolis is particularly busy, and that all classes of goods are selling extensively.

## Hardware Merchant Wins $5,000 Action

J. A. Brownlee, hardware merchant, London, Ont., has won an action for damages against that municipality and the public utilities commission of London. He sued for $5,000 damages for flooding of his premises by the bursting of a water main. Chief Justice Falconbridge gave judgment in his favor, and directed a referee to determine the amount of damages.

## Sales Force Guests Of A. C. Leslie & Co.

The firm of A. C. Leslie and Co., Ltd., Montreal, entertained the sales force to dinner at the Canada Club, Board of Trade Building, on Friday evening last, President W. S. Leslie being the host.

After dinner, short addresses were delivered by Mr. Leslie, and by George B. Ball, the Toronto manager, and by W. T. Cox, the Winnipeg manager.

A feature of the evening was that of a series of unique jokes, which were framed to apply, particularly, to the heads of various departments. All this was taken with the best of good humor, and the result was that of a better acquaintance, and a more genial comradeship was established. In enlarging upon this feature, various brands of goods for which the company are Canadian representatives, were referred to, and formed the basis for a pleasurable exchange of repartee.

## Annual Gathering of McClary Salesmen

The annual gathering of the salesmen of the McClary Mfg. Co., held at London, Ont., for four days last week, was attended by representatives from Montreal, Toronto, Hamilton, St. John, N.B., and other points. During the sessions a school of instruction was held at which the salesmen saw how articles are made in both the shops and foundry. On Thursday evening a reception and dance was held. The firm's representatives were warmly welcomed by J. K. H. Pope, secretary. An address was made also by Col. W. M. Gartshore, manager. Presentations were made by the salesmen of a set of pipes to A. M. Smith, the general sales manager, and of a parasol to Miss Malloch, nurse of the Welfare Department.

## Judge Rules That Charges Must Be Paid

An important point was decided in Montreal by Mr. Justice McLennan of the Superior Court, regarding the entering by a clerk of a charge for freight.

This case was one of an action by Lee, Kee, Yick and Company, trading in Montreal as Yick, Ling & Co. against the Canadian Pacific Ocean Services, Limited. It appears that ocean transportation had been taken on a quantity of goods for the complainant and the charge made for these was $55.60; on the other hand the amount should have been $551.60, but a clerical error explained the deficiency between the proper amount and the amount charged.

The parties to the action claimed that the goods were sold much cheaper than they would have sold them, had the freight been charged the full amount. The Judge, in considering the whole matter, however, found that owing to the fact that the plaintiffs were accustomed to importing goods from the Orient and also had a good idea of freight values, that the company must pay to the carrier, the C.P.O.S. Company, the difference in freight charges due to the clerical error and also the cost of the suit.

# Semi-Annual Convention of Salesmen of Wood, Vallance Limited, Held at Winnipeg

THE semi-annual convention of the salesmen of Wood Vallance, Ltd., Winnipeg, was brought to a conclusion on Friday evening by a banquet at the Royal Alexandra Hotel, tendered by the firm to the salesmen and the heads of departments. Regret was expressed at the inability of Messrs. J. C. Falls and David Wood to be in attendance. In their absence, J. C. Gillespie acted as chairman and occupied that position most acceptably.

The toast list included the following: "The King"; "Our Country," responded to by J. C. Gillespie, "Our Travellers," responded to by R. P. Buchanan, George Herity, J. A. Jack, F. J. O'Neill, F. B. Stott and M. P. Barnes; "Our Staff," responded to by H. B. Carbray, F. W. McGuire, F. W. Lynde and Don Ferguson; "The Ladies," proposed by A. T. Wood and responded to by Harry Bestall, A. V. Redmond, Frank O'Neill and D. A. Wood.

During the evening, a trombone selection by "Rag" Grant and addresses by G. M. McBride and a recitation by W. M. Claffy were much enjoyed.

The presentation of prizes and trophies was made by W. A. Watt.

The feeling was general that the esprit de corps created by such get-together affairs is bound to bring splendid results in the New Year. The convention in itself proved most interesting. The salesmen were given a thorough drilling in each department and during the sessions the genial sales manager, James Feir, gave the firm's representatives a heart-to-heart talk.

Four new men have been added to the travelling staff, Messrs. H. H. Hughes, R. M. Pritchard, A. H. Davidson and Bert Grant. Those who attended the banquet were: G. M. Watson, W. M. Claffy, M. P. Barnes, J. A. Jack, A. F. McDermid, R. P. Buchanan, G. H. Herity, J. P. Wing, F. J. O'Neill, H. A. Bostall, F. B. Stott, H. L. Huyck, R. G. Consterdine, H. S. Spencer, F. Perry, H. S. Martin, A. T. Redmond, W. H. Wilson, A. Gordon, B. E. Dalzell, A. H. Davidson, R. A. Grant, H. H. Hughes, R. M. Pritchard, A. H. Davidson, C. A. Pile; Jas. Feir, sales manager.

## How Shippers May Obtain Exemption From 3% Tax on Consignments From the United States

OF interest to all retailers is the following circular being sent out by S. B. Brown, assistant manager of the Transportation Department of the Canadian Manufacturers' Association:

(Circular No. 227)

**Supplementing Circular No. 221**
**United States Government Tax on Freight Charges.**

Dear Sirs,—You will no doubt be interested to learn that we have been able to suggest a simple procedure to be followed in order to obtain exemption from collection of the 3% tax on shipments from the United States, which has the approval of the Commissioner of Internal Revenue.

Owing to the diverse views expressed by transportation men in interpreting the regulations, we submitted our circular of November 8th to the Treasury Department of the United States Government, for an official ruling, and we are now advised by the Acting Deputy Commissioner that our digest of the regulations is substantially in accord with the requirements of treasury decisions 2889, 2917, and 2928.

Please refer to the fifth paragraph of circular No. 221, in which we say that the consignee in Canada (provided he is paying the freight charges) may authorize an agent or the shipper to execute the temporary exemption certificate in his behalf and file with the agent of the carrier at the point of origin.

It is impracticable for the Canadian importer to fill out this certificate, and in order to simplify the procedure as much as possible would suggest that our members forward to the shippers in the United States a simple power of attorney as authority to execute this document in their behalf. Would also suggest that the power of attorney include authority to execute and file certificate of exportation.

In our former letter we stated that this certificate may now be executed by the person entitled to exemption, providing the person so entitled to exemption has in his possession a memorandum from a customs official showing that the goods have been exported.

We are now advised that this memorandum may be executed by the delivering agent of the domestic carrier, the agent of the Canadian carrier, or the foreign consignee, as well as by the customs official. However, in order that permanent exemption from the tax may be assured, consignees in Canada are urged to furnish the shipper with the memorandum required, immediately on receipt of the goods, and not to rely on railroad or customs officials. The memorandum may be in the form of a letter reading substantially as follows:

"We hereby certify that consignment of 150 drums caustic soda, car G. T. 9567 ex Bay City, Mich., December 2nd, 1919, G. T. Western Lines way bill 1654, arrived Toronto, December 8th, entry made and duty paid December 9th and is being unloaded at our warehouse to-day (the 10th inst.)."

Should you encounter any difficulties, or if the information contained in this letter is not entirely clear to you, do not hesitate to take the matter up with us by correspondence.

# Starke, Seybold Limited Honor Returned Men

ON Friday evening last, at the 3rd Victoria Rifles Armoury, the wholesale hardware firm of Starke-Seybold, Limited, gave a unique entertainment to mark the return to civil life of those who had enlisted from among their staff. The entertainment took the form of a card and dancing party, and employees and guests numbered about four hundred.

Under the direction of Lieut.-Col. Robt. Starke, president of the company, the evening's entertainment was carried out without a hitch, and the whole evening was a most enjoyable one.

In addition to other guests and visitors, various members of other hardware houses attended, and altogether the gathering was representative of the wholesale and retail hardware trades.

Guests were received at the Armoury by Lieut.-Col. Robt. Starke and Mrs. Starke, Mr. J. P. Seybold, Mr. and Mrs. Herbert Seybold, and Mr. Gordon and Miss Seybold.

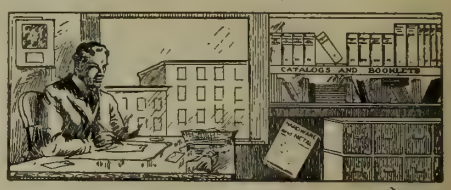
### Address to Returned Men

In addressing the returned men after a midnight supper had been served, Lieut.-Col. Robt. Starke made an appropriate address, and in which he said: "While welcoming these gallant soldiers, several of whom were wounded in action, I must add a word to express my own sorrow, and that of my colleagues, that there are others we cannot welcome back to-night. They paid the cost of victory, fell in action like brave soldiers, and we shall see them no more. But while they died on service, their memory is with many of us here this evening."

### Presentation Is Made

Lieut.-Col. Starke then introduced Brig.-General J. D. Ross, asking him to present to the returned soldiers of the firm a handsome scarf pin, each, as a slight recognition from the Starke-Seybold Company, and to remind them of services which they had rendered during the war. Those receiving this recognition were:

Lieut. G. Russell Starke, Lieut.-Col. Robt. G. Miller, McGill Co., First Canadian Tank Battalion; Lieut. Alex. E. Williamson, McGill Co., First Canadian Tank Battalion; Private Henry Dunette, 305th Infantry, A.E.F., and who was wounded in action; Private Albert Hancock, 3rd Development Battalion, A.E.F.; Private Albert Moore, Canadian Ammunition Column; Walter Wilkinson, 24th Battalion Victoria Rifles, wounded in action; Willie Labarge, 10th Reserve Battalion; Private O. R. Penny, P.P.C. L.I.; Private W. Mowat, C.F.A.



Much applause greeted the returned men as they stepped forward to receive the mementos. Immediately following this function Col. Starke came forward and referred to the fact that Major Chas. D. Smith, 13th Royal Highlanders of Canada, and Private J. McBride, 24th Victoria Rifles, had made the supreme sacrifice. There was general silence during the brief eulogy made by the speaker.

The variety of entertainment afforded the guests was rather unique, in that those who wished might dance, while billiards, bowling, and cards were other attractions which provided variety for any who desired to enjoy these various pastimes.

# Revised Shipping Rates Will Affect Many Hardware Lines

AN important revision of shipping rates of particular interest to hardware merchants has just been announced by the United States Shipping Board. New rates authorized on miscellaneous cargoes from North Atlantic ports to the United Kingdom, which will affect Canadian shippers. Cement, hemp, iron and steel, leather, wire and other goods, are contained in the list of revisions, as shown in the following table. Rates are per 100 pounds, except where otherwise stated:

Cement, in bags and barrels, 2,240 pounds, $15.00; cereals and all other breakfast foods, in bags or cases, $1.00; flour (except ground Tripoli), $1.00; hemp, up to 100 cu. ft. per ton, $1.50; hemp, over 100 cu. ft. per ton, $2.00. Iron and steel articles, viz.: Rates per ton of 2,240 pounds: Billets, iron or steel, $10.00; blooms, iron or steel, $10.00; brass bars and sheets, $15.00; car wheels, $11.00; copper ingots, pigs and bars, $13.00; hoops, iron or steel, $12.00; copper wire, rods and coils, $15.00; iron, pig, $10.00; lead, pig, $12.00; nails, wire, $11.00; pig iron, $10.00; pig lead, $12.00; piling, $11.00; pipe, cast, up to 4 in. outside measurement, $11.00; pipe fittings, $11.00. Pipe, nested, to take rate of smallest diameter of pipe in nesting: Pipe, wrought, up to 4 in. outside measurement, $11.00; plate, tin, $12.00; plates, iron or steel, not over 30 feet, $10.00; rails, up to 33 feet, $10.00; rivets, $12.00; scrap iron, $11.00; shafting, unfinished, $12.00; steel, cold rolled, in boxes, $13.00; steel, tool, $13.00; structural material, up to 30 ft. in length and 2 tons in weight, including angles, beams, channels, girders and T's, not fabricated, $11.00; tin plate, $12.00; tires, steel, $12.00; wheels, car, $11.00; wire, barbed, $14.00; wire, galvanized, $12.00; wire, plain, in coils, $12.00; zinc, $13.00; wire netting, per 100 pounds, $1.00; wire, piano, per 100 pounds, $1.00; leather, in rolls, bales, bags, bundles and counters and rands, per 100 pounds, $2.50; leather, in cases or barrels, except counters and rands, per cu. ft., $1.00; leather belting, $1.00; oakub, up to 100 cu. ft. per ton, per 100 pounds, $1.50; oakum, over 100 cu. ft. per ton, per 100 pounds, $2.00; rice, in bags, per 100 pounds, $1.00.

### ALUMINUM WARE MFG. CO., LTD.

The Aluminum Ware Manufacturing Co., Limited, of Oakville, Ont., has issued a forty-six-page catalogue listing the various lines of cooking utensils manufactured by the firm. The catalogue is attractively printed and illustrated. Readers of HARDWARE AND METAL may obtain copies upon request.

### JONES AND SHIPMAN

"Better Tools," is the title of a catalogue just issued by Messrs. Jones & Shipman, of East Park Road, Leicester, England. The list contains twenty-four pages, in which are shown tool holders, boring bars, lathe carriers, both light and heavy duty, steel sleeves, taper sockets, drifts, gauges and chucks. The catalogue is most attractively printed and illustrated. Readers of HARDWARE AND METAL may obtain copies upon request.

Continued from page 59

### DON'T WORK UNDER POOR BOSS

unfair, which of course is not true. Not one man in ten thousand wants you to sell him anything at a loss to yourself, be it services or goods. It is never necessary to sell at a loss. There is always value waiting to be paid, and when I hear the contrary notion advanced I wonder whether it is not the seller's estimate of value rather than the buyer's which is askew. When I find a man who complains that his services are not properly rewarded, that he is obliged to sell for less than full value, then I expect to find that he is off in his own values, that if he gave diligent attention to delivering more for the money he would not have any cause to complain about the money.

#### Get Full Return

It is quite the same way with advancement in a corporation. You will usually get full return for what you give, and you cannot expect more than that. And that full return will grow with the years. Our company is eighty-eight years old, and we have never discharged anyone because he was too old to work; yet the average age of our executives is only thirty-four. We have grown so steadily and have taken in so many young men that our average age keeps pretty constantly in the youngster class.

Having the older executives about is mighty necessary. A young man associating only with young men may get an "ism" or two that he will think is new. But if he is in daily contact with older men he will discover that they, too, have had their "isms" just as they had the measles and the chickenpox, and that what he thinks is new is really something very old. And so the office becomes the place where the younger men can get their best advice. It is good for them and it is good for the business.

# Dominion Commercial Travellers' Association Now Has 10,706 Members

At its annual meeting held in Montreal, Saturday, the Dominion Commercial Traveller's Association elected officers for the coming year. J. C. Shea, the first vice-president, was elected and installed as president, and made a brief address in thanking the members for this election. Other officers were returned by acclamation.

### Has Seen Big Growth

During the past year the growth of the organization has been particularly large. The actual figures show that 1,085 new members have been received and this makes the present total of 10,706, and which, it is understood, is the largest number ever recorded. The amount of balance in the mortuary benefit is given as $5,239,650.

### Attribute Growth to Conditions

In seeking reasons for the great growth of the association during the past year, the main reason was attributed to that of after-war development of trade in nearly every branch of business. It was expected that this growth would continue during 1920, and when a continued expansion in various trade directions is anticipated.

In referring to the growth during 1919, Maxwell Murdock, treasurer, also referred to the healthy condition of finances, and pointed out that the surplus of $47,067 brought the reserve fund up to $682,205, this being a record amount. This report, as well as others, was unanimously adopted.

### To Honor Returned Members

It was decided to set aside sum of $2,000 which will provide testimonials for members of the Association who served overseas. The form of this testimonial was left with the executive, and while it was not definitely decided, it is possible that a pair of suitably engraved gold cuff-links will be given to those still living.

A motion which elicited quite a discussion was that referring to the limitation of mortuary benefits to $1,000 instead of $1,200 as it is at present. The motion was strongly supported by the mover and seconder, but it was very strongly opposed by other members. The proposal was defeated by a majority of 18, leaving the by-laws unchanged with regard to this important matter.

The Association held its annual banquet on Monday night in the Windsor Hotel with the president-elect, Mr. J. C. Shea, in the chair. Various speakers included the Minister of Justice, Hon. C. J. Doherty; Hon. Walter T. Mitchell, Quebec Provincial Treasurer; Hon. F. D. Carvell, chairman of the Railway Commission; Mayor Martin of Montreal, and others.

# Commercial Travellers' Association Will Recommend Formation of a Federal Board

At the annual meeting of the Western Ontario Commercial Travellers' Association, held at London, Ont., the association went on record as favoring the forming of a Federal Board of Commercial Travelers' Association of Canada, to consist of three members from each association, with the headquarters at Montreal.

The federal board would discuss matters of interest to all commercial travelers throughout the Dominion. Steps would also be taken to have a representative of the federal board on the Canada Railway Board.

The travellers recently put on a campaign to raise $20,000 for homeless children. Their efforts were so successful that $25,000 has been secured. The campaign was in charge of Charles H. McGuire, manager of the Imperial Oil Co., at London, Ont., and a hearty vote of thanks was passed to him for his work.

Officers for the year were elected as follows:

President—G. Morley Adams, London; 1st vice-president—E. N. Hannah, London; 2nd vice-president—F. E. Harley, London; 3rd vice-president—M. E. Sherwood, Woodstock; directors—A. E. Cowley, London; J. H. Laughton, London; Geo. T. Hair, London; A. W. Howe, London; C. G. Secord, Brantford; Geo. W. Sulman, Chatham; W. G. Milne, Galt; H. B. Callander, Guelph; J. G. Murphy, Hamilton; Harry Tolton, Kitchener; I. W. Kingswood, London; Geo. C. English, London; H. Vance Kennedy, London; W. D. Martin, Stratford; L. W. Hambly, St. Thomas; W. T. Goodison, Sarnia; J. K. Bell, Toronto; Jas. H. McGuire, Windsor; H. Lang, Woodstock.

G. Morley Adams, president of the association, is confined to his bed through sickness and Vice-President E. N. Hannah presided at the meeting.

# Muskrat Skins Are Fetching High Prices

As pointed out in recent issues of HARDWARE AND METAL, there is a record demand for furs at the present time. This offers great opportunities for the sale of traps and supplies for trappers by hardware merchants.

The tremendous demand for the skin of the humble muskrat, "Hudson seal," when it appears as milady's coat or muff, has won it a high rank in the indictment against the high cost of living, according to a statement issued by the New York Fur Auction Sales Corporation.

The statement says that Michigan and Eastern rats are now being sold at $3.75 apiece, as compared with 55 to 60 cents in 1915, and that the Western Canadian variety brings $2.60, as against thirty cents in pre-war days.

# Incorporations

Ivey Storage Batteries, Limited, head office Toronto, capital $500,000, plans to manufacture and deal in storage batteries.

Canadian Fireclay Products, Limited, capital $40,000, head office Toronto, plans to manufacture and deal in fireclay products.

Bird Machinery Company of Canada, Limited, head office Hamilton, Ont., plans to manufacture and deal in machinery and parts.

Canadian Hart Products, Limited, head office Hamilton, Ont., capital $500,000, plans to manufacture and deal in abrasive products.

Browns Hardware Company, Limited, Hamilton, Ont., capital $30,000, plans to carry on a general hardware business and also deal in mantels.

The Mitchell Dossert Company, Limited, capital $50,000, head office Montreal, plans to manufacture and deal in electrical appliances and equipment.

Vlit Manufacturing Company, Limited, capital $150,000, head office Montreal, plans to manufacture and deal in polishes, paints, lead, varnish and colors.

The Weed Harvester Machine Company, Limited, head office Belleville, Ont., capital $50,000, plans to manufacture and deal in weed harvesters.

Foundries, Limited, head office Ottawa, Ont., capital $24,000, plans to manufacture and deal in iron, steel, tin plate, malleable iron, castings, etc.

Specialties, Limited, head office Montreal, capital $50,000, plans to manufacture and deal in wood and metal goods and to carry on a general foundry business.

Canadian Foamite Firefoam Company, Limited, capital $50,000, head office Hamilton, Ont., plans to manufacture and deal in fire protective devices.

Manitoba Clays and Building Supplies, Limited, capital $300,000, head office Winnipeg, plans to manufacture and deal in sewer pipes, brick, terra cotta, tile, etc.

The Goodyear Tire & Rubber Company of Canada, Limited, head office New Toronto, capital $30,000,000, plans to manufacture and deal in rubber goods of all kinds.

Republic Flow Meters Company of Canada, Limited, head office Toronto, capital $50,000, plans to manufacture and deal in devices for controlling the flow of vapors, liquids and gases.

Eriez Stove and Manufacturing Company of Canada, Limited, capital $200,000, head office Montreal, plans to manufacture and deal in stoves, furnaces, ranges, baths, lavatories and plumbing equipment.

# THE CLERKS DEPARTMENT

## Don't Work for a Poor Boss, Says Samuel M. Vauclain

### "But Make Sure You Know a Poor Boss When You See Him," Adds President of the Baldwin Locomotive Works in Talk to Young Men

"IN deciding whether it is better to be out entirely for yourself, or with a corporation, not a little of the decision will depend upon whom you are working for. If you find that you are under a poor boss you ought to get out as soon as you can, for half a dozen years of work under an inferior or incompetent boss will so change a young man's outlook that, more than likely, he will be worth very little thereafter. I do not mean by this that it is well for a youngster to be choosy and particular about whom he works for at the first, and to decide right offhand that if the boss doesn't do things after his manner he is a poor boss. The incompetent boy or man never has a good boss—that is, he never thinks he has. An incompetent, lazy individual could never like a first-rate boss."

This is the view of Samuel M. Vauclain, president of the Baldwin Locomotive Works. His views on the subject of "Why I Did Not Go Into Business for Myself" are given in the "American Magazine as follows:

Why did I not go in business for myself? Why did I choose always to work for a corporation rather than for myself?

My answer is: "I have never worked for anyone but myself."

#### Just as Much

A man is working just as much for himself when he is with a large corporation as when he has his own name over the door and is called the proprietor of the establishment. There is only one way to work—you cannot work for anyone and you cannot work for money, that is, if you want to have any fun or get anywhere. You must work for the work.

Let me explain: When I say that I have worked for myself and that everyone with a vision always works for himself, I mean that it is the work which must control. If your whole thought it to do in the best possible way the work that you start out to do, and you find it interesting, then every other question will solve itself—including that of the money return. Events rather than intentions will do the career molding.

#### Takes Care of Itself

The money return always takes care of itself and is the least important side to be considered. I have never bothered about it. I happen to know my own salary right now because the Board of Directors of the company fixed it the other day in meeting. But until that meeting I had never quite known my annual income for perhaps twenty years past. That sounds "unbusinesslike." Is it? Why should one bother counting money if there are more interesting things at hand to do? My salary was bound to be large enough for all proper purposes, because I was doing my work as best I knew how, and that is the world voucher for a salary. The details could be handled by a trust company, for they have men more interested and more skilled in handling money than I am.

#### Personal Finance

Some of my friends say that I would be wealthier to-day did I give more attention to personal finance. But I doubt it. I do not know what I am worth, but I am quite sure that I have been paid enough, and that it would have been stealing from my life to give thought to money, in which I was not interested, when that same thought might have been given to mechanics, in which I was interested. Then I should have suffered a loss which no amount of money could compensate.

#### The Really Hard Job

The really hard job in this world is not to make money—that is the easiest thing in the world, that is, money enough to support one comfortably. The really hard job is to discover that which you like to do. If you find it with a corporation then that is your job; if you cannot find it with a corporation, or if you happen to hit upon something interesting which you can do wholly for yourself, then you should go into business for yourself.

There is no rule; it is a matter of cases. And, when you get down to the individual case, the choice is not very difficult, providing always that you like to work and want to work. I have noticed that the young men who go from one place to another and seem never to be able to stay anywhere are usually those who are hunting for a "snap" or who imagine that they ought to be advanced before they have taken the trouble to know all about what they are doing. A boy or man who has a real desire to work can have no trouble at all in finding a job and, if he keeps that desire to work and keeps both his head and his hands going, he will always find the exact job which suits him.

#### The Best Course

I do think, however, that the large corporation, with its modern methods and air of doing big things, is the best possible preparatory course for business, and that a few years should be spent with one before any kind of a decision is made.

I speak of making a decision, and yet I have made only one myself, because I have had only two jobs in my life. In a way, I have never made a change, but rather just came into the new job more or less as a matter of course. As a boy of sixteen we were living in Altoona, Pennsylvania. The big thing in Altoona is the shops of the Pennsylvania Railroad; everything else is more or less built around them.

#### Were Sought After

Apprenticeships were largely sought after in those days, for an apprentice who learned the machinist's trade in the railway shops was certain to turn out as a good machinist. I was promised an indenture when I became seventeen; but when I was a little over sixteen I found that I could get into the shop as a helper, and, therefore, I quit school and took the job at fifty cents a day. I did not have to take this job. My parents did not need the money. But it seemed to me that, if I were going to be apprenticed in the following year, it might be well to be on hand early so that if there were any difficulty about an indenture, I would at least be in the shop and perhaps have an advantage. It is better to be on the inside looking out than on the outside looking in.

#### Had No Ideas

I had no particularly definite ideas as to the future, except that, first of all, I wanted to be a good machinist. The indenture came in due course, and until I was twenty-one I worked as hard as I knew how, because there were so many things to find out about in that place, and so many interesting operations to learn, that it took every moment of every day just to try to catch up with the things that I wanted to do. During the last year or so of my indenture, although still an apprentice and drawing an apprentice's pay, I was appointed a kind of under foreman.

#### Made Him Foreman

When I got my papers and was a full-fledged workman, they made me a foreman, which rather interfered with my plans. I had thought of working for several years in order to get enough money together to take an engineering course somewhere. I thought that by working summers and at odd times I could get myself through. But being made a foreman made me wonder whether or not it would be quite wise to take out three or four years wholly for study. Should I not then have to start all over again with a handicap to overcome? And, so, instead of trying for college, I took up mechanical drawing at night and, although some might think that, after a hard day's work, the night could not well be given up to study without injury to the health, I did not find it so. I have never found it so.

In fact, I have never taken a vacation. I have never needed one, and no place ever offered as many different kinds of amusement as could be found in the day's work. Although I usually reach the office about seven in the morning and leave anywhere from six to nine in the evening, and have often been in the office eighteen hours at a stretch, I do not consider that I have ever really worked. It has simply been fun, and I have always been doing the work or thing that I best liked to do. Why call that which you like to do "work"?

#### Enjoys Designing

I thoroughly enjoy designing a locomotive and helping to build it. In a way, I never had a better time in my life than during the war—first in getting the locomotives out to Russia and France; and then later, when we got into the war, in organizing and getting under way the rifle plant at Eddystone, which reached a capacity of six thousand rifles per day and, I am proud to say, supplied nearly two-thirds of all the rifles used by the American army in combat. At the same time we

built other plants which contributed some seven million shells.

But, to go back: Having decided not to go to college, and being in receipt of the not extravagant wage of eight dollars and forty cents a week, at the age of twenty-three I married. We looked at it this way: I could never earn less than eight dollars and forty cents a week and, therefore, if my wife and I learned to live on that sum, we could never thereafter have any financial difficulty. Altoona was not then an expensive town. We had no particular trouble in managing on eight dollars and forty cents, and we even put something by. So we have had no financial difficulty since. This is one of the points which it is well for a young man to bear in mind during the years when his future is in the balance. The tendency is to increase expenses with each increase in salary. It is better to learn to live on the first salary, and then no step need be taken merely to get the nearest dollar.

### Wanted a Raise

One of our young men came to me not long ago to recommend a raise in his salary. I asked him how much he was getting. Then I asked him how much he was saving, and he replied:

"I cannot save anything. It is all I can do to make ends meet—and often they do not meet."

I had to tell him, and I told it to him for his own good and to make him a better man later, that I would vote against an increase in salary. I did not want to preach to him, but I had to tell him the plain facts out of my own observation and experience. I said something after this fashion:

"We have hundreds of men who do not make one-third as much as you are now making, and yet they save money. You will find that every one of them has an account in the savings fund. You have no savings account and, if I should recommend that your salary be doubled, you even then would not have an account, for you would increase your expenses, and again find it impossible to make ends meet. It is all due to the fact that you have no decision in your own affairs. Whenever you decide to save ten per cent. or twenty per cent. of your salary, and stick to the decision, I shall be more than glad to recommend a very substantial increase, but not until then."

### Heedless of Weather

Let me take another personal instance: Through all the years I have always gone to work day in and day out heedless of the weather. So now, when I get up in the morning, I never bother looking to see if it is clear, or raining, or snowing; if it is hot or if it is cold. The work is ahead to be done, it must be done, so why bother about the obstacles? Why stop to think that it is too wet or snowy to make going out pleasant, or that it is too hot to work or too cold to travel? When you are interested in what you are doing and have made up your mind to do it, the weather does not count.

And again, the man who has himself in full charge will never be pressed for time. Take one of our workmen. He has been with us many years and has accumulated at least forty thousand dollars, although he holds no high position. In addition, he owns and operates a farm on the White Horse Pike in New Jersey on which, in his spare time, he has built himself a very good home. That man works at the Eddystone plant, which is a good twenty miles from his farm. But he is at his work every day before seven in the morning and he often does not leave before nine in the evening. Yet he finds time to attend to all of these outside interests. How he does it I do not know. But the big point is that he does it; and the older I grow the more convinced I am that practically anyone can accomplish anything if only he has a mind to do it.

### How It Happened

Having a mind in the work in hand will probably do the deciding of a career without much help from you yourself. It did for me. I almost started into business, but circumstances came along and settled the matter. It happened this way:

After I had been serving as foreman for a year or two at Altoona, a great boom came on there in the sand business. I thought I would go into that business on my own account. The prospects looked good, and time has proved that they were good, for a great many people have done extremely well with sand in that district.

### BUSTING THINGS UP

There was a fellow got a hunch
That he was strictly "It,"
Just to get even with his boss
He quit.

The boss he bore it wondrous well,
He never wailed or moaned or swore;
But said, "As you go out don't slam
The door."

The other boys about the place
Did not go moping much that day,
They laughed and said good-bye, and drew
Their pay.

He thought: "They do not realize
That I have left them to their fate,
So much the better; let them laugh;
But wait!"

And then he ambled down the street,
And confidently told the town:
"Now, fellows, watch and see the boss
Fall down."

Somehow or other things went on,
The business did not go to smash,
The boss went smiling as he grabbed
The cash.

And every day the fellow met
Some friend who didn't know he'd quit,
And didn't care, and wasn't sore
A bit.

It rather stunned him that the world
Went booming on through day and night.
As well as when he used to keep
It right.

Somehow there isn't any man
For whom the whole creation squirms;
And good men cluster round a job
Like germs.

And when you up and leave your place,
And think the whole blame works will quit.
The joker hollers, 'Tag, old man,
You're it!"

The world goes pluggin', plodding on,
As unconcerned as it can be;
If you are mentioned someone asks,
"Who's he?"

But before I could quite make up my mind to quit being a machinist I got a promotion, and when I started again to think about sand I got another promotion. I have not yet had time to get around to that sand business, and so I suppose the question is still undecided. Like many momentous affairs, it got shelved.

### Sent as Inspector

In 1882—I was then twenty-six—we were having a number of locomotives built at Baldwin's Locomotive Works. The shop sent me down as a kind of inspector to watch the construction. It took a year to build the locomotives, and during that time I became very familiar with Baldwin's. I liked the work. New jobs were coming up all the time. The outlook seemed unlimited—the whole world needed locomotives. The outlook in the Altoona shops was not exactly limited, but I had noticed that the ordinary progression of the machinist usually took him out of the shops to become a superintendent in some faraway station, where the work developed into a routine.

When the locomotives had been built I had become almost a part of Baldwin's; they wanted me to stay, and I stayed. That was all there was to changing jobs. First, they made me superintendent of what is known as the Seventeenth Street Shop—one of the divisions of the works. About a year later they made me superintendent of construction, and by the time I was thirty they had promoted me to the mechanical supervision of the whole establishment. Since then I have never had any definite sort of a title until lately, when I became president.

### Better Get Out

In deciding whether it is better to be out entirely for yourself, or with a corporation, not a little of the decision will depend upon whom you are working for. If you find that you are under a poor boss you ought to get out as soon as you can, for half a dozen years of work under an inferior or incompetent boss will so change a young man's outlook that, more than likely, he will be worth very little thereafter. I do not mean by this that it is well for a youngster to be "choosy" and particular about whom he works for at first, and to decide right offhand that if the boss doesn't do things after his manner he is a poor boss. The incompetent boy or man never has a good boss—that is, he never thinks he has. An incompetent, lazy individual could never like a first-rate boss.

### Many False Ideas

So many false ideas not only exist but are actually fostered about everything connected with work; they start with the mere getting of the job and then ramify through every phase and angle. There seems to be a notion that it is hard to get a job. Not long ago, a young man brought in a letter of introduction from one of my friends. The letter was long and the young man was nervous. Evidently, somebody had been telling him that he could not get a job for himself but needed a little pull somewhere. Possibly he had read the letter, for it besought me to try to find a place for the youth and so on, and so on. In fact I think it used the expression "to give the boy a job."

This youngster had what I call a good "mug"; he was bright and active-looking and was not very much afraid of me, although he had never worked anywhere. I sent him over to another department with a note, and at the end of an hour the head of that department called up to say that if I had a hundred more like him to send them over just as fast as I could get them there.

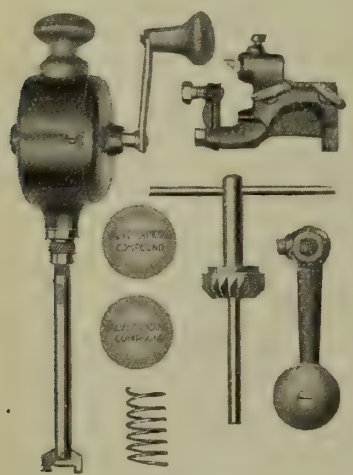
There is no difficulty about getting a job. You may not, and probably will not, get the one that you like best at the first trial, but you are sure to get something; and it does not require, in any place that is worth working, in a letter of introduction or a pull.

### On His Own Merits

I made up my own mind very early, in fact before I began as an apprentice in the Pennsylvania shops, that I was not going to be advanced by "influence." For that reason I never joined any social organization—any lodge, society, or church; I did not want to be advanced for any reasons originating outside of myself. Later, as I came into authority, I did not want to be asked to advance anybody for similar reasons.

### Are Not True

I do not know how or where these delusions arise. Perhaps they grow out of the belief that people generally desire to be



Continued on page 56.

# NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

### VALVE TOOL SET

The Little Sioux Valve Tool Set manufactured by Albertson & Company, of Sioux City, Iowa, is, the manufacturers claim, one of the most useful outfits for car owners yet put on the market. It is

*Tool Set*

stated that with these appliances, work may be quickly and thoroughly accomplished by the owner, which would cost many dollars if done in a garage or repair shop. The various tools, it is stated, are strongly made and built for service.

### CHAINOLENE

"Chainolene," a new preservative and lubricant, is being put on the market by the Chainolene Mfg. Company of Chicago. The claim is made that it is the correct lubricant for "roller type" chains as its distinctive adhesive qualities keep the rollers revolving continually in a film of oil, thus minimizing frictional resistance. "Chainolene," it is stated, is

*Chainolene*

not graphite, but a specially prepared compound that works its way in under the rollers, is free from any foreign substance and will not dry up. For bicyclists and motorcyclists, it is said to be invaluable.

### SPARK PLUG

A new half-inch extra long spark plug is being manufactured by A. R. Mosler & Co., Box 292, Mount Vernon, N. Y. Mosler plugs are of two-piece construction, and the manufacturers claim that this greatly facilitates clear-

*Spark Plug*

ing when plugs become fouled with carbon. Heat resisting electrodes with good electrical conductivity, nickel manganese wire being used, perfect contact between the cylinder wall and the shell of the plug, mica insulation and general all-round service and adaptability are also claimed for these plugs.

### SEAMLESS REFRIGERATOR

"Paris" Seamless Refrigerators, manufactured by the Sanderson-Harold Co., Ltd., of Paris, Ont., are made in two types. A top icer with ice chamber door opening on face of refrigerator and a side icer with either three or four doors. The manufacturers make the following claims; that special attention has been given to the wall construction, mineral wool being used as an insulator and proper air spaces allowed to insure perfect insulation. The principal feature is the new one-piece seamless porcelain lining. The provision chamber is a seamless tank, without crack or crevice, and it is stated, can be kept much cooler than refrigerators lined with sheets. It also can be kept clean much easier, as there are no cracks to harbor germs.

#### Fire Sets

Summer & Company, Moncton, N.B.—Can you tell me where to procure fire sets in Canada?

You can procure these from the following: Barton Netting Co., Windsor, Ont.; Enterprise Foundry Co., Sackville, Ont.; T. G. Rice Wire Mfg. Co., Toronto, Ont.; Toronto Lock Mfg. Company, Toronto.—Ed.

#### Beaver Board Tape

R. T. Holman, Ltd., Summerside, P.E.I.—Can you tell me where to procure tape for covering seams of beaver board?

You can procure this tape from: National Jobbing & Tailors Supply Co., Ltd., John Street, Toronto; Kay Cutting Co., 734 St. Paul Street W., Montreal, Que.; Walter Williams & Co., 508 Read Building, 45 St. Alexander St., Montreal, P.Q.; Whitby Braid & Edging Co., 70 Teraulay Street, Toronto, Ont.—Ed.

#### Restaurant Stools

Sommerville Hardware Co., Edmonton, Alta.—Can you tell me where to procure names of manufacturers of restaurant stools and chairs?

You can procure these from: Stratford Chair Company, Stratford, Ont.; Canada Foundries and Forgings, Ltd., Brockville, Ont.; Grimsby Steel Furniture Co., Grimsby, Ont.—Ed.

#### Pipeless Furnace

J. E. Casson, Esq., Victoria, B. C.—Can you tell me where to procure pipeless warm air furnace?

You can procure these from the following: McClary Mfg. Co., London, Ont.; Gurney Foundry Co., Ltd., Toronto; The Beach Foundry Co., Ltd., Ottawa, Ont.; The Hamilton Stove & Heater Co., Ltd., Hamilton, Ont.; Clare Bros. & Co., Ltd., Preston, Ont.; Findlay Bros. & Co., Ltd., Carleton Place, Ont.—Ed.

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

VERY important higher prices have taken effect this week, many of the basic hardware lines being affected. Amongst the numerous changes noted are: Wire nails and staples advanced 25 cents per 100 pounds. Flat, round and oval head iron wood screws are also higher. Builders' inside lock sets of the cheaper variety are up 10 per cent.

Tin, lead, spelter and antimony ingots are all firmer and a full steam ahead demand for 1920 is already noted.

Jute twine, fuel oil, window glass, hasps, Japanned shelf brackets, shoe tacks, pipe fittings, Colts' revolvers and pistols, Savage rifles, barb, coil spring and other wire goods, axe, pick and sledge handles, lumbering tools, measuring tapes, butts, cabinet desk and drawer locks, tire tape, wax, solder, sad irons and door bells, all are included in the list of advances.

Lower prices seem to have been forgotten, in the effort to procure goods, due to lack of production, which more and more has become the dominating factor of the present situation. It is stated that, generally, makers are squaring themselves to attack this problem with great vigor once the holiday period is past. Many are preparing for one of the greatest years of expansion in their history, it is stated.

## MONTREAL MARKETS

MONTREAL, Dec. 24—A whole list of increased prices is effective this week and follows the strong tendencies outlined in HARDWARE AND METAL for the past two or three weeks. The important item for the week is that of nails, standard wire being advanced to $5.25 per keg, and cut to $5.35. Wire of various kinds, including barbed, coil spring and plain, are also firmer. Axe, pick and sledge handles are marked higher. Flat and round head bright wood screws are marked higher. Vacuum bottles are likely to advance. Lumbering tools are higher. Steel tapes are up ten per cent. and various butts of the ordinary special grades and also plated fancy butts and screw and strap hinges are marked up. Various locks, including cabinet, desk, drawer, chest, trunk, pad, etc., are higher. Tire tape has increased in price and sad irons, door bells, wax, lead products, solder, sheet lead, lead wool and pig lead are all higher. Coal oil is firm and an advance would not be a surprise. Galvanized sheets are marked higher and zinc sheets are also quoted up half a cent per pound. Stoves are due for an early advance. New discounts are out on various wares. Iron and steel are very firm, but unchanged. Cotton and jute twines and ropes are soaring. Tin and spelter, antimony and pig lead, all are marked up this week and the general ingot undertone is firm. There seems little promise of relief in the way of lower prices on most hardware commodities.

### *Various Handles Up; Zinc Sheets Stronger*

**Montreal.**

HANDLES, SHEET ZINC. — Advances are effective for various handles, axe, pick, and sledge being affected. These three styles are up about 12½ per cent.

Sheet zinc, under the influence of spelter firmness, has advanced half a cent per pound.

### *Lumbering Tools Up; Steel Tapes* 10%

**Montreal.**

LUMBERING TOOLS, TAPES.—The discount on Pink's lumbering tools has been changed, recording an increase in the price.

Steel tapes of Lufkin manufacture have advanced about 10 per cent.

### *Bright Screws Higher; Handles; "Vac" Bottles*

**Montreal.**

SCREWS, VACUUM BOTTLES.—Flat head bright wood screws are

marked higher through a change of the discount to 75 per cent., and to 72½ per cent. for the round head, bright. Brass are unchanged.

An advance is imminent for vacuum bottles, it is reported, and this may come immediately after, or before the first of the year.

## *Ordinary Butts, Hinges Are Higher*

**Montreal.**

BUTTS, HINGES.—Ordinary styles of butts are higher this week through a revision of the discounts. This applies to the "800" series, and average increases are from 10 to 15 per cent.

Light strap and tee hinges are also higher, the present discount being 12½ per cent. Screw and strap hinges are also advanced, the present discount being 15 per cent.

## *Padlocks and Tape, Sad Irons Higher*

**Montreal.**

LOCKS, TAPE, SAD IRONS.—Higher prices are effective for padlocks of Eagle make, and chest, cash box, cupboard, drawer, desk, suitcase, and trunk locks of the same make are also advanced. The increases are from 10 per cent. to 15 per cent.

Tire tape, too, is higher, the prices being as follows: 1 ounce size, lb., 75c; 2 oz., 70c; 8 oz., 66c; and in 50 lb. lots or over, 5c per lb. less.

Mrs. Potts' sad irons are advanced to $2.25 for the No. 50, and to $2.05 for the No. 55.

## *Door Bells; Hinges; Special Butts Up*

**Montreal.**

SHELF HARDWARE.—Prices are higher on shelf hardware, including door bells, fancy plated butts, and cabinet hardware, including bolts, hooks, door springs, drawer pulls, etc. The change brings with it an advance of about 10 per cent. In many instances the jobbers no sooner have their changes made than others follow, and the trend is strongly upward.

## *Nails and Wire Up; Staples; Barb Wire*

**Montreal.**

NAILS AND WIRE.—An advance of 25c per keg for wire nails has been effected, and this makes the base price $5.25. The base, now, for cut nails is $5.35, this meaning an advance of 35c per keg.

While this advance would seem to be ample to take care of the market for awhile, there are suggestions that there will be higher prices immediately after, if not before the turn of the year. The market is ruling strong.

Galvanized plain, barbed, and coil spring wire are also higher in some quarters. The present prices of barbed wire are: "Catch weights," per 100 lbs., $5.90; 80-rod reels, 2 x 5 pt., per spool, $4.71; 4 x 6, $5.10; and 4 x 4, $5.53.

Staples are also marked higher, galvanized being $6.35 per keg; bright, $5.60; and smaller lots of bright, $6.10.

## *Steadied Basis on Rope; Cotton Firm*

**Montreal.**

ROPE AND CORDAGE.—Sales of rope are seasonably limited, and the basis is unchanged. Prices for the various grades are as follows: Pure manila, per lb. base, 31c; Beaver and British manila, 26c; and sisal, 22½c.

The undertone on all jute and cotton products is still firm, advances not having ceased, and there being every prospect of higher markets.

## *Oil and Gasoline Firm; An Advance For Wax*

**Montreal.**

OILS, GASOLINE, WAX.—There has been no quotable change for coal oil, nor for gasoline, but the undertone is firm. With the "States" market higher, increased prices may become effective here. Gasoline of the motor grade is selling at 33c, while coal oil, as to grade, is quoted at 22-25c per gallon.

Wax, of the various grades, is half a cent higher. This change applies to grades known as 118-20, 123-25, 128-30, 133-36.

## *Advanced Are Lead Products' Prices*

**Montreal.**

LEAD PRODUCTS. — Another advance for some lead products, in addition to the increases made effective last week, are now announced. Lead wool is quoted up, at 15c per lb., and various grades of solder are much firmer, with mark-ups for most of them, guaranteed grade being quoted at 40c per pound. There is quite a satisfactory movement, season considered.

| | |
|---|---|
| Lead pipe | 0 13½ |
| Lead waste | 0 14½ |
| 8 in. and over | 0 15½ |
| **Note.—Lead pipe is subject to a discount of 10%.** | |

| 45-55 | 0 31½ |
| 50-50 | 0 42½ |
| Zinc sheets, casks | 0 16½ |
| Do., broken lots | 0 17 |

## *Scarcity Sheets is Manifest; Increases*

**Montreal.**

SHEETS AND PLATES.—No relief has come to the trade in the matter of steel sheet supplies, and the market is again higher this week. English sheets are expected to arrive in this market in a few weeks' time and many hundreds of tons have been ordered, and, HARDWARE AND METAL is informed, that these will arrive, the stock being available. This means winter rates of freight, and, as a consequence, prices will rule quite high. On English sheets, as quoted below, the prices are 25c higher this week.

| | | |
|---|---|---|
| **BLACK—** | | |
| 10 gauge | 5 90 | 6 20 |
| 12 gauge | 5 95 | 6 25 |
| 14 gauge | 6 00 | 6 30 |

| 22 and 24 gauge | .... | 8 40 |
| 20 gauge | .... | 8 25 |
| 18 gauge | .... | 8 25 |
| 16 gauge | .... | 8 00 |
| English Standard— | | |
| 28 gauge | .... | 10 25 |
| 26 gauge | .... | 10 00 |
| 24 gauge | .... | 9 40 |
| 22 gauge | .... | 9 05 |
| 18 and 20 gauge | .... | 8 85 |

**NOTE——These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.**

## *Stoves Tend Higher; New Ware Discounts*

**Montreal.**

STOVES AND WARES. — Higher prices are bound to come for stoves and ranges, say the manufacturers. The market is very strong, and with difficulties in obtaining raw material, and higher labor outlay, increases cannot be long deferred.

New discounts are announced on various wares, and these were referred to, briefly, in HARDWARE AND METAL last week, the change being made just as the weekly reports went to press. The increases are varied, and run from 5 per cent. to about 15 per cent., enamelled, copper, sheet iron, tinned ware and tinner's trimmings, milk cans, cream cans, etc., being affected. This is a direct result of the recent advances for plates, and the scarcity and continued high prices of these wares, coupled with higher manufacturing costs, makes the undertone very strong at the advances. Revised discounts are to be found in the current list elsewhere.

## *Very Firm Iron and Steel Market*

**Montreal.**

IRON AND STEEL—In common with many basic commodities, iron and steel prices are ruling firm. The movement of supplies to the trade continues to be seasonably good, and there is a fair stock to meet the trade requirements.

IRON AND STEEL

| | |
|---|---|
| Iron finish machinery steel | 4 10 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 25 |
| Spring steel | 5 00 |
| Sleigh shoe steel | 4 05 |
| Tire steel | 4 25 |
| Toe calk steel, per 100 lbs. | 4 95 |
| Band steel | 4 05 |
| Harrow tooth steel | 4 20 |
| Mining tool steel, per lb. | 0 22 |

| | |
|---|---|
| Black Diamond tool steel, per lb. | 0 22 |
| Black Diamond cast steel, per lb. | 0 22 |
| Common bar iron, per 100 lbs. | 3 90 |
| Refined iron, per 100 lbs. | 4 90 |
| Mild steel | 4 95 |

## *Most Ingot Metals Higher in Price*

**Montreal.**

INGOT METALS.—Strength in nearly all lines is manifest this week, and notably in lead, tin, and kindred products.

COPPER.—This metal is stronger, though there is no quotable change, prices remaining at 24c for casting, and at 24½c for electrolytic.

TIN.—London advances for tin have been constant and many. The price in this market would be materially higher were it not for the favorable exchange rates. An advance is made to 63½c in this market.

LEAD. — Steadily upward goes the price of lead, and quotations are advanced in most markets. Under good demand the local price is 8⅞ to 9c per lb.

SPELTER.—An active demand is reported and the prices have advanced this week to 10¾c per lb.

ANTIMONY.—Somewhat firmer, and with Chinese basis 11c per lb, and English grade 11½c.

ALUMINUM.—Some scarcity of this is said to exist. Price 32-33c per lb.

## *Holiday Quietness On Old Materials*

**Montreal.**

OLD MATERIALS—Prices have been without change, practically, and with the usual holiday lull manifest, there is little new to report. It is expected that there will be a continued demand from the manufacturer for various old scrap, particularly for heavy grades of cast iron and heavy stove plate.

| Dealers' Buying Prices— | | |
|---|---|---|
| Old rubbers, boots and shoes | 0 07 | 0 08 |

| Machinery, cast (ton) | 29 00 | 30 00 |

# TORONTO MARKETS

TORONTO, Dec. 24—Important changes continue to be the order. The goods marked up this week all have very important connections with the hardware business. Amongst the most important changes are: Wire nails, fence staples, flat, round and oval head wood screws. Lock sets of the cheaper variety are up 10 per cent.

Price tendencies for the first part of the New Year show indications of advancing. The general outlook for business during the coming year is excellent. Many are preparing for one of the largest years in their business career. Now that the different labor movements are settling down again, production will take on more of a steady stride, it is expected. This should have the effect of steadying the markets generally, which of late have been very unsettled and of a firm nature. It is stated that while increased labor will undoubtedly bring a decline in price, it is not expected any change will take place of a downward nature for some time to come, as it takes full capacity production for normal demands and at present neither full capacity nor normal stocks exist.

## *Perfection Oil Stoves to be Handled by Makers*

**Toronto.**

PERFECTION OIL STOVES.—In the near future, the Perfection Stove Co., Sarnia, Ont., intend marketing their stoves through their own organizations. HARDWARE AND METAL have it on good authority that the head sales office will be located in Toronto.

The sale of these stoves was formerly controlled by the Imperial Oil, Ltd. The reason given was that owing to increased business in both lines, it was decided that each could be more satisfactorily handled separate.

The new ruling will gradually take effect as follows: The Province of Ontario, starting on February 1st, 1920. The Province of Quebec, starting March 1st, 1920, and all other Provinces starting July 1st, 1920.

## *Measuring Tapes Have Advanced 10%*

**Toronto.**

MEASURING TAPES.—An advance of approximately 10 per cent. has been made in measuring tapes, and the new prices are quoted as follows: No. 263 Challenge, 50 ft. steel, $4.90 each; No. 103 Reliable Jr., 50 ft. steel, $4.95 each; No. 243 Rival, 50 ft. steel, $4.25 each; No. 1243 Rival Jr., 50 ft. steel, $3.95 each; No. 603 Metallic, 50 ft., $3.45 each; No. 604 Metallic, 66 ft., $3.35 each; No. 403 linen, 50 ft., $2 40 each; No. 713, ass skin, 50 ft., $6.60 per dozen.; No. 714, ass skin, $7.75 per doz.

## *Marbles Sportsmen's Specialties May Advance*

**Toronto.**

On January 1st, it is stated there will be an advance in the price of some of Marble's sportsmen's specialties. The increase is said to be small on most items affected and is about five per cent. on some, and on others ten per cent. The increasing cost of manufacturing makes this change necessary. A revised price list is being sent to dealers. There will be no change in the discounts.

## *Cut Nails F.O.B. Toronto, $5.75 Base Net*

**Toronto.**

CUT NAILS.—The new price, quoted in HARDWARE AND METAL last week, of $5.35 base per keg, f. o. b. Montreal, will sell from Toronto warehouses at $5.75 net.

## *Wire Nails Advance; New Base Price $5.20*

**Toronto.**

WIRE NAILS. — Higher prices are again quoted on wire nails and the new base price is $5.20 per keg. As will be noticed by this that the nail situation is not improving. It is stated that nails are very scarce and the demand is a heavy one and considerable inquiries are coming from the U.S.A.

Notwithstanding the advancing cost of nearly all building material, 1920 looks like a great year for expansion and growth, and some are advising stocking in larger proportion to the present year.

## *Wood Screws Advance; New Prices Herewith*

**Toronto.**

WOOD SCREWS. — An advance has taken place in wood screws, the new quotations being: Head iron, 75%; Round Head Iron, 72½%; Oval Head Iron, 72½%.

## *Stoves and Ranges Firm; May Soon be Advanced*

**Toronto.**

STOVES AND RANGES at present are very firm, and higher prices in the near future may be expected, if present conditions are any indication.

The stove business has been very brisk all season, and it is the belief of manufacturers that it will take several months in the first of the New Year to catch up with present orders, where otherwise this coming season is usually slack, it is stated.

Labor is high and will continue so, it is expected. Stove-making material is also said to be very hard to procure. Some have it that the cost in stoves is bound to increase owing to the increased cost and scarcity of stove plates and other indirect factors.

## Ready Roofing Advances 10c Roll

Toronto

ROOFING.—An advance of 10 cents per roll has taken place in some brands of roofing, and quotations are as follows: Panamoid, 1-ply, $1.80 roll; 2-ply, $2.15 per roll; 3-ply, $2.50 per roll. Everlastic, 1-ply, $2.10 per roll; 2-ply, $2.40 per roll; 3-ply, $2.75 per roll.

## Boiler Tubes Unchanged; May Soon Advance

Toronto.

BOILER TUBES.—An advance of 10 per cent. has been quoted in some markets. Local jobbers have as yet not made any change in price, and it is expected the present ruling will hold till probably the first of the New Year.

Boiler tubes have been moving well and a very good demand is noticed for this season of the year. Following are the quotations:

| BOILER TUBES— | Per 100 feet Seamless | Lapweld |
|---|---|---|
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |

| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## Stove Pipe Elbows Now Quoted, List Plus 33½%

Toronto.

STOVE PIPE ELBOWS have advanced as noted under the heading of Wares in these pages under Current Quotations. The new price is being quoted at list price plus 33½%.

## Scrap Metals Firm; All Scrap Materials Quiet

Toronto.

SCRAP MATERIALS.—Owing to the closing of the present year the market has been somewhat quiet and no recent changes have been noted. The following are the prevailing quotations:

| DEALERS' BUYING PRICES | | |
|---|---|---|
| Pipe scrap | .... | 11 00 |
| Stove plate, per ton | .... | 18 50 |
| No. 2 busheling | .... | 13 00 |
| Yellow brass | .... | 0 10 |
| Red brass | .... | 0 15¾ |
| Light brass | .... | 0 07 |
| Scrap zinc | .... | 0 06½ |
| Heavy copper | .... | 0 17 |
| No. 1 machinery cast | .... | 24 00 |
| Heavy melting steel | .... | 15 00 |
| Wrought iron, No. 1, per gr. ton | .... | 15 00 |
| Heavy lead pipe | .... | 0 06 |
| Old rubbers, boots and shoes | .... | 0 06 |
| Overseas, lumbermen's rubber boots | .... | 0 04 |
| Bicycle tires | .... | 0 01½ |
| Automobile tires | .... | 0 03 |
| Tea lead | .... | 0 04 |
| Heavy lead pipe | .... | 0 05¾ |

## Corrugated Sheets Firm; Stocks Exhausted

Toronto.

CORRUGATED SHEETS are still reported at unchanged prices and stocks of sheets are exhausted, say manufacturers. However, better deliveries are expected for the coming year, and merchants are ordering goods with more confidence. Many seem more interested in the securing of supplies than securing at any special prices. The following are the quotations:

| Corrukated Sheets— | Per 100 square feet Gal'zd | Painted |
|---|---|---|
| No. 28 gauge | $8 25 | $7 00 |
| No. 26 gauge | 9 00 | 8 00 |
| No. 24 gauge | 13 50 | 10 00 |
| No. 22 gauge | 16 00 | 12 50 |
| No. 20 gauge | 19 00 | 16 00 |
| No. 18 gauge | 24 00 | 19 50 |

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

## Iron and Steel Bar Prices Hold Unchanged

Toronto.

IRON AND STEEL BARS.—No advance prices have been noted this week, although the present price is very firm. The mills have been advancing their prices, but generally jobbers are not making any change till the New Year at least.

Some state that they hope to continue business at the present prices through the early part of 1920, but this depends entirely on prevailing conditions.

The high U.S.A. exchange rate is a serious factor with many who depend on this market for supplies. Some are not taking advantage of this rate for goods in stock, but say they are forced to charge extra for shipments coming.

The following are the quotations:

| | | |
|---|---|---|
| Common bar steel | .... | 4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | 4 25 | 4 50 |
| Band steel | 4 25 | 4 50 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## Oakum Unsettled, Firm; May Show Change Soon

Toronto.

OAKUM.—At present oakum remains unchanged and is showing excellent results for this season of the year. The price is firm and unsettled, and a change in price in the near future would not be unexpected.

## Lead and Zinc Products Firm; Solder Advanced

Toronto.

LEAD AND ZINC PRODUCTS are holding firm at the new prices, quoted in last week's issue, of HARDWARE AND METAL. Solder has advanced this week. It is expected these prices will remain unchanged for some time to come unless important developments occur to the basic metals, which frequently are subject to sudden changes and fluctuations.

The following are the present quotations:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | .... | 0 13½ |
| Lead waste pipe, list, per lb. | .... | 0 14½ |
| Do., over 8 inches, list, per lb. | .... | 0 15½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | .... | 5% |
| Lead wool, lb. | .... | 0 16 |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | .... | 0 10½ |
| Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra. | | |
| Solder, guaranteed, lb. | 0 35½ | 0 36 |
| Solder, strictly, lb. | 0 34¼ | 0 34½ |
| Solder, commercial, lb. | 0 32½ | 0 33 |
| Solder, wiping, lb. | 0 31 | 0 31 |
| Solder, wire, lb. | 0 42 | 0 42¼ |
| Zinc sheets, per lb. | 0 17 | 0 19 |

## Bristle Brushes Unsettled; May Advance Again Soon

Toronto.

BRUSHES.—In spite of the recent advances, reported in HARDWARE AND METAL, indications point to a further advance in bristle brushes during the early part of the New Year. The brush market has been growing firmer for some time back and, it is stated, is due to the shortage of bristle.

Owing to so many European hogs being killed off during the war, white bristles are practically off the market, and, as it takes a hog practically five years to grow long bristles, the scarcity in this line may not soon be overcome.

## Jute Twine Advances; Prices Quoted 2c Higher

Toronto.

JUTE TWINE.—An advance of 2 cents per pound is now being quoted on jute twine. This is in order with recent advances in raw material, the chief cause, it is stated, being the shortage and higher costs of labor.

## Fuel Oil Advances; Now Quoted at 9 and 10c

Toronto.

FUEL OIL.—New and higher prices are in effect in this commodity and are now being quoted as follows: Fuel oil tank cars, net 9 cents per gallon; fuel oil, barrels, net, 10 cents per gallon. Since the cold weather a very good demand has been noted for fuel oil. The demand is also very good for coal oil. Other oils though have fallen off slightly owing to the cold weather, it is stated.

## Sheets and Plates Firm; Present Prices Hold

Toronto.

SHEETS AND PLATES.—The serious shortage of this commodity continues to be keenly felt, although some state that sheets are coming in better and that the size of shipments are stated to be even larger than was hoped for. Booked orders and future business seem out of the question. At least none of the mills are encouraging this class of business, it is stated, owing to the enormous booking still on hand of the 1919 variety. However, the demand for 1920 is expected to be of such a persistent nature, that manufacturers will find some way of catching up with their orders, it is stated, and all concerned are hoping the New Year will be one of industrial harmony and peace.

Owing to the scarcity and unsettled conditions of the markets locally it is almost impossible to quote accurate prices, as nearly all who have stocks have procured them under unusual con-

ditions, and sheets, galvanized, 10 oz., for instance, are quoted anywhere from $9.25 to $10 per 100 lbs.

The following are the prices:

**BLACK SHEETS—**

| | | |
|---|---|---|
| 14 gauge | 6 30 | 6 50 |
| 16 gauge | 6 65 | 6 95 |
| 18-20 gauge | 6 30 | 6 85 |
| 22-24 gauge | 7 25 | 6 90 |
| 26 gauge | 7 35 | 6 95 |
| 28 gauge | 7 50 | 7 05 |
| 3-16 inch plate | 5 95 | 5 55 |
| ¼-inch boiler plate | 5 45 | 6 10 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

**GALVANIZED SHEETS—**

| | Premier | | Apollo | |
|---|---|---|---|---|
| 10¾ oz. | $9 20 | $9 80 | $9 25 | $9 55 |
| U.S. 28 | 8 60 | 10 20 | 8 85 | 8 85 |
| U.S. 26 | 8 20 | 8 80 | 8 55 | 8 50 |
| 22 nad 24 | 8 00 | 8 20 | 8 40 | 7 30 |
| 18 and 20 | 7 80 | 8 00 | 8 25 | 8 10 |
| 16 | 7 55 | 7 80 | 8 10 | 7 90 |
| 12 and 14 | 7 35 | 7 55 | 7 95 | 7 65 |

An extra is now charged on galvanized sheets. 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Ingot Metals Continue Firm*

**Toronto.**

INGOT METALS.—The general price tendencies throughout all the list of ingots this week is a firm one. Indications point to a very good year for 1920 and many are preparing to handle the largest trade in their history.

TIN has advanced 3 cents per pound and the demand is said to be very good. The new quotation is 63 cents per pounds.

COPPER remains unchanged, and a fair demand is reported. There has been several recent advances in the primary markets, but these have as yet not made any effect on the local price which is quoted at 24 cents per pound.

LEAD continues to advance in foreign markets, although the local market shows no change. The present price is firm and is quoted at 9 cents per pound.

SPELTER has again recovered its weakness, and is now quoted from a firm basis, showing ¼ cent per pound advance over former prices. The new quotation is 11 cents per pound.

ANTIMONY is in better demand locally and is quoting at a firm price of 12 cents per pound.

ALUMINUM remains quiet with litt'e business offering. The quotation is 34 cents per pound.

# LONDON MARKETS

LONDON, Ont., Dec. 24—Advances continue to feature the markets again this week and higher quotations include a jump of sixty cents per hundred pounds in cut nails, new figures on safety hasps, sash hangers, wrought staples, wrought hooks, hasp hooks and staples, japanned shelf brackets, hinge hasps, shoe tacks in dozens, channel nails, hob and Hungarian nails, pipe fittings, cotton wrapping twine and wire nails.

The only reduction is shown in turpentine which is down ten cents per Imperial gallon.

Shortage of goods continues to be one of the annoying features of business all through the district. However, merchants have had an unusually fine Christmas trade and are looking forward to a continuance of good business in 1920.

## *Sixty-Cent Advance Made in Cut Nails*

**London, Ont.**

CUT NAILS.—An advance of sixty cents per hundred pounds has been made in cut nails and the new quotation is $5.60 base f.o.b. London.

## *Wire Nails Are Up 25 Cents Per 100 lbs.*

**London, Ont.**

WIRE NAILS.—New and higher quotations are in effect on wire nails, the new base price being $5.20, London. This is an advance of 25 cents per hundred pounds.

## *Higher Quotations on Safety Hasps*

**London, Ont.**

SAFETY HASPS. — An advance is shown in the prices of safety hasps, the new quotations being No. 815 x 3 ins., $1.50 per dozen; 4½ ins., $1.70 per dozen; 6 ins., $2.50 per dozen.

## *Sash Hangers and Fasteners Higher*

**London, Ont.**

SASH HANGERS, FASTENERS. — New and higher prices have been named on sash hangers, the quotations now being No. 1717, $1.65 per dozen. Sash fasteners are also higher, the quotations being No. 1719, $2.20 per dozen.

## *Wrought Staples, Hooks and Hasps Are Higher*

**London, Ont.**

WROUGHT HOOKS, HASPS, STAPLES.—Higher prices have gone into effect on all these lines. Quotations are as follows:

WROUGHT STAPLES—No. 155 x 1¼ in., 60c per gross; 1½ in., 63c; 2 in., 85c; 2¼ in., $1; 2½ in., $1.20; 3 in., $1.60; 3½ in., $1.85; 4 in., $2.65.

Wrought Hooks and Staples.—¼ in x 4 in., $6.25 per gross; 5 in., $6.65; 5-16 in. x 5 in., $8.20; 6 in., $10.20.

Hasps, Hooks and Staples. No. 30 x 6 in., 70c per dozen; 7 in., 80c; 8 in., 90c; No. 35 x 8 in., $1.65; 9 in., $1.85.

## *Shelf Brackets and Hinge Hasps Advance*

**London, Ont.**

JAPANNED SHELF BRACKETS, HINGE HASPS.—New quotations which show an advance have gone into effect on these lines. Prices now are:

Japanned Shelf Brockets.—No. 140 x 3 in. x 4 in., $1.10 per dozen pair; 4 in x 5 in., $1.45; 5 in. x 7 in., $2.25; 6 in. x 8 in., $2.70; 7 in. x 9 in., $3.25; 8 in. x 10 in., $3.80; 10 in. x 12 in., $5.40; 12 in. x 14 in., $8; 16 in. x 18 in., $18.

Hinge Hasps.—3 in., $2.20 per dozen pair; 4½ in., $2.4; 6 in., $2.70.

## *Higher Quotations Named on Shoe Tacks*

**London, Ont.**

SHOE TACKS.—Shoe tacks in dozens have been revised upwards, the new quotations being:

Shoe Tacks.—½ oz. to 1½ oz., 41c per dozen packages; 2 oz., 49c; 2½ oz., 55c; 3 oz., 63c; 3½ oz., 71c; 4 oz., 79c; 5 oz., 94; 6 oz., $1.08.

## *Channel Nails Are Revised Upwards*

**London, Ont.**

CHANNEL NAILS.—New and higher figures have been named on Channel nails, the quotations being: 3-8, $22.25 per 100 lbs.; 3½-8, $20.25; 4-8, $19.75; 4½-8, $19.25; 5-8, $18.75.

## *White Lead in Oil is Holding Unchanged*

**London, Ont.**

WHITE LEAD IN OIL.—Prices are holding steady, with a fair demand reported. Quotations are as follows: Pure, per ton, $17.45 per 100 lbs.; less tons, $17.80. Elephant, tons, $17.95 per 100 lbs.; less tons, $18.30.

## *Firm Prices Rule For Glass and Putty*

**London, Ont.**

GLASS, PUTTY. — Firm prices for both glass and putty prevail and a fairly active demand is noted. Quotations are as follows:

Glass.—Single diamond 25% off list; double diamond, 25%; cut lights, 10%.

Putty.—Standard, 100-lb. drums, $6.80 per cwt.; 25-lb. drums, $7.05; Pure, 100-lb. drums, $9.30; 25-lb. drums, $9.55.

## *Turpentine is Down Ten Cents Per Gallon*

**London, Ont.**

TURPENTINE.—New and lower quotations, which show a reduction of ten cents per Imperial gallon, are named on turpentine. Prices are as follows:

| TURPENTINE— | Per Imp. gal. |
|---|---|
| 1 barrel lots | 2 60 |
| 2 to 4 barrels | 2 59 |
| 5 gal. lots | 2 75 |

## *Linseed Oil Prices Show No Changes*

**London, Ont.**

LINSEED OIL.—Prices are holding steady and the demand is fair. Quotations are as follows:

| LINSEED OIL— | Raw | Boiled |
|---|---|---|
| 1 to 2 barrels, gal. | 2 67 | 2 70 |
| 3 to 5 barrels, gal. | 2 66 | 2 69 |
| 6 to 9 barrels, gal. | 2 61 | 2 67 |

## *Silver Flatware Scarce; Big Demand Continues*

**London, Ont.**

SILVER FLATWARE. — A decided shortage is noted on silverware and a very heavy demand continues. Many are of the opinion that they could have almost doubled their sales had they been fortunate enough to procure the stock.

## *Skates and Hand Sleighs Showing Good Demand*

**London, Ont.**

SKATES AND HAND SLEIGHS.—An extra heavy demand has been noted for skates and hand sleighs this season. It is hard to say whether it's the ideal skating weather or because the manufacturers are short of raw material and cannot keep up with the demand.

Hand sleighs are selling well, especially through the country where there has been heavier snow falls, and many merchants report the best sales in years.

## *Cotton Wrapping Twine Shows New Higher Prices*

**London, Ont.**

COTTON WRAPPING TWINE.—New and higher prices are noted on wrapping twine. The raw cotton market has been a very firm one and markets generally have been noted to advance. This has reflected in the higher prices of the products. The new prices are: Three-ply, 80 cents per pound; 4-ply, 84 cents per pound.

## *Pipe Fittings Higher; New Prices Herewith*

**London, Ont.**

PIPE FITTINGS are quoted at higher prices which are as follows: Black, Class C, 18c per lb.; Black, Class B, 26c per lb.; Galvanized, C, 26c per lb.; Galvanized, B, 36c per lb. Bushings, 17½% off list; Unions, 35%; Plugs, 12½%; Iron Stop Cocks, 10%.

## *Hungarian Hob Nails Advance 10%*

**London, Ont.**

SHOE FINDINGS.—Shoe tacks, Hungarian nails, and hob nails have advanced 10 per cent. This is not unexpected, as there are great scarcities reported in iron and steel, and nearly all manufacturers have suffered from the previous labor unrest.

The new prices are: 3/8 and shorter, $18.75 per 100 pounds; 3½-8 and longer, $18.25 per 100 pounds.

# WINNIPEG MARKETS

WINNIPEG, Dec. 24—For the past week the markets have shown marked activity in various lines, those affected chiefly being iron and steel products. In all cases, without exception, changes show decided and substantial advance on previous prices and existing conditions point to further advances on many of these lines at no distant date. Little surprise is felt at this general change as labor conditions in connection with the iron and steel trades have for a considerable time been of an unsettled and detrimental character to the interests of adequate production. Little change or relief from this order of things is anticipated, in fact greater difficulty in securing early shipment of goods from the manufacturer is expected as further production has been seriously retarded owing to the great coal strike that has deprived the steel and iron industries of the chief commodity necessary to their business.

It can therefore be clearly seen that no change is to be looked for and the securing of many lines to any appreciable extent will be for some time much more difficult than has heretofore been experienced. The conditions also indicate clearly, further possible substantial advances for the future. The chief lines affected by the week's changes are as follows: Metallic siding, metallic shingles, corrugated iron, galvanized conductor pipes, eavestrough, rifles, revolvers, lead pipe, cotton twine and sash cord.

## *Cotton Sash and Awning Cord Have Advanced*

**Winnipeg.**

SASH AND AWNING CORD shows further substantial advance. Little activity has been noticed in this line for some time, although all changes in the past have shown advance; a general change occurs this week. The prices given are greatly in advance of previous listings. The week's prices are: Sash Cord, white cotton, in hanks, size 3/16 inch, 86c per lb.; 7/32 inch, 85c per lb.; 1/4 inch, 84c per lb.; 4/32 inch, 84c per lb.

White cotton, in coils, size ¼ inch, 84c per lb.; 5/16 inch, 84c per lb.; 3/8 inch, 84c per lb.

Awning cord, white cotton, in hanks, size 1/8 inch, $4 per dozen; 5/32 inch, $15 per dozen.

Drab Cotton, in hanks, size 1/8 inch, $4.50 per dozen; 5/32 inch, $16 per dozen.

## *Cotton Twine Higher; New Prices Being Quoted*

**Winnipeg.**

COTTON TIWNES take an upward trend. As was expected, after last week's changes in ropes, tributary lines of this product have also advanced on a substantial scale on previous prices.

The latest quotations are: Cotton Twine, in cones, 3-ply, 86c per lb.; 4-ply, 90c per lb.; in balls, 3-ply, 90c per lb.; 4-ply, 95c per lb.

## *Lead Pipe and Waste Have Advanced Again*

**Winnipeg.**

LEAD PIPE AND LEAD WASTE PIPE again advance. Further advance has again occurred on these lines of a substantial nature. In the past, this line of goods has been steadily advancing, and further advances are anticipated at no distant date. The new prices are: Lead pipe, 13c per lb.; lead waste pipe, 14c per lb.

## *Colts' Revolvers and Pistols Much Higher*

**Winnipeg.**

COLTS' REVOLVERS AND PISTOLS are reported considerably higher than preceding prices. The market on this line has been quiet with little change for some time; this week's changes, however, show a decided and substantial advance on preceding prices. No further change is anticipated at present, although indications point to further advances for the future.

The new prices ruling are: Colts' revolvers, models 1382B, 1932B, 1838B and 1938B,, each, $37.50. New Service, models 2438B, 2544B and 28455B, each, $42.75. Automatic Pistols, models 2825B, $24.75; 2832B, $30.00; 2838B, $30.00. 2845B, $46.50. Automatic Target Pistols, 22-cal., $45.00.

## *Savage Rifles Higher; Show Marked Advance*

**Winnipeg.**

SAVAGE RIFLES show advance of marked degree. No change of much importance has occurred in this line for some little time. This week, however, shows a somewhat heavy advance on certain models, with little expectation of any change from this order. The new prices are: Savage Rifles, model 1914, $32.40 each; 22 h.p., $63.00 each; 250-3000, $68.40 each. Model 1899, regular solid frame, $55.80 each; regular takedown, $61.20 each; Featherweight takedown, $63.00 each

## *Galvanized Eavetrough, Conductor Pipe; Higher*

**Winnipeg.**

GALVANIZED CONDUCTOR PIPES AND EAVETROUGHS show marked advance on preceding prices. After a fairly long period of inactivity, these lines again show further advance of a substantial nature. It is not expected, however, that the new prices will rule

for any long period as further advances are expected.

The prices ruling are: Conductor Pipes, galvanized, 2 inch, $7.56 100 feet; 3 inch, $9.14 100 feet; 4 inch, $12.06 100 feet; 5 inch, $16.38 100 feet. Eavetroughs, O. G. Square Bead, galvanized, 8 inch, $6.48 100 feet; 10 inch, $7.20 100 feet; 12 inch, $8.46 100 feet; 15 inch, $11.61 100 feet. Half Round Gutter, 8 inch, $6.75 100 feet; 10 inch, $7.56 100 feet; 12 inch, $8.82 100 feet; 15 inch, $12.15 100 feet.

## *Corrugated Iron Higher; New Prices Are Quoted*

**Winnipeg.**

CORRUGATED IRON has shown a further substantial and marked advance. In the past, although the changes were not necessarily of an erratic nature, they have, nevertheless, continued to show strong tendencies for higher prices. This week again shows further advance of somewhat marked degree.

The latest quotations are: Corrugated Iron, galvanized, per 100 sq. feet, 28 gauge, $8.10; 26 gauge, $8.73; painted, 28 gauge, $6.30; 26 gauge, $7.43.

## *Metallic Siding and Shingles Have Advanced*

**Winnipeg.**

METALLIC SIDING AND SHINGLES again take a substantial upward turn. For some time these lines have shown little change, the market being quiet, yet firm. This week, however, shows decided advance on previous prices and present unsettled conditions do not hold much hope of any change for the better.

The prices now ruling are as follows: Metallic Siding, medium, galvanized, $8.33 100 square feet; medium, painted, $6.53 per 100 square feet. Metallic Shingles, medium, galvanized, $9.90 100 square feet; medium, painted, $7.88 100 square feet.

# PITTSBURGH MARKETS

PITTSBURGH, Dec. 25.—The view the average steel producer expresses as to the future of production seems altogether too gloomy. The common talk of the steel producers is of their having small tonnage outputs and of their having constantly to turn away customers because they cannot produce the tonnages the customers desire to place. The last thing any of the producers would even dream of, apparently, is of mills running at capacity, as they always did before the United States entered the war when they had orders enough, and by the way it was not so very often that they did have orders enough. There were spells of the mills being filled up, but frequently they did not last long. For instance, the statement, startling at first glance, is absolutely true that between 1906 and 1916 there was not a solitary calendar year in which during part of the year at least the mills did not run slack for lack of orders. The disinterested observer, in other words the market reporter, confesses to a slight feeling of irritation, not because the mills talk as if operating at capacity were out of the question, but because they seem, if not to enjoy the situation, at least to be contented with it. One would assume that their philosophy is that the less producers can produce the more money they can make. At the same time there is universal complaint and criticism that the average workman is no longer willing to do a full day's work. What is the difference, really, in the mental attitude?

The steel mills and departments that were closed from lack of coal—no large proportion of the total at any time—have made a rapid resumption since the coal strike was ended. The Indianapolis settlement was Wednesday, December 10, and on the following Monday there were many resumptions. There was, moreover, a large number of openings of mills in the Wheeling district, mills that had been closed since the beginning of the iron and steel strike September 22. In this category, for instance, are the two pipe mills in Wheeling, of the Wheeling Steel & Iron Company and the Steel Corporation, also the La Belle and Laughlin tinplate works of the Steel Corporation. The resumptions were not in full, of course, but full operation ought not to be long delayed. By this date all the capacity that was thrown idle by coal shortage is in operation again. The resumption came quickly because many of the mills did not have to wait on freshly mined coal, after the settlement of the labor difficulty, there being large quantities of coal on track held by the railroads under instructions of the Fuel Administration and when it was seen that coal mining at the union mines was to be resumed at once the coal available was released. Much of this coal was at destination, as originally consigned, and merely had to be released. Some estimates are that of all the coal held by the railroads on November 1, consigned to consumers, about one-third remained on December 10, the date of the settlement.

### Steel Scarce

The scarcity of steel grows from week to week, despite the fact that production has been increasing since October 1, or since just after the beginning of the strike. This is due, of course, to the exhaustion of stocks, and perhaps it is due in part also to fears of consumers that they will be short of steel in the early months of next year. There are no early deliveries, and practically no first quarter deliveries, except at premiums above the March 21 prices, the prices the Steel Corporation is rigidly adhering to, with a little company on the part of some of the large independents. Sellers at March 21 prices are dealing only with regular customers, not taking any orders from outsiders, and even at that they can only rarely promise any deliveries to begin as early as March.

The scarcest products are special grades of sheets, practically all pickled sheets, hot and cold rolled strips steel, wire nails, various descriptions of special wire including spring wire, and line pipe. There are no descriptions that are really plentiful. The situation as to scarcity is brought out by the fact that even in plates, expected to be a drug on the market on account of the great increase in capacity during the war, premiums are now the rule. A month or six weeks ago plates on attractive orders could be had at 2.50c, Pittsburgh, the March 21 price being 2.65c, but in the past ten days plates in larger than thousand ton lots have sold at 2.75c, and small lots might easily command still more. While very little car buying has been reported, the car shops are buying in a fair way, partly for repair work and partly against export orders for cars. In the circumstances, if plates are scarce no finished steel product can be plentiful.

Steel business in general has tapered off somewhat in the past few days and the usual holiday dullness will doubtless obtain until the fore part of January. Whether the excited market conditions of the past few weeks will promptly reassert themselves, however, is a question. There are some elements in the general business situation that are not favorable, but seem to have received attention by only a few in the trade. The impression that the market is altogether one-sided and will easily take care of itself, has been, perhaps, too universal.

### Pig Iron Advances

If the pig iron advance is over, it has stopped only now, for there have been advances to date. On fair-sized sales for extended delivery Bessemer has brought $36, valley, an advance of $1 over last quotations, while basic similarly has brought $35, valley, an advance of $2 over last quotations. Foundry iron remains at $38, valley, for prompt and first quarter, but there is a new development in that for second quarter alone foundry iron has brought $38, having previously sold, if at all for that delivery alone, at somewhat less. The pig iron advance now averages fully $11 a ton from the beginning of June, this $11 amounting to slightly over 40 per cent. on the basis of f.o.b. furnace prices,, and slightly under 40 per cent. on the basis of delivered prices.

Coke is still very scarce. By-product coke production began increasing immediately after the coal mining settlement, but is only now at approximately normal. Week before last beehive oven production was subject to restrictions and the Connellsville and Lower Connellsville region produced 27 per cent. less than in the preceding week. Last week the ovens were entirely free of Fuel Administration restriction, but after Monday car supplies were restricted by reason of the heavy movement of coal and there was little if any increase in production.

# Painting Never so Essential as Now

## It is Far Cheaper for Property Owners to Preserve the Buildings They Have Than to Make Repairs—Lumber Prices Highest in History of the Dominion—1920 Offers Unusual Opportunities

TWO features stand out with unusual prominence for the merchant who is selling paints and varnishes in connection with the 1920 trade. One is the acute demand all over the country for more housing accommodation. The other is the high cost of materials, especially lumber. Around both of these unusual opportunities for selling more paints centre.

The men who are going to build new homes and there are thousands of them, should be carefully checked, as every one of them will be a prospect for materials of one kind or another.

In the other class are the thousands of people who have not only residences, but factories, farm buildings or other structures. It will amaze the average merchant if he goes into the situation carefully to find out just how many of these places are out of repair, especially from a paint standpoint.

### Have Put It Off

The owners either because help was scarce, or they were busy, or because they thought prices of paints too high, or for some other reason have put off work that should have been done. Apparently they have not always realized the truth of a proverb that is current among the people of Holland, the most thrifty people in the world, that "Painting Costs Nothing."

Now with lumber at the price it is, these people are beginning to have it forced upon them that painting means saving money. If they can prevent the buildings they already have from deteriorating they are not going to have to make repairs and, therefore, they are going to save real money and applying paint is one of the most economical methods ever discovered for preserving wood and other materials.

### Education Needed

While these facts are being forced home every day to property owners, the hardware merchant can do good work along educational lines in this connection by snappy advertising.

If you find a customer showing any inclination towards painting, yet who seems inclined to delay the matter for superficial and trivial reasons, ask him to examine his buildings closely.

Many property owners look over their property and say: "Oh, I guess it looks good enough, I'll let it go for a while." When he takes this attitude, you lose money in paint sales and he loses money in depreciation.

### Make Close Examination

A careless examination will fail to show the little beginnings of rot and decay. He cannot see the many little places where moisture creeps in and loss starts.

Advertise to your customers the necessity of examining their buildings closely. The closer they can get their noses to the surface, the more they will see the need for care, for repairs, and for paint.

Tell them to rub their hands over the surface to feel the condition of the wood. Get them to examine the property in this way at least once a year, better still twice a year or still better, every four months.

The general condition of his property may look good to a man who sits inside and talks about the price of coal or the high cost of living. But to reveal the high cost of doing without paint let him get right up against it with his fingers and his eyes.

When paint is applied for appearance a man can stand off and be pretty well satisfied with his home, but when it is used for protection then he must get as close as possible in his examination to find the tiny weak spots where the insidious, constantly working, destroying forces of nature get in their fine work.

### How Soon May—Not How Soon Must

Close examination of property will soon get a man into the habit, of asking himself, "How soon **may** I paint?" instead of the stand off question of "How soon **must** I paint?"

Keeping constant scrutiny on his buildings will get a man painting his property a long time before the fellow that paints because he feels he must, purely from the decorative standpoint.

### Get After These

Get after the chap who has not acquired the painting habit. Also the fellow who doesn't paint for preservation and protection. And the fellow, too, who only paints for shame's sake to keep up appearances in the community.

Encourage these people to examine their buildings and tell them why they should examine them.

By anticipating the ravages of moisture in property and preventing its inroads with a timely coat of paint, a man will be money in pocket. No better example of saving at the bung and losing at the spigot can be furnished than the man who argues that he saves money by not painting.

### PAINTING NEVER SO ESSENTIAL AS NOW

(Continued from page 68)

A great many property owners realize this and paint regularly. The paint dealer can forget these people. They come to him anyway. It's the fellow who doesn't realize it that the merchant is concerned about, and with whom the chances for increased sales lies. He is the fellow that is responsible for the tremendous losses that are taking place on property every year as well as the fact that the paint business of every paint dealer in the country is by no means what it ought to be.

**Follow These Up**

It should be one of the settled policies of the hardware merchant who deals in paint to see that all these building prospects are followed closely with a view to securing the paint trade. Any building operations that he can in any way be instrumental in getting under way open up prospective paint buyers which he should follow up. When the building permits are issued or permits to renovate are granted it is good policy to canvass those prospects with advertising material or with a personal call.

When there are any sign of building activity that should be a clue to paint trade. It often does not pay to wait until the paint trade comes of its own accord. The other fellow may slip around and get it in the meantime. The year 1920 should be a painting year, primarily because it is necessary to preserve existing buildings and secondly because new dwellings are urgently required in many sections.

## DuPonts Cited By Trade Commission

WASHINGTON. — Upon application for the issuance of complaint, the Federal Trade Commission cited E. I. DuPont De Nemours & Company, Wilmington, Delaware, a corporation engaged in the business of producing and selling various explosives, including blasting powder, in a formal complaint alleging the use of unfair methods of competition and the use of "tying contracts."

The complaint alleges that the respondents have forty days in which to file answer after which the case will be tried on its merits before final settlement.

The complaint alleges that the respondents in the course of their business contracted with various producers of bituminous coal in the Springfield, Ill., district for the sale of blasting powder for a period of five years at a price fixed upon on condition that the coal producers would not use powder manufactured by any competitor of the respondent company but would purchase their entire requirements for the period of five years from the respondent; that the effect of this agreement has been to exclude competitors of the respondent from participation in the sale of powders to said coal producers and has substantially lessened competition in this district to the extent that the respondent has acquired a virtual monopoly in the sale of blasting powder.

# The Brush Department

## Opportunities for Hardware Merchants in Selling Bath Brushes, Shaving Brushes and Mirrors

### These Goods Go Well Together and Will Make a Fine Display Both in Store and Window—How Some Merchants Go After Business

BATH brushes, shaving brushes, hair brushes, nail scrubs, mirrors. These are all goods which offer splendid opportunities for the hardware merchant and many hardware merchants are pushing sales with most satisfactory results.

Concentrating on women's trade is now a feature of the policy of many stores and the lines mentioned have a strong sales "pull" from the feminine viewpoint. They also make a most attractive showing in the store and in window displays.

The druggists have realized the possibilities i these goods and feature them constantly, and there is no reason why the hardware merchants should not cash in on the prfits to be made.

**Chance For Salesmanship**

There are splendid chances for salesmanship in presenting these articles. A good plan is to show the higher-priced goods.

"We always show the higher-priced lines first," said one hardware dealer. "If people want something cheaper, we have it, but we find that once they see the higher-priced goods, they seldom buy the other. We find that women are especially interested in a fine showing of brushes. It brings them to the store and they talk about our display. The men are equally interested. We make a point of keeping goods together that are required. For instance, in displaying razors, strops, etc., we always include shaving brushes and soaps. Our plan is to sell the man everything he needs for shaving, and we find that it works well."

**Obtained Results**

One hardware merchant who put in $100 worth of hair brushes, mirrors, bath brushes and similar lines during the holiday season did so well that from now on he will keep a silent salesman of them in a prominent place in his store. He says he found it easy to interest Christmas shoppers in them. In addition to his store display, he sent out circulars, telling people about the goods he had in stock. This brought many of them in and quite a few articles were selected and held for Christmas presents. This dealer is enlarging his stock and laying plans for developing this department as an all-year-round one.

### GLASS WASHBOARDS ARE VERY SCARCE

HARDWARE AND METAL is informed that there is, at present a great difficulty in obtaining glass washboards. This is due, it is pointed out, to the difficulty of getting glass. Jobbers are unable, in some instances, to obtain required stock to fill immediate orders, and it would seem that the promise of early improvement in the situation is remote. Manufacturers are not making any promises of delivery, and in one instance coming to the attention of HARDWARE AND METAL, a manufacturer is said to have paid, in advance, for several carloads of material, and without definite assurance of when delivery to his plant would be made. There seems to be a great shortage of glass all around, as the same condition materially applies to window glass.

### A NEW FLAT WALL PAINT

The Beaverboard Companies, Buffalo, N.Y., are putting on the market a flat wall tone to be known as Beavertone. This will be marketed through dealers handling beaver board.

Stauffer Dobbie, Limited, capital $1,000,000, has been formed at Galt, Ont., to take over as a going concern, the Galt Robe Company, and manufacture hammocks, robes, etc.

# How to Make Paint Brush Sales

Suggest to your customers that now, while they have their fires going, is an ideal time for interior painting.

Those dirty window frames, wainscotings, floors, mouldings, etc., can be freshened by a coat of paint and made to greatly brighten the appearance of their rooms.

If they paint now—there are no flies to stick, nor dust to collect on the fresh paint surfaces and the consistent heat from furnace or stove dries the paint quickly.

Recommend painting now! And recommend

# Shortage of Plate Glass is the Most Acute in the History of the Trade

## "I Can See No Relief in Sight For a Year at Least," Says A. G. Hays, in Discussing the Situation—Prices Now and Four Years Ago

ANOTHER advance in insurance rates in plate glass, which has just been put into effect affords a striking illustration of the manner in which commodity prices have advanced.

"In 1915, we could buy our supplies of plate glass at approximately fifteen cents per square foot," said A. G. Hayes, sales manager of the Consolidated Plate Glass Co. of Canada, Limited, Toronto, in discussing the situation with HARDWARE AND METAL. "To-day we cannot get the glass, but a nominal price on the same goods would be seventy cents per square foot."

### An Acute Shortage

"There is an acute shortage," continued Mr. Hays, "perhaps the most acute the trade has ever experienced. I can see no relief in sight for at least a year. Demands have enormously increased and production has diminished."

Early in the war plate glass prices began to rise as a result of a number of causes. One of these was the shutting off of the supply from Belgium and northern France. Others were local, such as the general rise in wages, difficulty in securing transportation and the like. It was when the United States entered the war, however, that various factors became more active in causing prices to advance.

### Where It Started

The workmen in the quarries from which glass sand is obtained were low-paid, and they began to quit and go into munitions factories or other war work. To hold their help the producers of sand had to advance wages so that a car of glass sand now costs the glass factories nearly or quite five times as much as it did at the beginning of the war. Other materials going into the manufacture of plate glass also rose in price. When the railroads became congested in the carrying of food, fuel and war supplies it became increasingly difficult to ship plate glass, and in some parts of the country where large supplies had not been accumulated a scarcity, especially in large plates, arose and prices naturally went up.

### Reduced Output

In 1918, when all energy was being devoted to war work, the plate glass manufacturers reduced their output about one-half. This resulted in a reduction of their organizations of trained workmen, and when, of late, they sought to increase production they could not build up trained organizations at once. One result has been the turning out of much imperfect glass by men who were wanting in skill. This had to be cut into small plates to get rid of the imperfections, and a big plate of glass, like a big diamond, loses much of its value if it has to be cut into small pieces. This has entailed a heavy loss on factories and has caused prices to advance.

### Unusual Demand

With the supply on hand below the normal and with the manufacturers unable to turn out glass up to pre-war capacity, there has suddenly come an unusual demand for plate glass. The feverish activity in the manufacture of pleasure automobiles has created a great demand for glass for windshields and for sides of closed cars. Prices of glass are said to be higher in Detroit now than in any other large city. In some parts of the country there has been great building activity. A large amount of new glass has been used to replace plates which were only slightly cracked and had been allowed to stand in that condition for some time. Dealers have taken full advantage of the conditions and advanced prices also. The wages of glaziers have been greatly increased. Country dealers, with limited facilities for setting large plates, have increased their charges greatly on the ground that they would suffer severe losses if they broke glass in setting. All these things are factors in producing the present conditions.

# German Competition Still a Big Factor

LONDON, ENGLAND.—That the Allies did well in appointing a commission to keep a close watch on all German exports is shown by what is happening in Switzerland. Germany's ability to compete with production in other countries is in a dispatch indicated from Consul Stewart at Berne, Switzerland.

He says that the general level of prices on goods offered for sale in Switzerland by German manufacturers is less than 50 per cent. below Swiss prices. The variance is so great that business men are discussing the policy of closing the frontiers of Switzerland against German goods that are sent in to be sold at such extreme competitive prices.

The low value of the mark is not considered a complete reason for the difference in prices between German and Swiss products. It is said Germany delivers paper to Switzerland at 20 francs a pound; local paper costs from 59 to 70 francs a pound; it ships chairs at 13 francs each, whereas Swiss chairs cost 40 francs; it sells a set of bedroom furniture for 450 francs, whereas a Swiss set costs 1,600 francs. Should Germany double or treble its prices it would still be able to sell merchandise at prices the Swiss manufacturers cannot meet. It is feared the average industry will suffer particularly. Representatives of the furniture industry, which employs 30,000 workmen, speak of the danger which faces that industry. Representatives of the paper, bicycle, automobile, baby carriages, brewing and other industries make the same compliant.

# "Bob" Cotton Leaves Brandram-Henderson, Ltd.

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, Dec. 24.—A slight advance of price has been made for linseed oil, and there has been no improvement in the supply. Whether seed will arrive from the Argentine soon is impossible to say. Some English oil has been received, and this has been readily picked up by the manufacturers, who now need larger stocks of oil for winter paint making. Turpentine is still very firm, and there is difficulty in getting requisite amounts for manufacturing. Putty and white lead in oil are firm, and there has been heavy spot selling of the former and extensive bookings for the latter.

Glass advanced this week, the discount on box glass being decreased to 15 per cent. Plate glass is now net list. Varnishes are firming under the heavy costs for gums and china wood oil. Prepared paints are also very firm. There is some talk of an advance in the near future for flat wall paints. Shellacs are firm.

### *Some English Oil To Hand; Slight Advances*

**Montreal.**

LINSEED OIL.—Were it not for the fact that English oil—to some extent—is now available, prices would rule higher for oil crushed here, it is stated. As it is $2.50 per gallon is the low basis for raw, in single barrels, and manufacturers' needs are particularly heavy owing to an influx of orders from the trade for mixed paint, to be shipped at future dates. Argentine seed is said to be moving this way, but when it will arrive no one can say. The undertone is therefore quite as firm as it has been right along, and no reduction of price is probable in the Montreal market.

| | Imp. Gal. | |
|---|---|---|
| Raw— | | |
| Single barrels | 2 50 | 2 55 |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |
| Boiled— | | |
| Single barrels | 2 52½ | 2 57½ |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |

NOTE.—Owing to fluctuations seed markets jobbers, generally, are not quoting.

### *Turpentine in South Declined Moderately*

**Montreal.**

TURPENTINE.—In the Southern producing centres a decline of about three cents was made during the week, but there has been no improvement in supply and local stocks are small. Prices remain steady at the quotations given last week. The same difficulty which has been experienced in obtaining stocks for many weeks still is manifest. Trade needs are light, but manufacturing requirements are seasonably heavy. Rosin supplies are not easily obtained, and the markets are quite firm. Some of the selling grades are particularly hard to obtain.

| | Imp. Gal. | |
|---|---|---|
| Turpentine— | | |
| Single barrels | 2 35 | 2 40 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Putty Basis Steady; Very Heavy Demands*

**Montreal.**

PUTTY.—Heavier sales of putty than ever before in the history of the trade are reported from trade circles. This has greatly taxed the supplies of raw material, both whiting and oil being scarce. However, shortage has not been severe, and the trade are getting ample stocks. The basis is steadily firm without change.

| | 5 ton | 1 ton | Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 6 30 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do., 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 8 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 10 20 |
| Do., in 100 lb. cases | 7 15 | 7 40 | 7 75 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

### *Strength is Noted On White Lead in Oil*

**Montreal.**

WHITE LEAD IN OIL.—While there has been no advance in the price of white lead in oil, the steady advances in the price of pig lead suggest that there will be no lowering of the basis. Bookings have continued heavy, but present business is reduced to a smaller compass. The hundredweight price for standard grades is as follows: Five-ton lots, $16.50; ton lots, $17, and smaller lots than tons, $17.35.

### *Glass Prices Advance; Stock is Very Scarce*

**Montreal.**

GLASS.—Advances are in effect for glass, both sheet and plate. The market, as pointed out in last week's HARDWARE AND METAL, has been ruling very strong for a long time, and the increases, while not actually foreseen owing to the probability of Belgian glass arriving in increased quantities, have been made, in part, because these arrivals have not brought enough glass to relieve the stringency. As a matter of fact some have no 21-ounce glass in big sizes, in some cases not above 22 inches in width. The discount has been changed from 20 per cent. to 15 per cent. on sheet and plate to net list. Higher prices may soon be effective again if the stringency be not relieved, and all producers are finding labor and raw material costs higher than ever before.

### *Paints and Varnishes Promise to Rule High*

**Montreal.**

PAINTS, VARNISHES. — Heavier business on booked orders for prepared paints is reported as for the past two or three months than for any comparative period in the history of the trade. In fact this has taxed the various plants in some instances to the very limit. Some are even seeking increased warehouse space to accommodate the made-up stock until shipping dates arrive. The market is very strong, labor and raw material costs being high on all products. Varnishes are, if anything, firmer than ever before. The cost of gums is still ruling high, and these are not easily secured. China wood oil is very firm. Some even look for an advance on these goods in the very near future.

## TORONTO

TORONTO, Dec. 24. — Paint and paint commodities are all rather quiet this week owing to the Christmas holidays, etc. Many firms are taking advantage of this to take stock and do their general yearly housecleaning. The prices on nearly all paint commodities are holding at a firm price and no lower prices are at present looked for.

Linseed oil prices are being firmly maintained. Flaxseed continues to show marked advances on the primary market, but it would be hard to state if any further advances will be made in oil, which is already quoted at a very high price.

Turpentine is holding at last week's prices although it is stated Southern markets have been showing almost daily advances of about 1 cent per gallon. It has been stated that a heavy flood has occurred near one of the main shipping points anr railroads are said to be refusing shipments.

Rosin is holding firm at present prices and receipts are said to be very heavy.

Putty is unchanged and a very large business has been noted. The present

# *A New Year Resolution!*

The successful hardware man, when he reviews his past year's business, can look back with satisfaction to the increase in his business since he nailed up the B-H sign outside his shop.

B-H products are quality products and while quality is undoubtedly the reason the B-H Agency is so profitable, it would be hard going to win out against the more aggressive advertising of competing brands. But even this possibility is eliminated for the B-H proposition is an example of "good products" and "good advertising" going hand in hand.

The B-H Proposition far outshadows all others in the Paint Business and means an almost unlimited scope for the furtherance of hardware merchandising.

**Let your New Year's Resolution be "B-H" for 1920**

***Write to-day for particulars of the B-H Agency--it will pay you.***

"Save the surface and you save all" *Paint & Varnish*

**BRANDRAM-HENDERSON** LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

price is a firm one although no immediate change is expected.

Glass has advanced 5 per cent. This is said to be directly the result of the high rate of exchange.

## *Window Glass Has Advanced 5%*

**Toronto.**

WINDOW GLASS has advanced 5 per cent. This is said to be directly due to the high rate of U.S. exchange. Glass continues to be a very scarce article, both plate and sheet. The manufacturers state there will be no immediate relief. The money market has as yet not been adjusted and it is not generally known just how the European situation will pan out. The Belgian manufacturers, it is stated, have had to raise their laborers' wages 20 to 30 per cent. There are small quantities coming to Canada from Belgium, but the volume is not large enough, it is said, to materially affect the present market.

## *Ready Prepared Paints Firm; Booking Continues*

**Toronto.**

READY PREPARED PAINT.—The remaining few days of 1919 will bring to a close one of the most prosperous years reported in the paint line for some time. The prospects for business are said to be even more favorable during the coming year. No cheaper prices are expected, and some are of the opinion that if any changes are made they will be of an upward nature. The present volume of business, it is stated, is large for the season of the year, and booked orders are coming in with confidence, it is stated.

## *Turpentine Firm; Remains Unchanged*

**Toronto.**

TURPENTINE is holding firm at last week's prices, although, it is stated, Southern markets have been showing almost daily advances of about 1 cent. per gallon. It was expected that turpentine would show weaker tendencies, and this may be the case later on. It has been reported that a heavy flood has occurred near one of the main shipping points, and this may affect the local markets owing to railroads refusing to accept shipments, which generally come through this source. The following are the present quotations:

| | Per Imp. gal. |
|---|---|
| 1 barrel lots | 2 55 |
| 2 to 4 barrel lots | 2 54 |
| 5 gal. lots | 2 70 |

## *Putty Sales Heavy; Prices Remain Unchanged*

**Toronto.**

PUTTY.—The prices on putty are being maintained at a firm price. No immediate change is at present looked for. The sales of this commodity has been excellent and a good demand is still reported for this season of the year.

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels | 7 10 | 7 35 | 7 70 |

## *Linseed Oil Firm; No Change in Price Noted*

**Toronto.**

LINSEED OIL.—Prices are being firmly maintained. Flaxseed, although of a fluctuating nature, continues to show marked advances on the primary market. It is hard to state if any further immediate advance will be made in linseed oil, which is already quoted at very high prices. The following are the present quotations:

| Linseed Oil— | Raw | |
|---|---|---|
| 1 to 2 barrels, gal. | 2 70 | 2 80 |
| 3 to 5 barrels, gal. | 2 69 | .... |
| 10 barrels and over | 2 67 | .... |
| | Boiled | |
| 1 to 2 barrels, gal. | 2 73 | 2 83 |
| 3 to 5 barrels, gal. | 2 72 | .... |
| 10 barrels and over | 2 70 | .... |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

# MacLean Publishing Company Has Christmas Tree for Children

## Col. John B. Maclean, President of the Company, Gives a Christmas Treat to All Children of the Organization

ON the Saturday afternoon before Christmas, the offices of the MacLean Publishing Company on University Avenue, Toronto, were given over to the children of the organization and their parents. The idea of the Christmas entertainment originated with Col. Maclean himself, and neither time, effort, nor money were spared in seeing that everything was arranged to give the children the time of their young lives.

Something in the neighborhood of 200 children were present of all sizes, from babies in arms to grown boys and girls, and they, with their parents, made a gathering that filled the main office that had been cleared for the occasion and flowed over into the new building in the rear.

In the centre of the main floor was a great Christmas tree loaded with gifts, for every child there was a present, books and watches and flashlights and toys generally were there in profusion, with a Santa Claus of magnificent size presiding over the ceremonies, supported by a policeman and a clown. When the last gift had been received, and the last Christmas stocking grasped by eager hands, there was a regular midway to attract the youngsters.

At the front was a magician doing wonderful things with balls and handkerchiefs; further down a Punch and Judy show, the delight of the younger children. A scale for trying their weights, and a booth where ice cream cones were to be had for the asking. In the new building the young ladies of the institution served tea to the mothers and fathers of the children, and here was a mysterious lady who would read your fortune in a cup, while another part of the floor was given over to dancing.

A Highland piper gave the necessary Scottish tone to the gathering. Altogether it was a great affair and everyone had a splendid time.

# "The More Bolshevists Talk the Quicker People Will See Through Their Motives," Says Charles M. Schwab

SUCCESSFUL employment of labor will rest more upon recognition of the rights of collective bargaining and profit-sharing, according to Charles M. Schwab, chairman of the Board of Directors of the Bethlehem Steel Company.

Speaking at the annual dinner of the Pennsylvania Society, of which he is president, Mr. Schwab declared he did not think the world, and especially America, would be overturned by Bolshevism, and that "the more the Bolshevists talk and threaten destruction, the more will people see through all the sophistry preached to them and stand adamant for America continuing to be a land of law, or order and of opportunity."

"We hear a great deal about the labor problem," continued Mr. Schwab. "I am one of those who doesn't believe much in theorizing about labor and capital. I do not believe the world is going to be suddenly changed by any academic solutions of or resolutions about the labor question.

"I believe that the first and prime need of every man engaged in industry is to get and to keep his own house in order and to secure the confidence and the enthusiastic loyalty of his own men.

"It is the duty of the business man to address himself to seeing to it that the largest possible opportunity for employment and work is given to the greatest number of men, and I am myself a firm believer in the fact that the successful employment of labor does now and will in the future more and more rest upon the recognition of the right of the men to deal with their employers collectively and upon the privileges of the men through some kind of profit-sharing to obtain a direct share in the profits realized upon the articles they themselves are making.

# THE WHY PHILOSOPHY OF

## W. G. HARRIS

**President The Canada Metal Company, Limited**

**Did you ever get up against the question WHY?**

**In building up a huge business like ours, time and time again WHY is the great question we get rubbed in.**

**For instance, for years we have been manufacturing BABBITT METALS—SHEET LEAD—LEAD PIPE and SOLDER and guarantee everything we manufacture to be of the highest quality and to give excellent service.**

**WHY can we give this guarantee?**

**The reply is, we have been manufacturing for over 30 years and our factory is the best equipped in the Dominion. We use nothing but the purest of raw materials.**

**The WHY is because of QUALITY and SERVICE.**

**Let us have your enquiries.**

# Jap-a-lac Prestige

Not alone because it was the original "Household Finish," but because true quality has been maintained. From the time the first package was sold, Jap-a-lac has held *first place* in its field.

Through all these years Jap-a-lac has gained prestige. It has found new ways of serving its users and has lengthened its term of usefulness. It is now standard in paint and hardware stores throughout the Dominion.

This prestige is an asset to every Jap-a-lac Dealer. It is "good will" that expresses itself by sure and steady profits in the cash drawer. If you are not now carrying Jap-a-lac let us tell you more about the opportunities it represents.

Remember, too, that the Glidden line has now been completed by the addition of house paint — Glidden Endurance Paint—and that the Glidden proposition is one with which every dealer should be familiar. Write for literature to-day.

**THE GLIDDEN COMPANY, Limited**

## Our Step-Ladder Chairs are Winners

Also Step-ladders, Ironing Boards, Curtain Stretchers, Hercules Wire Stretchers, Reversible Drip Tub-stands, Clothes-bars, Eureka Post Hole Diggers, Malleable Iron Tank or Silo Lugs and Well Points.

Prompt attention given your enquiries.

**Otterville Mfg. Co., Limited**

**OTTERVILLE, ONT.**

# "NORCROSS" Cultivator Hoes

***Have "Built-in" Selling Points***

It is very simple to demonstrate the superiority of NORCROSS Tools. In fact, it's self-evident to skilled gardeners. That's why world famed gardeners use and endorse them.

NORCROSS work close up to plants safely; they come in sizes to suit anyone; the 5-prong size may be easily attached to a wheel plow. Handsome, durable and profitable.

**C. S. Norcross & Sons**
**Bushnell, Ill., U.S.A.**

# The Real Ankle Support That Makes Others Look Like Imitations

Sell Perfection Ankle Supports—the only sure and comfortable ankle support on the market.

Made from the best quality of steel, and is so devised that by means of a hinge and sliding attachment the ankles may bend forward or backward, but simply can not bend sideways.

You'll sell more skates this winter as well as supports if you handle this line.

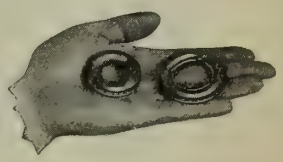
**Write us for prices.**

**Owen Sound Steel Press Works, - Owen Sound, Ont.**

## J. B. MORRISON

Our salesman covering a part of central Ontario for Hardware lines. He sells his trade large numbers of Red Star Washers. Mr. Morrison is a returned soldier, a Captain. He went overseas with the 147th Greys.

# Easy to Sell Red Stars



Red Star Washers sell easily. A lady comes into the store. The beautiful finish of the Red Star attracts her attention. She touches the handle and it moves with a gentle push. She is astonished that it can be operated so easily. She is a prospect at once.

**Red Star Washing Machine**

## Red Star Works Easily

The Red Star runs easily because the mechanism revolves on two sets of ball bearings. Gears are machine cut and spiral in shape. The compact bed plate holds all parts in perfect adjustment so that nothing catches or binds. The large fly wheel accumulates momentum.

**Runs on two sets of Bicycle Ball Bearings**

**Works So Easily**

## Won't You Try It?

Try the Red Star, It's a jim dandy to sell. One merchant recently sold 20 in a town of only 75 people.

*Have you our Catalogue?*

# CARTER'S

**A Display of Carter's Genuine Red Lead will prove two things**

Its Saleability and its Profit Making Qualities.

Painters find Carter's Genuine Dry Red Lead a pure, uniform and economical paint and preservative for metal-work, steam pipes, etc.

Made from the highest grade of Canadian Pig Lead, highly oxidized and ground very fine. Used with pure Linseed Oil it is very easily applied and his unusual Covering Capacity.

Every sale means a satisfied customer, a good profit and a sure "repeat."

We also make Carter's Genuine Dry White Lead, Carter's Genuine Orange Lead and Carter's Litharge.

May we send you prices and particulars?

**The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal**

# Economy Is a Great Sales Force

# SILKSTONE

(REGISTERED TRADE MARK)

## FLAT WALL COLOURS

**The Economic Appeal** is a powerful force in business to-day. Economy for your customer can also mean good profits for you—no salesman needs argument on that. It may mean larger profits on each sale, or more turnovers per year; what you as a business man want is a constant flow of money with a profit in it to your cash register. Silkstone Flat Wall Colours fill this want exactly. Cheaper than wall paper, more sanitary and longer lasting, it can be washed often and never rubs off.

Silkstone gives a beautiful, soft, silky finish. The economy of Silkstone appeals forcibly to all.

**There is something ahead for you; write for our agency proposition.**

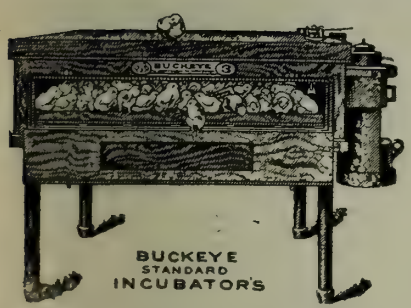
DIAMOND A BRAND — ASHDOWN'S GUARANTEE

*The Trademark of Largest Wholesale* *Behind Canada's Hardware House*

Ashdowns have grown to be the largest Wholesale Hardware Dealers in Canada. There must be a reason.

Early in the history of the West we realized that the Hardware Dealer of the Western provinces had problems to contend with not met with elsewhere.

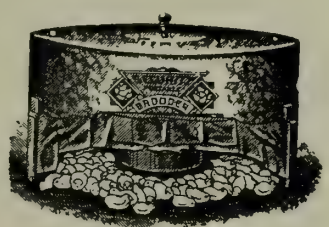
His problems have been ours, too. We know his needs, and with our warehouses situated in **Winnipeg, Saskatoon and Calgary** as to be handy to any Western dealer, we are in a position to-day to render him a very valuable service.



Courteous treatment, quick service and quality in the lines we sell has ever been our aim.

The fact that we are sole distributors for some of the most famous Hardware lines bespeaks something of the confidence manufacturers are putting in us.

Here is one of them—



## Buckeye Incubators and Brooders

Buckeye Incubators are unquestionably the most successful hatching devices that have ever been placed on the market. Each and every machine is sold under an **absolute guarantee** to hatch more chicks than any other incubator manufactured.

Buckeye Incubators made in seven capacities. 65, 120, 175, 200, 250, 350 and 600 eggs.

The Buckeye Incubators and Brooders need no introduction to the trade. They are unquestionably the most dependable and most widely advertised lines on the market. We consider ourselves most fortunate in securing these machines for our trade.

The Buckeye Oil Burning Brooders are simple in construction and the most inexperienced person can operate them with absolutely satisfactory results.

The Buckeye Coal Burning Brooder grows three chicks where one grew before and saves one-half the expense and nine-tenths of the trouble.

There is nothing to know about incubators in order to sell them. We furnish complete operating instructions with each incubator, and guarantee results.

SEND US AN ORDER NOW FOR A SAMPLE TO PUT ON YOUR FLOOR TO ENABLE YOU TO INTRODUCE THE LINE TO YOUR CUSTOMERS FOR THE COMING SPRING'S BUSINESS.

## The J. H. Ashdown Hardware Co., Limited

**Calgary** **Winnipeg** **Saskatoon**

MADE IN CANADA

# BUFFALO OILS

These are a few of our most staple lines, so well and favorably known throughout Western Canada, and are sold only through reliable merchants.

**Special Cylinder Oil for Steam Engines**

**Harness Oil. Neatsfoot Oil**

A Gas Engine Oil (for gasoline engines).

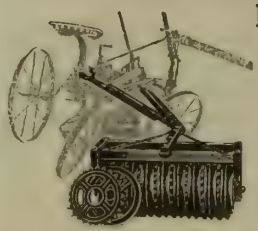
Tractorlene Oil (for oil burning engines).

Ideal Thresher's Machine Oil (for general use.

Automobile Oil and Transmission Greases.

**PRAIRIE CITY OIL COMPANY, LIMITED, WINNIPEG**

## EUREKA Tough and strong as Gauge Glass can be made



There is only one best and that is the "Eureka" manufactured by Joseph Torney & Sons, Birmingham, used with utmost satisfaction by railways and larger plants throughout Canada and United States.
We are Canadian representatives and carry a stock in Winnipeg for sorting orders and shorts. Let us quote you either F.O.B. Winnipeg or Liverpool.

The great shortage of Gauge Glasses makes it to your advantage to place import orders as early as possible.

Hardware and Metal's unique circulation as proven by the A.B.C. audit is due to 31 years of honest effort to give the retail trade the best possible service.

# Brushes Built for Real Service

## Why Not Sell Brushes that Give Real Service?

TRADE SIMMS SET IN RUBBER MARK

**PAINT BRUSHES**

can be used in alcohol, varnish, parafine, crude oil, grease, kalsomine, glue, paste, paint remover—**anything**—and yet retain their usefulness.

**There is nothing known that will cause the bristles to come out.**

The composition used in Simms brushes will stand any kind of usage or misusage—and not a bristle will loosen.

For years your painter customers have been looking for just such a brush.

Stock up and secure their trade and goodwill.

***Our other products are also of the same high quality***

# The Paint Man's Best Friends

BOWSER ESTABLISHED 1885

## Paint Oil Storage Outfits

They prevent evaporation and gumming; leakage and spillage. Keep the oils pure and clean; keep the oil room clean and free from fire hazard.

Measure oils accurately, quickly, without loss and in a clean satisfactory manner.

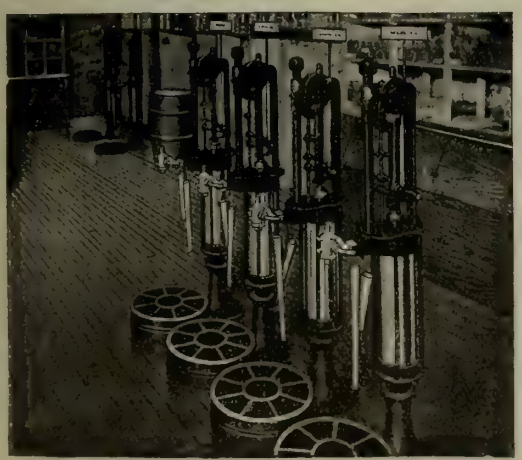

Fig. 115 Pumps on Sales Floor. Tanks anywhere in basement.

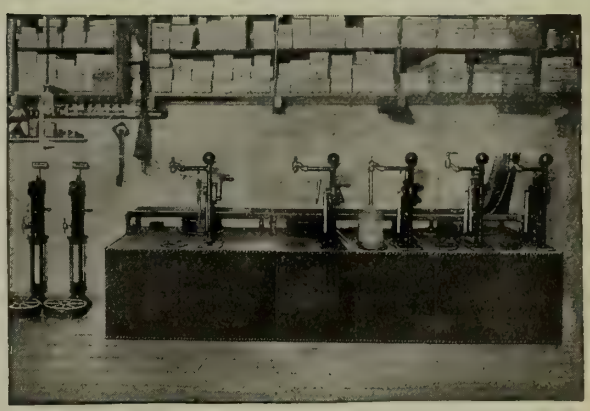

Fig. 109 First Floor Outfits.

May be installed where most convenient: require but little floor space.

BOWSER Storage Is: **Systematic—Clean—Saving Sanitary—Practical—Safe**

It makes the handling of paint oil a pleasure and profit instead of a burden and loss.

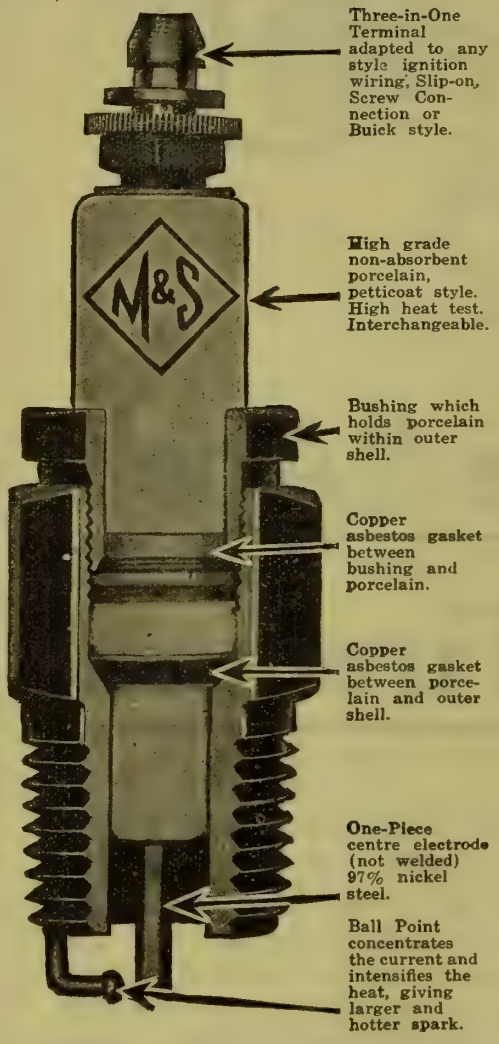
DUNLOP TIRES

SEAL OF QUALITY

CORD

# The "Ace" of Tiredom

Dunlop Cord Tires **come right** to you because they **go right** from us.



The difference in the Dunlop price in comparison with some unknown and unvouched-for tires is a mere incident in comparison with the continuous service you receive from Dunlop Cord Tires—"Traction" or "Ribbed."

While Dunlop Cord Tires naturally become the motorist's property ultimately, they never cease to carry the Dunlop name.

That name which stands for so much that is notably praiseworthy in connection with the whole history of tire-making now means the last letter in "the last word" of tire merit to critical motor owners—it means Pre-War Quality and Price and Post-War Improvements and Satisfaction.

All sizes—30 x 3½ to 37 x 5.

**Dunlop Tire & Rubber Goods Co.**
**Limited**
**Head Office and Factories: Toronto**
**Branches in the Leading Cities**

# Hotter Spark Means More Power in Your Car

The way your car responds with an M. & S. Spark Plug is an eye-opener.

The hotter the spark the quicker response from your engine.

M. & S. Spark Plugs produce a hotter spark.

The heavy ball-point concentrates the current and intensifies the heat.

—Quicker ignition—more complete combustion and better results in general.

And the one-piece center electrode is 97% nickel-steel—which reduces the danger of carbon fouling.

The high grade porcelain has perfect chemical glaze unaffected by heat. High heat test ensures against spark troubles. And mark this—

M. & S. porcelain is *interchangeable.* One porcelain fits all plugs.

No. 500
½" Standard with Three-in-One Terminal

**M. & S. Spark Plug No. 500 is Standard Equipment on Model No. 4 Overland**

The Three-in-one Terminal is adapted to any style ignition wiring. Special Chevrolet model ball terminal. (M. & S. Spark Plug No. 500 is standard equipment on Model 4 Overland).

*M. & S. plugs are Made-in-Canada by Canadian workmen.*

Tip-top quality of both material and workmanship and the most exacting tests warrant our guarantee of complete satisfaction—or free repair or replacement.

*Dealers! Order from your nearest Jobber or write direct for descriptive circular.*

*Made in Canada*

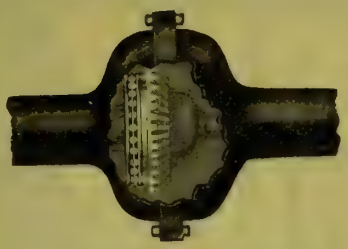
# MALTESE CROSS TIRES

**"The Tires That Give Satisfaction"**

The years may change, but the quality of "The Tires that Give Satisfaction" is unvarying.

Mile after mile, day after day, Gutta Percha Tires are giving performances in excess of expectations. Lasting Success is only possible if you sell the best tires—Maltese Cross Tires.



Start now to secure the tire business of your locality by selling and displaying these "Creators of Good-Will" — Gutta Percha Tires.

Thrust Bearing in Place

Thrust Bearing

Roller Bearing

Roller Bearing in Place

*Made in Canada*

# Chapman Bearings

## *Quick Turnover*
## *Good Profit*
## *Strongly Advertised*

### Chapman Differential Thrust Bearing

Readily substituted for the plain, flat washer in the differential of Ford or Chevrolet. The flat washer wears out due to heavy end thrust. When worn there is lost motion in the gears and incorrect contact of teeth, causing extreme wear and noise.

The Chapman Differential Thrust Bearing exactly replaces the washer with no other changes required.

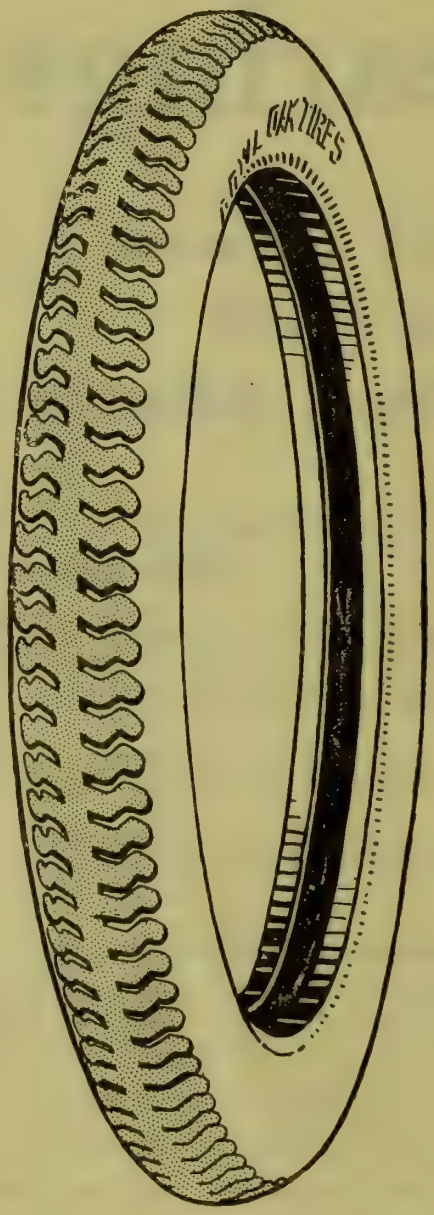
It takes the pressure on steel balls, reducing friction to a minimum and holds the gears in perfect mesh.

### Chapman Roller Bearing

A Ford or Chevrolet car is subject to rapid wear in the cup and cone bearings of the front wheel, because the hub is too small to take a cone bearing with sufficient factor of safety.

Chapman Roller Bearings overcome this difficulty and are easily installed.

Every Ford and Chevrolet is a prospect.



**Get our dealer proposition by a post card to-day.**

# "We never need to repair a Royal Oak Tire"

THAT is what Mr. John Brown, tire and auto accessory dealer, of New Toronto, told a customer of his, a Doctor, who had come to him for a set of Royal Oak Tires.

A friend who overheard the remark told us about it. Much as we were glad to hear it, it was not news to us. Many dealers throughout the country have been telling their customers pretty much the same thing right along.

And when you come to think of it there is little cause for surprise in the fact that a tire which yields a mileage running from 6,000 to 10,000 miles should find its way to the repair shop but rarely. The point is that, barring some serious and untoward accident, when a Royal Oak Tire wears out it wears out all over like a good rubber heel; and when it is ready for repairs it is ready for the discard.

From this you may reasonably infer that Royal Oak Tires do wear out, but the truth is they take their time about it. That is why for the most part you seldom see them hanging around repair shops. They are far too busy putting in good mileage on the road.

# THROW AWAY YOUR OLD TOOLS

## —and Change Your Tire in a Jiffy without

**Pulling and Tugging and Sweating and Swearing.**

**NO MORE**
**Hard Work,**
**Dirty Work,**
**Useless Work.**

*EVERY CAR OWNER WANTS ONE FOR CLINCHER TIRES—WANTS ONE, NEEDS ONE, AND WILL HAVE ONE IF YOU CARRY THEM IN STOCK.*

KING OF ALL CLINCHER TIRE TOOLS.

**The trade is supplied through jobbers in every territory. If for any reason your jobber cannot make prompt shipment, send your order to us, and shipment will be made either through your jobber, or direct if necessary.**

**Marquette Tire Tools take the drudgery out of changing clincher tires. The Marquette is a REAL Tire Tool. It is positive in action, positive in its grip, and will not tear the tire. Use it a few times and you will never think of being without a "Marquette". It is to a tire what a screw-driver is to a screw. Not an accessory, but a NECESSITY. It is the ONE TOOL most needed in an emergency. There are thousands in use—ask any one who has used one and know for yourself of its value.**

From A to Z

VERY little verbal argument is necessary to effect a sale in the case of

**"SPHINX"**

**England's Most Durable Plug**

interest is at once created in the attractive green metal box with the ingenious sealing band permitting the lid to be opened and the identification card to be perused. The sterling merits of the plug enclosed are vouched for by the Guarantee, unequivocal and without time limit, printed plainly on the box.

It is easy to sell Sphinx Plugs—and profitable. I shall be pleased to quote and to send you literature on request.

Sole Agent for Dominion: Wm. T. Evans, 1684 St. Urbain St., Montreal

## Save Your Fenders

### Merchant's Anti-Skid Chain Tightener

Loose chains slap against fenders, marring and bending them and creating an infernal racket. Merchant's prevent this by gripping the chain at 5 points, giving an easy tension all around. Saves Chains. Saves Tires. A wonderful little accessory.

Price per pair, $1.00

Patent Pending.

# Cannon Oilers
**Easy Seller Because—**
It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

The Season's Rush Proves the Necessity of Gipe-Hazard Service in Your Store

Time and labor saved is money earned. Absence of salesmen from their posts when customers are waiting diverts many of the latter to other stores where service is better. With Gipe-Hazard service you will have the satisfaction of knowing that you have the best, and it will enable your staff to remain at their posts instead of running for change. Watch your out-of-date system during the busy season, and you will be convinced.

GIPE-HAZARD STORE SERVICE CO., LTD.

## Its Handiness SELLS IT

The Imperial Folding Steel Auto Chair is built of best steel of oval section, finished in rich black japan; seat and back upholstered in black waterproof art leather.

This comfortable, strong chair is a boon where space is at a premium, folds to less space than any other chair—yet perfectly convenient. Adult size seat 16" high. Children's size, seat 12" high.

**Imperial Bit & Snap COMPANY**
RACINE - WISCONSIN

# Wanted

## HELP WANTED

TWO EXPERIENCED HARDWARE SALESmen. Good wages; steady job. Apply Cochrane Hardware Limited, Sault Ste. Marie, Ont.

WANTED — MALE STENOGRAPHER WHO has had hardware experience, duties to assist in correspondence, keep up price books and assist as secretary to a general manager of a Northern Ontario company. Apply in own handwriting, stating age, past experience and salary required, to Box 636, Hardware and Metal.

WANTED — A BUILDERS' HARDWARE salesman to call on architects and contractors in Toronto. Must be able to interpret plans and specifications. Must be a high-class man and be well recommended. Box 641, Hardware and Metal.

WANTED — FOR EARLY ENGAGEMENT thoroughly experienced hardware man, must be energetic, good appearance and possess executive ability. State age, experience, married or single, and salary. George Taylor Hardware Limited, Cobalt Branch.

## WANTED

WANTED — HARDWARE STOCK ABOUT $10,000 in Ontario town, not less than 5,000 population. Box 650, Hardware and Metal.

## SITUATIONS WANTED

EXPERIENCED HARDWARE MAN OPEN FOR immediate engagement; wholesale or retail. First class references. Box 625, Hardware and Metal.

**HAVE YOU RECEIVED HARDWARE AND METAL STOCK ELECTRO CATALOG YET?**

## HIGH-GRADE HARDWAREMAN

35 years of age. Experience covers 14 years of manufacturing, travelling and retail service. Have specialized in Tools, Builders' Hardware, also Stoves. Have good connection in West. Am trained office executive. Would consider travelling West on salary or commission. Service in France. Box 620, Hardware and Metal.

Use this page—the page which is never overlooked.

Everything is classified under appropriate headings.

Quite often the want ad. page is consulted as a guide to conditions. Anything of interest to the Hardware and Metal trade can be located by an advertisement on this page. HARDWARE AND METAL reaches the best hardware men in the Dominion.

The cost of this service is very small——2 cents per word first insertion, and 1 cent per word for each subsequent insertion of the same advertisement. We have a box system whereby everything is strictly confidential, for which we charge 5 cents per insertion extra.

Kindly enclose remittance with ad. so as to save unnecessary bookkeeping.

Did you ever stop to consider the cost of

**Wood Cold Air Faces**

in comparison with iron ones? Oak faces are stronger, neater, cheaper and make a better finish with any kind of floor and are also cleaner and more sanitary.

Made with oblong mesh. Legs of chairs or other small articles will not drop through. Write for price list and order some samples.

**A. H. Power Furnace Co., 1-3 Hayden St., Toronto**

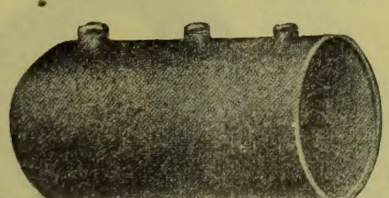
## Cooking Thermometers

When a magazine like "Good Housekeeping" devotes many pages to articles on Thermometer Cooking there must be something in it.

WILDER

Accurate Thermometers for home cooking have been tested and approved by Good Housekeeping Institute and are an inspiration to housekeepers everywhere.

CANDY



BAKING

**THE WILDER-PIKE THERMOMETER CO., Inc.**

**Fulton Street - TROY, N.Y., U.S.A.**

## GASOLINE TANKS

**WELDED, TESTED, HIGH-CLASS TANKS**
**For Underground Storage of Gasoline**

A high quality tank, steel welded throughout, making it practically a one-piece tank. Painted on the outside with anti-rust, acid-proof black paint. They are practically rust and corrosion proof. They are made by expert workmen. Our tanks are built to conform to the requirements of the National Board of Fire Underwriters. They are all tested before leaving our works under air pressure by a competent superintendent and then crated and shipped so they will reach you in good condition. We believe our prices will appeal to you as being very reasonable. If not as represented when it reaches your station, fire it back at our expense. Can we do fairer? Any size made to your order.

# VIKO

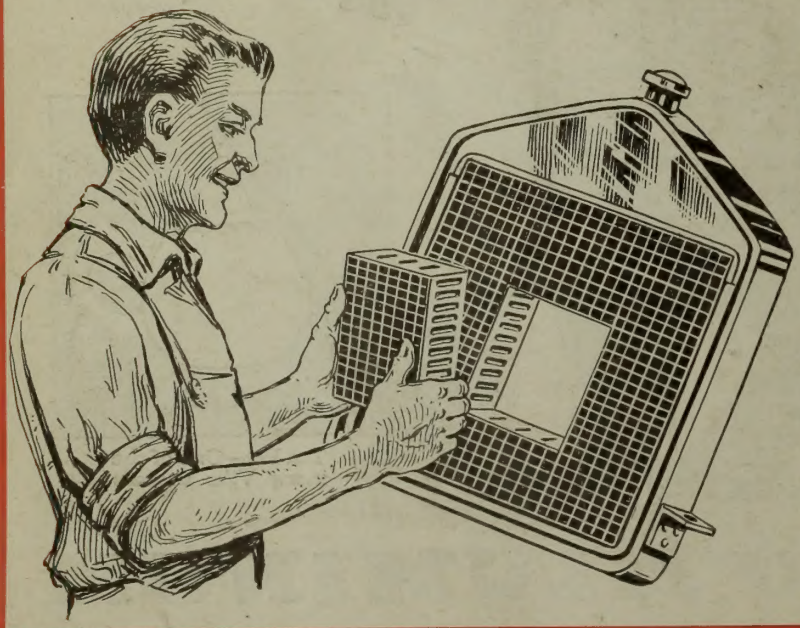
## The Popular ALUMINUM

# McKINNON RADIATORS

## *Really Cellular*

The very simplicity of the McKinnon Radiator is what appeals to the car owner. He knows that injuries to his radiator can be easily and quickly repaired. He knows that if an accident happens and his radiator is punctured he can still proceed on his way. He merely plugs up the leaking cells with wooden plugs, chewing gum, tire dough or any adhesive substance, and drives on to *your* repair shop.

You quickly cut out the damaged cells, fit in a new cell or two, and solder the outside edges, front and back. You can make these repairs without much delay.



*Simplicity of temporary repair and rapidity of permanent repair* are good selling points for McKinnon Radiators.

McKinnon Radiators are carefully tinned inside and out to prevent corrosion.

The sides are straight downward and corrugated, thus agitating the water and increasing the cooling power of the radiator.

Every dealer and garage man should carry our "really cellular" radiators.

The most serviceable radiator made.
